1998
DISTRICT CENSUS REPORT
OF
CHAGAI

CENSUS PUBLICATION NO. 38

POPULATION CENSUS ORGANIZATION
STATISTICS DIVISION
GOVERNMENT OF PAKISTAN
ISLAMABAD

SEPTEMBER
1999

PREFACE

The Fifth Population and Housing Census, initially due in March 1991, was conducted from 2-18 March 1998 throughout the country including Federally Administered Tribal Areas, Northern Areas and Azad Kashmir. During the first three days i.e., from 2nd to 4th March houselisting was carried out where in each house was physically numbered and registered as an inventory for conduct of the census from 5th to 18th March. The inventory served as a guideline for the supervisors besides ensuring complete coverage, during the census operation.

There were 3 separate questionnaires used for houselisting and collection of information on population and housing characteristics. Form-1 (Annex-A) was used for houselisting. Form-2 i.e., short form (Annex-B) was used for collection of information about all persons on core questions such as name, relationship with the head of the household, residential status, sex, age, marital status, nationality, religion, mother tongue, literacy, educational attainment and possession of national identity card, number of rooms, tenure, period when constructed, construction material of walls and roofs and source of drinking water-inside or outside, source of light, fuel used, type of kitchen, bathroom and toilet facilities and watching of TV and radio and reading of newspapers.

Form-2-A i.e., long form (Annex-C) was used for obtaining additional information about migration alongwith its reasons, field of education, economically active population, fertility, disability and inoculation of children against 5 diseases were asked on sample basis. About 8 percent single stage stratified sample was drawn with slightly more representation given to small provinces, districts and urban areas to make it a representative sample. Necessary definitions and concepts relating to the above mentioned questionnaires/forms are given at (Annex-D) for information of the readers.

The report mainly consists of three sections viz write up which carries general description of the district and some analysis of population and housing data, second section comprises tables while third section provides additional information about these sections in the form of annexures.

The write up section contains three main parts viz (i) general description about the district, (ii) broad analysis of population census data and (iii) broad analysis of housing census data. The general description covers location, boundary, area, geography, climate, rainfall, ethnicity, administrative set-up, agriculture, flora and fauna, health, industries, communication system, infra structure beside introducing the district. The broad analysis of population census data deal with population size, growth and distribution, other demographic and socio-economic characteristics.

The broad analysis of housing census data throw light on housing units/households, in terms of information on number of rooms, population density per housing unit and per room, tenure, period since constructed, construction material used on walls and roofs, source of drinking water, source of lighting, cooking fuel used in kitchen, availability of kitchen, toilet and bathroom facilities and assessment of media reach etc.

The report comprises 52 tables in all, 40 relate to population data, 12 to housing data. Of 52 tables 27 are based on complete count information while remaining on sample count information. Because of space problem the tables on occupation and industries are given in coded form. Therefore, after mentioning occupation and industries in coded form on the tables the detail occupational groups and industry divisions and district map are appended at Annex-E, F & G respectively.

Census taking was a gigantic task which involved the whole nation in one way or the other which is commendable as a team work. The role of Provincial Governments was very vital and with out their active cooperation, the operation would not have been successful. The meritorious services rendered by the field staff in addition to their own jobs, are also appreciable. The services rendered by the staff and officers of Federal Bureau of Statistics in training and data processing was helpful. I am personally indebted to the Federal Government who inculcated in me a sense of responsibility to conduct the census in March 1998, and releasing the data as early as possible for the benefits of all users.

The Armed Forces supported the Population and Housing Census work on hundred percent basis therefore, I extend my gratitude to their officers/staff involved in this operation.

I also thank the International Agencies like UNFPA, UNDP, UNICEF for their financial assistance in acquiring equipment & machinery and technical support in the form of consultancy services, training and study visits abroad.

Finally I thank the officers and staff members of the Population Census Organization for their relentless efforts to complete the census successfully.

Dated: 16th September, 1999

(JAVID AKRAM)
Chief Census Commissioner

PART - I
GENERAL DESCRIPTION OF THE DISTRICT

1 GENERAL DESCRIPTION OF THE DISTRICT

1.1 GEOGRAPHY

1.1.1 Name, Location and Area

The district derives its name from "Chagai" a village on the western border of the Lora Hamun. The legend attributes the origin of the name to the numerous wells (Chahas) which are said to have formerly existed in the vicinity.

The district lies between 27°-52′ to 28°-04′ ‘ north latitudes and 60°-52′ to 66°-20′ east longitudes. It is bounded on the north by Afghanistan on the east by Quetta Mastung and Kalat districts, on the south-east by Kharan district and on the south-west by Iran. The total area of the district is 50,545 Square Kilometers.

1.1.2 Physical Features/Topography

The physical features of the district vary and may be distinctly divided into three parts. The highlands, the low-lands, and the desert. The highlands or the mountainous area comprise the Koh-i-Sultan, the Chagai Hills, the Sarlath range, the Ras Koh and the Kachau and Mirjawa. These mountain ranges have a general east-west trend. The Koh-i-sultan with a height of 1000 to 2300 meters and the Chagai hills with a height of 2000 to 2400 meters dominate the central north of the district. The existence of a number of craters, in these two mountains, show repeated volcanic activity in the past. In the Chagai hills, Gonshero Pass is used for movement between Pakistan and Afghanistan. The Sarlath range is located in the north eastern corner of the district whose height vary from 1100 to 1600 meters. The hill ranges of Kachau and Mir-Jawa are situated along the south-western boundary of the district. Their height vary between 900 to 2300 meters. The Ras Koh lie in the south east along the border with Kharan district. It is higher than other mountains of the district. The highest peak is "Ras" Koh", which attains a height of about 3000 meters.

The low-land part of the district is its plain area which is of two types. The area between Nushki and Chagai consists chiefly of a vast level plain of alluvial soil interspersed with tracts of sand and intersected by a low range of stony hills. The other portion of plain stretches from Hamun-e-Lora towards the southwest; between Chagai and Ras Koh hills. It is known as the "Dak".

The area beyond Chagai is a sandy desert and stony or gravel land. The crescent shape moving sand dunes are found between Chah Sanda and Tratoh and between Kundi and Mashki Chah. The longitudinal/lateral type of sand dunes are found on the north of Koh-i-Sultan towards the border of the district with Afghanistan, forming part of desert region of Afghanistan.

1.1.3 Rivers and Streams

The drainage of the district is carried off by innumerable hill torrents known as Nawars or seasonal nullahs. With the exception of a few they contain water only after rains. In the eastern end of the district two noteworthy streams namely Kaisar and Lora, enter the district from the north. The former flows as perennial stream towards the south, while the latter flows in a southwestern direction and then towards the west draining itself into lake basin known as Hamun-i-Lora. The other hill torrents in Chagai and Dalbandin include Bulo, Morjen, Girdi and Gaze.

In the central part of the district i.e., area down the eastern Chagai and western Koh-i-Sultan ranges, many such torrents flow down towards the south however, a few of them are able to reach the Hamun-i-Mashkel; the great lake basin on the border with Kharan district.

In the western part of the district besides the seasonal streams two rivers are of principal importance. One is Tahlab river, which flows along the southwest and southern boundary with Iran. In rainy season it has enough water to manage its channel to Hamun Mashkel. The other is Mirjawa River which originates in Iran and enters Chagai from southwest near Qila Sufed. It flows along the southern boundary with Iran for some distance.

1.1.4 Climate

The climate of the district is extremely hot in summer and cold in winter. The difference between day and night temperature is considerable. The temperature also varies in different parts of district. The summer season is long and severe lasting from April to October. The mean maximum and minimum temperature for July, the hottest month, is 42.48 C and 25.88 C respectively. Sudden and severe sand storms add misery to heat. Especially the western half of the district is exposed to the effects of Bad-i-Sad-o-bist-roz (wind of 120 days which constantly flows day and night from a northwestern direction continuing from mid May to mid September).

The winter season is though short but its severity cannot be denied. Though the mean minimum temperature seems not dropping below freezing point. The occurrence of frost is not an uncommon phenomena. The mean maximum and minimum temperature for the month of January has been recorded as 17.38 °C and 1.31 °C respectively.

The district lies outside the sphere of Monsoon currents, therefore, the rainfall is irregular and scanty. The mean annual rainfall is 80.56 millimeters. Aridity is the basic characteristic of the district. Summer rainfall is negligible. The rainfall in winter is received from western depressions. Which is also inadequate everywhere for agriculture. Rainfed farming is practiced only in years of good rainfall.

The data on temperature precipitation recorded at Dalbandin station is given in the Table 1.1.

TABLE 1.1 MONTHWISE 30 YEARS MEAN TEMPERATURE, PRECIPITATION AND HUMIDITY

NAME OF DISTRICT = CHAGAI **STATION = DALBANDIN**

Month	Mean Temperature (°C)		Precipitation (Millimeters)	Relative Humidity (%)
	Maximum	Minimum		
January	17.38	1.31	16.10	49.50
February	20.05	4.56	18.09	45.27
March	26.24	9.93	18.58	35.96
April	32.47	15.81	7.85	26.08
May	38.07	20.31	2.17	18.90
June	42.23	23.87	0.78	14.73
July	42.48	25.88	3.86	18.63
August	41.24	23.68	0.91	18.38
September	37.68	17.71	0.36	16.35
October	32.10	11.53	1.47	20.73
November	5.42	5.75	2.46	30.68
December	19.50	2.31	7.86	44.40
Annual	31.24	13.53	80.56	28.30

Source: Normal for the period 1961-90, Data processing Centres Meteorological Department, Karachi.

1.1.5 Flora

In the district the major tree species are khanjak (Pistecia Khanjak), Ghaz (Tamarix Articula) taghaz (Haloxylon Amodendron). Bushes are Hashwarg (Rhozya Stricta), Pog (Calegnum Polygonaides), Cotor (Stockcia Brohinca), Lara (Salsola Kali), Kandar (Alhogi Camalorum), Tusso (Gaillaina Aucheri) etc. It includes grasses like Moger (Atriplex Dimprphostegium) Kash (Sacchorum Siliare), and Shahnaluk (Allium Rubellum). Hing plant is also found in Raskoh near Dalbandin.

