PREFACE

The Fifth Population and Housing Census, initially due in March 1991, was conducted from 2-18 March 1998 throughout the country including Federally Administered Tribal Areas, Northern Areas and Azad Kashmir. During the first three days i.e., from 2nd to 4th March houselisting was carried out where in each house was physically numbered and registered as an inventory for conduct of the census from 5th to 18th March. The inventory served as a guideline for the supervisors besides ensuring complete coverage, during the census operation.

There were 3 separate questionnaires used for houselisting and collection of information on population and housing characteristics. Form-1 (Annex-A) was used for houselisting. Form-2 i.e., short form (Annex-B) was used for collection of information about all persons on core questions such as name, relationship with the head of the household, residential status, sex, age, marital status, nationality, religion, mother tongue, literacy, educational attainment and possession of national identity card, number of rooms, tenure, period when constructed, construction material of walls and roofs and source of drinking water-inside or outside, source of light, fuel used, type of kitchen, bathroom and toilet facilities and watching of TV and radio and reading of newspapers.

Form-2-A i.e., long form (Annex-C) was used for obtaining additional information about migration alongwith its reasons, field of education, economically active population, fertility, disability and inoculation of children against 5 diseases were asked on sample basis. About 8 percent single stage stratified sample was drawn with slightly more representation given to small provinces, districts and urban areas to make it a representative sample. Necessary definitions and concepts relating to the above mentioned questionnaires/forms are given at (Annex-D) for information of the readers.

The report mainly consists of three sections viz write up which carries general description of the district and some analysis of population and housing data, second section comprises tables while third section provides additional information about these sections in the form of annexures.

The write up section contains three main parts viz (i) general description about the district, (ii) broad analysis of population census data and (iii) broad analysis of housing census data. The general description covers location, boundary, area, geography, climate, rainfall, ethnicity, administrative set-up, agriculture, flora and fauna, health, industries, communication system, infra structure beside introducing the district. The broad analysis of population census data deal with population size, growth and distribution, other demographic and socio-economic characteristics.

The broad analysis of housing census data throw light on housing units/households, in terms of information on number of rooms, population density per housing unit and per room, tenure, period since constructed, construction material used on walls and roofs, source of drinking water, source of lighting, cooking fuel used in kitchen, availability of kitchen, toilet and bathroom facilities and assessment of media reach etc.

The report comprises 52 tables in all, 40 relate to population data, 12 to housing data. Of 52 tables 27 are based on complete count information while remaining on sample count information. Because of space problem the tables on occupation and industries are given in coded form. Therefore, after mentioning occupation and industries in coded form on the tables the detail occupational groups and industry divisions and district map are appended at Annex-E, F & G respectively.

Census taking was a gigantic task which involved the whole nation in one way or the other which is commendable as a team work. The role of Provincial Governments was very vital and with out their active cooperation, the operation would not have been successful. The meritorious services rendered by the field staff in addition to their own jobs, are also appreciable. The services rendered by the staff and officers of Federal Bureau of Statistics in training and data processing was helpful. I am personally indebted to the Federal Government who inculcated in me a sense of responsibility to conduct the census in March 1998, and releasing the data as early as possible for the benefits of all users.

The Armed Forces supported the Population and Housing Census work on hundred percent basis therefore, I extend my gratitude to their officers/staff involved in this operation.

I also thank the International Agencies like UNFPA, UNDP, UNICEF for their financial assistance in acquiring equipment & machinery and technical support in the form of consultancy services, training and study visits abroad.

Finally I thank the officers and staff members of the Population Census Organization for their relentless efforts to complete the census successfully.

PART - I
GENERAL DESCRIPTION
OF THE DISTRICT

1 GENERAL DESCRIPTION OF THE DISTRICT

1.1 GEOGRAPHY

1.1.1 Name, Location, Boundary and Area

Abbottabad is named after its founder James Abbott, Hazara's first British Deputy Commissioner. It is at a distance of 121 kilometres from Islamabad via Hasan Abdal. It is 1220 meters above sea level and is situated at the crossroads of most of the areas of tourist interest in Pakistan like Nathiagali, Murree, Thandiani, Kaghan valley, Skardu, Gilgit and Khunjrab. Abbottabad is extremely beautiful, charming and pleasant district located at the base of Himalayan mountain.

