1999

PREFACE

The Fifth Population and Housing Census, initially due in March 1991, was conducted from 2-18 March 1998 throughout the country including Federally Administered Tribal Areas, Northern Areas and Azad Kashmir. During the first three days i.e., from 2nd to 4th March houselisting was carried out where in each house was physically numbered and registered as an inventory for conduct of the census from 5th to 18th March. The inventory served as a guideline for the supervisors besides ensuring complete coverage, during the census operation.

There were 3 separate questionnaires used for houselisting and collection of information on population and housing characteristics. Form-1 (Annex-A) was used for houselisting. Form-2 i.e., short form (Annex-B) was used for collection of information about all persons on core questions such as name, relationship with the head of the household, residential status, sex, age, marital status, nationality, religion, mother tongue, literacy, educational attainment and possession of national identity card, number of rooms, tenure, period when constructed, construction material of walls and roofs and source of drinking water-inside or outside, source of light, fuel used, type of kitchen, bathroom and toilet facilities and watching of TV and radio and reading of newspapers.

Form-2-A i.e., long form (Annex-C) was used for obtaining additional information about migration alongwith its reasons, field of education, economically active population, fertility, disability and inoculation of children against 5 diseases were asked on sample basis. About 8 percent single stage stratified sample was drawn with slightly more representation given to small provinces, districts and urban areas to make it a representative sample. Necessary definitions and concepts relating to the above mentioned questionnaires/forms are given at (Annex-D) for information of the readers.

The report mainly consists of three sections viz write up which carries general description of the district and some analysis of population and housing data, second section comprises tables while third section provides additional information about these sections in the form of annexures.

The write up section contains three main parts viz (i) general description about the district, (ii) broad analysis of population census data and (iii) broad analysis of housing census data. The general description covers location, boundary, area, geography, climate, rainfall, ethnicity, administrative set-up, agriculture, flora and fauna, health, industries, communication system, infra structure beside introducing the district. The broad analysis of population census data deal with population size, growth and distribution, other demographic and socio-economic characteristics.

The broad analysis of housing census data throw light on housing units/households, in terms of information on number of rooms, population density per housing unit and per room, tenure, period since constructed, construction material used on walls and roofs, source of drinking water, source of light, cooking fuel used in kitchen, availability of kitchen, toilet and bathroom facilities and assessment of media reach etc.

The report comprises 52 tables in all, 40 relate to population data, 12 to housing data. Of 52 tables 27 are based on complete count information while remaining on sample count information. Because of space problem the tables on occupation and industries are given in coded form. Therefore, after mentioning occupation and industries in coded form on the tables the detail occupational groups and industry divisions and district map are appended at Annex-E, F & G respectively.

Census taking was a gigantic task which involved the whole nation in one way or the other which is commendable as a team work. The role of Provincial Governments was very vital and with out their active cooperation, the operation would not have been successful. The meritorious services rendered by the field staff in addition to their own jobs, are also appreciable. The services rendered by the staff and officers of Federal Bureau of Statistics in training and data processing was helpful. I am personally indebted to the Federal Government who inculcated in me a sense of responsibility to conduct the census in March 1998, and releasing the data as early as possible for the benefits of all users.

The Armed Forces supported the Population and Housing Census work on hundred percent basis therefore. I extend my gratitude to their officers/staff involved in this operation.

I also thank the International Agencies like UNFPA, UNDP, UNICEF for their financial assistance in acquiring equipment & machinery and technical support in the form of consultancy services, training and study visits abroad.

Finally I thank the officers and staff members of the Population Census Organization for their relentless efforts to complete the census successfully.

Dated: 26th March, 1999

PART-I
GENERAL DESCRIPTION
OF THE DISTRICT

1 GENERAL DESCRIPTION OF THE DISTRICT

1.1 GEOGRAPHY

1.1.1 Name, Location, Boundary and Area

The beautiful valleys of Batagram district are located at latitude 34°-40 and longitude 73°-1, surrounded by Kohistan district to the north, Mansehra district to the east, Kala Dhaka tribal area to the south and Shangla district of Malakand division to the west. Its headquarters is at Batagram town at a distance of about 75 Kilometres from Mansehra on the Silk Highway. The district consists of Batagram and Allai sub-divisions.

1.1.2 Physical Features and Topography

The district is mostly mountainous with peaks rising above 4000 meters with thick forests. However, fertile plain areas exist in Nindhya, Tikri, Deshan, Batamori, Banna and Rashang valleys. The highest point is at Darwazai Sar (4689 meters). The next highest point is in the central part of the district, with an altitude of about 3000 meters. From the central mountains, various spurs and hills of lesser height run in various directions.

1.1.3 Rivers and Streams

Plenty of springs and streams flow through out the district providing clean water for drinking and irrigation. There are two main streams (locally called Khwar) i.e. the Nindhya Khwar and Allai Khwar. Nindhya Khwar originates in the mountains of hill and after flowing through the main villages joins Indus river at Thakot in the east. Branch nullahs, also join the said Khwar near Tamai village and Kass bridge called Sarori and Landai Khwars respectively. The other big stream, the Allai Khwar originates in Chaur Mountains and flowing through Biari, Nogram, Batecla, Banna and Taloos joins the Indus river at Kund in the east. The district covers an area of 350,172 acres (excluding the 930 square kilometres unsettled area of Chor pastures). Details of the land use are as below:

1.	Cultivated	61,340 acres
	i. Irrigated	8,363 acres
	ii. Un-irrigated	52,977 acres
2.	Forests	175,000 acres
3.	Un-cultivated	99,940 acres
4.	Ghairmumkin	13,892 acres

1.1.4 Climate

Climate in Batagram is moderate in summer and severe cold in winter. Upper parts of the district especially Shamlai, Hill, Bilandkot, of Batagram sub-division, and Sorgai, Rashang, Gangwal, Batecla and Pashto Batangi of Allai sub-division receive heavy snowfall. Chaur is snowbound and inaccessible eight months in the year.