1.1.6 Fauna

The wild life species in the district are Ural, Hare, Sand Grouse, Fox, Jackal and Wolves, Chinkara, Houbara Bustard, Sissee, Waterfowl and Chakor.

1.2 AGRICULTURE AND RELATED SECTORS

1.2.1 Agriculture

In terms of labour involvement agriculture is the main activity in the economy of the district. Major crops grown in the Rabi season are wheat, vegetables and fodder. In Kharif season the major crops are onion, potato, fruits, vegetables and fodder. In the agricultural sector the labour force consists of both men and women. Melon, potato, pulses, tomato, vegetables, fruits etc. are considered as cash crops while wheat and jowar are considered as food crops. However in case of some crops it is difficult to draw a line between food and cash crops.

The reasons for low per hectare yield are non-availability of better quality seeds and the lack of irrigation facilities, fertilizer and pesticides.

Most of the farming is performed with traditional methods of cultivation. Few people are using tractors, threshers and mechanical ploughs. Table 1.2 & 1.3 show the area, production and average yield of important Rabi and Kharif crops in the district.

TABLE 1.2 AREA PRODUCTION AND YIELD OF RABI CROPS GROWN IN CHAGAI DISTRICT FOR THE YEAR 1997-98

Crops	Total Area In Hectares (Irrig+unirrigated)	Production In Tonnes	Yield per Hectare (Kilograms)
RABI CROPS			
Wheat	16150	29930	1853
Barley	75	120	1600
Cumin	580	351	605
Vegetables	855	14045	16427
Fodder	137	5150	37591

Melons	3695	52730	14271
Fodder	2650	71100	26830
Corriander	20	11	550

Source: Agriculture Statistics of Balochistan (Agriculture Department) 1997-98.

1.2.2 Irrigation

The major source of irrigation in the district is tube well. Other sources are karezes and open surface wells. Karezes are being dried up and the quantum of water is decreasing. An other source of irrigation is channels and hill torrents, which originate from the mountains and flow during rains.

As far the regulation/ownership of water resources are concerned tube wells and open surface wells are privately owned and all rights are vested in the hands of the owners. In case of canals, Karez and springs rights of ownership are vested in the hands of the community. The person having the greater proportion of the land receives a water share in line with his land.

1.2.3 Horticulture

The horticulture sector in the district is not highly developed due to lack of irrigation facilities. However, the following fruits are grown in the district where water is available. Table 1.4 shows the area, production and average yield of important fruits.

TABLE 1.4 AREA, PRODUCTION AND YIELD OF ALL FRUITS GROWN IN CHAGAI DISTRICT 1997-98

Fruits	Total Area Bearing/non-bearing	Production (Tonnes)	Yield per Hectare (Kilograms)
RABI CROPS			
Almond	35	75	2414
Apple	98	1251	13171
Apricot	38	497	14210
Grapes	193	695	9524
Peach	11	11	1000
Plum	12	150	12500
Pear	1	10	10000
Pomegranate	157	2664	17879
Dates	569	5318	9480
Other Fruits	22	232	10556

Source: Agriculture Statistics of Balochistan (Agriculture Department) 1997-98.

1.2.4 Forestry

The terrain of the district is not favourable for forestry. Rainfall is scanty and the shifting sand dunes and extreme temperature make the condition for vegetation unfavourable in the district.

Due to scanty rainfall and shortage of water there is no forest on commercial basis.

1.2.5 Livestock

Although Chagai district traditionally depends on the livestock sector, the rate of growth of the livestock sector has been less as compared to the agriculture sector. However the livestock sector has not lost its importance and is second to the agriculture sector in the district.

Normally the nomads take their animals to Bolan district in search of range-land during winter and bring them back in summer.

There are two veterinary hospitals 15 dispensaries one artificial in-semination centre and one disease investigation laboratory unit in the district. Table 1.5 shows the livestock position in the district.

TABLE 1.5 LIVESTOCK POPULATION IN CHAGAI DISTRICT, 1996

S.No.	Livestock	Number	S.No.	Livestock	Number
1.	Cattle	2649	2.	Buffaloes	-
3.	Sheep	195716	4.	Goats	278782
5.	Camels	26493	6.	Horses	25
7.	Mules	-	8.	Asses	3151
9.	Poultry	96913			

Source- Livestock Department GOB, Quetta, 1996-Census.

1.3 INDUSTRY AND TRADE

1.3.1 Industry

The only, worth mentioning industry is the Saindak metal project. Saindak Metal limited, although completed, is not functional fully due to some reasons but the project would have a significant Socio-economic effect in the district. Further industries based on minerals such as cutting and polishing of marble and granite can be established. Marble and granite are presently being exported within and outside the country. Now availability of Raw material is the main hurdle in the establishment of industry.

1.3.2 Mining

Nature has generously gifted the district with natural resources. Chagai is also called the museum of minerals. The big deposits are copper, onyx marble, Sulphur, iron and granite. Presently one of the big projects called Saindak metal limited (SML) has been established with the Chinese Metallurgical Construction Corporation (MCC).

The district has great potential both for metallic and non-metallic minerals. The famous deposits in Balochistan of copper and gold are in this district. Massive sulphide mineralisation has also been identified. Sulphur is widespread around the southern and southwestern sides of an extant volcano Koh-e-Sultan. Vermiculite deposits are in Doki River in Chagai district, which is the only deposit of its kind in the province.

Only marble is found at Zard Kan, Patkok, Juhli, Botak, Mashki Chah, Tozghi and Zeh. Iron deposits are also found and are of high quality. Major deposits are found in the area Pachin Koh. And smaller in Chigendid and Chilghazai. Saindak deposits of porphyry type copper are also located in the district. The other minerals, which are under investigation, are gold by BHP of Australia, granite, vermiculite and magnesite etc.

1.3.3 Trade and Trade Centres

The trade activity in the district is negligible. And for that reason no trading centre is available in the district.

1.3.4 Communication

Chagai district is connected by road and railway with the provincial headquarters at the one hand and with Taftan near the Iran border. Metal and shingle roads exist in the district. Apart from the metal road there is other many kacha roads linking the small town/villages of the district to each other.

The total length of the roads in the district is 1974 km, out of which 605 are metalled, whereas 1369 km is shingle roads. Source:(District Profile Chagai 1997, P-55 P&D G.O.B)

The only railway line is between Quetta and Taftan. Two trains leave Quetta for Taftan twice a week. The distance covered by the train from Galangor station to Nushki station is 36 km. Whereas from Nushki to Taftan is 479 km.

The only airport in the district is at Dalbandin and twice a week Fokker services are available from Quetta to Dalbandin.

There is no radio and television station in the district. Transmission of PTV-2 can be seen clearly at Kishingi, whereas 70% clear transmission is visible at Nushki due to a microwave booster. In other parts of the district, transmission of PTV can be seen only through dish antenna. Similarly radio transmissions of Quetta, Karachi, Islamabad, Zahidan, Kabul and BBC are heard throughout the district.

The Pakistan Telecommunication Corporation limited has established a network of telephones in the district. Besides auto exchange, digital exchange has also been commissioned in the district. Telephone exchanges are working at Nushki, Dalbandin, Naukundi and Taftan.

In Chagai district there are four post offices, one each at Nushki, Dalbandin, Naukundi and Taftan.

Grid electricity is available in a very limited quantity by transmission line with the National grid Via Mastung and Kirdigab on a 132 kV line. Another 40-kilometer long 33 kV transmission line has been laid from Nushki to Mall. Two grid stations are working at Nushki and Mall. There are three powerhouses, one each at Dalbandin, Naukundi and Taftan and electricity is supplied through a number of high-speed diesel generators of various capacity at the above locations. Electricity is supplied only 6 to 10 hours daily at Dalbandin and 6 hours at Naukundi.

GATEWAY TO NUSHKI

RAILWAY TO TAFTAN

Sui Southern Gas Company does not connect the Chagai district with the main gas pipeline.

1.3.5 Future Prospects of the District

Chagai is the largest district in the province and the least populated both in terms of human and livestock population. There is a considerable potential for further development of the mineral sector in the district. Two factors are the main hurdles for exploitation and development of minerals. One factor is the lack of infrastructure, like roads, water, power and gas and the second is the high cost of estimating the proven reserves and preparation of feasibility reports.

1.4 HISTORY, ETHNICITY/TRIBES AND CULTURE

1.4.1 History

Very little is known about the ancient history of Chagai. The earliest monuments are the ruins of terraced embankments. These are found at the foot of the Ras-Koh hills; they are ascribed to the Gabrs or fire-worshippers, which are said to have been the inhabitants of this area more than two thousand years ago. The next traces of ancient history are the square shaped tombs in the western areas of the district, which are attributed by local traditions to the kaianis dynasty of Iran.

The Baloch are perhaps the oldest inhabitants of the district, who according to them migrated from Aleppo. The Brahvis, about whose origin there are different theories, must have moved towards the north from their original home in Kalat district and settled down in pockets with a major concentration in the Nushki area. Both the Brahvi and Baloch appear to have been firmly established in the beginning of the 16th century.

The advent of the British in this area commenced with the British agreement of 1878 with the Khan of Kalat. Subsequently as a result of the partial survey and definitions of the western boundary with Iran from Kuhak to Koh-i-Malik Siah and Demarcation of the Afghan Baloch boundary in 1896, the western Sanjrani (present Dalbandin sub-division and Naukundi tehsil) became part of Kalat State. In November 1896 the first British Political Agent of Chagai was appointed. Nushki continued to be Niabat to Kalat State. Three years later, however the Niabat of Nushki was leased by the British from the Khan of kalat. The management of the Niabat was handed over on the 1st July 1899 to the British Government. From July 1899 to the 13th August 1947 the district remained under the British Government. After independence in 1947 and after the declaration of Balochistan as a province in 1970, Chagai became a district within Quetta Division.

