PREFACE

The Fifth Population and Housing Census, initially due in March 1991, was conducted from 2-18 March 1998 throughout the country including Federally Administered Tribal Areas, Northern Areas and Azad Kashmir. During the first three days i.e., from 2nd to 4th March houselisting was carried out where in each house was physically numbered and registered as an inventory for conduct of the census from 5th to 18th March. The inventory served as a guideline for the supervisors besides ensuring complete coverage, during the census operation.

There were 3 separate questionnaires used for houselisting and collection of information on population and housing characteristics. Form-1 (Annex-A) was used for houselisting. Form-2 i.e., short form (Annex-B) was used for collection of information about all persons on core questions such as name, relationship with the head of the household, residential status, sex, age, marital status, nationality, religion, mother tongue, literacy, educational attainment and possession of national identity card, number of rooms, tenure, period when constructed, construction material of walls and roofs and source of drinking water-inside or outside, source of light, fuel used, type of kitchen, bathroom and toilet facilities and watching of TV and radio and reading of newspapers.

Form-2-A i.e., long form (Annex-C) was used for obtaining additional information about migration alongwith its reasons, field of education, economically active population, fertility, disability and inoculation of children against 5 diseases were asked on sample basis. About 8 percent single stage stratified sample was drawn with slightly more representation given to small provinces, districts and urban areas to make it a representative sample. Necessary definitions and concepts relating to the above mentioned questionnaires/forms are given at (Annex-D) for information of the readers.

The report mainly consists of three sections viz write up which carries general description of the district and some analysis of population and housing data, second section comprises tables while third section provides additional information about these sections in the form of annexures.

The write up section contains three main parts viz (i) general description about the district, (ii) broad analysis of population census data and (iii) broad analysis of housing census data. The general description covers location, boundary, area, geography, climate, rainfall, ethnicity, administrative set-up, agriculture, flora and fauna, health, industries, communication system, infra structure beside introducing the district. The broad analysis of population census data deal with population size, growth and distribution, other demographic and socio-economic characteristics.

The broad analysis of housing census data throw light on housing units/households, in terms of information on number of rooms, population density per housing unit and per room, tenure, period since constructed, construction material used on walls and roofs, source of drinking water, source of lighting, cooking fuel used in kitchen, availability of kitchen, toilet and bathroom facilities and assessment of media reach etc.

The report comprises 52 tables in all, 40 relate to population data, 12 to housing data. Of 52 tables 27 are based on complete count information while remaining on sample count information. Because of space problem the tables on occupation and industries are given in coded form. Therefore, after mentioning occupation and industries in coded form on the tables the detail occupational groups and industry divisions and district map are appended at Annex-E, F & G respectively.

Census taking was a gigantic task which involved the whole nation in one way or the other which is commendable as a team work. The role of Provincial Governments was very vital and with out their active cooperation, the operation would not have been successful. The meritorious services rendered by the field staff in addition to their own jobs, are also appreciable. The services rendered by the staff and officers of Federal Bureau of Statistics in training and data processing was helpful. I am personally indebted to the Federal Government who inculcated in me a sense of responsibility to conduct the census in March 1998, and releasing the data as early as possible for the benefits of all users.

The Armed Forces supported the Population and Housing Census work on hundred percent basis therefore, I extend my gratitude to their officers/staff involved in this operation.

I also thank the International Agencies like UNFPA, UNDP, UNICEF for their financial assistance in acquiring equipment & machinery and technical support in the form of consultancy services, training and study visits abroad.

Finally I thank the officers and staff members of the Population Census Organization for their relentless efforts to complete the census successfully.

PART-I
GENERAL DESCRIPTION
OF THE DISTRICT

1. GENERAL DESCRIPTION OF THE DISTRICT

1.1. GEOGRAPHY

1.1.1. Name, Location, Boundary and Area

Dera Bugti derives its name from the Bugti tribe which is the dominant tribe of this agency. The agency is named after its headquarter town "Dera Bugti"; means, the abode of Bugtis. It was created in July, 1983 and given an independent status as Dera Bugti agency/district.

