# PREFACE

The Fifth Population and Housing Census, initially due in March 1991, was conducted from 2-18 March 1998 throughout the country including Federally Administered Tribal Areas, Northern Areas and Azad Kashmir. During the first three days i.e., from 2nd to 4th March houselisting was carried out where in each house was physically numbered and registered as an inventory for conduct of the census from 5th to 18th March. The inventory served as a guideline for the supervisors besides ensuring complete coverage, during the census operation.

There were 3 separate questionnaires used for houselisting and collection of information on population and housing characteristics. Form-1 (Annex-A) was used for houselisting. Form-2 i.e., short form (Annex-B) was used for collection of information about all persons on core questions such as name, relationship with the head of the household, residential status, sex, age, marital status, nationality, religion, mother tongue, literacy, educational attainment and possession of national identity card, number of rooms, tenure, period when constructed, construction material of walls and roofs and source of drinking water-inside or outside, source of light, fuel used, type of kitchen, bathroom and toilet facilities and watching of TV and radio and reading of newspapers.

Form-2-A i.e., long form (Annex-C) was used for obtaining additional information about migration alongwith its reasons, field of education, economically active population, fertility, disability and inoculation of children against 5 diseases were asked on sample basis. About 8 percent single stage stratified sample was drawn with slightly more representation given to small provinces, districts and urban areas to make it a representative sample. Necessary definitions and concepts relating to the above mentioned questionnaires/forms are given at (Annex-D) for information of the readers.

The report mainly consists of three sections viz write up which carries general description of the district and some analysis of population and housing data, second section comprises tables while third section provides additional information about these sections in the form of annexures.

The write up section contains three main parts viz (i) general description about the district, (ii) broad analysis of population census data and (iii) broad analysis of housing census data. The general description covers location, boundary, area, geography, climate, rainfall, ethnicity, administrative set-up, agriculture, flora and fauna, health, industries, communication system, infra structure beside introducing the district. The broad analysis of population census data deal with population size, growth and distribution, other demographic and socio-economic characteristics.

The broad analysis of housing census data throw light on housing units/households, in terms of information on number of rooms, population density per housing unit and per room, tenure, period since constructed, construction material used on walls and roofs, source of drinking water, source of lighting, cooking fuel used in kitchen, availability of kitchen, toilet and bathroom facilities and assessment of media reach etc.

The report comprises 52 tables in all, 40 relate to population data, 12 to housing data. Of 52 tables 27 are based on complete count information while remaining on sample count information. Because of space problem the tables on occupation and industries are given in coded form. Therefore, after mentioning occupation and industries in coded form on the tables the detail occupational groups and industry divisions and district map are appended at Annex-E, F & G respectively.

Census taking was a gigantic task which involved the whole nation in one way or the other which is commendable as a team work. The role of Provincial Governments was very vital and with out their active cooperation, the operation would not have been successful. The meritorious services rendered by the field staff in addition to their own jobs, are also appreciable. The services rendered by the staff and officers of Federal Bureau of Statistics in training and data processing was helpful. I am personally indebted to the Federal Government who inculcated in me a sense of responsibility to conduct the census in March 1998, and releasing the data as early as possible for the benefits of all users.

The Armed Forces supported the Population and Housing Census work on hundred percent basis therefore, I extend my gratitude to their officers/staff involved in this operation.

I also thank the International Agencies like UNFPA, UNDP, UNICEF for their financial assistance in acquiring equipment & machinery and technical support in the form of consultancy services, training and study visits abroad.

Finally I thank the officers and staff members of the Population Census Organization for their relentless efforts to complete the census successfully.

