PREFACE

The Fifth Population and Housing Census, initially due in March 1991, was conducted from 2-18 March 1998 throughout the country including Federally Administered Tribal Areas, Northern Areas and Azad Kashmir. During the first three days i.e., from 2nd to 4th March houselisting was carried out wherein each house was physically numbered and registered as an inventory for conduct of the census from 5th to 18th March. The inventory served as a guideline for the supervisors besides ensuring complete coverage, during the census operation.

There were 3 separate questionnaires used for houselisting and collection of information on population and housing characteristics. Form-1 (Annex-A) was used for houselisting. Form-2 i.e., short form (Annex-B) was used for collection of information about all persons on core questions such as name, relationship with the head of the household, residential status, sex, age, marital status, nationality, religion, mother tongue, literacy, educational attainment and possession of national identity card, number of rooms, tenure, period when constructed, construction material of walls and roofs and source of drinking water-inside or outside, source of light, fuel used, type of kitchen, bathroom and toilet facilities and watching of TV and radio and reading of newspapers.

Form-2-A i.e., long form (Annex-C) was used for obtaining additional information about migration along with its reasons, field of education, economically active population, fertility, disability and inoculation of children against 6 diseases were asked on sample basis. About 8 percent single stage stratified sample was drawn with slightly more representation given to small provinces, districts and urban areas to make it a representative sample. Necessary definitions and concepts relating to the above mentioned questionnaires/forms are given at (Annex-D) for information of the readers.

The report mainly consists of three sections viz write up which carries general description of the district and some analysis of population and housing data, second section comprises tables while third section provides additional information about these sections in the form of annexures.

The write up section contains three main parts viz (i) general description about the district, (ii) broad analysis of population census data and (iii) broad analysis of housing census data. The general description covers location, boundary, area, geography, climate, rainfall, ethnicity, administrative set-up, agriculture, flora and fauna, health, industries, communication system, infra structure beside introducing the district. The broad analysis of population census data deal with population size, growth and distribution, other demographic and socio-economic characteristics.

The broad analysis of housing census data throw light on housing units/households, in terms of information on number of rooms, population density per housing unit and per room, tenure, period since constructed, construction material used on walls and roofs, source of drinking water, source of lighting, cooking fuel used in kitchen, availability of kitchen, toilet and bathroom facilities and assessment of media reach etc.

The report comprises 52 tables in all, 40 relate to population data, 12 to housing data. Of 52 tables 27 are based on complete count information while remaining on sample count information. Because of space problem the tables on occupation and industries are given in coded form. Therefore, after mentioning occupation and industries in coded form on the tables the detail occupational groups and industry divisions and district/sub-division map are appended at Annex-E, F & G respectively.

Census taking was a gigantic task which involved the whole nation in one way or the other which is commendable as a team work. The role of Provincial Governments was very vital and with out their active cooperation, the operation would not have been successful. The meritorious services rendered by the field staff in addition to their own jobs, are also appreciable. The services rendered by the staff and officers of Federal Bureau of Statistics in training and data processing was helpful. I am personally indebted to the Federal Government who inculcated in me a sense of responsibility to conduct the census in March 1998, and releasing the data as early as possible for the benefits of all users.

The Armed Forces supported the Population and Housing Census work on hundred percent basis therefore, I extend my gratitude to their officers/staff involved in this operation.

I also thank the International Agencies like UNFPA, UNDP, UNICEF for their financial assistance in acquiring equipment & machinery and technical support in the form of consultancy services, training and study visits abroad.

Finally I thank the officers and staff members of the Population Census Organization for their relentless efforts to complete the census successfully.

PART - I
GENERAL DESCRIPTION
OF THE DISTRICT

1 GENERAL DESCRIPTION OF THE DISTRICT

1.1 GEOGRAPHY

1.1.1 Name, Location, Boundary and Area

The district derives its name from the Loralai stream, a confluent of Anambar or Nari river. The town of Loralai is situated on the north of this stream. The district headquarters was established in 1906.

The districts lies from 29° 54' to 30° 39' north latitudes and 67° 44' to 69° 40' east longitudes. It is bounded on the north by Killa Saifullah and Ziarat districts, on the north-east by Musakhel district, on the south-east by Barkhan district, on the south by Kohlu district, on the south-west by Sibi district and on the west by Ziarat and Pishin districts. Total area of the district is 9830 square kilometers.

1.1.2 Physical Features/Topography

The topography of the district is dominated by the mountain and hills, varying in elevation from about 900 to 3000 meters. The highest mountains are in the north-west, along the border with Ziarat, Pishin and Qila Saifullah districts. The direction of the mountain ranges, in the western half of the district, is mostly from west to east while that in the eastern half, from north-west to south-west. In the western part, the main ranges are the Shoreghar, Nagarghar, Murdarghar, Ghulamghar, Saraighar, Dabbarghar, Landaghar, Pitaoghar and Damanghar. In the eastern part of the district, the important mountain ranges are Sebatghar, Mandghar, Gadabarghar, Spinkaighar, Dadarghar and Torghar.

In between the mountain ranges there are fertile valleys. The most important of these valleys is the Thal Chotiali in Duki tehsil, which is so low and flat that when viewed from the neighbouring hills it gives a look of an inland sea. In the northern part of the district lies the Bori valley, which runs east to west and is bounded on the north by the Damanghar range and other ridges and on the south by Kurghar range. It continues westward up to the Murdarghar. The Murdarghar forms the south-west corner of the Thal or Karahi plain. The Chamalang valley is situated in the south-eastern part of Duki sub-division. It gets water from the Chamalang Rud and other smaller streams flowing from Dodarghar in the north and Kharlakghar in the south.

1.1.3 Rivers and Streams

The rivers and streams flow mostly from the north-west and north-east to the central part and then to the south. The most important river is Anambar which starts from the confluence of Loralai and Sehan rivers in Loralai sub-division and flows to the south in Duki

sub-division, crossing the district in the south. Most of the drainage of the district is through the Anambar river. In Duki sub-division the Lakhi Rud and the Narechi are its important left bank tributaries. The Loralai river originates in the north-western mountains and flows through Loralai tehsil up to its confluence with Anambar river. Important streams joining Loralai river are Kohar Manda and Mara Rud. The third important river is Sehan Rud. It originates in the mountains of Musakhel district, crossing into enters Loralai district in the north-east and flows in a south-west direction before joining the Anambar river near village Chinjwal. Important tributaries of the Sehan Rud are the Nigangi Rud which originate in the mountain of Zhob district. The Thal and Beji rivers irrigate the part of the Duki and Thal or Karahi plains.