The district lies from 33° 50' to 34° 23' north latitudes and 72° 35' to 73° 31' east longitudes. It is bounded on the north by Mansehra district, on the east by Muzaffarabad district of Azad Jammu and Kashmir and Rawalpindi district, on the south by Rawalpindi and Haripur districts and on the west also by Haripur district. The total area of the district is 1967 square kilometres.

1.1.2 Physical Features/Topography

The topography of the district is dominated by the mountains and hills. The mountains of Abbottabad district are part of lesser Himalayas. One of its range flanks the right bank of Kunhar and Jhelum rivers and enters Abbottabad district from north. It occupies the district as Dungagali range and its off shoots, which vary in elevation from about 2500 to 2700 meters. From this range many spurs project on either side. The spurs projected towards the west are longer with valleys lying in between. However, the height of country in the west varies between 600 to 1500 meters.

The space between the mountains is filled by low tracts. Along the northern boundary of the district a series of low lying hills form barrier to the Mangal tract in Mansehra district. To the south of these hills lie the "Orash" or "Rash" plain with an area about 6 square kilometres. It looks as if it had once been a great lake. The centre of this plain is still marshy but most of it is drained now and excellent maize and potatoes crops are grown. Another such tract is "Dhan" which is an elevated basin enclosed by Nara hills. Other small cultivable tracts are along the valleys of rivers and streams. The plain tract of Dor valley to the south is one of them which merges with the Haripur plain in the south. On the Dhund branch of upper Haro lies the Lora tract.