# GENERAL DESCRIPTION OF THE DISTRICT

# 1. GENERAL DESCRIPTION OF THE DISTRICT

## 1.1 GEOGRAPHY

### 1.1.1 Name, Location, Boundary and Area

In ancient and medieval times the Kurram-Bannu route was one of the routes used by the invaders and colonizers from the north west to reach India. The Akra mounds, which are 11 kilometers from Bannu, probably represent the ruins of a regional capital of the Bactrian or "Indo-Greek" rulers of the 2nd century B.C. to 1st century A.D. There are different explanations as to the derivation of the name "Bannu". The Aryans who occupied the land around 2500 B.C, had mentioned it as "wano" in their book Rigvaid. The Bannuchis who claims to have descended from Banno, the wife of Shitak, the conqueror of the area, named it as such after the mother of conquering tribe. The Chinese pilgrims Fa-Hian and Hiuen Tsang, mentioned in their writings that the Bannu valley was known as "Pona" which afterwards changed to Bannu.

Bannu was traversed by the raids of Mahmud Ghaznavi in the early 11th century A.D., and in the century of chaos which followed, was colonized by the Afghan tribe called Bannudi or Bannuwal, who still occupy part of the district to which the name was given. Taimur is said to have crossed Bannu for his massive raid on the Punjab and Delhi in 1398. By 1838 it had fallen to Sikh Kingdom of Ranjit Singh but 11 years later the second Sikh War brought it under British control. Bannu district was formally constituted in 1861.

The district lies between $32^0$ 43' to $33^0$ 06' north latitudes and from $70^0$ 22' to $70^0$ 57' east longitudes. It is bounded on the north by the tribal area adjoining Bannu district, on the east by Karak district, on the south by Lakki Marwat district and on the west by South Waziristan agency and tribal area adjoining Lakki Marwat and Bannu districts. The total area of the district is 1,227 square kilometers.

### 1.1.2 Physical Features/Topography

Bannu district lies in the Bannu valley, which is a low structural basin. The valley is bounded on the north by the hills of Kohat district and on the west by the hills of Karaghora, which is an extension of North Waziristan hills. The highest point in northern hills is Baraganatu post with a height of 434 meters. While in the western hills, the height goes up to 708 meters. The rivers flowing through these hills have formed a number of passes. The important passes are Kurram and Tochi. They are named after the Kurram and Tochi rivers.

The district consists of a great alluvial plain. The alluvium has been brought by the streams from North Waziristan. The general elevation of the plain is from 300 to 600 meters. The foot hills area is formed of stiff clay, covered by layers of stones and pebbles.

### 1.1.3 Rivers and Streams

The general slope of the district is from northwest to southeast. The whole area is intersected by hill torrents and deep ravines. Kurram river enters the district at the north western corner and passes through the district, in a southeast direction.. The Tochi river enters the district south of Kurram river and flows out of the district first to the east and then to the south-eastern direction. Between these two rivers the area is called "Doab" which is irrigated by different canals.

The prominent tributaries joining Kurram river on its left bank include Tanga'i Algad, Khalboi Khawara, Adhami/Tarkhoba, Tarkhobi Algad and Kashu Algad. Another prominent nallah is Baran or Lohra Algad which enters the district halfway between Kurram and Tochi rivers. From the south western corner of the district two streams namely Khairore and Shaktu join Tochi river on its right bank. A number of other hills streams also drain the district. These streams have developed braided channels and have filled the valley with deposits ranging from clay to boulders.

### 1.1.4 Climate

The summer season starts in May and lasts till mid August. May and June are dry and hot months. In July and August the weather is hot and moist. June is the hottest month with mean maximum and minimum temperatures more than 40° C and 26° C respectively. December, January and February are the winter months. The mean maximum and minimum temperatures during January are about 17° C and 5° C respectively. The maximum rainfall occurs in August i.e. 111.36 millimeters. As there is no meteorological station in Bannu, the mean monthly maximum and minimum temperature, precipitation and relative humidity recorded at Kohat station is given in the following table 1.1:-

**TABLE: 1.1 MEAN MONTHLY TEMPERATURE, PRECIPITATION AND HUMIDITY RECORDED AT KOHAT STATION**

The district is also famous for the export of snuff (*naswar*) and curry powder throughout the country. These items are prepared locally from the local production of tobacco and termeric alongwith other ingredients.