1.4.2 Ethnicity and Tribes

In Chagai district there are three major ethnic groups namely Baloch, Brahui and Pashtoon. Baloch and Brahui are nearer to each other compared to Pashtoons. Baloch and Brahui have similar traditions, though they speak different languages. In many families there are intermarriages, whereas Pashtoons have altogether different traditions and a different language. They have similarities with the Pashtoons living in other parts of the province, particularly in northern Balochistan.

The prominent tribes of the district are Mengal, Badini, Jamaldini, Notezai, Sanjrani, Mohammad Hassani, Sasoli, Hassanzai, Sherzai, Lejai, Burhanzai, Syed and Barech.

1.4.3 Culture, Customs and Traditions

The social organization in Chagai district is mainly structured along tribal lives. The social structure is patriarchal people live in joint family system particularly in rural areas in which polygamy is a common phenomenon. In urban areas the trend is towards the nuclear family. The society is structured on kinship basis. Sardari system is still in practice in Chagai district. The Sardari system of Brahuis is similar to that of Baloch. However the Sardar, s role has been altered over the years. Many of the elected representatives are tribal chiefs and sardars.

Customs of co-operation are found in the area. It includes the practice of collective labour (Ashar or Hawachk) at harvest time and granting of financial assistance (Bijar and Pursi) to fellow tribesman on reciprocal basis.

The vast majority of the district population is Muslims and belongs to Sunni sect with a minority of Hindus. The people are generally religious minded, offer prayers five times a day regularly. The Hindu population observes "Deva" and "Holi". The Hindus of Nushki make an annual pilgrimage to the Jawarkin hill, which is 22 km from Nushki, on the occasion of "wasakhi" festival on the 13th April.

Although Chagai district is very peaceful it is customary among the people to carry arms. It is a fashion among the Sardars and notable s to keep arms. There are two options available for conflict resolution, one is government judiciary system and the other is the tribal jirga. The jirga system is the traditional system of justice. Besides the district and local jirgas the Political Agent can and does appoint jirgas for special purposes. The jirga system was abolished in 1991, but one can still form a provisional jirga comprising of notable when there is a need for resolving a conflict. Sometimes conflicts are resolved through imposition of penalties in the form of cash, land, and kind or by marrying women to the inflicted side.

1.4.4 Food

Wheat is the major staple food. Atta is whole-wheat flour made into roti (bread), and is the typical bread consumed with most meals. Pulses are eaten in the form of dahl, or lentils. Meals are generally taken three times a day. Breakfast may consist of roti and tea or only tea. Lunch as the main meal commonly consists of roti with vegetables or meat or pulses. Dinner may be a repeat of lunch with slight variations.

Meat is seldom used. On festivals goats and sheep are generally slaughtered to celebrate the occasion. Milk taken is that of goats, sheep and camels. Curd is the basis of most of the food preparations.

1.4.5 Dress

The common dress in Chagai district is shalwar (trouser) and qameez (shirt). Chapal made of leather is used as a foot wears. The better-off people wear a long turban tied over a kullah, shirt reaching the knee and baggy trousers.

1.4.6 Dwellings

Housing units in rural areas mainly consist of one or two rooms built of mud, whereas in urban areas houses more than two rooms are found. In urban areas mostly houses are pacca. The nomads live in the blanket tents. In summer the nomads live in huts made of curved sticks covered over with bushes.

1.4.7 Occupations

Most of the workers like masons, barbers, carpenter; tailors, welder's etc. are migrants from other provinces. Important occupational groups are "production and related workers, transport, equipment operator and labour" and "sales workers" other economic activities are construction mining and quarry.

1.4.8 Betrothals and Marriages

The marriage customs are more or less uniform through out the district. The majority of the marriages in the district are arranged particularly in rural areas. It is usually the father who decides upon the formal terms of marriage, though their wives may influence them. Marriages with, the near relations though not always the rule are preferred, because exchange can be easily arranged. The bride price that has to pay is less.

The custom of (Lab, Vulvar) is in practice. The payment of Vulvar is imputed to the male side by the female members at the time a proposal of marriage is made. The amount of Vulvar is not fixed. The amount of Lab in olden times was paid in kind, usually in the form of sheep, goats and camels, with the commercialization the trend is towards cash payment, particularly in urban areas.

The system of exchange of girls (Char Pa Chari, or Badly, or Sarri) prevails among the tribes in Chagai district. Under the system, if there is much difference between the ages or personal attractions of the girls, which are to be exchanged, the parents of the girl have to pay an additional sum in cash. This custom of additional payment is confined chiefly to the nomadic population.

1.5 ADMINISTRATIVE SET UP

1.5.1 Executive, Revenue and Judicial System

Chagai district was created in 1896 at the time of the British. Nushki was the only sub division of the district with two tehsils. Nushki and Dalbandin, Nukundi sub tehsil was upgraded to tehsil in 1950. Chagai district was attached to kalat in 1957 but was detached after two years.

A Political Agent (PA) heads the district. He is assisted by three Assistant Commissioners (ACs) and four Tehsildars and 5 Naib-Tehsildars. Political Agent is also assisted by one Assistant Political Agent.

Administratively the district is divided into following sub divisions, tehsils and sub tehsils: -

Name of Sub-Division	Tehsils/Sub-Tehsils
1. Nushki	1. Nushki Tehsil
	2. Dak Sub-Tehsil
2. Dalbandin	1. Dalbandin Tehsil (Tribal Area)
	2. Chagai Sub-Tehsil(Tribal Area)
3. Taftan	1. Nokundi Tehsil
	2. Taftan Sub-Tehsil

All nation-building departments work in co-operation/liaison with Political Agent. The P.A is an Ex-officio member of all the important committees and forums in the district. Rather in most of the cases his function is to supervise the progress of all development activities carried out by the line departments on the district.

District Chagai is divided into two areas "A" and "B" for the purpose of administration. Except Nushki town area and Dalbandin town area, which falls in "A" area, the larger area of the district falls in "B" area? In "A" area regular police force exists. There are three police stations situated as Nushki, Dalbandin and Saindak, headed by one Deputy Superintendent of Police (DSP). The police force comes under Superintendent of Police (SP) Kalat. In "B" area this police force does not exist and all "B" area is controlled by levies. Levy is a conventional force for maintenance of law and order in "B" area. This was initiated during British rule and continues even today. Local people of the area are employed according to their quota in their area and are controlled by the Political Agent.

The ranks of levies are Risaldar Major, Risaldar, Jamadar, Daffadar, Havaldar, Sowbedar and footmen etc. Usually the levies are effective in dealing with the law and order situation in the district, as they are well aware of the tribal set-up. However, in case they could not cope with the situation, the Political Agent, to help Chagai administration calls in "Chagai Militia". "Chagai Militia" is a para-military force coming under the Federal interior Ministry. They also control smuggling activities across the border.

The overall law and order situation in the district is good in the district, except that smuggling is taking place. This is because the district touches the border-areas of Iran and Afghanistan and the smugglers are well aware of the routes to deceive the custom officials. In Chagai district revenue is collected mainly through the district council and the provincial government, However, Political Agent is responsible for collection of revenue in the district. Income Tax and custom duty are in the jurisdiction of the Federal Government. Justice is administered through regular - as well as through Qazi Courts. The Court of Session Judge has been established in the year 1995, and the only Session Judge working in the district is posted at Nushki. A Qazi Court, who deals with civil matters only, has been working at Dalbandin for the last 12 years.

Previously the District Magistrate and the Sub-Divisional Magistrate had judiciary powers but now the administration and the judiciary are separate. Travelling can be done freely in the area as buses and other traffic ply on the road connecting Quetta with Taftan which is a town on the border between Pakistan and Iran. Both local and foreigners move freely during day and night between Quetta and Taftan, since this is the main RCD road connecting Pakistan via Iran to many countries of the world specially Europe.

1.6 HEALTH

The break-up of the Health services provided in Chagai district by the government is as under.

1) District HQ. Hospital, Nushki	01
2) Total Rural Health Centres	02
3) Total Basic Health Units	21
4) Total Civil Dispensaries	23
5) Total School Health Services unit	01
6) Total Mother and Child Health Centres (MCHs)	04

Source: Balochistan Education Management Information System. (BEMIS)

There was one intermediate Boys College in Chagai district, which is upgraded to degree level. There is no Girls College in the district, but the male lecturers and assistant professors of the Boys College at Nushki hold the classes for girls in the evening in a girl's high school.

1.8 IMPORTANT/HISTORICAL PLACES

The important features of archaeological interest in the district are the remains of ancient forts, karezes, dams and cupolas. Their history is not known and the inhabitants ascribe them. In Dalbandin Tehsil there are ruins of several cupolas in the neighbourhood of Padag and Zarala.

1.8.1 Shrines/Ziarats in the District

There are several well-known shrines in the district. The most important of these are: - 1, The shrine of Sayyad Bala Nosh near Chagai. 2, Sher Jan Agha near Keshingi. 3, Pir Sultan. 4, Sheikh Hussain. 5, Sayyad Khawaja Ahmed etc. The Ziarat Ghaibi, Zinda Pir and Chil Ghazi situated in Nushki are also famous.

1.8.2 Ras Koh

At 3:16 P.M on May 28, 1998, deep in the heart of Balochistan a lucky Pakistani pushed a button-adding a new chapter to nuclear history. May 28 has gone down in our national history as the most important event, only second to our independence. In short, May 28 blessed the Pakistani nation with a new vigour and new confidence. This day a years ago Pakistan detonated its atomic devices at Chagai in Ras koh and became the first Muslim atomic state of the world. Now this day will be celebrated as Yaum-e-Takbir. The naming of the day as Yaum-e-Takbir is a most happy choice.