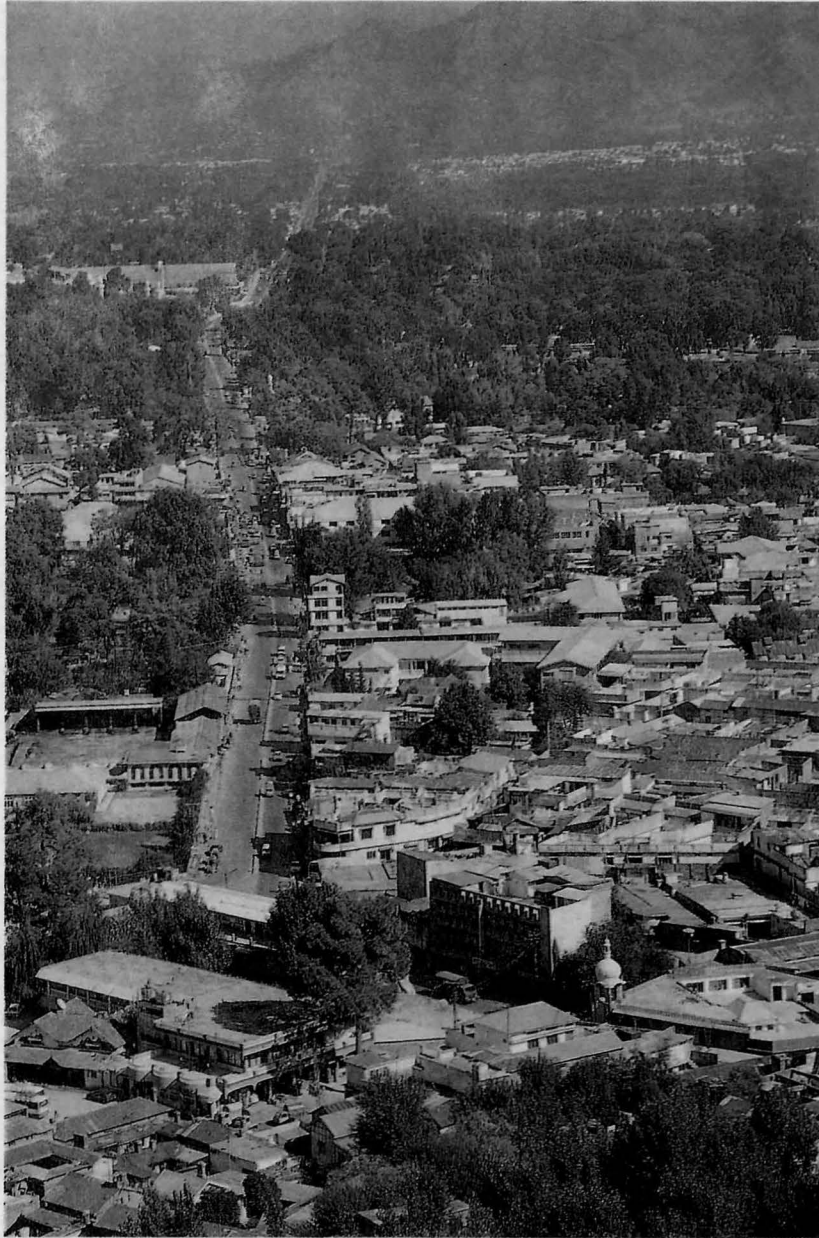

1.1.3 Rivers and Streams

The important streams of the district are Haro, Dor and Siran. Besides these Kunhar river flows along the north eastern boundary of the district and joins the Jhelum in the east. The Jhelum river flows along the eastern boundary for about 50 kilometres. The Haro originates at the southern end of Dungagali range and flows through the district as two separate streams towards southwest. The northern/upper stream is known as Karlal and the southern/lower stream as Dhund. The Dor river rises at the northern end of Dungagali range and flows in the centre of the district in a south western direction. The Siran river enters the district from the north western corner and flows southwards along the western boundary for a short distance and finally leaves the district near Kachhi village. These rivers have innumerable tributaries, some with a permanent flow (*Kathas*), other with scanty flow (*Kassies*).

The general slope of the district is from northeast to southwest, however, some smaller streams flowing down the north and north eastern slopes join the Kunhar and Jhelum rivers.

1.1.4 Climate

Due to mountainous character of the district the nature of the climate is such that the summer season starts a little later and is comparatively less severe. The temperature begins to show higher record from May and it lasts till June. In June the mean maximum and minimum temperature has been recorded as 32.41°C and 19.67°C respectively. On account of being cool hilly area, Abbottabad is a summer resort. On the other hand the winter season is severe and heavy snow-fall takes place. The months of December, January and February are extremely cold. In January, the coldest month, mean maximum and minimum temperatures has been recorded as 12.56°C and 1.77°C respectively. The rainfall record is quite high. The average annual rainfall reaches to 1366.16 mm. The maximum rainfall is received in the month of August (261.27 mm) closely followed by July (258.26 mm). Moreover the rainfall received during the months of February, March and April also show a high amount. However the average rainfall received during the summer season is more than that of winter. Other noteworthy phenomena is high content of relative humidity in the atmosphere in Abbottabad which shows a high record throughout the year and even June is not very dry month. The mean maximum and minimum temperatures, precipitation and relative humidity recorded at Kakul station in the district is given in the following table 1.1:-

1.3.1 Industry

A few small scale industries are available which are still in developing stage. A small industrial estate have been established at Mandian five kilometres away from Abbottabad city, where cement, wood work, PVC pipes ,wires, cement pipes are prepared. The main occupation of women is house keeping. In the hills the women fully look after the cattle, cut and carry fuel wood and help their men in the field. Remarkable industry is not available here.

1.3.2 Communication

Abbottabad generally consists of hilly and mountainous terrain with unsatisfactory communication facilities. However the main city and towns are linked with metalled road. Since the district is mountainous, rail communication is only up to Havelian which is connected with Rawalpindi (Taxila). Abbottabad is linked with world through a modern digital telephone exchange. Some other telephone exchange are also working in various parts of the district i.e. Sherwan, Kutiala, Jarral, Nawanshehr, Dhamtour, Qalandarabad, Lora, Takkia-Sheikhan, Bagnotar and Bakot. Telecommunication facilities are also available. One radio station established at Jhangi is serving the people of this area. A few newspapers, "Daily Shamal, Daily Aaj, Daily Markaz etc." are published here.

1.3.3 Trade and Trade Centres

Although Abbottabad is a district as well as divisional headquarter, but Havelian is the trade centre due to railway station, connected with Punjab/Peshawar and other part of the country through railway line. The government has established an export promotion bureau office headed by an Assistant Director to promote the trade in the district.