Allai and Pashto Valleys: The climate of the area is determined by the high altitude. The climate of the tract generally falls in temperate. The south easterly monsoons play an important role in deciding the climatic conditions of the area. Summer rains usually start in the second half of June and continue for about three months. The hottest month is June.

During monsoons the temperature considerably comes down and weather becomes humid. The period from September to November is usually dry and this is the period when the visibility is clear. After November the snow starts falling which stays there up to April.

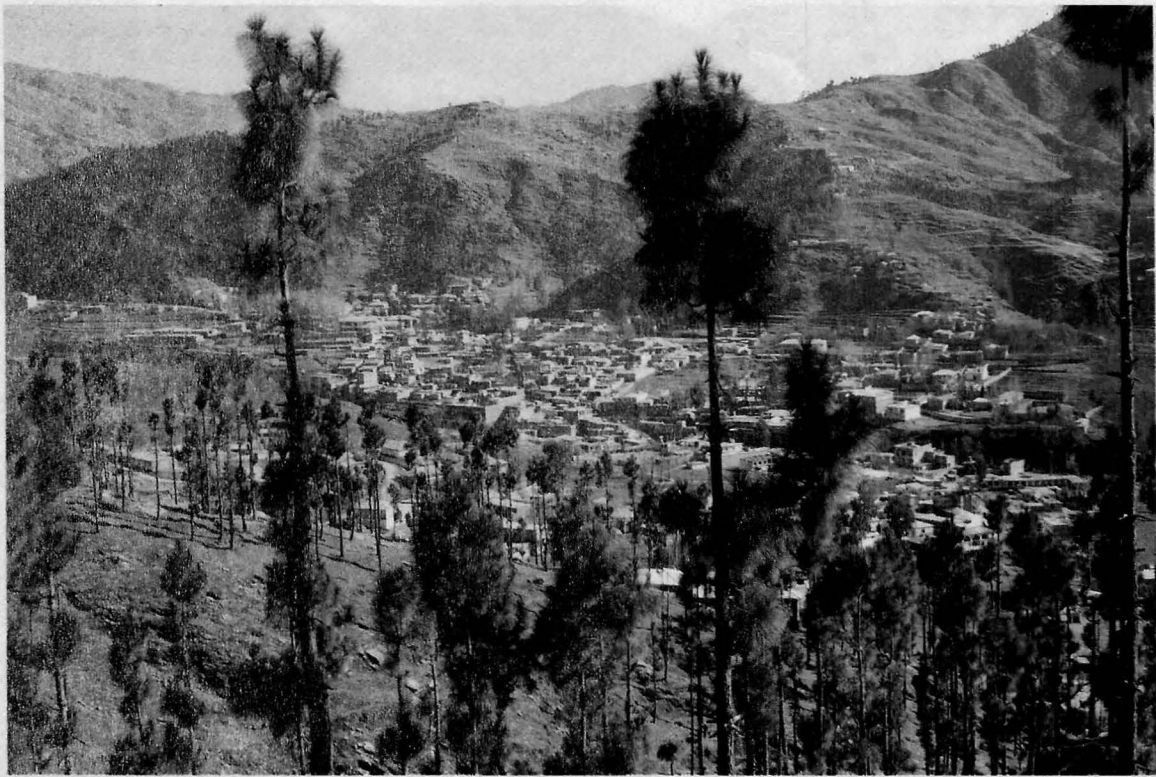

Hillan and Batagram Valleys: The vast variations in altitude, aspect, disposition of mountain ranges and prevailing wind currents in the tract exhibits the climate from subtropical at the base of the hills to alpine conditions prevailing in the higher-ups. In the foot hills the summers are more severe. The climate over a large tract is however mild and salubrious. Rainfall caused by the south-west monsoons, during July to mid-September constitute almost half of the annual average. There are marked seasons of rainfall, drought and snowfall. April to June in Chir tree zone are the hottest months with slight relief provided by occasional showers. October and November the post monsoons months bring about another drought spell. During winter, snowfall is heavy in higher altitudes and sometimes it descends to 900 meters but below 1500 meters it hardly stays for more than a few days. Detailed data on temperature and precipitation is not available directly for Batagram district. To give an idea a table, showing temperature and precipitation, recorded at Balakot in Mansehra district is given.

13. Jungli paiz	29. Mushkbala
14. Khatmi	30. Banafsha
15. Raisha Khatmi	31. Atropa Balladona
16. Gulkhaira	32. Artemisea maritima

The area has a variety of fauna comprising the following:

1. Leopard	9. Wild Goat
2. Leopard Cat	10. Porcupine
3. Black Bear	11. Flying Squirrel
4. Brown Bear	12. Monal
5. Brown Monkey	13. Pheasant
6. White Monkey	14. Pakhraj Pheasant
7. Jackal	15. Koklas Pheasant
8. Musk Deer	16. Other migratory birds

1.1.6 Forestry

There are rich forests in the area. Most of them belong to the local but are protected by government ban on tree cutting. The forests are looked after by the forest department, but timber smuggling has still been reported to be common. Below are details of the forests in the area.

Range	Land Category		Area in Acres	Species	
A. Batagram	i.	Guzara Forests	39780	i.	Blue Pine
	ii.	Resumed land	220	ii.	F/Spruce

1.1.7 Agriculture

The entire area of the district is fertile and gives good crops. However, most of the area is Barani and in case of sufficient rains in summer, a good maize crop is expected. Rice is an other major crop cultivated throughout the district wherever there are water channels. Batagram is also famous for rice crop and different qualities are grown. The major crops are Maize, Wheat and Rice. Maize is cultivated on 46,359 acres, wheat is cultivated on about 19,902 acres and Rice on 5,821 acres.