1.8.3 Saindak Metal Project

Saindak Metal Project is one of the largest projects in Balochistan. The project is almost completed. The project will prove a milestone in accelerating the development of Balochistan. An isolated part of Chagai district will be developed into a new city.

1.8.4 Khaisar Valley

Khaisar valley is an important picnic spot for the local people near Nushki. There is also some other picnic spots around Nushki, which are not well known due to lack of tourism facilities.

BROAD ANALYSIS OF POPULATION CENSUS DATA

2 BROAD ANALYSIS OF POPULATION CENSUS DATA

2.1 POPULATION SIZE GROWTH AND DISTRIBUTION

2.1.1 Population Size and Growth

The Population of Chagai district, was 202.56 thousands in 1998 as compared to 120.46 thousands in 1981, recording an increase of 68.16 percent during 17 years i.e. 1981-98. If we compare intercensal increase, a substantially high increase of 84.47 percent was observed during 1972-81 in comparison to 58.26 percent during 1961-72 and 18.08 percent during 1951-61. The population of the district has increased at an accelerated rate showing as much high increase as 479.57 percent during the last 47 years i.e., 1951-98.

The average annual growth rate of Population in the district from census to census is also showing very inconsistant trend. It has declined to 3.10 percent during intercensal period 1981-98 against 7.51 percent during 1972-81 and 4.01 percent in 1961-72. Although, the rate of growth of Population has come down considerably, it is still, high enough and the population of the district will double in next 23 years if it continues to grow at this rate.

Table 2.1 Shows the population and intercensal increase since 1951.

Fig: 2.1 Presents the population of censuses since 1951.

Fig: 2.2 Demonstrates the annual average growth rate of population during intercensal periods.

TABLE 2.1 POPULATION AND INTERCENSAL, INCREASE SINCE 1951

Description	1951	1961	1972	1981	1998
Population (in Thousands)	34.95	41.26	65.30	120.46	202.56
Intercensal Increase (Percent)	-	18.08	58.26	84.47	68.16
Cumulative Increase (Percent)	-	18.05	86.84	244.66	479.57
Average Annual Growth Rate (Percent)	-	1.69	4.01	7.51	3.10

Fig : 2.1

CHAGAI DISTRICT

POPULATION SINCE 1951

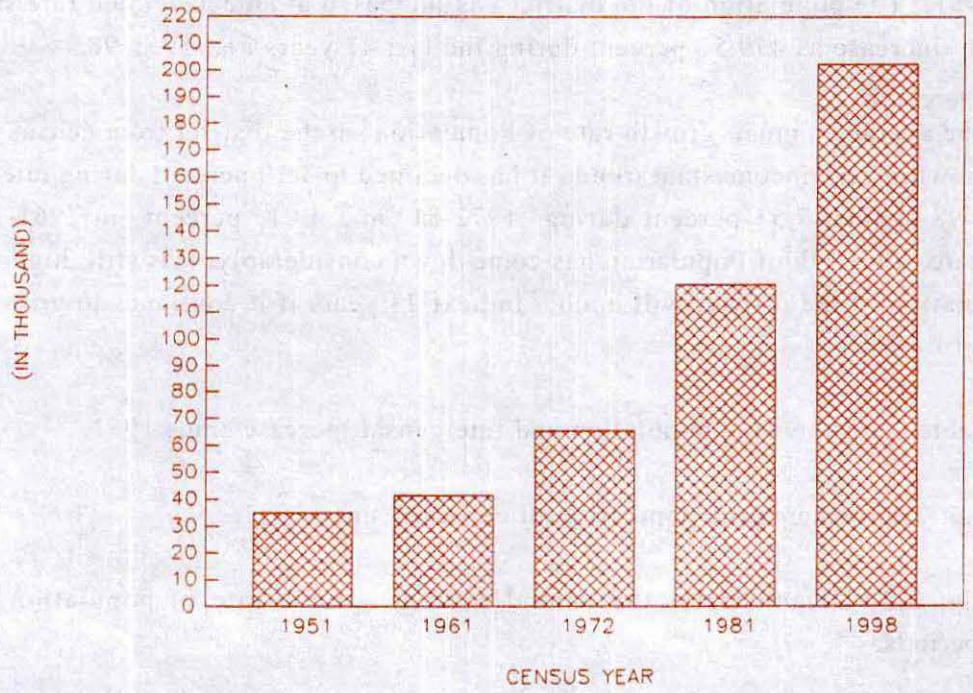

Fig : 2.2

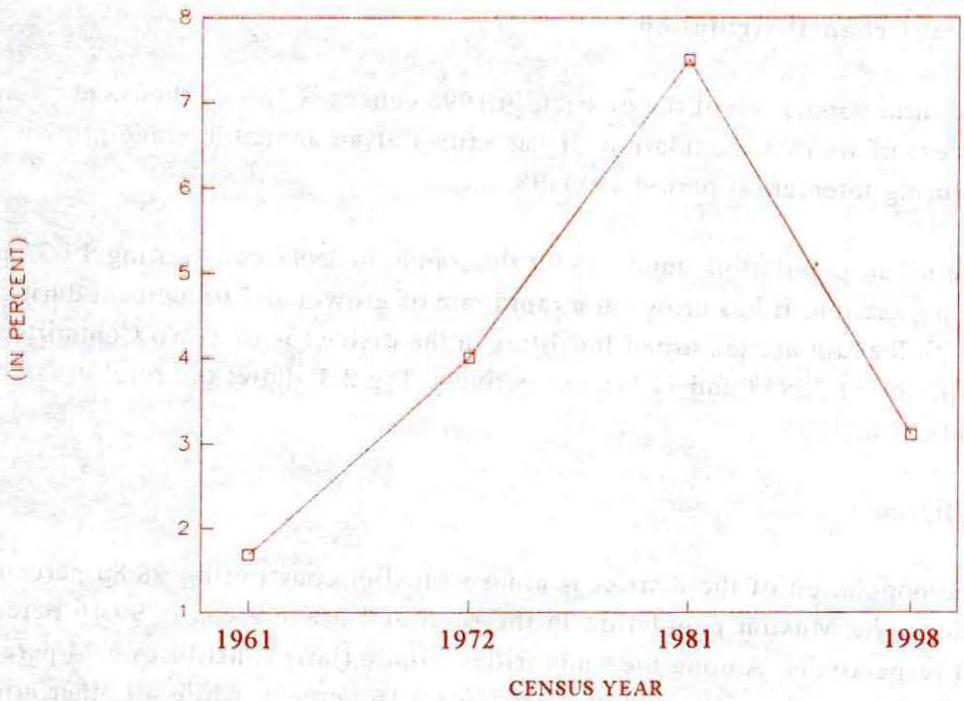
CHAGAI DISTRICT

INTERCENSAL AVERAGE ANNUAL GROWTH RATE



The Chagai district consists of three sub-divisions-Dalbandin, Nushki and Taftan. The Population of Dalbandin sub-division is 82.84 thousands in 1998 while that of Nushki and Taftan sub-divisions is 98.03 and 21.70 thousands respectively. The area of the district is 50545 square kilometers with a population density (persons per square kilometre) is only 4 in 1998 as compared to 2.38 in 1981.

2.1.2 Household Size

The average household size of the district is 6.7 in 1998. A sharp contrast exists in the household size between rural and urban areas at 9.53 and 6.41 respectively, implying more congestion in urban area due to the increasing pressure of urbanization over the time.

2.1.3 Rural/Urban Distribution

The rural population of the district, in 1998 census is 166.67 thousands, constituting 82.28 percent of its total population. It has grown at an annual average growth rate of 2.52 percent during intercensal period 1981-98.

The urban population stands 35.90 thousands in 1998 constituting 17.72 percent of the district population. It has grown at a rapid rate of growth at 7.03 percent during 1981-98. Nuski and Dalbandin are the urban localities in the district with Town Committee status having a Population of 32948 and 11948 respectively. Fig 2.3 shows the rural/urban proportion of population in, 1998.

2.1.4 Religion

The population of the district is almost Muslim constituting 98.80 percent of its total population. The Muslim population in the rural and urban areas is 99.61 percent and 95.05 percent respectively. Among the minorities, Hindu (jati) constitutes 0.74 percent and scheduled caste 0.22 percent followed by Christians 0.16 percent, while all other minorities 0.08 percent in the total population of the district. Table 2.2 provides percentage distribution of population by religion.

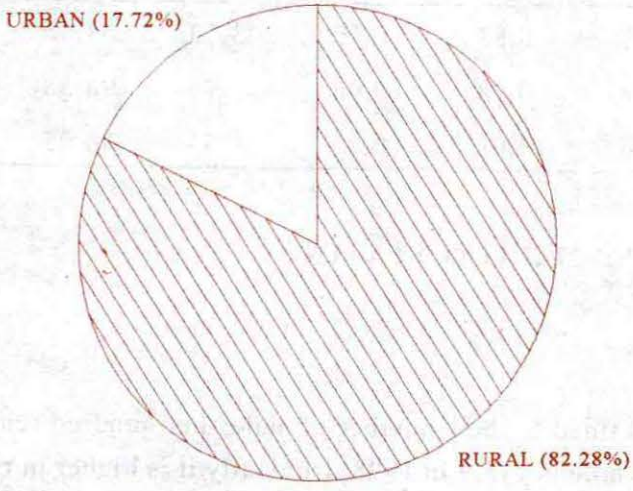
TABLE: 2.2 PERCENTAGE OF POPULATION BY RELIGION AND RURAL/URBAN AREAS, 1998

Religion	All Areas	Rural	Urban
Muslim	98.80	99.61	95.05
Christian	0.16	0.04	0.70
Hindu (Jati)	0.74	0.05	3.95
Qadiani (Ahmadi)	0.03	0.02	0.07
Scheduled Caste	0.22	0.26	0.02
Others	0.05	0.01	0.21

Fig : 2.3

CHAGAI DISTRICT

RURAL-URBAN POPULATION, 1998



2.1.5 Mother Tongue

Balochi is the most commonly spoken mother tongue of the population in the district as reported by 93.65 percent followed by Pushto at 3.14 and Punjabi at 0.83 percent Saraiki and Urdu is spoken by 0.50 and 0.33 percent respectively. Sindhi 0.15 and others are spoken by 1.41 percent of the district population. Table 2.3 shows the distribution of population by mother tongue.