Dera Bugti agency is located between $68^{\circ}.16'$ to $69^{\circ}.48'$ east longitude and $28^{\circ}.28'$ to $29^{\circ}.40'$ north latitude. It is bounded in the north by Kohlu agency, in the south by Jacobabad district, in the east by Dera Ghazi Khan, and Rajanpur districts, and in the west by Nasirabad and Bolan districts. Total area of the district is 10160 square kilometres. The district comprises three sub-divisions, Dera Bugti, Sui, and Phelawagh. Dera Bugti is the district, sub-division as well as tehsil headquarters with town committee status. The maps of the district as well as tehsils, are attached as annexure-G.

1.1.2. Physical Features and Topography

Physically, the district is characterized, as barren mountains and vast barren plains. The area available for cultivation comprises of alluvial soil suitable for growing cereal crops, fodder and vegetables depending upon the availability of surface water as well as rainfall which is rare and inadequate in the area.

1.1.3 Rivers and Streams

There is no river in Dera Bugti agency, however, its important '*nadies*', streams and lake are : Marav Lake, Shori, Heran, Siabat and Pathar.

1.1.4 Climate

The climate is hot and dry during summer, and cold and dry in winter. Rains are received during July to September in summer and February to March in winter. Table 1.1 shows the annual mean, temperatures and rainfall as well as relative humidity.

Since, there is no meteorological station in Dera Bugti district, the rainfall data and other informations recorded at meteorological station Sibi, are used for reference purpose due to similar climate.

The data shows that the maximum mean temperature ranges from 22.65°C in January to 46.01°C in June whereas the minimum mean temperature ranges from 5.64°C in January to 30.90°C in June, however, the annual maximum mean temperature remains around

35° C. The total annual precipitation is about 149 mm., and the relative humidity at about 39 percent.

1.1.5 Flora

There is limited plantation in the area, however, acacia and wild shrubs of different kinds are among the important plants found in the agency.

1.1.6 Fauna

The wild animals found in the agency include jackal, fox and rarely wolves.

1.2 AGRICULTURE AND RELATED SECTORS

1.2.1 Agriculture

Agriculture is the major sector of economy as well as an important source of income and employment in the Dera Bugti agency. Total area available for cultivation is 21,014 hectares, of which only 37 percent is cultivated as no perennial surface irrigation is available whereas rainfall is uncertain and even in-adequate. The traditional Rabi and Kharif crops are sown in the agency. The Rabi crops are sown in September/October and harvested in May/June. The Kharif crops are sown in June/July and harvested during September/October. Important Rabi and Kharif crops alongwith area, production and average yield per hectare are shown in table 1.2.

Mechanized farming as well as use of chemical fertilizers and pesticides is not very common. Most of the farmers use animals, for ploughing. The farming is almost carried out by men, however, women also contribute.

The Irrigation Department has prepared two schemes which would, on completion, help bring 3214 hectares of land under cultivation. The schemes are: (i) Sangsilla Irrigation Scheme to irrigate 2000 hectares and (ii) Storage Dam, near Dera Bugti town, to irrigate 1214 hectares.