### 1.3.2 Communication

The district headquarters and important towns are connected with metalled roads. The main road of the district is Bannu-D.I. Khan road from where branches have been extended on both sides to the interior important towns. According to Chief Engineer Central Design Office C&W Department NWFP, 1995-96 there are 264.41 kilometers black topped roads in the district.

The district was served by Pakistan railways. A narrow gauge railway line connecting Bannu with Mianwali through Lakki Marwat was operating but its operation has been stopped due to certain reasons. The present position of telegraph and postal communication in the district is as under in table 1.11:-

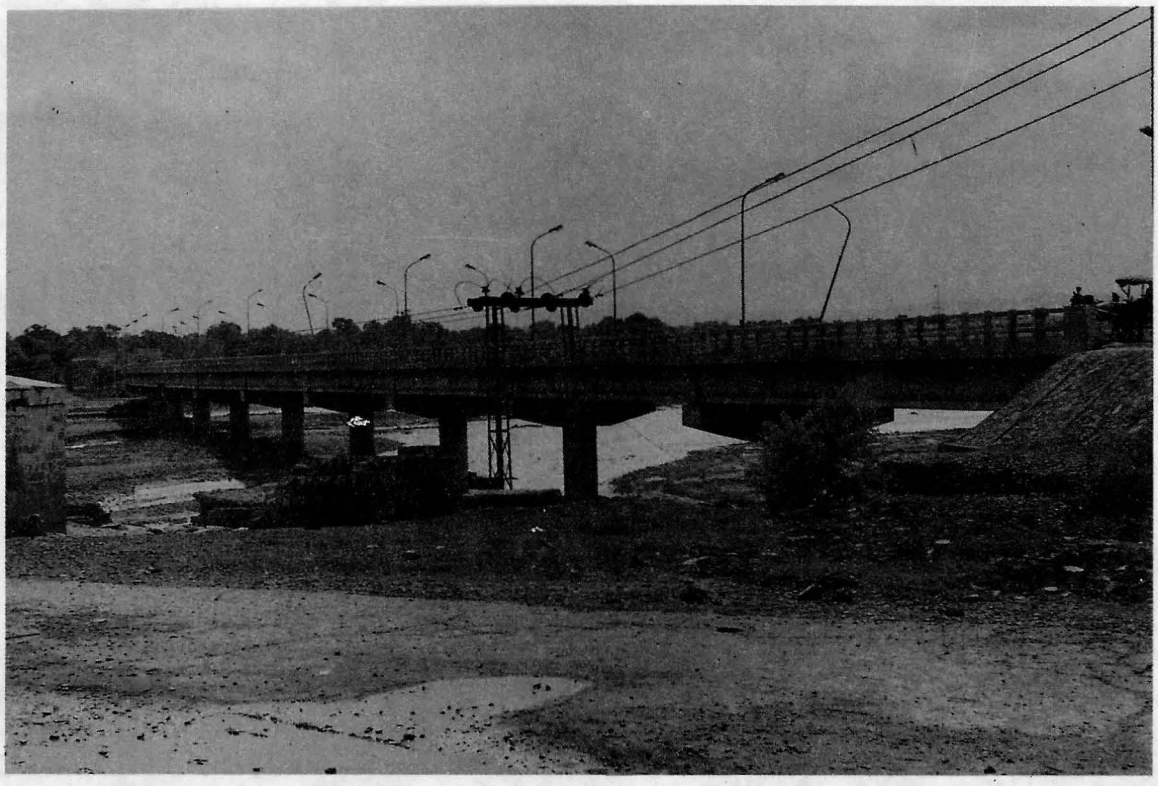
### 1.3.3 Trade and Trade Centres

Bannu is a central place for trade with districts of Karak and Lakki Marwat, North Waziristan agency and frontier region Bannu. It lies on Indus highway. All the essential commodities/goods are first marketed in Bannu and then despatched to the above mentioned districts, agency and frontier region Bannu.