TABLE 2.3 PERCENTAGE OF POPULATION BY MOTHER TONGUE AND RURAL/URBAN AREAS, 1998

Area	Urdu	Punjabi	Sindhi	Pushto	Balochi	Siraiki	Others
All	0.33	0.83	0.15	3.14	93.65	0.50	1.41
Rural	0.08	0.58	0.02	1.75	96.58	0.22	0.77
Urban	1.50	1.98	0.75	9.57	80.05	1.79	4.38

2.2 SEX, AGE AND MARITAL STATUS

2.2.1 Sex Ratio

Sex ratio is defined as the " number of males per hundred females ". The sex ratio for Chagai district as a whole is 115.9 in 1998. Ironically it is higher in rural areas at 116.4 as against 113.7 in urban areas.

The ratio varies significantly at various age groups. It rises sharply from 109.08 at ages 0-4, to 122.20 at ages 10-14 thereafter it reflects an irregular trend and ranges from 115.11 to 126.77 from ages 15-19 to 55-59. It shoots up at 133.07 between ages 60-64 and touches the peak (162.05) at high age group 65-69. It again started declining at 153.73 and 100.23 at advanced ages 70-74 and 75 + respectively which reflects a peculiar demographic trend. Uneven distribution of population by sex at various age groups may be the impact of number of factors such as age misreporting or under reporting of females or over reporting of males by the respondents or lack of probing about their ages during enumeration.

2.2.2 Age Structure

The age structure of the district indicates that the population below 15 years, is 48.14 percent; of which 16.92 percent is below 5 years of age including 1.89 percent infants. The Population of 65 years and above is 2.27 percent. Thus the population of working age groups (15-64 years), has emerged at 49.59 percent with a high age dependency ratio of 98.35 percent.

The age dependency ratio is still higher in urban areas at 102.23 percent as compared to the over all ratio in the district as well as in rural areas at 97.54 percent. It is higher for males as compared to that for females, both in rural and urban areas

The adult population, 18 years and above comprises 47.11 percent of the total population (47.53 percent among males and 46.53 percent among females). The percentage of population eligible to vote, 21 years and above, is 37.95. The population by important age groups is given in table 2.4.

TABLE 2.4 PERCENTAGE OF POPULATION BY AGE GROUPS SEX AND RURAL/URBAN AREAS 1998

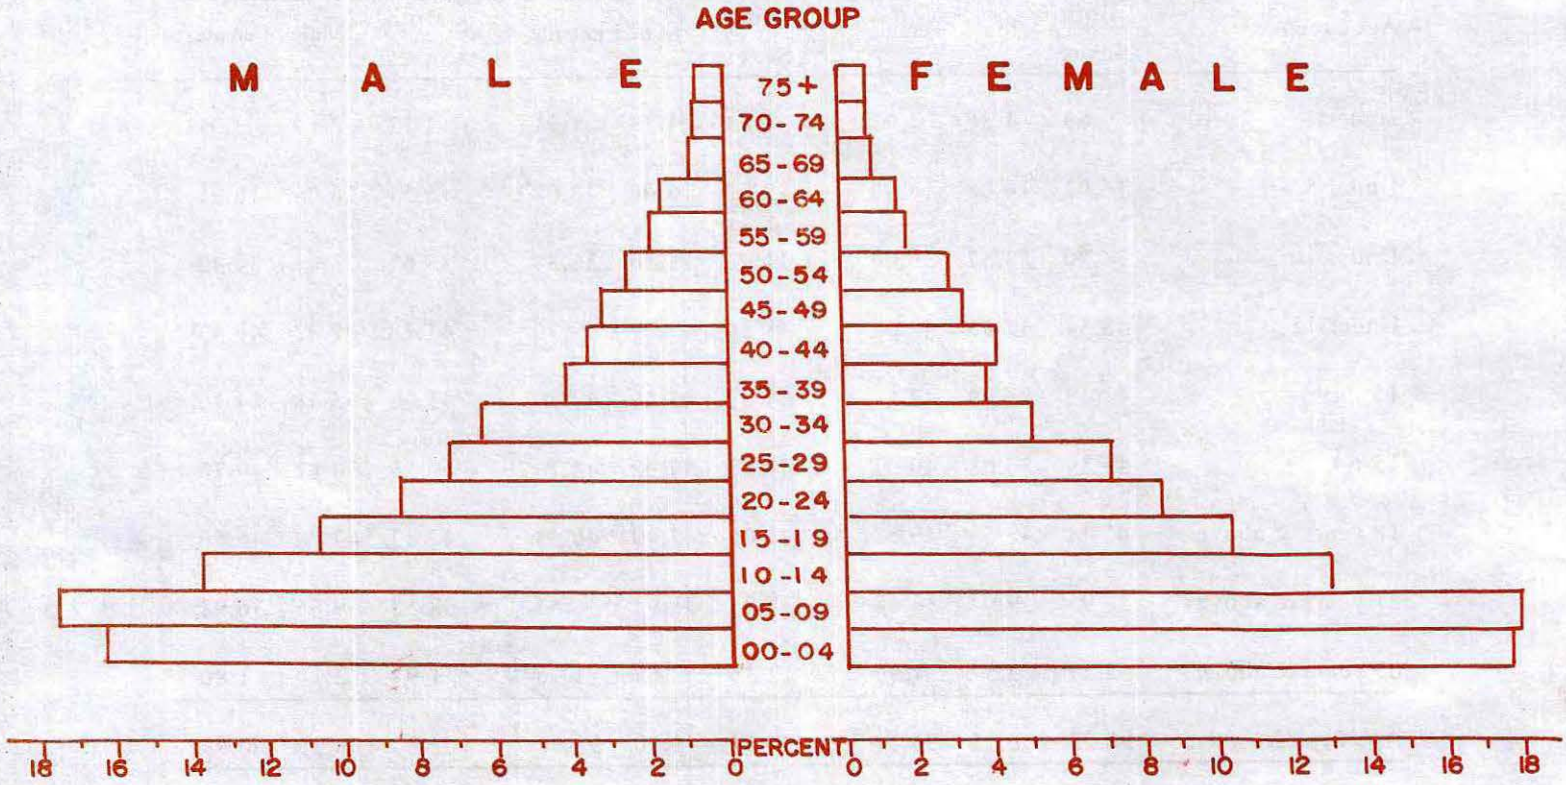
Age Group	All Areas			Rural			Urban		
	Both Sexes	Male	Female	Both Sexes	Male	Female	Both Sexes	Male	Female
Under 1	1.89	1.86	1.93	1.84	1.79	1.91	2.12	2.19	2.01
Under 5	16.92	16.08	17.90	17.01	16.08	18.08	16.54	16.06	16.91
Under 10	34.70	33.57	36.00	34.92	33.70	36.34	33.67	33.01	34.42
Under 15	48.14	47.35	49.06	48.28	47.41	49.30	47.48	47.02	47.43
15 - 49	43.42	43.90	42.87	43.07	43.56	42.50	45.06	45.48	44.10
15-64	49.59	50.08	49.01	49.38	49.92	48.74	50.55	50.82	49.70
18 years & above	47.11	47.53	46.53	47.05	47.49	46.53	47.42	47.70	46.59
21 years & above	37.95	39.04	36.68	37.81	38.91	36.53	38.58	39.65	36.98
65 years & above	2.27	2.57	1.93	2.34	2.67	1.96	1.97	2.10	1.80
Age Dependency Ratio	98.35	100.35	96.11	97.54	99.70	95.08	102.23	103.35	100.97

The district has a broad based population pyramid, showing a high proportion of population at younger ages, under 5 years at 16.92 percent, (16.08 percent among males and 17.90 percent among females). The shape of the pyramid is becoming narrower at advanced age groups.

High distortion in the percentage distribution of population at various age groups may be the impact, either of age mis-statement by respondents or over/under enumeration of particular sex. Fig. 2.4 demonstrates the age sex structure in the district.

Fig: 2.4

POPULATION PYRAMID CHAGAI DISTRICT
AGE AND SEX STRUCTURE 1998



2.2.3 Marital Status

All individuals aged 15 years and above enumerated in the 1998 Population Census were classified according to their marital status; namely, 'married' 'never married' 'widowed' and 'divorced'. Out of them 31.38 percent are never married, 64.73 currently married, 3.79 widowed and negligible percentage, 0.10 percent, divorced. The never married amongst males are 37.30 percent as compared to 24.29 percent amongst females. The mean age at marriage also varies for males and females which is 24.72 years for males as against 20.93 years for females. Implying, that the male marry at comparatively higher age than that of females.

2.2.4 Females of Reproductive Ages by Marital Status

Of the total female population in the district, 42.87 percent is in the reproductive ages, (15 - 49 years), the percentage is relatively higher in urban areas at 44.58 as against 42.50 in rural areas. Among the females in reproductive ages, 27.96 percent are never married, 69.70 percent currently married, 2.22 percent widowed and only 0.12 percent divorced.

About 9 percent of the ever married women of reproductive ages are found without any child, 10.41 percent have 1 child, 11.51 percent 2 children, while 10.97 percent have reported 3 children and 16.48 percent 4 children. However, 46.89 percent of the ever married women have reported 5 or more children.

2.2.5 Disabled Persons

The disabled persons, 7843 in all, constitute 3.87 percent of the total population in the district. Among the disabled persons, 56.85 percent are males against 43.15 percent females. The percentage of crippled among the total disabled persons is the highest at 18.95, (18.12 percent among males and 20.04 percent among females), followed by those having more than one disability 5.39 percent, mentally retarded 5.13 percent and blinds 5.04 percent. The percentage of insane is 4.45 while 56.27 percent of the total disabled population have reported some other categories of disability.