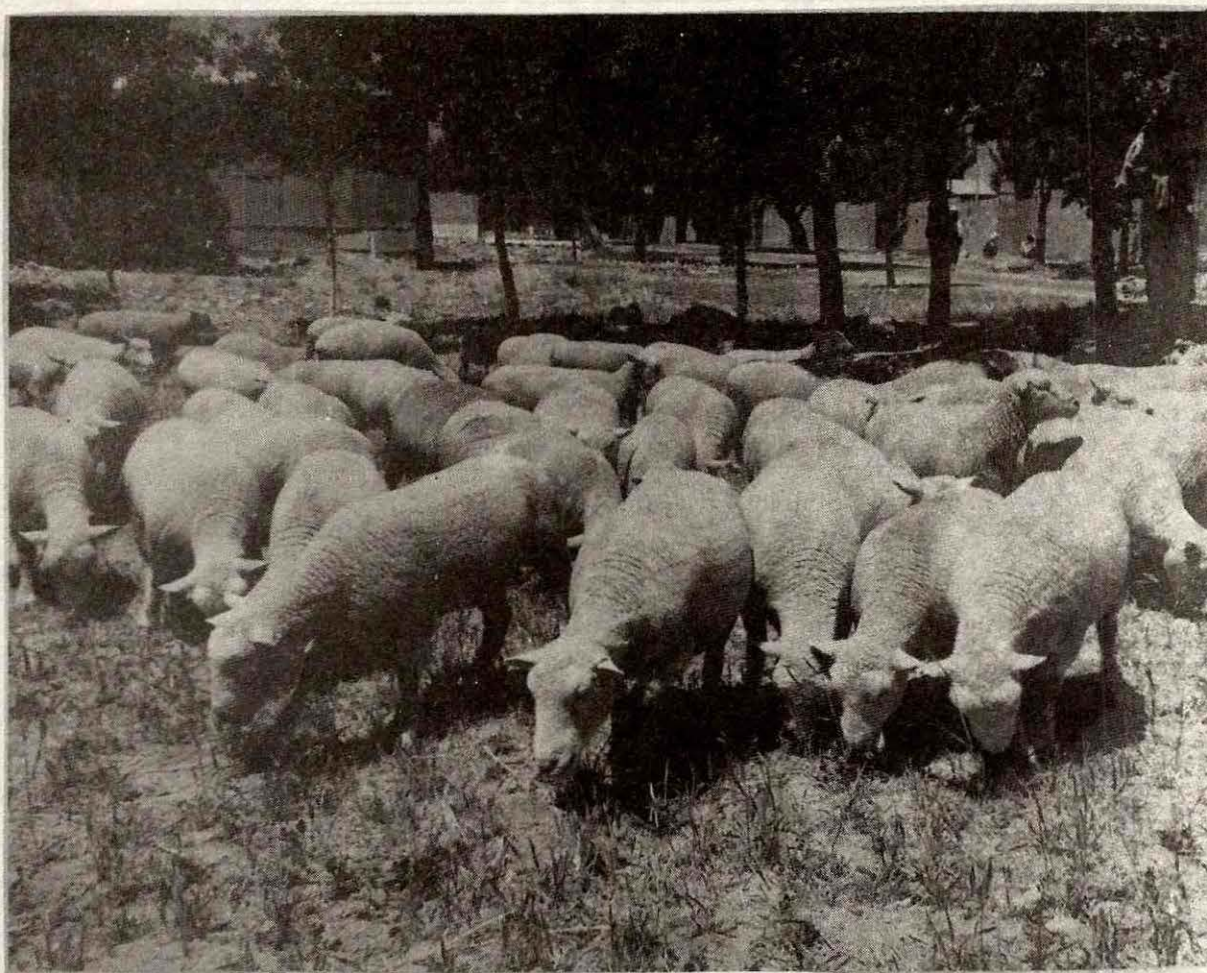

1.2.3 Horticulture

The climate being hot and dry, is not suitable/ favourable for gardening/horticulture in the Dera Bugti agency as such no significant production of fruits is reported, however in 1997-98 an area of 15 hectares was recorded with total production of about 95 tonnes of fruits in the agency.

A HERD OF SHEEP

1.2.4 Livestock

A powerful livestock sector exists in the Dera Bugti agency which perhaps makes up more than its deficiency in respect of arable land. Livestock combined with agriculture is the major source of income generation and employment in the agency. Mostly, the entire families of farmers participate in livestock management. Live stock population in the Agency is shown in table 1.5.

One veterinary hospital, 27 veterinary dispensaries, and one artificial insemination center are functioning in the agency.