1.1.4 Climate

The climate of the district varies with the elevation, but on the whole it is dry and healthy. The summer is cool and pleasant but the winter is intensely cold with hard frost and snow fall. June is the hottest month with mean maximum and minimum temperature of about 38° C and 24° C respectively. January is the coldest month during which the mean maximum and minimum temperature is 16° C and 4° C respectively. The district lies outside the monsoon area, therefore, the rainfall is light. The average annual rainfall is more than 398 millimetres.

The data on temperature and rainfall is not available for Loralai district. It is adjacent to Barkhan, therefore, the monthly 30 years mean temperature, precipitation and relative humidity recorded at Barkhan station is given below in table 1.1:-

TABLE 1.1: MONTHWISE 30 YEARS MEAN TEMPERATURE, PRECIPITATION AND RELATIVE HUMIDITY RECORDED AT BARKHAN STATION

1.1.5 Flora

The vegetation cover in the district is sparse. Trees, such as juniper, macrocode and pistachio, are found on the hills and mountain olive grow on low-lying hills. Phulai (*acacia modesta*) is found along the Anambar river to the east end of the Bori valley. Other commonly occurring trees in the district include, *ash* and *myrtle*. Less common species include beer gargat, bushk and pamangi. All these are used as vegetables. A variety of grasses grow in the district, the most important being saba (*step caliphat*) and sargrah. In the plain areas a considerable under-growth of shrub, suitable for camel grazing is to be found.

1.1.6 Fauna

Wildlife found in the district is much the same as that found in other highland areas of the province such as wolve, jackal, hyena and fox. The porcupine and badger are also common. Wild pigs are occasionally found in the Gadebar and Anambar forests. Mountain sheep and markhor are fairly plentiful especially in the higher altitudes of the Suleman range and in the hills near Chautair and Wana.

Among the game birds, chikor and see-see are numerous in the hills. Black and grey partridge, pigeon, sandgrouse, quail and bustard are found in the plains. Water fowl is plentiful in the season. Common birds such as vulture, kite dove, sparrow, lark hoopoe (*hudhud*) and starling (*sarau*) are also found. Among reptiles, snakes are numerous in all the tehsils except Sinjawi.

1.2 AGRICULTURE AND RELATED SECTORS

1.2.1 Agriculture

In terms of agricultural production and horticulture, Loralai is presumably the most developed rain fed region in the province as it is situated on the edge of the monsoon receiving areas. The precipitation in the district is inadequate, only partly compensated for by the winter rains and snow. However, the overall rainfall pattern has proved sufficient for the recharging of under ground aquifers and water-table and thus keeps the tube wells going. Almost 83 percent of the cultivated area is irrigated from the water from tube wells, 7 percent is canal fed and 5 percent each from water from karezes and springs and dug wells. Despite the fact that only 149246 hectares out of the total area of 993300 hectares is under cultivation, yet is a highly lucrative field of endeavour where in majority of the district population is engaged.

There are two cropping seasons "rabi and kharif". The major crops produced during rabi season are wheat, barley, vegetables and fodder. Kharif crops are chilli, onion, fodder, maize, Jowar, potato, and vegetables. Wheat accounts for 63 percent of the total crop yield for rabi season. Acreage, production and yield of major crops grown in the district for the year 1997-98 is shown in the following table 1.2:-

TABLE 1.2: ACREAGE PRODUCTION AND YIELD OF MAJOR CROPS GROWN IN LORALAI DISTRICT FOR THE YEAR, 1997-98

1.2.2 Irrigation

The major sources of irrigation are, tube well, kareze, spring, canal and well. The kareze and spring are mostly community owned, whereas tube wells and open surface wells are privately owned. A comprehensive system based on the extent of land-holdings exists for the distribution of water from community owned sources. The system also caters for the repair and maintenance of water channels. The cost of which is again apportioned on the above principle. On the other hand however, the growing number of tube wells is tending to disrupt

the delicate balance between recharge and exploitation of ground water resources. It is extremely vital that this cycle (recharge/use) be made sustainable for long-term irrigation prospects. The construction, recently of the Kohar delay action dam would go some way in this direction, but there is a crying need for building many more such dams if the long term irrigation prospects are not to be jeopardised.

1.2.3 Horticulture

The district has a tremendous edge in horticulture and apple, almond, plum, apricot, pomegranate and peach are produced in considerable quantities, added to this is the advantage of proximity to Punjab province where the bulk of the fruits are marketed and fetches a good price. This aspect of quick and better returns and the availability of a ready market (Punjab) has led to an increasing investment in horticulture sector and has resulted in raising the incomes and living standards of the beneficiaries. Acreage, production and yield of major fruits grown in the district for the year 1997-98 is as under in table 1.3:-

TABLE 1.3: ACREAGE, PRODUCTION AND YIELD OF MAJOR FRUITS GROWN IN LORALAI DISTRICT, 1997-98

1.2.4 Forestry

The nature of terrain with steep mountain slopes ranging from 1,500 to 3,000 meters in elevation and limited rainfall has not been conducive in making Loralai suitable for purposes of forestry. Out of a total of 44397 hectares only 18,305 hectares are reserved for coniferous forest and the remaining 18,305 is scrub land or range land which too is counted as forest

area. The major trees found on higher hills are juniper and pistachio. Olive grow on the lower hills.

Although commercial-scale logging is not present yet a considerable number of trees are cut particularly for fuel wood purposes by the local people leading to an ever increasing pattern of deforestation and thereby contributing to an ecological degradation. The juniper forest located at Chautair in Sinjawi sub-tehsil and Surghund area of Bori sub-division is fast losing ground under the combined assault of deforestation and disease. There is little help forthcoming from the concerned agencies by way of supportive intervention, either to check logging or the ravages of disease, and there is a real fear that we may soon lose this precious heritage.

1.2.5 Livestock

Livestock raising is an important source of livelihood for the rural population and sizeable herds of sheep and goat are kept. Other animals like camel, horse, donkey, cattle and poultry are also kept by the people.

Four veterinary hospitals; one each at Loralai, Mekhtar, Sanjawi and Duki are operating in the district with 111 dispensaries, spread far and wide. Besides, there are three Artificial Insemination Centres (AI) and one Disease Investigation Laboratory (D.I.L). Livestock population of Loralai district according to the Livestock Census, 1996 is as under in table 1.4:-

TABLE 1.4: LIVESTOCK POPULATION, LORALAI DISTRICT

1.3 INDUSTRY AND TRADE

1.3.1 Industry

No major industry, as such, exists in the district. However, cottage industry based on handicrafts and embroidery produced by the local women folk is a fairly thriving commercial enterprise, supplementing the income of the individual households. Apart from this, small scale auto and electrical goods repair outfits are operating in Loralai town where other commercial activities such as whole selling, retailing, hotels, and restaurants are also found.