2.3 LITERACY AND EDUCATIONAL ATTAINMENT

2.3.1 Literacy

Literacy, in census 1998, is defined as the "ability to read a newspaper and write a simple letter in any language". It is measured in terms of " literacy ratio"; computed as percentage of literate persons among the population aged 10 years and above.

Literacy ratio in Chagai district is at 26.99 percent in 1998. It varies significantly for males at 37.99 percent in contrast to 13.76 percent for females.

TABLE 2.5 LITERACY RATIOS BY SEX AREA, 1998

Area	Both Sexes	Male	Female
All	26.99	37.99	13.76
Rural	22.95	33.55	10.10
Urban	45.42	58.64	30.07

A high disparity in the literacy level appears by area and gender. The literacy ratio in urban area at 45.42 percent which is almost double than that in rural areas at 22.95 percent. A vast sex differential exists in favour of males, in urban as well as rural areas as the male literacy level is almost double compare to that of females in urban areas and more than three times in rural areas, however the gap between two ratios is wider at 28.57 percentage points in urban in contrast to 23.45 percentage points in rural areas. High illiteracy of females may be the impact of their negligence in the field of education like other social sectors which needs to be improved through effective measures for the uplift of females. Figure 2.5 illuminates the overall literacy ratio by sex and area.

2.3.2 Educational Attainment

A person who has attained any educational level among the population aged 10 years and above is treated as an educated. The educated persons in the district are only 26.47 percent including those below primary; the remaining 73.53 percent either attained no educational level or have never attended any educational institution. A large variation exists in the ratio of educated persons by sex and area. The percentage of educated males is 37.47 and for females 13.24. It is 22.41 for rural as against 44.96 for urban areas. Table 2.6 gives the ratio of educated persons.

TABLE 2.6 PERCENTAGE OF EDUCATED PERSONS BY SEX AND RURAL/URBAN AREAS, 1998

Area	Educated persons as percentage of population 10 years and above		
	Both Sexes	Male	Female
All Areas	26.47	37.47	13.24
Rural	22.41	33.02	9.56
Urban	44.96	58.14	29.65

2.3.3 Enrollment Ratio

The enrollment ratio, of the district measured as percentage of students to population of ages 5-24 years, is 27.68 percent. It is higher for males i.e. 34.24 percent compared to 20.05 percent for females. The enrollment ratio is higher in urban areas at 44.50 percent as against 24.04 percent in rural areas. A significant difference appears between male and female enrollment ratios both in rural and urban areas. The ratio of male enrollment is about double to that of females in rural areas but this gape is closer in urban areas i.e. of eight percentage points.

Table 2.7 shows enrollment ratios.

TABLE 2.7 ENROLLMENT RATIO BY SEX AND RURAL/URBAN AREAS, 1998

Area	Both Sexes	Male	Female
All Areas	27.68	34.24	20.05
Rural	24.04	30.11	16.91
Urban	44.50	53.69	45.67

2.3.4 Level of Education

Of the total educated persons in the district, 27.43 percent have passed primary, 18.04 middle, and 16.20 matriculation. After matriculation, the percentage falls to 5.02 for intermediate, 2.62 for graduates and 1.33 for post graduates and 3.74 percent diploma/certificate holders including others, indicating weak education base like other districts in the province.

2.4 MIGRATION

2.4.1 Migration

Migration data covers movement of population in terms of shifting the residence from one district to another in the same province and from one province to another. It does not cover persons who changed their place of residence within their own district.

2.4.2 Life-time Migrants

The total lifetime in-migrants in the district are 6586 (3.25 percent of the total population). They are 67.26 percent in rural and the remaining 32.74 percent in urban areas, the male and female lifetime in-migrants are 78.74 and 21.26 percent respectively. The persons who have migrated into the district during the last 5 years i.e. after March, 1998, are 38.08 percent, while 29.24 percent had migrated earlier to 5 years but after 1988. The remaining 32.68 percent have migrated in 10 years earlier.

The majority of life time in-migrants 52.73 percent, moved for employment/transfer, 16.31 percent migrated with head, 6.18 percent due to business, 5.31 percent migrated into the district as a result of marriage and 1.61 percent migrated for study. Only 0.38 percent returned home while 17.48 percent migrated for other reasons.

Majority of immigrants i.e., 69.97 percent belong to the other Provinces while 16.70 percent migrated from within the province. A little batch of 0.20 percent migrated from AJK/NA and 6.65 percent repatriated to home from other countries while 6.48 had not reported their place of previous residence.

TABLE 2.8 PERCENTAGE OF MIGRANTS FROM OTHER PROVINCE/WITHIN PROVINCE BY RURAL/URBAN, 1998

Place of previous Residence	Migrants By Residence		
	All Areas	Rural	Urban
All Areas	100	100	100
(Within Province)	16.70	6.28	38.13
Other Provinces	69.97	80.11	49.12
AJK/NA	0.20	0.25	0.09
Others Countries	6.65	5.53	8.95
Not Reported	6.48	7.83	3.71

2.5 ECONOMIC CHARACTERISTICS

2.5.1 Economically Active Population

Economically active population comprises the persons aged 10 years and above of either sex who are engaged in some work for pay or profit including unpaid family helpers as well as the un-employed; not working but looking for work and laid off during the reference period.

Economically active class among the population aged 10 years and above comprises 46187 persons (98.51 percent males and 1.49 percent females). It constitutes 22.80 percent of the total population in 1998 which is termed as crude participation or activity rate; the remaining, 77.20 percent economically inactive population comprises 34.70 percent children below 10 years age, 29.85 percent domestic workers including 29.14 percent housewives, 8.11 percent students and 4.54 percent all other categories. Table 2.9 provides the percentages of population by economic category.

TABLE 2.9 PERCENTAGE OF POPULATION BY ECONOMIC CATEGORY

Economic Category	All Areas			Rural			Urban		
	Both Sexes	Male	Female	Both Sexes	Male	Female	Both Sexes	Male	Female
Economically active Population	22.80	41.84	0.73	23.68	43.43	0.69	18.74	34.39	0.95
Economically inactive Population	77.20	58.16	99.27	76.32	56.57	99.31	81.26	65.61	99.05
Children below 10 years	34.70	33.57	36.00	34.92	33.70	36.34	33.67	33.01	34.42
Students	8.11	14.89	0.25	7.20	13.20	0.22	12.32	22.83	0.38
Domestic work	29.85	1.32	62.91	29.69	1.38	62.63	30.57	0.99	64.20
All others	4.54	8.38	0.11	4.51	8.29	0.12	4.70	8.78	0.05
* Activity Rate	34.92	62.99	1.15	36.38	65.50	1.08	28.26	51.33	1.45
Un-employment rates	35.57	36.09	1.16	35.98	36.45	1.33	33.16	33.95	0.63

* Refined activity rate.

The refined activity rate as percentage of total economically active persons to the population aged 10 years and above is worked out at 34.92 percent for the district. A high variation exists between male and female activity or participation rates at 62.99 and 1.15 percent respectively.

The activity rate is higher in rural areas at 36.38 percent as against to 28.26 percent in urban areas. Similarly, the activity rates, for males is higher in rural area in comparison to the corresponding rates in urban areas as reflected in table 2.9.

A very high sex differential exists in the activity rates in favour of males i.e. 64.42 percentage points in rural and 49.88 percentage points in urban areas. Low activity participation of females in economic can be attributed to their engagement in house keeping work as well as to cultural myelin to some extent, however, their role as unpaid family helper cant be ignored in farming and other economic activities particularly in rural areas.

2.5.2 Un-employment

The un-employment rate is the percentage of persons un-employed the including those not worked but looking for work and laid off to the total economically active population in the district. The un-employment rate of the district is 35.57 percent. It varies for males and females as well as for rural and urban areas. The un-employment rate for males is 36.09 percent and for females 1.16. It is 35.98 percent in rural and 33.16 in urban areas. A clear sex differential appears regarding un-employment rates within and across rural urban boundaries but with varying degree of percentage.

2.5.3 Employed Population by Occupation

Of the total employed population in the district 33.23 percent is in the major occupation group-9 "Elementary Occupations ". The next higher occupation Group comprising 25.53 percent is of "Skilled Agricultural and Fishery Workers" followed by 20.24 "Service workers and Shop and Market Sales Workers" 8.30 percent "Plant and Machine Operators and Assemblers while Professionals and Technicians and associate professionals" sharing 3.40 percents each.

The pattern of occupational groups varies significantly in the rural and urban areas. In rural areas most of the employed persons 33.32 percent are associated with Group-9 "Elementary Occupations" followed by "Skilled Agricultural and Fishery Workers" at 29.08 percent and "Service Workers and Shop and Market Sales Workers" at 19.52 percent. In urban areas the 32.76 percent employed population is engaged in "Elementary Occupations", "Service Workers and Shop and Market Sales Workers" at 24.31 percent, "Plant and Machine Operators and Assemblers" 9.52 percent and "Professionals" at 8.21 percent.

2.5.4 Employed Population by Industry

About 34 percent of the working population is engaged in "Community Social and Personal Services" followed by "Agriculture, Forestry, Hunting and Fishing" at 20.33 remaining in other non-agricultural industries. In rural areas the most important industry are "Community, Social and Personal services" and "Agriculture, Forestry, Hunting and fishing" which accounts for 56.11 percent. In urban areas 37.76 percent of the working population is associated with the "community, social and Personal Services" followed by 21.66 percent in "Whole Sale and Retail Trade and restaurants and Hotels", "Construction" at 14.83 percent and " Transport, storage and Communication" at 10.38 percent.

2.5.5 Employed Population by Employment Status

Among the employed population 52.61 percent is self-employed, 31.11 percent working as Government Employee 11.23 percent working as Private and Autonomous Employee and 4.11 percent as Unpaid Family Helper. Table 2.10 gives percentage of working population by employment status.