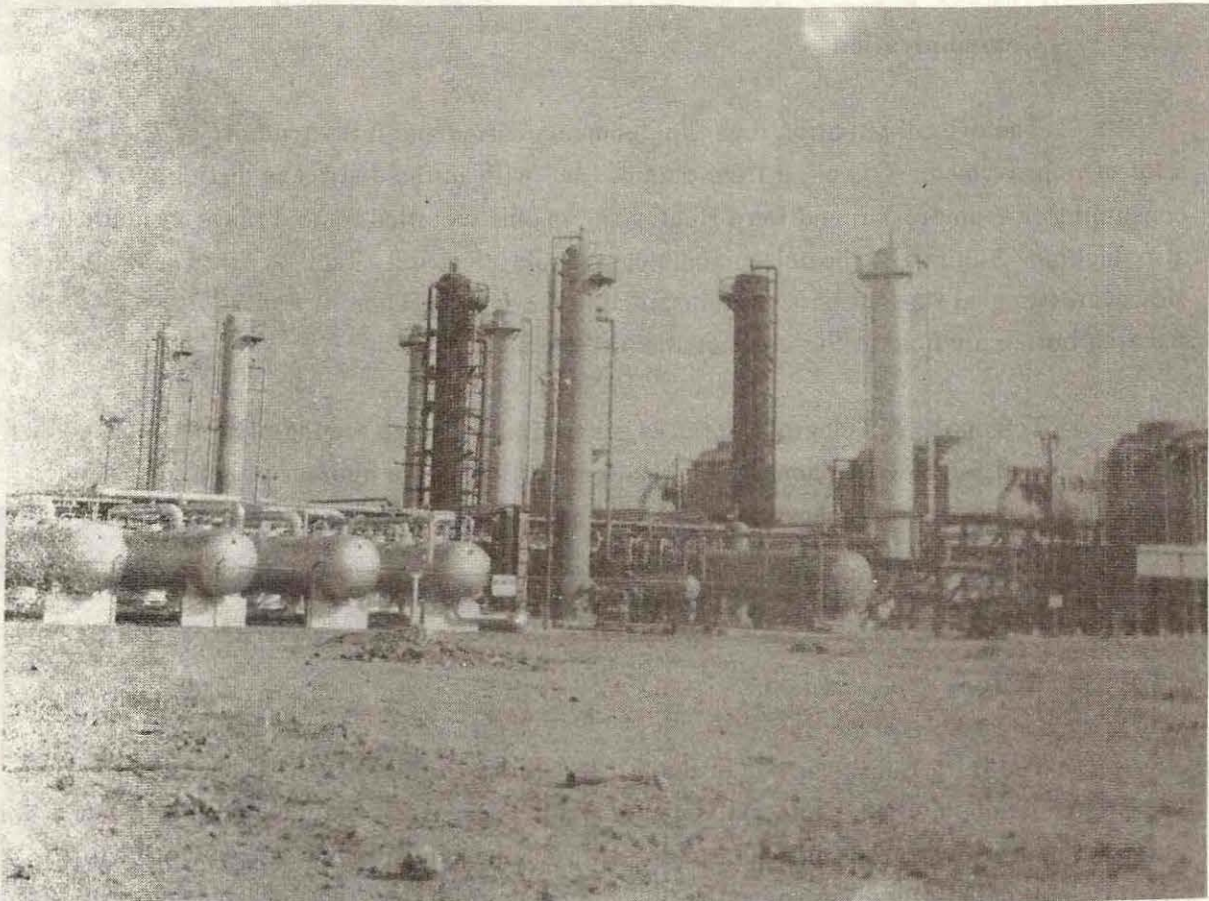

1.2.5 Forestry

No official statistics is available on the size and types of forests; a large part of the agency is still un-reported.