1.3.2 Mining

Duki tehsil is the coal producing region of the district where coal-mining activity offers a highly lucrative investment outlet by virtue of the fact that a ready market exists in the neighboring Punjab province. However, entry into the field is relatively restricted and only a handful of entrepreneurs are reaping the benefit. The local consumption of coal is almost negligible and is primarily used for domestic heating / cooking purposes. A limited number of low-grade marble deposits are also being worked and the production again ends up in Punjab.

1.3.3 Communication

The district is linked by road to Punjab province to the north-east and to the provincial capital, Quetta to the south-west. It is linked with Killa Saifullah district which lies to the north-west and to Sibi district lying to the south-east. Total length of black topped roads in the district is 330 kilometers. Out of this, 138 kilometers are provincial roads while the National Highway Authority manages 142 kilometers. The remaining 50 kilometers are farm-to-market roads. Shingle roads have a total length of 209 kilometers. The general state of the roads is not satisfactory and lack of proper maintenance is leading to a further deterioration of their condition. Since fruit and vegetable marketing, occupies such a vital niche in the district's economy it is imperative that immediate attention be given to maintenance of the existing roads and construction of additional roads including link roads.

The district does not have any railway or air linkages. Although a radio station has been established at Loralai, it is not fully operational as yet. The people listen to radio broadcasts from the Quetta radio station. Loralai does not have a television station, but a booster station is working whose range is limited to Loralai town only. However, there is a growing trend towards the use of dish antennas through out the district.

Loralai is linked through Nation Wide Dialling System to the rest of the country. A telegraph office inclusive of customer services is functioning. Postal services are also available throughout the district. There are six post offices in the district; four in Loralai town, one in Duki and one in Sinjawi.

In the absence of piped natural gas facility the people of the district are constrained to use fuel wood and gas cylinders for domestic purpose. In matter of power-supply Loralai enjoys an advantageous position in that it is connected both with south to north and north to south transmission lines of the national grid. A 132 KV transmission line from Sibi, Harnai and Shahrag and another 132 KV a transmission line from Rakhni, Mekhtar feeds into the grid Station at Loralai.

1.3.3 Trade and Trade Centre

Trade is mostly conducted on retail basis and to a limited extent on whole sale basis. Almost all sorts of goods are traded. The major exports of the district are fresh fruits, dry fruits, hide and skin wool and coal. All other items are brought in the district either from the provincial capital or from Punjab province. All trading activity is being carried out exclusively in the private sector with little or no support from the concerned government agencies.

1.4 HISTORY, ETHNICITY/TRIBES AND CULTURE

1.4.1 History

Historically, Loralai was part of the Afghan province of Kandhar with Thal Chotialy as its headquarter, under the Safavid (Iranian) dynasty and later under the Durrani. It was ceded to the British Indian government after the signing of the Gandamak treaty on 25th May, 1879. In February, 1881, the Thal Chotialy including Duki was made a sub-district of Harnai Political Agency under the charge of a native Assistant. On 22nd of November 1884 Chiefs of Bori and Zhob Tumans executed an agreement whereby they accepted the supremacy of the British government. The Cantonment from Duki was accordingly moved forward to Loralai in 1886, followed in November 1887 by the shifting of the office of Assistant Political Agent to that town. Duki and Thal Chotialy together with other tracts within the limits of the Thal Agency were declared part of British India. In October 1903 the Thal Chotialy and Zhob Agencies were remodeled, the name of the former was changed to Sibi district and a new district Loralai was created. To this Musakhel and Bori tehsils from Zhob and Duki, Sinjawi and Barkhan tehsils from Thal Chutialy district were transferred.

The Loralai district remained in existence with the same boundaries till December, 1991, when the area comprising the district was remodeled and bifurcated into further two districts viz. Barkhan and Musakhel. The present district of Loralai consists of Bori, Duki and Sinjawi tehsils with its headquarter at Loralai town. With the creation of Zhob division, Loralai town also became the divisional headquarters.

1.4.2 Ethnicity and Tribes

Kakars, Dummars, Tareens, Lunis, Zakhpels, Nasirs, Pachis Syeds together with Ghilzais, Sulemankhels Baloch and Marris constitute the principle tribes of the district. With the exception of Balochs and Marris the remaining tribes are all Pashtoons.

1.4.2 Food

The majority of the people have two meals a day, one in the morning and other at sunset. However, some people do have a third meal early in the morning in the shape of breakfast. Generally men and women eat separately. Wheat is the staple food-grain.

Meat is extensively used and in winter, dried meat (*Landi*) is widely consumed. Urban people also include rice, pulses and vegetables in their meals. In the rural areas milk and its bi-products are commonly used. Tea is an integral part of the meals of almost every household.

1.4.4 Dress and Ornaments

The dress of the people is largely simple and made of cotton cloths. *Shalwar, kameez*, a turban and a *chaddar* (piece of cloth) slung across his shoulders constitutes the dress of an average individual both during the summer and winter. Women wear a wrapper and a long shirt reaching the knees, embroidered with silk and studded with coins/shells and various other trinkets. The women in rural areas/tribal women are usually wrapped up in a large-sized *chaddar* covering head to toes for their *pardah*. In the urban areas however, increased sophistication and diversity in the dressing among both male and females is being witnessed but women are still strictly, *pardah* observing.

Ornaments are widely used by women of the district. Bangles, ear-rings and other traditional forms can be seen. Until fairly recently ornaments of choice for common women folk were made of Silver, but with the rise in levels of income and better communication, Gold has rapidly replaced the Silver.

1.4.5 Dwellings

Mud huts are the most common form of dwelling in the district. However, those among the rural population having comparatively higher levels of income live in massive mud built fort-like structures. The use of concrete in rural area is still very rare. In towns, however, the use of concrete is growing. Every household essentially has a separate portion for the guests.

1.4.6 Occupations

The livelihood of majority of the population is tied to agriculture and agro-based trade and services. Fruit orchards alongwith cultivation of wheat and vegetables engages a sizeable section of the population. Raising of livestock is next in importance. A good number of people are engaged in providing services to government in various departments.

1.4.7 Culture, Customs and Traditions

The main determinant of social organization in the district is the tribal system. Tribal affiliations are pre-eminent. Family and kinship, which command loyalty of its members and remain the most important institutions. The joint family system is still the norm with the father or some other elder acting as head of the family.

Both inter-tribal as well as intra-tribal marriages are common. The institution of *Vulvar* or bride money still exists and is said to cover the costs of the household effects for the new couple. It is paid by the bridegroom before marriage, the amount being determined on the basis of age, status and beauty of the girl. After the settlement of *Vulvar*, the engagement takes place. A date is then fixed for *Nikah* and marriage ceremony. Which is marked by dance, music and firing of shots in the air. The role of women in decision making is negligible. It is generally the father who decides upon the formal terms of marriage. Marriages with near relations, although not always the rule, is preferred because exchange can easily be arranged.