The pattern of working population by employment status seems to be similar in rural and urban areas. However, in rural areas, the majority; 53.32 percent, is Self Employed followed by 30.77 percent Government Employee, Private Employees 9.86 percent and 4.69 percent as Un-paid Family Helpers. Similarly, in urban areas 48.63 percent are Self Employed followed by 33.00 percent Government Employees, 12.72 percent Private Employees and 2.80 percent Employer and only 0.87 percent un-paid family helpers.

TABLE 2.10 EMPLOYED POPULATION BY EMPLOYMENT STATUS, SEX AND RURAL/URBAN AREAS 1998

Employment Status	All Areas			Rural			Urban		
	Both Sexes	Male	Female	Both Sexes	Male	Female	Both Sexes	Male	Female
All categories	100	100	100	100	100	100	100	100	100
Self employed	52.61	53.23	25.88	53.32	53.93	24.38	48.63	49.29	30.82
Employee (Govt.)	31.11	31.13	30.44	30.77	30.94	23.03	33.00	32.20	54.72
Employee (Auto.)	0.94	0.94	1.32	0.76	0.75	1.34	1.98	2.01	1.26
Employee (Private)	10.29	10.37	6.91	9.86	9.96	5.37	12.72	12.75	11.95
Employer	0.93	0.96	-	0.60	0.61	-	2.80	2.90	-
Un-paid Family Helper	4.11	3.38	35.44	4.69	3.82	45.87	0.87	0.85	1.26

2.6 IMMUNIZATION

The question about immunization has been included in the 1998 population census for the first time to evaluate the vaccination programme launched by the Government from time to time. It is encouraging to note that 63.08 percent of the children below 10 years age have been reported in 1998 census as vaccinated, while 13.67 percent as not vaccinated leaving the rest i.e. 23.25 percent as not known. The percentage of vaccinated among males and females is 32.32 and 30.76 respectively. The percentage of vaccination done in urban and rural areas is very close to each other i.e., 63.03 and 63.31 percent respectively. Similarly for male and female children, with a little higher margin in respect of male children. Table 2.11 gives detail of immunization by sex and area.

TABLE 2.11 PERCENTAGE OF POPULATION (LESS THAN 10 YEARS) BY IMMUNIZATION, SEX AND RURAL/URBAN AREAS, 1998

Area	Population Under 10 years	Both Sexes			Male			Female		
		Vacci-nated	Not Vacci-nated	Not Known	Vacci-nated	Not Vacci-nated	Not Known	Vacci-nated	Not Vacci-nated	Not Known
All areas	70,285	63.08	13.67	23.25	32.32	7.26	12.37	30.76	6.41	10.89
Rural	58,199	63.03	15.24	21.73	32.24	8.14	11.51	30.79	7.10	10.21
Urban	12,086	63.31	6.08	30.61	32.69	3.00	16.47	30.62	3.08	14.14

2.7 NATIONAL IDENTITY CARD

The question about national Identity Card was asked in the 1998 population census for the first time to see the coverage element of I. D. Cards. The question about NIC was asked from population aged 18 years and above: According to the response to the question it was found that 64.01 percent of population aged 18 years and above had obtained NIC. The percentage of card holders in general was 72.62 for males and 53.85 for females.

The variation of gender and area shows that 71.17 percent of rural males have obtained NIC as compared to 51.20 percent females. The coverage in urban areas is, however, higher at 79.37 percent for males as against 65.85 percent for females. Table 2.12 gives necessary details by sex and area.

TABLE 2.12 PERCENTAGE OF POPULATION (18 YEARS AND ABOVE) HOLDING NATIONAL IDENTITY CARD BY AGE, SEX AND RURAL/URBAN AREAS 1998

Area	Both Sexes			Male			Female		
	Population under 18+	N.I.Card Obtained	N.I.Card Not Obtained	Population under 18+	N.I.Card Obtained	N.I.Card Not Obtained	Population under 18+	N.I.Card Obtained	N.I.Card Not Obtained
All Area	95431	64.01	35.99	51681	72.62	27.38	43750	53.85	46.15
Rural	78410	62.05	37.95	42571	71.17	28.83	35839	51.20	48.80
Urban	17021	73.09	26.91	9110	79.37	20.63	7911	65.85	34.15

PART - III
BROAD ANALYSIS OF HOUSING CENSUS DATA

3 BROAD ANALYSIS OF HOUSING CENSUS DATA

3.1 TYPE OF HOUSING STOCK

3.1.1 Level of Congestion-Persons and Rooms

More than 56 percent of the housing units in Chagai district are single room houses. The percentage of single room houses is about six times higher in rural areas in comparison to urban areas. On the contrary, the percentage of housing units with 2 to 4 rooms is higher in urban area at 74.47 percent as against 53.71 percent in rural areas. Similarly, the percentage position of houses with 5 or more rooms is nearly four times in urban as compared to that in rural areas. The number of rooms per housing unit is also higher in urban areas at 3.2 as against 2.00 in rural areas. However, the level of congestion (persons per room) is slightly higher in rural areas at 3.15 in contrast to 2.91 in urban and 3.05 in the district. The level of congestion in terms of persons per housing unit is however higher in urban areas at 9.3 in contrast to 6.3 in rural areas requiring construction of more housing units with additional rooms to reduce the level of congestion. Table 3.1 gives the indices of congestion in 1998 census.

TABLE 3.1 INDICES OF CONGESTION IN 1998 CENSUS

Indices of Congestion	1998		
	All Areas	Rural	Urban
Persons per Housing Unit	6.7	6.3	9.3
Persons per room	3.05	3.15	2.91
Rooms per Housing Unit	2.2	2.00	3.2
Housing Units with one room (percentage)	37.13	41.45	7.28
Housing Units with 2-4 rooms (percentage)	56.34	53.71	74.47
Housing Units with 5 rooms and more (percentage)	6.53	4.84	18.24

3.1.2 Nature of Tenure

There were 29746 housing units in the Chagai district in 1998 census, 25981 (87.34 percent) in rural and 3765 (12.66 percent) in urban areas. As classified by tenure, 93.34 percent of the total housing units were owned. The percentage of ownership in urban areas was significantly higher at 95.95 as against 75.35 in rural areas. similarly the percentage of rented housing units in urban is fairly higher than that in rural areas. However, in rural areas 2.61 percent housing units were rent free as compared to the corresponding percentage of 6.48 in urban areas. Table 3.2 provides the data by nature of tenure.

TABLE 3.2 NATURE OF TENURE (PERCENTAGE) BY RURAL/URBAN 1998

Tenure	All Areas	Rural	Urban
All Types	100	100	100
Owned	93.34	95.95	75.35
Rented	3.56	1.44	18.17
Rent Free	3.10	2.61	6.48

3.1.3 Period of Construction

Of the total owned housing units (27766) in the district 59.75 percent were built before 10 years, 27.98 percent during the last 5-10 years, 11.78 percent during the last five years and only 0.49 percent houses were found under construction. The percentage of houses constructed in urban areas before 10 years was marginally higher at 77.93 as compared to that in rural at 57.68. However, the percentage of houses constructed during last 5-10 years was higher in rural at 29.62 as against 13.61 in rural areas.

3.1.4 Construction Material - Outer Walls

The quality indices of construction of outer walls are not that high in the district as to be considered up to the mark. There is marked deviation in the qualitative indices of construction between urban and rural areas. In urban areas above one fourth percent of the housing units have the standard pucca walls made of baked bricks/blocks and stones with cement bonding more than two third have walls of un-baked/bricks and earth bonded about 6 percent have wooden walls while other categories are only 0.19 percent. In contrast,to this rural areas have about 4 percent of the walls in the standard category of baked bricks/blocks and stone with cement bonding and about 84 percent of walls are made of un-baked bricks with mud bonding. The wooden category is about 6 percent and the un-specified category of material used is 6.67 percent. Table 3.3 gives details of construction material used in the outer walls.

TABLE 3.3 MATERIAL USED IN OUTER WALLS (PERCENTAGE) BY RURAL/URBAN 1998

Construction Material	All Areas	Rural	Urban
All categories	100.0	100.0	100.0
Baked Bricks/Blocks/Stones	6.34	3.64	24.99
Unbaked Bricks/Earth Bond	82.11	83.97	69.24
Wood/Bamboo	5.70	5.72	5.58
Others	5.85	6.67	0.19

3.1.5 Construction Material-Roofs

The standard of construction of roofs significantly differs in rural and urban areas as reflected from table 3.4. As regards the Categories, about 90 percent of the housing units in rural and above four fifth in urban areas have used baked bricks supported by girder or wooden log/bamboo in the construction of roofs. However, in urban areas 13.33 percent houses have used RCC/RBC in the construction of roofs, percentage use of this category in rural is at 1.21. The use of Cement/iron sheets is 7.20 percent in urban areas as against 1.43 percent in rural areas. However, the use of unspecified material in the construction of roofs is marginally higher at 7.76 percent in rural areas as compared to only 0.56 percent in urban areas.

TABLE 3.4 MATERIAL USED IN ROOFS (PERCENTAGE) BY RURAL/URBAN-1998

Construction Material	All Areas	Rural	Urban
All Categories	100.00	100.00	100.00
RCC/RBC	2.74	1.21	13.33
Cement/Iron Sheet	2.16	1.43	7.20
Wood/Bamboo	88.25	89.60	78.91
Others	6.85	7.76	0.56

3.2 HOUSING FACILITIES

3.2.1 Source of Drinking Water

The easy access to potable/safe drinking water is one of the basic human needs. As per information gathered in 1998 Housing Census, the facility of piped water both inside and outside the houses is available to 36.41 percent of the housing units in the district. The hand pumps, wells and ponds are other common sources of drinking water both in urban and rural areas inside or outside the houses.