1.3.4 Mining

The mountains of the Abbottabad district are rich in various minerals. At present soapstone and magnasite dug out from Sherwan area mines while the phosphate stone snapped from Kakul and Tarnawi. The phosphate mines run under the management of Pakistan Industrial Development Corporation.

1.4 HISTORY, ETHNICITY/TRIBES AND CULTURE

1.4.1 History

During 13th Century A.D. Jadoon Pathans pushed out Turks from Rash area (Dhamtour). The karlal and the dhund tribes snatched independence in Galliat area from ghakkars.

The Sikh Rule in Abbottabad began in 1818 when Hashim Khan, Turk of Manakrai, following an internal quarrel, invited Makban Singh, the Governor of Rawalpindi to invade Abbottabad district. He built a fort at Sarai Saleh and was ultimately slain by the locals. Later, Hari Singh, Governor of Kashmir, ruled Abbottabad district upto 1837. There was general uprising against Sikh Raj and the local chiefs assembled at Haripur and elected Syed Akbar Shah of Sithana, as their chief. In 1846 Raja Ghulab Singh exchanged the territory of Hazara division including Abbottabad district, in return of Jammu with the British Government. Accordingly, Abbottabad district was annexed with the Punjab under British rule. Mr. Abbott founded the city of Abbottabad in 1853 and became the first Deputy Commissioner. Hazara, Abbottabad was then part of it.

During Sikh Rule, the headquarter of the district was at Mansehra and Haripur. In 1874, Abbottabad tehsil was made up out of southern portion of Mansehra and eastern portion of the Haripur tehsils. In 1893, Barian, Hill Cantonment was transferred to Abbottabad district, but in 1901, on the formation of NWFP, it was restored to Rawalpindi and Punjab, and the rest of the district formed part of the new province. In 1947 the district of Abbottabad became part of Pakistan. In 1950 a general unrest arose in the area of Upper Tanawal against the Nawab of Amb. Consequently the administration of Upper Tanawal area was taken over by the Provincial Government. A regular revenue settlement was carried out for the purpose of administration, the area lying around Darband, was merged with Haripur tehsil.

In October 1976, Mansehra was given the status of a full fledged district which consisted of Mansehra and Batagram tehsils. Consequently in July 1991 Haripur tehsil was separated from Abbottabad and made a district. Thus only the old tehsil of Abbottabad remained which was declared as Abbottabad district.

1.4.2 Ethnicity and Tribes

DEFINITIONS AND CONCEPTS

Urban Areas

All localities which were either metropolitan corporation, municipal corporation, municipal committee, town committee or cantonment at the time of the census, were treated as urban.

Household

A household means a group of persons living together who have collective arrangement for eating. A person living alone was also considered to constitute a household. The distinguishing characteristic of a household is its common cooking arrangement.

Housing Unit

A housing unit means a separate and independent place of abode, inhabited by one household and, if vacant, meant for habitation by one household. It does not necessarily mean a separate building. A building may have one or more housing units. Furthermore, any place not intended for habitation but occupied by a household at the time of census was also treated as a housing unit.

Room

A room is defined as a space in a housing unit having a roof and walls from roof to floor. This includes sleeping, dining, drawing, study, children's and servant's rooms but excludes kitchen, bathroom, latrine, store, balcony, porch and motor garage.

Age

Age is recorded as of the last birthday.

Marital Status

Marital status has been classified into never-married, married, widowed and divorced. Never-married applies to persons who have never been married. Married includes all persons who are at present married and living as husband and wife as well as those married persons living apart but having a living wife/husband. Those couples, whose marriage (Nikah) had been solemnized but giving away ceremony had not taken place, were also treated as married. Widowed applies to a person whose husband or wife was dead but who had not married again. Divorced applies to both divorcer and divorcee, if not remarried.

Religion

Religion is recorded and tabulated as informed by the respondents.

Literate

A person who can read a newspaper and write a simple letter, in any language, is treated as literate.

Field of Education

(a) General Education

It includes educational programmes of primary, middle, matriculation, intermediate and bachelor's degree in arts or science.

(b) Technical/Engineering