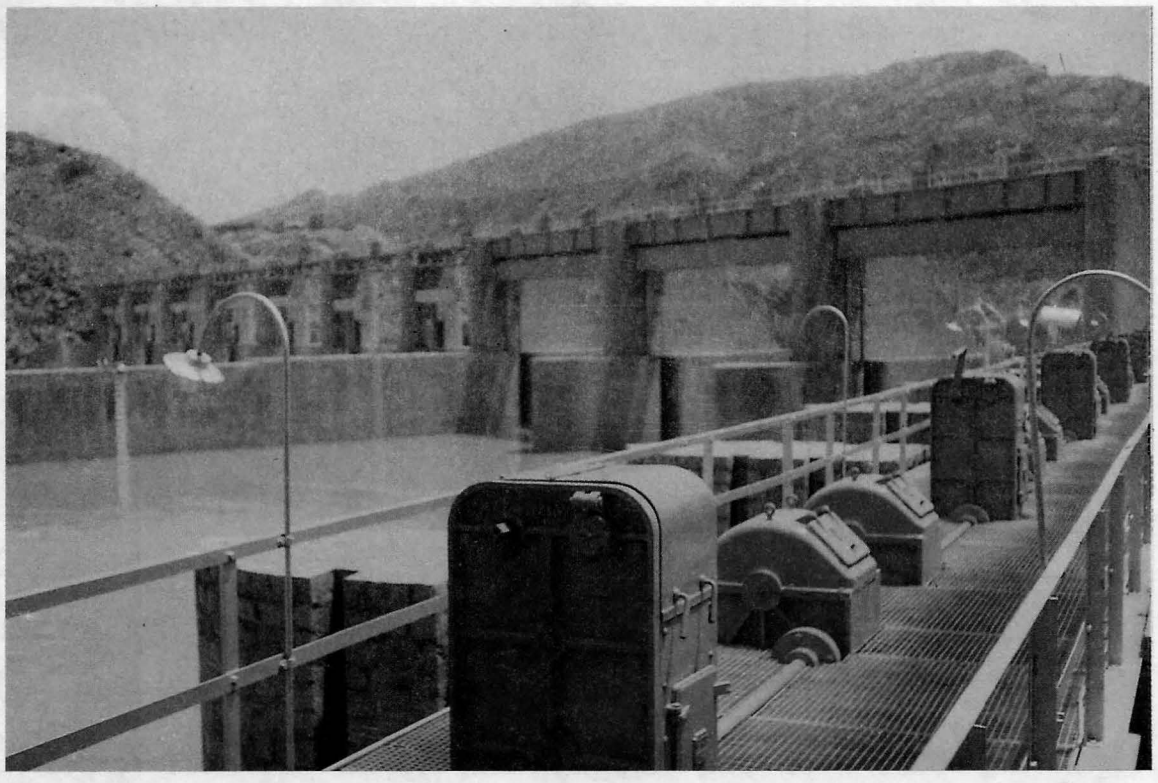
## 1.4 HISTORY, ETHNICITY/TRIBES AND CULTURE

### 1.4.1 History

The earlier mention of the district is in Rigvaid which mentions the Kurram river repeatedly. It may be mentioned that the Rigvaid was compiled by the priests and theoreticians of the Aryans between 2500 to 1200 B.C. Plainli who is considered to be the greatest grammarian of Sanskrit language mentions a place "Wano". Ptolemy also mentioned Panangar in his writings which were compiled in the second century of the Christian era.



KURRAM BRIDGE, BANNU.



HEAD BRIDGE, BANNU.

In the sixth century B.C. the Kayani Empire annexed it until Darius amalgamated a large portion of what is now western wing of Pakistan. Alexander the Great redeemed the honour of the Greeks by vanquishing their traditional enemies, the Iranians, marched on to Peshawar and onwards to Taxila and Jhelum, which were the provinces of the fallen Iranian monarch, and which he considered his rightful due. Death did not give much respite to this veteran warrior, and after his demise, his general Selecus Nikatar ruled the North Western Frontier Province from his capital Pushkalawati,. The rise of the young Chandara-Gupta Mauraya and his statesmanship availed him of Selecus's daughter in marriage and his Indian province aforementioned as dowry of the young Marya bride. Thus what was earlier, the stronghold of Hinduism, became a place of pilgrimage for the rising Buddhist influence, of which Ashoka was the greatest exponent. Malicious tongues, however, say that Ashoka after subjugating the whole of "Arya Varta" had no one to fight with, and hence his conversion to the Sakyamuni's religion of nonviolence was hypocritical. After the disintegration of the Mauraya Empire, which was not long after the demise of Ashoka the great, this district was ruled in turn by the Baktrians the Kushans, the Hindu Rajas of Kabul and Sultan Mahmud of Ghazni.