1.1.8 Livestock

People in Batagram like to keep Livestock. Their population in the district is as follows:

	<u>Livestock</u>	<u>Population</u>
1.	Buffalo	59,885
2.	Cattle	106,882
3.	Goat	128,420
4.	Sheep	24,482

The Assistant Director of Livestock and Dairy Development Department stationed at Manshra looks after the establishment in Batagram. There are 2 Civil Veterinary Hospitals, 6 Dispensaries and 4 Centres in the district, each with a Veterinary Officer or a Veterinary Assistant as incharge. Annually about 14000 animals of different species are treated against different diseases by the department. Vaccination is conducted by the department staff as well as Livestock Extension workers in different villages trained by the department with the financial assistance of Manshra Village Support Project.

Following are common Livestock diseases.

1. Buffalo/Cattle

- a) Haemorrhagic Septicaemia
- b) Black Quarter
- c) Foot & Mouth Disease
- d) Red Water or Babesiasts
- e) Worm Infestation

2. Sheep/Goat

- a) Pleuropneumonia
- b) Worms Infestation

3. Poultry

- a) New Castle Disease
- b) Coccidiosis
- c) Chronic Respiratory Disease.

Batagram has been identified as suitable for fisheries. A trout fishery has been developed at Allai. However, more investment in both the Private and Public Sector needs to be attracted.

1.1.9 Mining

The natural resources of the area offer a vast scope for investment and development. However, lacking proper advertisement and promotion, so far the area remains a backward region. Batagram has unexplored mineral resources and occurrence of precious and semi precious stones has been reported by the locals. Marble mines are under exploration at Thakot. So far search for precious and semi precious stones has been a field of individual adventures and a proper study has yet to be carried out.

1.1.10 Communication

A total of 132 kilometres metalled and 212 kilometres of Kacha roads are present in the valleys. The Karrakurram Highway or the Silk Highway enters the district at Sharkool Manshara and leaves at Thakot. The main roads are as below:

i.	Main Karrakurram Highway (portion in district Batagram).	50 kilometre
ii.	Batagram Shamlai	20 kilometre
iii.	Batagram Oghi	30 kilometre
iv.	Batagram Paimal Sharif	20 kilometre
v.	Chattar Kuzabanda	25 kilometre

Besides there are a number of Farm to Market Roads constructed under various Foreign Aided Projects.

A Digital Telephone Exchange with 500 connections started operation in July, 1994. The capacity is being increased to 1000, mobile phone services don't operate in this range. The television is only received via satellite. Surveys are being conducted to install television boosters to extend direct transmission to the area from PTV. There is one Post Office, 7 Sub Post Offices and 48 branch offices of postal department in the district.

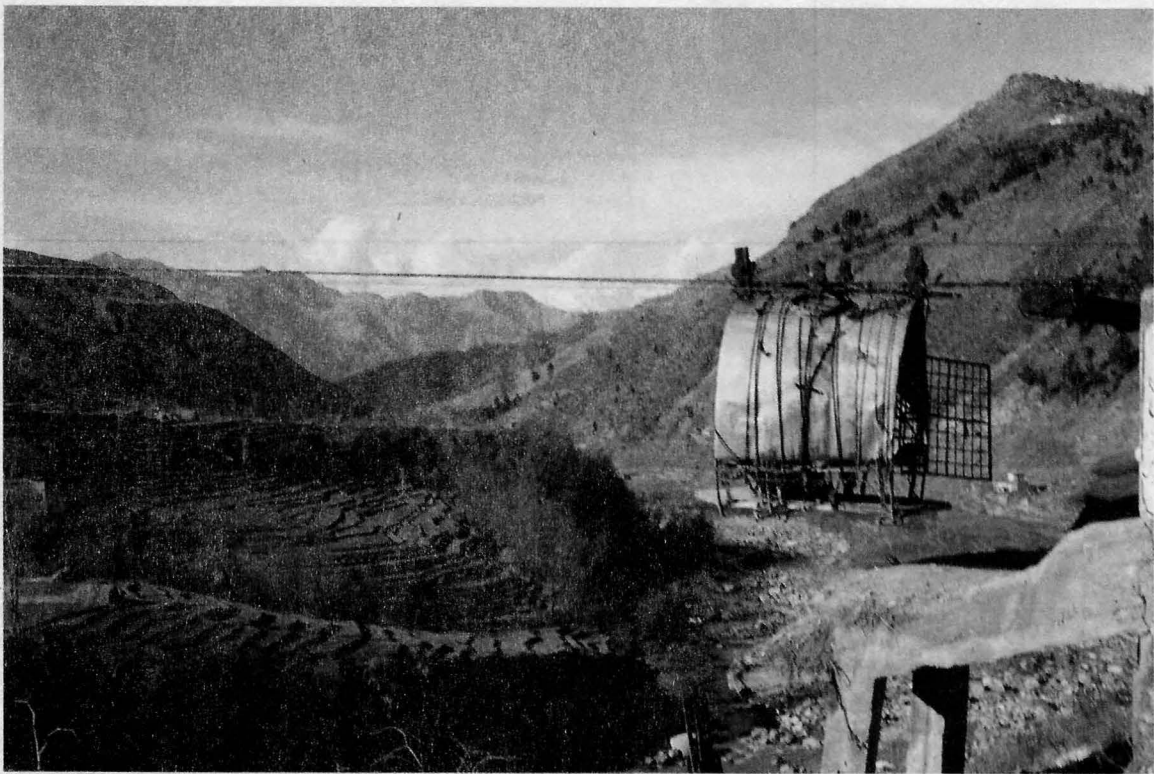

1.2 HISTORY, ETHNICITY/TRIBES AND CULTURE

1.2.1 History

The area had a tribal status till 1949, the people having retained their independence through stiff resistance to the British rule. The Government of Pakistan merged the parts covering areas of tribes at Tikri, Nindyar, Deshan, Hill and Thakot (the main valleys of Batagram sub-division at present). Allai was merged in 1971. Land settlement was carried out in areas of Batagram sub-division in 1966-67 and in Allai in 1976-77. The area was administratively a sub-division of Mansehra district till 1-7-1993 when it was upgraded to the status of an independent district with Batagram and Allai as its two sub-divisions.