The concept of community participation is deeply rooted and has a long tradition in the district. The practice of collective labour at harvest time and other periods of peak labour needs, is common among the people. Irrigation practices such as digging and management of karezes are centuries old and are based on the principle of work/labour sharing. Similarly communities join hand in many other areas of common interest.

The population of the district is almost Muslim, with a sprinkling of Christian and Hindu. The people are deeply religious and at the same time their lives are marked by strict adherence to tribal norms and values.

For conflict resolution, people have two alternatives, the judicial system functioning under the regular law or the tribal *jirga* system. However, there is a perception and feeling among the common people that the tribal system is more effective than judicial system of the government. The tribal *jirga* system was formalized and codified by the British and was based on the principle of compensating the aggrieved party in line with tribal norms and values. Although abrogated by the Balochistan High Court in 1991, *jirgas* are still constituted informally with the active consent and approval of the local administration for mediation in, and solution of all manners of disputes.

1.5 ADMINISTRATIVE SET UP

1.5.1 District Administration

The district is controlled by the Deputy Commissioner, assisted by an Additional Deputy Commissioner and Assistant Commissioners/Sub-Divisional Magistrates at sub-division level. The Deputy Commissioner is the overall coordinator of various government departments. The district is divided into following sub-divisions/tehsils and sub-tehsils.

<u>Name of Sub-Divisions</u>	<u>Name of Tehsils/Sub-Tehsils</u>
1. Loralai	1. Loralai/Bori tehsil
	2. Mekhtar sub-tehsil
2. Duki	1. Duki tehsil
3. Sinjawi	1. Sinjawi sub-tehsil

1.5.2 Police Department

For the purpose of administration, the district is divided into two areas "A" and "B". Municipal limits of Loralai, town and parts of Duki and Sinjawi come under "A" area. Rest of the district falls in "B" area. "A" area is controlled by regular police force headed by the Superintendent of Police (SP). While "B" area is controlled by levies force. Levies are a rural unconventional force widely used in Balochistan for the maintenance of law and order.

1.5.3 Judicial System

In 1991, tribal *jirga* system was annulled by the Balochistan High Court and now a two tier system operates in the district. On the one hand there is the District and Sessions Judge and the Civil Judges while on the other there are the Qazi courts and *Majalis-e-Shoora*.

1.5.4 Revenue System

All matters pertaining to revenue and its collection, land disputes, allotment of lands, settlements etc are governed by the Land Revenue Act, the powers under which vest in the district administration. A mauza or a patwar circle constitutes the basic unit of revenue administration. The area of a patwar circle varied from 4 to 5 miles in some places to 10 to 15 miles in others. This system was the kingpin in the revenue collection machinery bequeathed by the British. With the promulgation of Zakat and Usher ordinance, however, the system is showing signs of grievous neglect, with abandoned patwar circles, and loss or destruction of the carefully maintained revenue records. Its only rarely that clauses of Revenue Act are now invoked for the purpose of recovery of government arrears. Agencies/departments such as the Excise department and the Income tax department have now over taken the Land Revenue department both in importance and in terms of the quantum of resources generated. Similarly the services providing line departments levy there own fees and taxes.

1.6 HEALTH

The break-up of the health services available in the district is as under in table 1.5:-

The District Health Officer (DHO) has the overall responsibility for health services provided in the district. Despite the fact that the physical infrastructure in respect of health service is quite adequate yet the non-availability of specialized doctors and paramedical staff has left the health delivery system seriously handicapped. The result is that a large number of patients have to endure the arduous of journey to the provincial capital, Quetta to get treatment.

There is one residential college in Loralai town, which was established in 1989. There are two-degree colleges, one each for boys girls, both of which are located at Loralai town. An intermediate college for boys is functioning at Duki.

1.8 IMPORTANT/HISTORICAL PLACES

1.8.1 Loralai Town

The area now comprising district Bori/Loralai has had a variegated past. Remaining at different points of time, part of the Mughal Empire, the Persian Empire, and the Nihat of Kandhar under the Abdalis, until it was ceded to British as part of the terms of the treaty of Gandamak. However, there are no archaeological finds or other historical landmarks that could testify to its significance in times gone by, except perhaps its role as a stopping place for

caravans enroute to southern Punjab from Afghanistan. This later assumption too is derived from empirical rather than historical evidence. However, there is a chapter in the annals of Loralai of which it can rightly be proud of. Loralai produced a freedom fighter of a very high stature named Zarak Khan.

Zarak Khan was born in Mekhtar a village about 50 kms from Loralai on Jan 11, 1919. As he entered his youth, he became disillusioned with the form and style of British rule in his native land. Disillusionment turned into antipathy and he organized a band of young fighters to defy and resist the British rulers.

His hit and run tactics caused a great deal of consternation to the British administrations and his bravery caught the imagination of the local people. The Holly wood film industry bestowed recognition and eulogy for his role in defying the British rule by making a film on his life and times. The film is called Zarak Khan. He died on July 6, 1966 at Loralai.

Loralai is also important in terms of its agricultural production and out put. Its location, sitting astride the land route from Balochistan to Punjab also gives it strategic value. It is a multiethnic multi-cultural town where Pushtoons, Balochis, Saraikis and Punjabi speaking people are living in complete harmony.

BROAD ANALYSIS OF
POPULATION CENSUS DATA

2 BROAD ANALYSIS OF POPULATION CENSUS DATA

2.1 POPULATION SIZE, GROWTH AND DISTRIBUTION

2.1.1 Population Size and Growth

The population of Loralai district is 297.56 thousands in 1998 as compared to 235.04 thousands in 1981 recording an increase of 26.60 percent over the last 17 years i.e. 1981-98. The increase of 125.85, 83.74 and -34.70 percents was observed during intercensal period 1972-81 (8.46 years), 1961-72 (11.67 years) and 1951-61 respectively. Overall the population of the district has increased quite rapidly showing substantial increase of 243.05 percent during the last 47 years i.e. 1951-98 which is about three and a half times.

The average annual growth rate of population in the district has declined to 1.40 percent during intercensal period 1981-98 as against 10.11 percent during 1972-81 and 5.35 percent in 1961-72. If the population of the district keep up growing at an average annual growth rate of 1.40 percent it will double in 49 years. Table 2.1 gives population and intercensal increase of the district since 1951. Figures 2.1 and 2.2 depict population increase and its growth rate since 1951 in a graphic presentation.