The incontrovertible proof of the above assertions is in the shape of coin found at Akra. There are several Greco-Bactrian copper coins of Eukratides, Philoxenses, Menander and Appollodotus, a majority of the coins belong to the Barbaric Kings, Azas, Mayas, Wema, Kadphises, Kanorki and Howerki, coins of the Brahmin Kings of Kabul, Samanta Dena and Syalapati, and of the Ghaznavid Kings, Sabuktagin and Mahmud continuing upto Iltutmesh. The most valuable antiquities are small, but the chain cornelians and agates apparently the stones of Greek signet rings have also been found.

From the Hindu Kings the scepter passed into the hands of the Ghaznavid Sultans. Mahmud of Ghazni sacked the city of Bannu in 1006 A.D., and went onwards to Multan to punish the Karamites.

Tradition says that Mohammad Ghauri had also camped at Bannu, and gave his name Ghori-wala to his camping ground. The Afghans now appeared for the first time in the annals of the district.

Popular tradition ascribes the earliest occupation of Akra to Hindus to whom succeeded Greeks, Indo-Gracians and Indo-Scythians. Subsequently Hindus recognised the place calling it Sat Ram, and remained in possession until Sultan Mahmud of Ghazni destroyed it and coins and other antiquities established the settlement here of Hindus and of races acquainted with Greek art, also of Muslims in later times. The coins found are mostly copper.

In their animosity for the Afghan tribes in general and the Bannochis in particular, because the latter gave them immense trouble in consolidating their hold on Bannu, and never willingly reconciled themselves to the British Raj the first Gazetteer has not only vehemently denounced the people but the place too. Here is verbatim copy of what he has to say about Bannu:-

Within historical times Bannu has never been a theatre for great events, nor have its inhabitants played a conspicuous part in Indian history. The secret of its insignificance was this. It lies between Hindustan and Kabul. It is true the valley has been occasionally traversed by conquering armies from the west, and Mason and others, have written of it as

being a "highway" between India and Kabul. But in point of fact such armies first debouched upon what is now British territory either by the Khyber or the Kurram route which later commences at the head of the Miranzai valley in the Kohat district. Thus Taimur Lang (Taimerlane) when in 1398 he marched Via Bannu and Dang Kot, on the Indus into the Punjab most probably came by this "Kurram route", and a century later (1505) when Babar ravaged Bannu, his army had advanced by the Khyber Pass to Kohat and thence to Bannu. It therefore, seems erroneous to write of Bannu as being a "highway" between Indian and Kabul. Of the five trans-Indus districts, it is really the only one from which no great route leads westward. Under the circumstances it appears only reasonable to attribute the historical unimportance of Bannu to its secludenese".

The testimony of the "enemy" recoils upon the learned major Edwards. The place which has been consistently attracting the attention of all the conquerors of the worthwest cannot, by any stretch of imagination be called "Insignificant".

In the footsteps of Mahmud of Ghazni, Mohammad Ghori marched with his hordes through Bannu, because this route was easier to get at the infidel Karamites of Multan.

### 1.4.2 Ethnicity and Tribes

Ethnologically the people of Bannu district are Aryans with mixture of Mongol and Semitic blood. Bannu has been invaded and inhabited by a number of people from the north and every race has left a mark of its ethnic composition. Among its inhabitants, there are the Bannochis, Wazirs and Marwats. Throughout its history these tribes have been contending for ascendency over it and possession of its cultivable and grazing surface area, finally settling down to an ordered life, with every tribe accepting a distinct part of it. In a few villages, Bhitannis, Syeds and Awans are also mixed up with these main tribes, but their group strength is insignificant. Some years ago refugees also settled in Bannu city but they were a small minority.