KARAKORAM HIGHWAY SNAKING THROUGH BATAGRAM.

CHAIRLIFT IS A COMMON FORM OF TRANSPORT. THESE CHAIRLIFTS ARE LOCALLY MADE AND ARE THE ONLY MODE OF TRANSPORT FOR REACHING CERTAIN LOCALITIES.

1.2.2 Ethnicity/Tribes

Most of the inhabitants are Swatis. The major tribes in the area are:

- i) Swatics
- ii) Gujar
- iii) Akhunkhel
- iv) Mada Khel
- v) Syeds
- vi) Quresh

All people belong to Muslim Sunni school of thought. A few Hindu families consisting of about 150 persons also reside in Batagram and Shamlai villages. The Muslims are staunch followers of religion. Almost every man keeps a beard and reports to mosque for prayers five times a day. There are a number of religious schools in Batagram and students from all over the province come here for education.

1.2.3 Food

Since rice is mostly cultivated in the area, the people are very fond of it and eat it at least at dinner daily, with rice milk, curd and curry called '*Karhi*' are served. '*Karhi*' is prepared from buttermilk and being delicious is often prepared for guests. Maize bread with '*Karhi*' is also a favourite dish. Wild grown vegetables like '*Kuwandeer*', Moot, and '*Goochi*' are special and exported as well. The '*Goochi*', a type of mushroom, is very expensive and exported to foreign countries for use in preparation of medicines. *Desi Ghee*, Honey, Walnuts and '*Amloks*' are in abundance in Allai.

1.2.4 Dress

People wear the traditional Pakhtoon dress of Shalwar, Qamees, Turban and Chadder. The women wear Shalwar, Qamees and Chadder designed for female. In the past, due to the inaccessibility of the area and the poverty of the people, local woollen clothes were prepared to suit the harsh winters. With time and prosperity traditions have changed and people mostly wear swati and direy caps instead of turbans, and fine factory cloth is used for dresses.

1.2.5 Dwellings

Most of the houses are made of clay and are clustered in villages as well as scattered. A house generally consists of two or three rooms with a verandah. People live in a joint family system and live together in one house or adjacent houses. The quality and construction of the houses has improved with the prosperity brought by the locals working in the Middle Eastern countries.

Every cluster of houses has a '*Hujra*' where the male members daily meet, discuss local issues and spend time. It is a common place and used as guest room as well. *Huqqa* has been a unique part of the *Hujra*, which is prepared by the elder of the *Hujra* and all smoke it on their turn. The young spend winter nights in *Hujras* and arrange music programmes or dishes. It is an important part of Pukhtoon culture which is changing with the modern times as people have begun to prefer personal guest rooms.

1.2.6 Occupations

Generally the people are not literate, and earn living by farming as tenants on lands owned by *Khawanins*. However, surprisingly a significant number of locals are residing and working in Thailand, Malaysia and the Middle East and have brought prosperity to the area.

The major trading centers are at Banna, Thakot, Kuza Banda, Shamlai and Batagram. People operate small shops and hotels at these bazars. Transportation is also a common business. Suzuki and Datsun pickups and vans ubiquitously shuttle loads of passengers on the roads.

1.2.7 Culture, Customs and Traditions

The area has interesting marriage customs. Generally the marriages are held within own tribe but there is no ban on marriages out of the tribe. The marriages are arranged by the parents of the man and girl when they are at the age of 20 to 25 years. The engagement is held ceremoniously but *Rukhsati* (departure of girl) is made after one to two years. During this period the girl is not allowed to appear before her fiancé or his close relatives including his parents. After engagement the boy visits the girl family for "*Salami*" and takes along precious gifts for girl and her close relatives. He stays there for 10 to 15 days and is invited by the relatives as well. When he comes back, he is also given gifts like dresses, wrist watch and gold ring etc. During the period of engagement on the occasions of Eidain, mid Shabaan and Muharram, special gifts and rich items of food are sent to the parents of the girl and the boy also visits for "*Salami*". For the departure of the girl to the husband's house, a large procession called "*Junj*" carrying "*Doli*" visits the girl's house from the boy's family on the fixed date. The bride is brought in the "*Doli*" in a big procession and the young fire gun shots in the air for joy. In old days the father of the boy would send some necessary items of marriage i.e *Charpais* with use of animal skin etc., which were brought back with the "*Junj*". This was called *Prikoon*. However, the tradition has changed and proper dowry is now given by the father of

the girl. Immediately after the departure, the bridegroom in company of his friends visits the bride's house for *Salami* and "fooling" is done with him for amusement. On the way back naughty boys throw stones at the cavalcade especially the bridegroom. In the night the "*Nikah*" is held by a *Maulvi* in Islamic manners. The meal call "*Walima*" is served to the people after the marriage.

1.2.8 Deaths

The death ceremony is performed in a respectable manner. The villagers jointly prepare grave and the men and the women assemble in the house of the deceased for *taziat*. *Namaz-e-Janaza* is offered usually after *Zuhar* prayers attended by a large number of men. On the day of the death and the following day, the villagers serve *meals* to the family of the deceased and the guests. For the purpose committees have been constituted at the *Mohalla* level. The people visit the house of the deceased up to three days, especially at night times, offering *Fateha* (prayers for the deceased). On the third day of mourning, the women folk visit the house of the deceased with tea and foods for the guests. The women visit the graveyard and offer *Fateha*. On the fortieth day the family of the deceased give food to the poor and the relative as "*Khairat*". Those who can afford may build a cement or marble grave a year later

1.3 ADMINISTRATIVE SET-UP

1.3.1 Executive, Judiciary and Revenue System

The administrative set up is just like in any other settled districts in the country. The district is divided into two sub-divisions with headquarters at Batagram and Allai. Generally for every major administrative department there is a district incharge with a sub-divisional incharge in each sub-division. Batagram being a new district does not have fully established institutions and some of the departments are still keeping their headquarters at Mansehra. However, the major public dealing departments are fully operational.