TABLE 2.1: POPULATION AND INTERCENSAL INCREASE SINCE 1951

Description	1951	1961	1972	1981	1998
Population (Thousand)	86.74	56.64	104.07	235.04	297.56

2.2 SEX, AGE AND MARITAL STATUS

2.2.1 Sex Ratio

Sex ratio is an important demographic indicator which is defined as the "number of males per hundred females". The sex ratio of the district computed in 1998 is 113.5 for the district. The sex ratio in rural and urban areas of the district is 110.26 and 141.15 respectively which indicates that the male proportion is much higher in the urban areas as compared to the rural areas.

2.2.2 Age Structure

According to the 1998 Census the population below 15 years is 43.85 percent of the total population. Out of this 14.83 percent is below 5 years age including 1.52 percent infants. The population of 65 years and above is 2.83 percent and 53.32 percent of the population is of the working age group (15-64 years), giving an age dependency ratio of 87.53 percent in 1998. This ratio for rural and urban areas is 90.43 and 68.34 percent respectively.

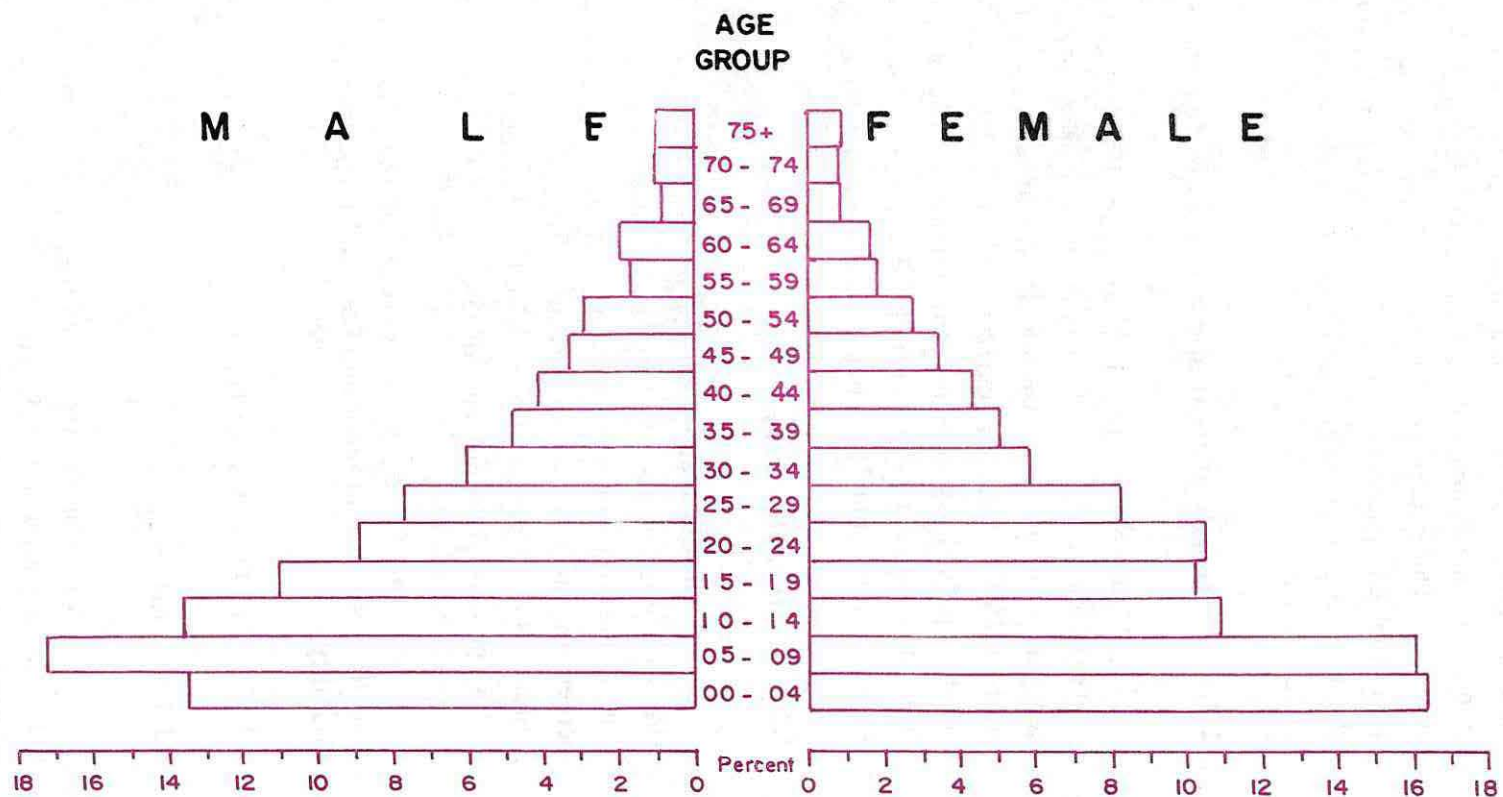

The adult population 18 years of age and above in the district is 51.40 percent. This percentage in rural and urban areas is 50.59 and 57.46 percent respectively. The percentage of population eligible to vote i.e 21 years of age and above is 41.97 percent which is higher in urban areas at 46.59 percent in comparison to 41.35 percent in rural areas. The population by important age groups is given in table 2.4. Figure 2.4 shows an age and sex structure of the population of the district in a graphic presentation.

POPULATION PYRAMID OF LORALAI DISTRICT-1998

2.2.3 Marital Status

All individuals aged 15 years and above have been enumerated according to their marital status namely married, never married, widowed and divorced. Out of them 33.89 percent are never married, 63.64 percent married, 2.41 percent widowed and 0.06 percent are divorced. The percentage of the never married amongst male is relatively higher at 38.61 percent as compared to 28.61 percent among female. This difference is also reflected through the mean age at marriage which is also higher for males at 26.19 years as compared to female at 22.70 years.

2.2.4 Female of Reproductive Ages by Marital Status

Out of total female population, 47.74 percent is in child bearing ages i.e 15 to 49 years, the percentage is slightly higher in urban areas at 49.12 percent as against 47.58 percent in rural areas. Among the female in reproductive ages 32.80 percent are never married, 65.93 percent are currently married, 1.20 percent widowed and 0.06 percent divorced. Fourteen point forty three percent married women of child bearing age are found without any child, 8.38 percent have reported one child, 34.11 percent have 2 to 4 children, 9.51 percent have 5 children and 33.64 percent have 6 and more children.

2.2.5 Disabled Persons

The disabled persons constitute 0.80 percent of the total population of the district. The percentage of male and female disabled persons is 0.76 and 0.85 percents respectively. Among the disabled, percentage of crippled is 41.44 percent for both sexes which is 30.05 percent for male and 52.95 percent for female. The percentage of insane is 6.71 percent for both sexes, 3.59 percent for male and 9.87 percent for female. The blind among the disabled is 4.87 percent, 7.10 percent for male and 2.61 percent for female.