By appearance, the people called "Bannochis" are distinctly different from the other tribes, viz, the Wazirs and Marwats. The Bannochis are comparatively short in stature, have swarthy complexion and slender built bodies. They are physically weaker than Marwats and Wazirs. They keep their hair very short, almost shave it. They are generally clean shaven and are fond of displaying moustaches. Their dress consists of 'shalwar' and 'trousers' a shirt, a turban about six yards long and a cotton cloth hung on the shoulder.

The Marwats are a handsome and well built people with a fair complexion, descendants of the Ghilzais who colonized the present Marwat district in the 16th century.

The Marwats and the Wazirs generally keep long hair and are bearded. Many Marwats still use a join cloth instead of trousers and their shirts are tailored longer than those of other tribes.

The Wazirs are strongly built people tall in structure and robust in physique. They wear a shorter shirt and very baggy trousers.

### 1.4.3 Food

Agriculturists begin their day with tea and bread or even a *'paratha'* depending upon the financial position of the persons. In the forenoon they take their morning meal, consisting of *lassi* and maize cake in case of the Bannochis, and wheat or barely, jowar or gram bread in case of others. Between 3 and 5 p.m., they take tea again. At night another meal, consisting of wheat bread, meat or pulses or potatoes are taken. The bread is mostly cooked on a *'Tabai'* made of stone which serves the purpose of iron *(Tawa)*. Tea is boiled in mixed form with a strong dose of tea leaves, a little milk and *'gur'* or occasionally sugar desi or refined. The kettle (tea pot) is kept boiling till the tea becomes very strong.

The Bannu people cook their *'roti'* (loaf) in a very big size called *'Naghan'*. Usually one *'roti'* whether of maize or wheat, is enough for two or three persons. Occasionally rice, in the form of *'pulao'* and *'halwa'* (a sweet dish) is added for entertaining a guest or as a delicacy. Chicken and other birds are also sometimes used.

Of particular interest is the marriage feast. It consists of specially prepared leaves of wheat bread. These are baked by women who are specialists in this art. Every loaf has a circumference of about 3 or 4 feet and is very thin.

The bread is heaped up in a huge pilein a *'Karaha'* a shallow iron tub. Then it is soaked in soup and finally ghee is poured over it then about 40 men sit around and dine out of it. After the first group gets up another group of the same number takes over, and if there is shortage of bread or soup of ghee, more are put in without washing the *'Karaha'*. This goes on till all the guests are feasted. Meat is also served in these feasts. This feast in local language is called *'Paenda'*.

### 1.4.4 Dress and Ornaments

Hand woven cloth has almost disappeared. All the tribes now use mill-made cloth for their clothes. The people living in Bannu city and those living in the near villages, are usually dressed in plain yet finer cloth than those who live in remote villages. The educated and better off are dressed usually, in white trousers and light coloured shirt, a Peshawari or silken *lungi* without *'kulla'* and the people in far off villages and the poorer class in the city and around use rough cloth, generally dyed grey or *'khaki'*. The same difference exists in the female dress also. The richer and the educated community generally use fine cloth in light shades whereas the poorer women use cheaper stuff making up the difference by resorting the fast and bright colours. While going out, the typical Bannochi women use a *'Burqa'* (Veil) which is not so common with the other tribes. In this *'Burqa'* 12 yards of "Latha" is generally used. The old fashioned shoes with gold thread work on its upper part is fast disappearing and the universal, high heeled shoes and sandals are coming into general use. Bannochi women usually uses seven and a half yards of cloth for her shirt and trousers with two and a half yards for her *'dopatta'* whereas the Wazir and Marwat women use much more. Winter and summer clothing is usually made of the same stuff i.e., "cotton" with a woolen pull-over added in winter, both for males and females. In addition the richer people use a woollen coat

or a blanket in winter as against the white cotton *'chaddar'* in summer. A bare footed person, whether man or woman is hardly seen. Chappals and shoes are generally used by men while sandals and *'jootas'* are the common foot wear for women. No one uses wooden shoes over here. Some men and women belonging to hilly tracts wear sandals made of 'Mazri' as well.