Following are the major departments in the district:

1. District administration
2. Judiciary
3. Police
4. Education department
5. Health department
6. Construction & Works/Highway department
7. Agriculture department
8. Livestock department
9. WAPDA (Electric Power Company)
10. Telecommunication department
11. Forest department

1.3.2 District Administration

The Deputy Commissioner stationed at the headquarters supervises the activities of all departments in the district. His major concern is the law and order in the district as the District Magistrate and looks after the land records as the District Collector. He is incharge of the district record room and district treasury. He is assisted by two Assistant Commissioners one in each sub-division. The Assistant Commissioners decide revenue and criminal cases of a certain nature at the sub-division. They also look after the law and order situation.

Each sub-division has a revenue setup of a Tehsildar and Naib Tehsildar who have a number of Girdawars under each. Each Giradwar looks after the work of several Patwaries of his Girdawar circle. The Patwaries stay in their Patwar Halqas and maintain an updated land record of their Halqa.

1.3.3 Judicial System

In Batagram the judicial system is based on the Criminal Procedure Code and the Civil Procedure Code as in most of the country. The District and Sessions Judge assisted by a Senior Civil Judge both stationed at Batagram hear cases of civil and criminal nature. In criminal cases a public prosecutor contests the cases on behalf of the state. There is a well established Bar of lawyers at Batagram. Appeals from the Sessions Court are heard at the High Court Bench at Abbottabad. For undertrial prisoners a judicial lock up is available at Batagram.

However, the region being tribal in nature, still holds the traditions of Jirga system and many serious issues are mostly resolved by sittings of the elders of the area.

1.3.4 Police Department

The Police department is headed by the District Superintendent of Police. He supervises and controls the police force in maintaining law and order and in investigation of cases of criminal nature. The Police department operates under the Police Rules. The Superintendent Police is assisted by two sub-divisional Police Officers one in each sub-division. The whole district is covered by six Police Stations, three Police Posts and two Patrolling Posts. The Police department has an efficient wireless communication system which is extended to all the police stations and police vehicles.

The police is assisted by three platoons of Frontier Constabulary (FC), two stationed at Batagram and one at Allai. At Banna Allai there is a small fortress of the FC as well where one of the FC platoons is permanently stationed. The FC is a separate establishment and its District Head (DOFC) is headquartered at Oghi.

1.3.5 Medical Facilities

A District Health Officer supervises the medical facilities in the district. The district has one District Headquarters Hospital, 3 Rural Health Centers, 39 Basic Health Units and 2 Leprosy Centers. Unfortunately, except for the DHQ hospital Batagram and RHC Allai none of the other hospitals has a doctor. Private doctors also practice in the area and provide additional medical facilities. In the absence of road communications and inaccessibility of the houses the people resort to traditional treatments.

1.3.6 Educational Institutions

Education is supervised by three district head of departments depending on level and gender of education and students respectively:

1. District Education Officer (Male Primary)
2. District Education Officer (Female Primary)
3. District Education Officer (Middle and Secondary)

These officers are supported by a number of officials in various ranks to supervise the educational institutions. However, the setup is far from satisfactory. The Literacy rate is not very high. A number of schools have been developed without proper planning. Low enrolment, teacher absenteeism, and misuse of school buildings by the land owners are common problems. Mostly the institutions belong to government as detailed below, however now some good schools have been launched in the private sector particularly at the Batagram Headquarters.

Government Institution	Male	Female	Total
College (Yet to Start)	1	-	1
Higher Secondary School	1	-	1
High School	20	1	21
Middle School	25	9	34
Primary School	338	166	504
Mosque Schools	157	-	157
Maktab Schools	3	-	3
JICA Model School	1	-	1

The Degree College has just been completed and is expected to start functioning this year. It is hoped to cover the area from Kohistan to Batagram.

1.4 IMPORTANT HISTORICAL PLACES

1.4.1 Hydro Power Projects

The area has tremendous Hydro power potential as reported by the Sarhad Hydro Power Development Organization which has conducted studies together with the German experts. Allai Khwar presents an ideal site for a high head hydro power station of several hundred megawatt capacity. It has been reported to be one of the best sites in the world where electric power could be generated through High Head Falls on several spots in cascade. The Government of NWFP in collaboration with the German Government has completed the feasibility study of the project and implementation is expected in near future after settling of the sponsors and financing arrangement. The project is expected to open the region to major socio-economic activities.