About forty seven percent of the disabled population were reported having disability others also including deaf and mute, mentally retarded and having more than one disability.

2.3 LITERACY AND EDUCATIONAL ATTAINMENT

2.3.1 Literacy

A person was treated as literate in the 1998 Census if he could read a newspaper and write a simple letter in any language. The literacy ratio of the district among the population aged 10 years and above is 20.47 percent, 53.28 percent in urban areas and 15.82 percent in rural areas. The male literacy ratio is 30.12 percent compared to 9.24 percent for female. Table 2.5 gives literacy ratio by sex and rural/urban for the 1998 Census which is also highlighted by figure 2.5 in a graphic presentation.

Fig : 2.5

All Areas	20.47	30.12	9.24
Rural	15.82	24.25	6.39
Urban	53.28	66.15	33.39

2.3.2 Educational Attainment

A person aged 10 year and above, is treated as an educated if he attains any educational level. The percentage of educated persons like literacy ratio is 19.01 percent of the population aged 10 years and above. A large variation exists in the ratio of educated persons by sex and area. The percentage of educated males is 28.56 percent and of females, 7.90 percent. It is 52.57 percent for urban areas as against 14.26 for rural areas. Table 2.6 shows the educated persons by sex and urban rural areas.

Urban	52.57	65.56	32.51

2.3.3 Enrolment Ratio

The enrolment ratio measure the percenatge of students to population of ages 5-24 years which is 18.12 percent of the district. It is higher for males i.e 24.83 percent as compared to 10.04 percent for females. The enrolment ratio is significantly higher in urban areas at 41.55 percent as against 15.10 in rural areas. A significant difference appears between male and female enrolment ratio in both rural and urban areas. The ratio for male enrolment is more than three times to that of females in rural areas while the difference is slightly more than one time in urban areas. Table 2.7 gives enrolment ratio by sex rural/urban areas in 1998.

2.3.4 Level of Education

Out of the total educated persons, 25.57 percent have passed primary, 22.88 percent middle and 18.87 percent matriculation. After matriculation the percentage falls to 5.11 percent for intermediates, 3.52 percent for graduates and 1.49 percent for post graduates. In addition, 0.44 percent are diploma/certificate holder and 3.44 percent are all others. The percentage of dropout before attaining the primary level is 18.69.

2.4 MIGRATION

2.4.1 Migration

Migration data covers movement of population from one district to another in the same province and from one province to another. It does not cover person who changed their place of residence within their own district in view of the limitation of the questionnaire.

2.4.2 Life Time Migrants

The total life time in-migrants are 5.12 percent of the total population. Out of which the male and female life time in-migrants are 7.04 and 2.94 percent respectively. The persons who have migrated into the district during the last one year after March 1997 are 27.16 percent. Thirty three point seventy one percent have migrated during last 5 years after March, 1993, while 11.17 percent had migrated before 5 years but after 1988. About twenty eight percent has been reported to be migrated 10 years earlier.

Majority of life time in-migrants i.e. 50.65 percent migrated due to employment/transfer followed by 36.07 percent moved with the head of household, 4.78 percent other reasons, 4.66 percent due to business, 3.40 percent as a result of marriage, 0.41 percent for study and 0.03 percent returning home. No one has been reported to have migrated due to health.

Majority of in-migrants i.e. 75.90 percent migrated from other provinces while 12.21 percent belong to Balochistan province. Two point twenty three percent have been reported to be migrated from Azad Jammu and Kashmir and Northern Area. A little batch of 4.28 percent repatriated to home from other countries while 5.37 percent had not reported their place of previous residence. Table 2.8 provides the percentage of life time in-migrants of the district.

2.5 ECONOMIC CHARACTERISTICS

2.5.1 Economically Active Population

The economically active population of the Loralai district among the population aged 10 years and above to the total population is 25.28 percent which is 75.21 thousand souls with 97.49 percent male and 2.51 percent female. The remaining 74.72 percent economically inactive population consists of 31.49 percent children below 10 years, 31.73 percent domestic workers including 66.09 percent female amongst the total females and 1.45 percent male workers amongst total males. The students share is 5.52 percent while all other categories constitute 5.98 percent in the total economically inactive population of the district.

The labour force participation rate as percentage of total labour force to the population aged 10 years and above is computed at 36.90 percent for the district. There is a significant difference in the participation rates between male and female labour force as 66.88 percent for male compared to 2.00 percent for female. The labour force participation rate is higher i.e. 45.28 percent in urban areas as compared to 35.71 percent in the rural areas. Table 2.9 gives the percentage distribution of population by economic categories.

**TABLE 2.9: PERCENTAGE OF POPULATION BY ECONOMIC CATEGORIES

Un-employment rate	28.96	29.70	0.00	32.11	33.00	0.00	11.41	11.59	0.00

2.5.2 Un-Employment

The un-employment rate (28.96 percent) as percentage of un-employed labour force(i.e looking for work and laid off) to the total labour force reflects a high degree of un-employment in the district which is much higher for male i.e 29.70.percent compared to female of zero percent. The un-employment rate in the rural areas is fairly higher at 32.11 percent as compared to 11.41 percent in urban areas.

2.5.3 Employed Population by Occupation

Among the employed class in the district the highest percentage 43.16 belongs to Major Occupation Group-6 “skilled agricultural and fishery workers”, followed by Group-9 “elementary occupations” and Group-5 “service workers and shop and market sales workers” comprising 26.18 and 11.13 percent respectively. The next higher is Group-0 “workers not classified by occupation” sharing 10.74 percent. The rest 8.79 percent of the employed population are engaged in the remaining occupational groups.

2.5.4 Employed Population by Industry

Most of the working population i.e 40.25 percent is engaged in the Major Industrial Division-1 “agriculture, forestry,hunting and fishing”. Out of the remaining, 33.12 percent are engaged in Division-9 “community, social and personal services”, 9.40 percent engaged in Major Division-6 “wholesale and retail trade and restaurants and hotels”, 6.25 percent associated with Major Division-5 “ construction” and 5.32 percent in Major

Division-2 "mining and quarrying". The next higher is Major Division-4 "electricity, gas and water" sharing 2.30 percent. The rest 3.36 percent engaged in the remaining industrial divisions.

2.5.5 Employed Population by Employment Status

The proportion of working or employed population (working and un-paid family helper) to population 10 years of age and above is 26.21 percent. Out of this 50.51 percent are self employed, 35.02 percent working as employees (Govt. Autonomous and Private) and 14.06 percent are un-paid family helper. The employer category is only 0.41 percent. If we compare rural/urban variations, the proportion of self employed is higher in rural areas while that of employee (Govt) is higher in urban areas. The percentage of un-paid family helper is higher in rural areas. Table 2.10 gives percentage of working population by employment status.