As already observed, the working men wear *'khaki'* or grey coloured cloth but during Eid festivals and on marriage ceremonies they turn up in clean bright coloured clothes with black or brown *chaplies*, white trousers, coloured shirt, stiff turban and a white *'chaddar'*. The women-folk wear on such occasion , bright coloured clothes made of linen, rayon or silk or printed cotton and an array of ornaments for head, ears, neck, breast and hands. These ornaments are made of gold in the case of wealthier families and the middle class or the poorer use imitation gold or silver.

### 1.4.5 Dwelling

Houses are usually rectangular in shape, with one or more *'Kothas'* a courtyard and the enclosure wall. The houses are generally contiguous, with streets running between rows of houses. They are made of hard clay with mud roofs. *'Reeds'* and *'Dheelas'* are also used in roofing. Stones and burnt bricks are used as house building material by some land-lords and the peasant properties.

The houses are of varying dimensions. Most houses particularly those which are inhabited by the tenants, have only one *'Kotha'* without any ventilation. The slightly wealthier people have more spacious houses with a separate enclosures for cattle and poultry and godowns for grains.

The Bannochis live in compact areas with their houses close to each other while the Marwats and Wazirs live in scattered villages with their houses widely separated from one another.

'Cots' (bed steads) and sometimes chairs are used as furniture. Chowks and hujras are an essential part of every village. Chowks are used for village gossip for which practically all the men-folk turn up in the evening. There is a hubble-bubble *(Chilam)* in every chowk in which tobacco is smoked in a round. Tobacco is also used in the form of *'Naswar'*. The 'Hujras' consisting of one or two rooms are not common property. They belong to the richer people who use the same as their guest houses. The increasing electrification of the rural area, has made night life in villages, brighter and gayer. The number of radio sets in the rural areas is fast increasing and is becoming an essential part of the chowks and hujras, with the result that the village gossip begins with the inclusion of national and foreign news.

### 1.4.6 Occupations

Agriculture is the principal occupation of the people. Wheat, barley and gram are grown in the sandy tracts by the Marwats and Wazirs. The chances of returns depend upon the timely arrival of rains. The soil, being sandy, does not require any manure or deep ploughing. All that the farmers have to do is to cover up the seeds with a small plough, then wait for the rains to come. After sowing, the farmers have nothing to do but wait for the rains and then reap the harvest. Women join hands with men both in sowing and harvesting.

The cultivators of Bannu being engaged in agricultural pursuits almost all the round, have no time for any subsidiary occupations. The Marwats and Wazirs though living on agriculture are engaged in agriculture for hardly three months in the year and have nothing to do for nine months in the year.

In certain localities *'Chicks'*, 'Ban' (for cots) *'Dhela'*, baskets etc., are prepared by the zamindars in their spare time and are sold in the weekly fare. Marwats and Wazirs remain idle most of the time compared with the Bannochis who are more active. A Bannochi agriculturist works more than 8 hours daily.

### 1.4.7 Culture, Customs and Traditions

The people are generally fond of sports. Indigenous games like "Ainda" and "Kabaddi" are engaged in by young-folk, and enthusiastically catched by the people. Kabaddi is comparatively more popular game. The local colleges organise a cultural week during the month of December every year and a Kabaddi tournament is the most important feature in it. The matches attract very large crowds daily. Apart from these sports, hockey, football, volleyball are very popular here. The Bannu district has a good around sports record. 'Majlis' which includes instrumental music, singing and dancing, is an indispensable feature in marriages and other festivals. Drama, debate and symposiums are gradually becoming popular, with the local collages becoming a rallying point for all talent. Women sing and dance on the occasions of marriages, betrothal or circumcisions, but always indoor.

In the city and cantonment, the cinemas are very popular places of entertainment. English and Urdu films are enjoyed by large number of people. The tables, harmoniums, banjo 'sattar' rabbab, violin and mouth organ are the common musical instruments.