1.4.2 Historical Places

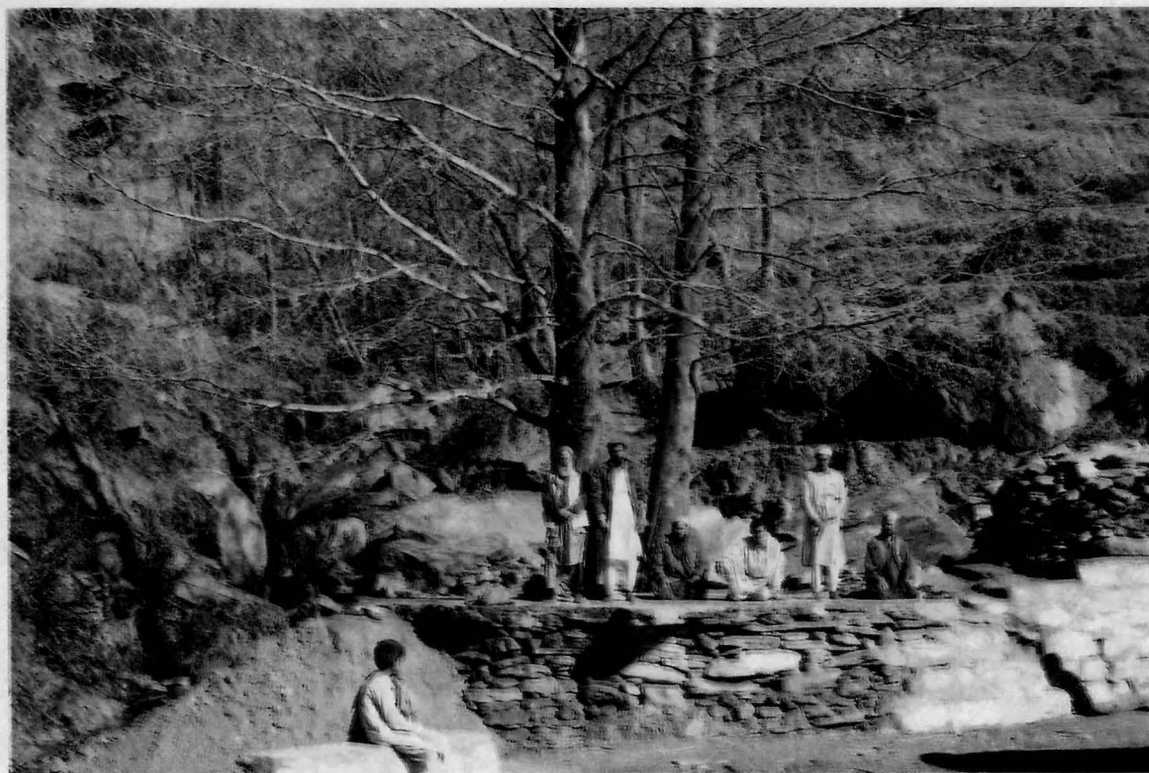

Archeological findings in the region has raised interest in the remains and sites at Batagram. However, such places have already been explored by black marketers and smugglers. The diggings at high altitude peaks are an evidence to such work. It has been reported that in search of artifacts and gold, ancient graves at these locations have been dismantled, particularly those which were not oriented towards "Kaaba" as the Muslim graves traditionally are. Chel, mountain peak at height of about 3000 meters, is known for Kanjaraye Gat "The Whore's Rock", where a females body part is engraved in a rock. There are various traditions about the name of the rock.

1.4.3 Chor Pastures

At altitudes of about 3000 meters located at Allai sub-division and bordering with the remote regions of Kohistan and Kaghan valley of Mansehra district, plane pastures of Chor are known for the extra ordinary beauty they reveal in the few months of summer when the snow melts. The area is inaccessible by road and needs a day or two of foot walk uphill to reach Chor. In summer the 930 square kilometres of the remote lush green plains unknown to the civilized world are a fairy tale land where one can only hear the melody of flutes played by sheperd boys.

PART - II
BROAD ANALYSIS OF
POPULATION CENSUS DATA

2 BROAD ANALYSIS OF POPULATION CENSUS DATA

2.1 POPULATION SIZE, GROWTH AND DISTRIBUTION

2.1.1 Population Size and Growth

The Population of Batagram district has increased nearly three & half times since 1961. It is 307 thousands in 1998 compared to 94 thousand in 1961, resulting in an enormous increase of 225 per cent since then. The Population of the district has surprisingly decreased during 1981-1998 intercensal period (17 years) by 9.39 percent at an average annual rate of 0.58 percent, whereas this rate was 8.21 percent during 1972-81 (8 years and 5 1/2 months) and 5.40 percent during 1961-72 (11 years and 7 1/2 months). The abnormal increase during 1972-81 and decrease during 1981-98 could be attributed to relative over/under enumeration in one census or the other. Out migration of population could also be another aspect of population decrease during 1981-98. Table 2.1 gives population and intercensal increase of the district since 1961. Figure 2.1 highlight the trend of population increase since, 1961.

TABLE 2.1 POPULATION AND INTERCENSAL INCREASE SINCE 1961

Description	1961	1972	1981	1998
Population (In Thousands)	94	174	339	307
Intercensal Increase (Percent)	-	84.42	94.89	-9.39
Cumulative Increase (Percent)	-	84.42	259.40	225.65
Average Annual Growth Rate (Percent)	-	5.40	8.21	-0.58

The population of the district is unevenly distributed among its tehsils, about 60 percent population is found in Batagram and 40 percent in Allai tehsil. The total area of the district is 1507 Sq. Kilometres, having a population density of 203.9 persons per Sq. Kilometres in March, 1998 which was 225.83 persons per Sq. Kilometres. in 1981.

2.1.2 Household Size

The average household size for the district is 6.6 persons in 1998 which was 7.8 persons in 1981. The population of the district also showed decline of 9.39 percent in 1998 as compared to 1981 census. No variation in average household size exist among tehsils.

2.1.3 Rural/Urban Distribution

The whole district is rural. There are twelve rural localities in the district having population of 5000 or more while sixty five rural localities have population between 2000-4999. The rest of the localities have less than 2000 inhabitants.

2.1.5 Mother Tongue

Pashto is the most common mother tongue of the population of the district as reported by 81.65 percent. Urdu, Punjabi, Saraiki and Sindhi are the other languages spoken as mother tongue whose percentages are 0.29, 0.02, 0.02 and 0.01 respectively. Table 2.3 gives the percentage of Population by mother tongue with rural/urban residence in 1998.

2.2 SEX, AGE AND MARITAL STATUS

2.2.1 Sex Ratio

The sex ratio of Batagram district in 1998 is 106.6 which has decreased from 134.5 in 1981. The sex ratios widely varies with different age groups. It is 104.49 for age group 0-4, rises up to 114.07 to age group 10-14. It again goes down to 93.46 for age group 25-29 from where it again moves up to 112.74 in age group 35-39. It again comes down to 97.77 at ages 45-49 and thereafter ranges from 105.54 to 140.95 in the advanced age groups.