In urban areas above 94 percent housing units get piped water, with more than 88 percent inside the houses, in comparison to rural areas at about 28 percent with more than 18 percent inside the houses. The second important source of drinking water both inside and outside the houses is well which fulfill the need of 7.3 percent in rural and about 2 percent houses in urban areas. The use of other sources is amazingly higher in rural at about 14 percent, 22 percent in urban areas. The contribution of hand pump is only i.e. 0.60 percent in rural and 0.27 percent in urban areas. However, the pond is the single largest source of water supply outside the houses which is used by more than 8 percent in rural and only 0.61 percent in urban housing units.

TABLE 3.5 HOUSING UNITS BY SOURCE OF DRINKING WATER (PERCENTAGE) BY RURAL/URBAN, 1998

Source of Drinking Water	All Areas	Rural	Urban
All sources	100.00	100.00	100.00
Inside	34.96	26.88	90.68
Pipe (Nul)	27.81	18.98	88.79
Hand Pump	0.56	0.60	0.27
Well	6.58	7.30	1.62
Outside	65.04	73.12	9.32
Pipe (Nul)	8.60	9.0	5.84
Hand Pump	4.35	4.95	0.21
Well	32.18	36.78	0.45
Pond	7.67	8.70	0.61
Other	12.24	13.69	2.20

3.2.2 Source of Lighting

Electricity, as an important source of lighting, is available to above 30 percent of the housing units in the district, the percentage in urban areas is significantly higher at 73.04 in comparison to rural areas at 24.16 In rural areas about 74 percent of the housing units still use kerosene oil as source of lighting as against only 22 percent in urban areas. The use of other sources for lighting is higher in urban areas at 5.07 percent in contrast to 2.59 percent in rural areas. Table 3.6 provides percentage of housing units by source of lighting.

TABLE 3.6 HOUSING UNITS BY SOURCE OF LIGHTING (PERCENTAGE) BY RURAL/URBAN, 1998

Source of Light	All Areas	Rural	Urban
All Sources	100.00	100.00	100.00
Electricity	30.34	24.16	73.04
Kerosene Oil	66.74	73.26	21.89
Others	2.90	2.59	5.07

3.2.3 Cooking Fuel Used

About 92 percent of the housing units in the district use wood/brush wood as fuel for cooking, the percentage of which is slightly higher in urban at 93.84 percent as compared to 91.14 percent in rural areas. Only 0.99 percent use gas, 4 percent kerosene oil and remaining 4 percent use other sources. The use of gas is significantly higher at 2.23 percent in urban as against only 0.81 percent in rural areas, while Kerosene Oil is used as cooking fuel by 4.33 percent housing units in rural as compared to 3.56 percent in urban areas. Table 3.7 provides percentage of housing units by source of cooking fuel.

TABLE 3.7 HOUSING UNITS BY SOURCE OF COOKING FUEL USED (PERCENTAGE) BY RURAL/URBAN, 1998

Fuel Used	All Areas	Rural	Urban
All Sources	100.00	100.00	100.00
Wood	91.48	91.14	93.84
Kerosene Oil	4.23	4.33	3.56
Gas	0.99	0.81	2.23
Others	3.30	3.73	0.37

3.2.4 Availability of Separate Kitchen, Bath room and Latrine Facilities

In modern living, the provision of kitchen, bath room and latrine is the basic necessity particularly in residential housing units. As per census information, about 27 percent of the housing units have the facility of kitchen, 27 percent of Bath room and about 18 percent of latrine as a separate category in the district whereas the percentage of shared facility is 39, 43 and about 17 percent respectively. About 35 percent houses are still without the facility of kitchen and 30 percent houses are without a bath room. A significant number of i.e. 66 percent of houses still deprived of latrine which is even high in rural at 74.07 percent as compared to 10.92 percent in urban areas. The situation needs a lot of improvement in this regard. The status of urban houses regarding the provision of these facilities is better as about 48 percent units had a separate kitchen, 51 percent a separate bath room and 48 percent an independent latrine. The percentage of shared facilities is also higher in urban than in rural areas. Table 3.8 provides details of availability of housing facilities.

TABLE 3.8 HOUSING UNITS BY KITCHEN, BATH ROOM AND LATRINE FACILITIES (PERCENTAGE) BY RURAL/URBAN, 1998

Housing Facilities	All Areas	Rural	Urban
Kitchen			
All forms	100.00	100.00	100.00

Shared	16.24	12.64	41.09
None	66.07	74.07	10.92

3.2.5 Source of Information

The question about source of information has been asked for the 1st time in the 1998 Census to access the media coverage. Among the total households in the district, 5.31 percent households have access to Television, about 37 percent to Radio and above 14 percent to the Newspapers. In urban areas, about 18 percent housing units use T.V. as sources of information however, its coverage is limited to only 3 and a half percent households in rural areas. The access to Radio as a second important source of information is also marginally higher in urban as compared to urban areas at 52 vs 34 percent houses similarly the availability of news papers is to about 34 percent in urban houses as compared to 12 percent in rural houses. Table 3.9 provides the data about source of information.

TABLE 3.9 HOUSE HOLDS BY SOURCE OF INFORMATION (PERCENTAGE) BY RURAL/URBAN, 1998

Total Area	Households	T.V.	Radio	Newspapers
All areas	29,746	5.31	36.72	14.59
Rural	25,981	3.52	34.46	11.85
Urban	3,765	17.66	52.27	33.47

DEFINITIONS AND CONCEPTS

Urban Areas

All localities which were either metropolitan corporation, municipal corporation, municipal committee, town committee or cantonment at the time of the census, were treated as urban.

Household

A household means a group of persons living together who have collective arrangement for eating. A person living alone was also considered to constitute a household. The distinguishing characteristic of a household is its common cooking arrangement.

Housing Unit

A housing unit means a separate and independent place of abode, inhabited by one household and, if vacant, meant for habitation by one household. It does not necessarily mean a separate building. A building may have one or more housing units. Furthermore, any place not intended for habitation but occupied by a household at the time of census was also treated as a housing unit.

Room

A room is defined as a space in a housing unit having a roof and walls from roof to floor. This includes sleeping, dining, drawing, study, children's and servant's rooms but excludes kitchen, bathroom, latrine, store, balcony, porch and motor garage.

Age

Age is recorded as of the last birthday.

Marital Status

Marital status has been classified into never-married, married, widowed and divorced. Never-married applies to persons who have never been married. Married includes all persons who are at present married and living as husband and wife as well as those married persons living apart but having a living wife/husband. Those couples, whose marriage (Nikah) had been solemnized but giving away ceremony had not taken place, were also treated as married. Widowed applies to a person whose husband or wife was dead but who had not married again. Divorced applies to both divorcer and divorcee, if not remarried.

Religion

Religion is recorded and tabulated as informed by the respondents.

Literate

A person who can read a newspaper and write a simple letter, in any language, is treated as literate.

Field of Education

(a) General Education

It includes educational programmes of primary, middle, matriculation, intermediate and bachelor's degree in arts or science.

(b) Technical/Engineering

It includes engineering educational programmes in the fields of electrical, electronic, industrial, metallurgical, mining, mechanical, agricultural, forestry, chemical, petrochemical, aviation, nautical, etc. It also includes programmes in survey, drafting and designing, all types of engineering technician programmes, all types of trade, craft and industrial programmes. Architectural and town planning programmes are also included.

(c) Medicine/Tib

It includes educational programmes of medical diagnostic and treatment techniques, medicine and surgery, medical X-ray techniques, dentistry, pharmacy, etc.

(d) Health

It includes educational programmes of public health, nursing, mid-wifery and other health related auxiliary programmes.

(e) Commerce/Business Administration

It includes educational programmes of typing, shorthand, clerical, secretarial, operation of office machines, book keeping, accountancy, electric data processing, business administration, marketing and sales, financial management and investment analysis, public administration, institutional administration, personal administration and other commercial, business and public administration programmes.

(f) Teaching

It includes all educational programmes which enable the teachers to teach all types of subjects to all categories of students. It includes education science programmes.

(g) Agriculture/Forestry/Animal Husbandry

It includes educational programmes of agriculture, forestry and fishing including general agriculture, animal husbandry, horticulture and gardening, crop husbandry, agricultural technology, food sciences and technology, veterinary, medicine, fishery science and technology, etc.

(h) Law

It includes educational programmes in jurisprudence, history of law, international law, labour law and maritime law and other laws.

(i) Economically Active Population

The economically active population comprises the persons aged 10 years and above of either sex who are engaged in some work for pay or profit including un-paid family helpers as well as those; not working but looking for work and laid off.

The Crude Activity Rate is measured as the percentage of economically active persons to the total population while the Refined Activity Rate is measured as the proportion of economically active persons among the population exposed to the risk of entering the economic life.

In collection of the data on economic activities "usual status" approach has been adopted as against the approach of labour force surveys, where data is usually collected on "current status" basis.

(j) Occupation

Occupation means the main job, profession, trade or kind/type of work usually performed by a person. In case of more than one occupation, the principal occupation is recorded. The principal occupation is that in which the person works most of the time.

(k) Industry

Industry means the activity of the organization, or business in which a person usually works.

Employment Status

(a) Self-employed

Self-employed is a person who operates his own farm, business, or industry or practices a profession but does not employ any hired help, paid either in cash or kind.

(b) Government employee

A Government employee is a person who works in any Government/Semi-Government Organization for pay.

(c) Private employee

A Private employee is a person who works, for pay, for person/farm/shop/firm/ organization/office which is not run or managed by the Federal/Provincial/Local Government/Autonomous body.

(d) Employer

Employer means a person who operates his own farm, business or industry or practices a profession and who employees one or more persons for the purpose.

(e) Un-paid Family Helper

Un-paid family helper means a person who works, without pay or profit, on family farm, business or industry.

Migrant Population

The migrant population mean those who have moved out their residence from one administrative district to another administrative district. It excludes population who have moved within a district.

Disability

Disability refers to the physical and organic handicap of a person due to natural deformity or deficient functioning of any limb resulting from accident, disease, etc. For census purposes it refers to visible malfunctioning of any organ of the body. It includes blind, deaf and mute, crippled, mentally retarded and insane.

Annexure-E