No other important customs and usages exist in Bannu besides those connected with religion, marriages, births and deaths etc.

### 1.4.8 Marriages and Deaths

**Marriages**

On the day of the marriage, a procession of women and children moves out of the house of the bridegroom for the bride's house. The village barber or *'dum'* leads the procession beating his drums as hard as he can with most of the and young girls either singing or dancing while following him. As the procession reaches nearer the village or the house of the other party, the noise of this revelry rises to a crescendo. There upon the assembly of women on the other side, make ready for the reception which is extended rather contemptuously, expressive for a mood of grief or bitterness.

A little later the men-folk arrive with baskets of sweets. They are seated in the chowk (Hujra). The father or the guardians, with the village mullah as a middle man enters into the bargain. *Mehr*, ornaments etc., are decided upon. Sweets are distributed and a volley of shots is fired. Many points of differences arise but are smoothed out by the elders on both sides.

The institution of marriage and ceremonies connected therewith are the same as elsewhere. There is, however, one difference in the details, that is that the Nikah ceremony takes place at the house of the bridegrooms and not the bride. Girls are married between the age of 15 and 20 years while men marry between 18 to 40.

**Deaths**

When a person dies, the unhappy news is communicated to all the villagers by the village barber. He informs the grave-diggers and the village mullah. All the villagers must turn up for the '*Jinaza* Prayer'. Alms in the form of cash and sweets are distributed in the graveyard amongst the mullahs and others. The females join in a common wall in the house of the deceased. Every woman attending, brings some money, which is given to the eldest female member of the bereaved family. In the evening food is served to all the people of the village.

## 1.8 IMPORTANT/HISTORICAL PLACES

### 1.8.1 Akra

Nine miles away from Bannu city is situated a historical and archaeological site called 'Akra' (derived from a Greek word acropolis meaning a raised fortified place). The Bactrian Greeks ruled formerly West Pakistan in the second and 1st centuries B.C., Bannu being a part of Greek Empire. The relics, mostly coins and broken pieces of pottery recovered from the site prove that in ancient times it was the seat of Greek Government then ruled by Greeks, again by Hindus and then Muslims.

### 1.8.2 Kurram Garhi

The other place of interest is the Kurram Garhi Project. Seven miles to the north of Bannu city is situated the weirs, the tunnel, the rest houses, the canal, the first fall, and the Baran dam, all to prove man's power over the turbulan rivers. The site has now become a holiday resort for the visitors.

## 2.2 SEX, AGE AND MARITAL STATUS

### 2.2.1 Sex Ratio

Sex ratio is an important demographic indicator which is defined as the "number of males per hundred females". The sex ratio computed in 1998 is 106.9 for the district which has come down from 109.6 in 1981. Table 3.7 provide percentage of housing units by source of cooking fuel used by rural/urban area.

### 3.2.4 Availability of Separate Kitchen, Bathroom and Latrine Facilities

Only 30.55 percent of the housing units in the district had a separate Kitchen, a separate bathroom 33.75 percent and an independent latrine 19.39 percent. The figure for urban areas especially for separate kitchen and separate bathroom are 33.91 and 42.91 percent respectively which are higher as compared to rural areas. The percentage having an independent latrine is much higher in urban area which is 44.12 percent. The percentage of shared facilities are lower in urban area i.e., 26.73 percent for kitchen, 42.50 percent for bathroom and the shared facility for latrine is higher in urban areas as compared to rural areas.. Table 3.8 gives details of availability of housing facilities by rural/urban area.

### 3.2.5 Source of Information

The question about source of information has been asked for the first time in the 1998 Population census to assess the media coverage. About seventeen percent of the households in rural areas have access to television, 17.14 percent radio and 9.39 percent news paper as source of information. The percentage figures of media reach for urban areas especially for TV and news paper is relatively higher i.e., 49.32 percent and 30.90 percent respectively. Table 3.9 provide percentage of housing units by source of information by rural/urban area.