2.2.2 Age Structure

According to 1998 Census the population aged below 15 is 47.90 percent of the total population which has increased from 45.97 percent in 1981. Out of these 15.98 percent are below 5 years of age including 1.95 percent infants. The Population of 65 years and above is 3.41 percent. The population of the working age groups i.e. 15 to 64 years thus comes to 48.69 percent giving an age dependency ratio of 105.38 percent, compared to 141.61 in 1981. This ratio is 109.01 and 101.64 percent for males and females respectively.

The adult population, 18 years and above, in the district is 47.62 percent, 46.62 for males and 48.70 for females. The Population eligible to vote, 21 years and above, is 40.08 percent. The percentage of population by important age groups and sex is given in table 2.4. Figure 2.2 shed some light on age sex structure of the district. It can be seen that the district has broad base population pyramid indicating high proportion of population under 5 which is 16.14 percent for females and 15.82 percent for males. The shape of the pyramid starts becoming narrower in the adult age group and went on to a thin peak, showing smaller proportion of population at advanced age groups.

2.2.3 Marital Status

All individuals aged 15 years and above enumerated in the 1998 Population Census were classified according to their marital status, namely, married, never married, widowed and divorced. Out of them 22.99 percent are never married, 72.70 currently married, 4.25 widowed and negligible percentage divorced. The never married amongst male is 29.30 percent much higher than females which is 16.38 percent. This differential is also reflected through the mean age at marriage which is 19.26 years for females compared to 24.30 years for males.

2.2.4 Females of Reproductive Ages by Marital Status

Out of total female population 42.53 percent is in reproductive ages, i.e., 15 to 49 years which is relatively higher as compared to 1981, when this percentage was 36.59. Among the females in reproductive ages, 19.57 percent are never married, 78.84 currently married, 1.50 widowed and 0.09 divorced. About twelve percent of the ever married females of reproductive age group are found without any child, 26.26 percent have 6 and more children followed by 14 percent who have 2-4 children. While 9 percent ever married females have reported 1 child.

2.2.5 Disabled Persons

The disabled persons constitute 1.36 percent of the total population of the district. Among them 1.81 percent are females and 0.88 males. Amongst the disabled the percentage of crippled is highest i.e. 57.07 for males and 44.32 for females. The deaf and mute persons are 0.38 percent for both sexes, 9.58 for males and 5.73 for females. A little less than 16 percent i.e. 15.77 percent of the disabled population have reported some other disability.

2.3 LITERACY AND EDUCATIONAL ATTAINMENT

2.3.1 Literacy

The literacy ratio of the district among the population aged 10 years and above is 18.31 percent. It has increased by 15.43 percentage points since 1981 when it was only 2.88 percent. The male literacy ratio is higher i.e. 29.40 compared to 6.48 for females. Table 2.5 gives literacy ratio by sex for 1981 and 1998. Figure 2.3 shows the literacy ratios by sex, 1981 & 1998

2.3.4 Level of Education

Out of the total educated persons 28.66 percent have passed primary, 16.83 middle and 18.77 matriculation. After matriculation the percentage falls to 4.04 for intermediate, 1.71 for graduates and 0.87 for post graduates

2.4 MIGRATION

2.4.1 Migration

Migration data covers movement of population from one district to another in the same province and from one province to another. It does not cover persons who changed their place of residence within their own district in view of the design of the questionnaire.

2.4.2 In-Migrants

The total in-migrants are 3816 (i.e. 1.24 percent of the total Population.) The male and female in-migrants are 61.84 and 38.16 percent respectively. The persons who have migrated into the district during the last 5 years i.e. after March, 1993 are 32.42 percent, while 17.51 percent had migrated before 5 years but after 1988. The remaining 34.09 percent have migrated 10 years earlier. Out of total in-migrants 12.89 percent migrated into the district as a result of marriage, 25.63 percent moved with head, 0.24 percent due to education and 21.70 percent due to business. Table 2.8 provides the percentage of in-migrants of the district.

2.5 ECONOMIC CHARACTERISTICS

2.5.1 Labour force

The labour force of the Batagram district among the population aged 10 years and above comprises about 69 thousands souls (98 percent males and 2 percent females). The remaining 77.53 percent economically inactive population consists of 33.79 percent children below 10 years, 33.81 percent domestic workers including 65.25 percent housewives amongst the total females and 4.31 percent male workers amongst total males. The students share 5.84 percent while all other categories contribute 4.10 percent in the total economically inactive population of the district.

The labour force participation rate as percentage of total labour force to the population aged 10 years and above is computed at 33.93 percent for the district. There is significant difference in the participation rates between male and female labour force at 64.45 percent for males compared to only 0.01 percent for female

Since there is no urban area in the district the entire labour force is concentrated in the rural parts and the statistics computed for rural areas exactly represents the district pattern. Table 2.9 gives the percentage distribution of population by economic category.

2.5.2 Un-Employment

The unemployment rate i.e. 40.95 percent, as percentage of un-employed labour force (i.e. looking for work and laid off) to the total labour force reflects a very high degree of un-employment in the district which is still higher for males i.e. 41.77 percent compared to females at nominal rate of 0.73 percent. Again, the un-employment rates computed for rural parts represent exactly the district pattern since there is no urban area in the district.

2.5.3 Employed Population by Occupation

About sixty percent of the total labour force is in the occupation group "Skilled Agricultural and Fishery Workers" and the next higher occupation group comprising 10.93 percent is of "Service Workers and Shop and Market Sales Workers" followed by 9.13 percent, "Elementary Occupations".

2.5.4 Employed Population by Industry

Most of the working population, i.e., 54.61 percent, is engaged in "Agriculture, Forestry, Hunting and Fishing" remaining 45.39 percent in non-agricultural industries. Out of those in non-agricultural industries 14.38 percent are engaged in "Community, Social and Personal Services" followed by 5.70 percent engaged in "Whole Sale and Retail Trade and Restaurants and Hotels". The persons engaged in "Transport, Storage and Communication" are 2.35 percent of the total working population.