2.6 IMMUNIZATION

The question about immunization has been included in the 1998 Census for the first time to evaluate the vaccination programme launched by the Government from time to time. It is encouraging to note that 58.24 percent of the children under 10 years age have reported as vaccinated, while 21.37 percent reported as not vaccinated leaving the rest i.e 20.39 reported as not known. The percentage of vaccinated male is slightly higher at 29.55 percent as against vaccinated females at 28.70 percent. Table 2.11 gives detail of immunization by sex and rural/urban area.

2.7 NATIONAL IDENTITY CARD

The question about National Identity Card was asked in the 1998 Census for the first time to see the coverage element of National Identity Card. The question was asked from population of 18 years age and above. According to the responses to the question it was found that 50.95 percent of the population aged 18 years and above have obtained National Identity Card. It was 61.70 percent for male and 39.25 percent for female. Table 2.12 gives the necessary detail by sex and area.

PART - III
BROAD ANALYSIS OF
HOUSING CENSUS DATA

3. BROAD ANALYSIS OF HOUSING CENSUS DATA

3.1 TYPE OF HOUSING STOCK

3.1.1 Level of Congestion, Persons and Rooms

Eighteen point sixty seven percent of the housing units in the Loralai district are single room houses. The percentage of single room houses is higher at 19.93 in rural areas in comparison to that in urban areas at 5.56 percent. The percentage of housing units with 2 to 4 rooms is little higher in rural areas at 63.11 percent as against 62.31 percent in urban areas. In contrast the percentage of houses with 5 or more rooms is fairly higher in urban areas as compared to that in rural areas.

The number of rooms per housing unit is higher in urban areas at 3.7 as against 2.9 in rural areas. Similarly the level of congestion (persons per room) is slightly higher in urban areas as compared to that in rural areas. The level of congestion in terms of persons per housing unit is also higher in urban areas at 9.6 in contrast to 7.2 in rural areas requiring construction of more housing units with additional rooms to reduce the level of congestion. Table 3.1 gives the indices of congestion in the 1998 Census.

TABLE 3.1: INDICES OF CONGESTION IN PERCENTAGE, 1998

Congestion	All Areas	Rural	Urban
Persons per Housing Unit	7.4	7.2	9.6
Rooms Per Housing Unit	3.0	2.9	3.7

Housing Units with 5 rooms and more (Percentage)	18.29	16.96	32.12

3.1.2 Nature of Tenure

There were 40073 housing units in the Loralai district in the 1998 Census, 36568 (91.25 percent) in rural areas and 3505 (8.75 percent) in urban areas. As classified by tenure, 84.09 percent of the total housing units were owned. The percentage of ownership in rural areas is relatively higher at 86.17 as against 62.43 in urban areas. The percentage of rented housing units in urban areas is higher than that in rural areas. Similarly the percentage of rent free houses in urban areas is higher at 12.21 percent as compared to the rural areas at 11.75 percent. Table 3.2 provides the data by nature of tenure.

TABLE 3.2: NATURE OF TENURE (PERCENTAGE) BY RURAL/URBAN, 1998

Rent Free	11.79	11.75	12.21

Due to rounding the figures may not add upto exactly 100.

3.1.3 Period of Construction

Of the total owned housing units (5980) in the district, 72.74 percent, were built more than 10 years earlier, 18.35 percent during the last 5-10 years, 8.20 percent during the last five years and only 0.71 percent houses were found under construction. The percentage of houses constructed in rural areas before 10 years is slightly higher at 72.80 as compared to that in urban areas at 71.85 percent whereas the percentage of houses constructed during last 5-10 years is higher in urban areas at 19.70 as against 18.26 in rural areas.

3.1.4 Construction Material-Outer Walls

The district has 82.52 percent housing units having outer walls made of unbacked bricks with earth bonding and 6.34 percent of the houses have the standard pacca walls made of bricks/blocks and stones with cement bonding. There is marked variation in the qualitative indices of construction between urban and rural areas. In urban areas 17.43 percent of the housing units have the standard pacca walls made of baked bricks/blocks and stones with cement bonding, 65.36 percent have walls of un-baked bricks with earth bonding and 15.12 percent have wooden walls while other categories are 2.08 percent. In contrast, the rural areas have 5.28 percent of the walls in the standard category of baked bricks/blocks and stone with cement bonding and 84.16 percent of walls are made of un-baked bricks with mud/earth bonding. The wooden category is 5.85 percent and the un-specified category of material used is 4.71 percent. Table 3.3 gives detail of construction material used in outer walls.

TABLE 3.3: MATERIAL USED IN OUTER WALLS (PERCENTAGE) BY RURAL/URBAN, 1998

Others	4.48	4.71	2.08

Due to rounding the figures may not add up to exactly 100.

3.1.5 Construction Material-Roofs

The predominant material used for construction of roof in the district is wooden log/bamboo by 89.98 percent housing units while 5.60 percent of housing units have their roof built with un-specified material.

The standard of construction of roofs significantly differs in rural and urban areas. Ninety point eighty one percent of the housing units in rural and 81.23 percent in urban areas have used baked bricks supported by girder or wooden log/bamboo in the construction of roofs. Similarly the use of un-specified material in the construction of roofs is higher at 5.68 percent in rural areas as compared to 4.79 percent in urban areas.

In urban areas 6.05 percent houses have used RCC/RBC in the construction of roofs. The use of this category in rural areas is only 1.06 percent. The use of cement/iron sheets is 7.93 percent in urban areas as against 2.45 percent in rural areas. Table 3.4 gives detail of material used in roofs by rural/urban areas.

3.2 HOUSING FACILITIES

3.2.1 Source of Drinking Water

The easy access to potable/safe drinking water is one of the basic human needs. As per information gathered in the 1998 Census, the facility of drinking water inside the house is available to 54.21 percent of the housing units, while 45.79 percent of the housing units use outside source as drinking water. The facility inside the house is significantly higher in the urban areas as compared to the rural areas, whereas the facility outside the house is higher in rural areas as compared to the urban areas. Table 3.5 gives detail of the source of drinking water by rural/urban areas.

3.2.2 Source of Lighting

The main source of lighting is electricity which is used by 60.61 percent of the housing units. This percentage in urban areas is significantly higher at 96.75 percent in comparison to that in rural areas at 57.15 percent. The second main source of lighting is kerosene oil which is used by 38.48 percent of the household in the district. This percentage is significantly higher in rural areas at 41.88 percent as against urban areas at 3.00 percent. The other source of lighting is used by only 0.91 percent of the housing units. This percentage is higher in rural areas at 0.97 percent as against urban areas at 0.26 percent. Table 3.6 provide percentage of housing units by source of lighting by rural/urban area.