2.5.5 Employed Population by Employment Status

The percentage of working or employed population to population 10 years and above is 20.04 which is 69.69 of the total labour force out of this 55.38 percent are self-employed, 19.33 working as employees (Government, Autonomous and Private) and 17.15 unpaid family helper. Table 2.10 gives percentage of working population by employment status.

2.6 IMMUNIZATION

The question about immunization has been included in the 1998 population census for the first time to evaluate the vaccination programme launched by the Govt. from time to time. It is encouraging to note that 52.54 percent of the children under 10 years age have reported as vaccinated, while 28.58 percent reported as not vaccinated leaving the rest i.e. 18.88 percent reported as not known. The percentage variation of vaccinated between male and females is close at 52.95 for male and 52.10 for female babies. Table 2.11 gives detail of immunization by sex and area.

2.7 NATIONAL IDENTITY CARD

The question about National Identity Card was asked in the 1998 population census for the first time to see the coverage element of I.D. Cards. The question about NIC was asked from population of 18 years and above. According to the responses to the question it was found that 62.05 percent of population aged 18 years and above have obtained NIC. It was 75.78 percent for males and 48.04 percent for females. Table 2.12 gives necessary details by sex and area.

DEFINITIONS AND CONCEPTS

Urban Areas

All localities which were either metropolitan corporation, municipal corporation, municipal committee, town committee or cantonment at the time of the census, were treated as urban.

Household

A household means a group of persons living together who have collective arrangement for eating. A person living alone was also considered to constitute a household. The distinguishing characteristic of a household is its common cooking arrangement.

Housing Unit

A housing unit means a separate and independent place of abode, inhabited by one household and, if vacant, meant for habitation by one household. It does not necessarily mean a separate building. A building may have one or more housing units. Furthermore, any place not intended for habitation but occupied by a household at the time of census was also treated as a housing unit.

Room

A room is defined as a space in a housing unit having a roof and walls from roof to floor. This includes sleeping, dining, drawing, study, children's and servant's rooms but excludes kitchen, bathroom, latrine, store, balcony, porch and motor garage.

Age

Age is recorded as of the last birthday.

Marital Status

Marital status has been classified into never-married, married, widowed and divorced. Never-married applies to persons who have never been married. Married includes all persons who are at present married and living as husband and wife as well as those married persons living apart but having a living wife/husband. Those couples, whose marriage (Nikah) had been solemnized but giving away ceremony had not taken place, were also treated as married. Widowed applies to a person whose husband or wife was dead but who had not married again. Divorced applies to both divorcer and divorcee, if not remarried.

Religion

Religion is recorded and tabulated as informed by the respondents.

Literate

A person who can read a newspaper and write a simple letter, in any language, is treated as literate.

Field of Education

(a) General Education

It includes educational programmes of primary, middle, matriculation, intermediate and bachelor's degree in arts or science.

(b) Technical/Engineering

It includes engineering educational programmes in the fields of electrical, electronic, industrial, metallurgical, mining, mechanical, agricultural, forestry, chemical, petrochemical, aviation, nautical, etc. It also includes programmes in survey, drafting and designing, all types of engineering technician programmes, all types of trade, craft and industrial programmes. Architectural and town planning programmes are also included.

(c) Medicine/Tib

It includes educational programmes of medical diagnostic and treatment techniques, medicine and surgery, medical X-ray techniques, dentistry, pharmacy, etc.

(d) Health

It includes educational programmes of public health, nursing, mid-wifery and other health related auxiliary programmes.

(e) Commerce/Business Administration

It includes educational programmes of typing, shorthand, clerical, secretarial, operation of office machines, book keeping, accountancy, electric data processing, business administration, marketing and sales, financial management and investment analysis, public administration, institutional administration, personal administration and other commercial, business and public administration programmes.

(f) Teaching

It includes all educational programmes which enable the teachers to teach all types of subjects to all categories of students. It includes education science programmes.

(g) Agriculture/Forestry/Animal Husbandry

It includes educational programmes of agriculture, forestry and fishing including general agriculture, animal husbandry, horticulture and gardening, crop husbandry, agricultural technology, food sciences and technology, veterinary, medicine, fishery science and technology, etc.

(h) Law

It includes educational programmes in jurisprudence, history of law, international law, labour law and maritime law and other laws.

Economically Active Population

The economically active persons means, persons of 10 years and above ages, of either sex, who are working for pay or profit and those not working but looking for work including laid off.

The Crude Activity Rate means the percentage persons economically active to total population while Refined Activity Rate is the proportion of economically active persons in population exposed to the risk of entering the economic life.

In collection of the data on economic activities "usual status" approach has been adopted as against the approach of labour force surveys, where data is usually collected on "current status" basis.

Occupation

Occupation means the main job, profession, trade or kind/type of work usually performed by a person. In case of more than one occupation, the principal occupation is recorded. The principal occupation is that in which the person works most of the time.

Industry

Industry means the activity of the organization, or business in which a person usually works.

Employment Status

(a) Self-employed

Self-employed is a person who operates his own farm, business, or industry or practices a profession but does not employ any hired help, paid either in cash or kind.

(b) Government employee

A Government employee is a person who works in any Government/Semi-Government Organization for pay.

(c) Private employee

A Private employee is a person who works, for pay, for person/farm/shop/firm/organization/office which is not run or managed by the Federal/Provincial/Local Government/Autonomous body.

(d) Employer

Employer means a person who operates his own farm, business or industry or practices a profession and who employs one or more persons for the purpose.

(e) Un-paid Family Helper

Un-paid family helper means a person who works, without pay or profit, on family farm, business or industry.

Migrant Population

The migrant population mean those who have moved out their residence from one administrative district to another administrative district. It excludes population who have moved within a district.

Disability

Disability refers to the physical and organic handicap of a person due to natural deformity or deficient functioning of any limb resulting from accident, disease, etc. For census purposes it refers to visible malfunctioning of any organ of the body. It includes blind, deaf and mute, crippled, mentally retarded and insane.