3.2.3 Cooking Fuel Used

Ninety three point sixty two percent of the housing units in the district use wood for cooking, 3.17 percent kerosene oil, 1.95 percent other sources and 1.26 percent gas users. The use of wood is more prevalent in rural areas where 93.95 percent housing units use it followed by 3.18 percent kerosene oil, 2.03 percent other sources and 0.84 percent gas users. These percentages in urban areas are 90.19 for wood, 5.65 percent gas users, 3.11 percent kerosene oil and 1.06 percent other source. Table 3.7 provide percentage of housing units by source of cooking fuel used by rural/urban areas.

Due to rounding the figures may not add upto exactly 100.

3.2.4 Availability of Separate Kitchen, Bathroom and Latrine Facilities

Twenty five point seventy four percent of the housing units in the district had a separate kitchen, 33.55 percent had separate bathroom and 17.47 percent had independent latrine. The figure for urban areas for separate kitchen, separate bathroom and separate latrine are 33.41, 36.78 and 35.46 percents respectively which are higher as compared to rural areas. The percentage of shared facilities for kitchen, bathroom and latrine are also higher in urban areas in comparison to that in rural areas. Table 3.8 gives detail of availability of housing facilities by rural/urban areas.

3.2.5 Source of Information

The question about source of information has been asked for the first time in the 1998 Population Census to assess the media coverage. Slightly more than forty nine percent of the households in urban areas have access to television, 62.14 percent radio and 39.63 percent newspaper as source of information. These percentages in rural areas are 9.39 percent for television, 33.47 percent radio and 10.14 percent for newspaper. Table 3.9 provide percentage of housing units by source of information by rural/urban areas.

DEFINITIONS AND CONCEPTS

Urban Areas

All localities which were either metropolitan corporation, municipal corporation, municipal committee, town committee or cantonment at the time of the census, were treated as urban.

Household

A household means a group of persons living together who have collective arrangement for eating. A person living alone was also considered to constitute a household. The distinguishing characteristic of a household is its common cooking arrangement.

Housing Unit

A housing unit means a separate and independent place of abode, inhabited by one household and, if vacant, meant for habitation by one household. It does not necessarily mean a separate building. A building may have one or more housing units. Furthermore, any place not intended for habitation but occupied by a household at the time of census was also treated as a housing unit.

Room

A room is defined as a space in a housing unit having a roof and walls from roof to floor. This includes sleeping, dining, drawing, study, children's and servant's rooms but excludes kitchen, bathroom, latrine, store, balcony, porch and motor garage.

Age

Age is recorded as of the last birthday.

Marital Status

Marital status has been classified into never-married, married, widowed and divorced. Never-married applies to persons who have never been married. Married includes all persons who are at present married and living as husband and wife as well as those married persons living apart but having a living wife/husband. Those couples, whose marriage (Nikah) had been solemnized but giving away ceremony had not taken place, were also treated as married. Widowed applies to a person whose husband or wife was dead but who had not married again. Divorced applies to both divorcer and divorcee, if not remarried.

VIII

Religion

Religion is recorded and tabulated as informed by the respondents.

Literate

A person who can read a newspaper and write a simple letter, in any language, is treated as literate.

Field of Education

(a) General Education

It includes educational programmes of primary, middle, matriculation, intermediate and bachelor's degree in arts or science.

(b) Technical/Engineering

It includes engineering educational programmes in the fields of electrical, electronic, industrial, metallurgical, mining, mechanical, agricultural, forestry, chemical, petrochemical, aviation, nautical, etc. It also includes programmes in survey, drafting and designing, all types of engineering technician programmes, all types of trade, craft and industrial programmes. Architectural and town planning programmes are also included.

(c) Medicine/Tib

It includes educational programmes of medical diagnostic and treatment techniques, medicine and surgery, medical X-ray techniques, dentistry, pharmacy, etc.

(d) Health

It includes educational programmes of public health, nursing, mid-wifery and other health related auxiliary programmes.

(e) Commerce/Business Administration

It includes educational programmes of typing, shorthand, clerical, secretarial, operation of office machines, book keeping, accountancy, electric data processing, business administration, marketing and sales, financial management and investment analysis, public administration, institutional administration, personal administration and other commercial, business and public administration programmes.

(f) Teaching

It includes all educational programmes which enable the teachers to teach all types of subjects to all categories of students. It includes education science programmes.

(g) Agriculture/Forestry/Animal Husbandry

It includes educational programmes of agriculture, forestry and fishing including general agriculture, animal husbandry, horticulture and gardening, crop husbandry, agricultural technology, food sciences and technology, veterinary, medicine, fishery science and technology, etc.

(h) Law

It includes educational programmes in jurisprudence, history of law, international law, labour law and maritime law and other laws.

(i) Economically Active Population

The economically active population comprises the persons aged 10 years and above of either sex who are engaged in some work for pay or profit including un-paid family helpers as well as those not working but looking for work and laid off.

The Crude Activity Rate is measured as the percentage of economically active persons to the total population while the Refined Activity Rate is measured as the proportion of economically active persons among the population exposed to the risk of entering the economic life.

In collection of the data on economic activities "usual status" approach has been adopted as against the approach of labour force surveys, where data is usually collected on "current status" basis.

(j) Occupation

Occupation means the main job, profession, trade or kind/type of work usually performed by a person. In case of more than one occupation, the principal occupation is recorded. The principal occupation is that in which the person works most of the time.

(k) Industry

Industry means the activity of the organization, or business in which a person usually works.

Employment Status**(a) Self-employed**

Self-employed is a person who operates his own farm, business, or industry or practices a profession but does not employ any hired help, paid either in cash or kind.

(b) Government employee

A Government employee is a person who works in any Government/Semi-Government Organization for pay.

(c) Private employee

A Private employee is a person who works, for pay, for person/farm/shop/firm/organization/office which is not run or managed by the Federal/Provincial/Local Government/Autonomous body.

(d) Employer

Employer means a person who operates his own farm, business or industry or practices a profession and who employs one or more persons for the purpose.

(e) Un-paid Family Helper

Un-paid family helper means a person who works, without pay or profit, on family farm, business or industry.

Migrant Population

The migrant population mean those who have moved out their residence from one administrative district to another administrative district. It excludes population who have moved within a district.

Disability

Disability refers to the physical and organic handicap of a person due to natural deformity or deficient functioning of any limb resulting from accident, disease, etc. For census purposes it refers to visible malfunctioning of any organ of the body. It includes blind, deaf and mute, crippled, mentally retarded and insane.