1.3 INDUSTRY AND TRADE

1.3.1 Industry

The industrial activity is limited to flour milling. The agency has the biggest and the first natural gas plant at Sui which supply natural gas for domestic as well as commercial purposes throughout the country. Other fields are Pir Koh, Loti and Uch in the agency. Cottage industry includes wool spinning/weaving, while small scale industry comprises of brick kilns.

SUI GAS INSTALLATION AT SUI

1.3.2 Mining

The Dera Bugti agency has the distinction of harnessing natural gas 1st time in the country in 1963. Heavy reserves of natural gas are available in the agency at Sui.

1.3.3 Trade

No trading activity or trade centers for that matter exist in the area. Transportation of goods and essential commodities for local consumption is carried out from sukkur and Jacobabad (Sind) and Sadiqabad (Punjab).

1.3.4 Communication

The overall situation regarding communication and infrastructure still requires a lot of improvement. Traveling from outside and with-in the district is difficult and time consuming; Kashmore-Sui and Dera Bugti road, is only metalled road. Transport facility is also lacking. Similarly the telecommunication and electricity facilities are inadequate. However, two grid stations have been installed in the agency. There is no Railway service in the area but an air field at Sui connected with PIA flights..

Telephone & Telegraph services are available which are mainly concentrated in Dera Bugti and Sui towns. There is one head post office, and a number of sub-post offices in the agency. Several branches of commercial banks have been established.

1.4 HISTORY, ETHNICITY/TRIBES AND CULTURE

1.4.1 History

The Dera Bugti was one of the last territories to fall to the British colonial rule. The Bugtis defied the British imperialism with great courage, and fought a number of battles against them. However, in last quarter of 19th century the British rule extended to the territory, now called Dera Bugti agency which later constituted a part of Sibi district. In 1974, by the creation of Kohlu agency; Dera Bugti was made part of Kohlu agency, however, detached from it in July, 1983 and notified with an independent status as Dera Bugti agency/district.

1.4.2 Ethnicity/Tribes

Dera Bugti is mostly the Baloch dominated area. The non-Baloch population is less than five percent of the total, and mainly concentrated in Dera Bugti and Sui towns. The Bugti tribe, is the main tribe, which consists of eight main sections, and twenty eight sub-sections, as per detail given below:

SECTIONS AND SUB-SECTIONS OF BUGTI TRIBE

Main Section	Sub-Section	Main Section	Sub-Section
1. Raheja	1. Beeberakzai 2. Sobhazai 3. Karmanzai 4. Mandwani	6. Kalper	1. Bandulani 2. Habibani 3. Bakhilani 4. Deenari 5. Hamzani 6. Hotkani
2. Nothani	1. Baluchanzai 2. Darmanzai	7. Shambani	1. Shambani 2. Saidani 3. Khiazai

4. Perozani	1. Shalwani 2. Chakrani 3. Perozani		
5. Mondrani	1. Mondrani 2. Phong		

1.4.3 Culture, Customs and Traditions

The Sardari system evolved several centuries back is still, fully intact in Dera Bugti agency. The area is mostly inhabited by the Bugti tribe. Each sub-section has its own Sardar. Similarly, each of the eight main sections has a chief of sardars. Besides, there are dignitaries and notables in each main section. The common tribesmen among the Balochi follow their section's administration, while the others abide by the Provincial Government administration.

The Population of the Dera Bugti agency/district is almost muslim of Sunni faith. The minorities including Hindus, Sikhs, and Christians and others constitute about one percent of the district population. The non-muslims can also join the Bugti tribe, and use the surname of Bugti.

1.4.4 Food

The food habits of the local population are almost the same as in other rural parts of Balochistan. There are three usual eating times: morning for breakfast, Noon for lunch, and after sunset for dinner. The composition of breakfast and meals is simple and traditional. All meals are freshly cooked and the family members eat together.

1.4.5 Dress

Kamiz-Shalwar and turban preferably of white colour are worn by all men. The cut of their dress differentiates them among Marris and from other tribes. Women wear embroidered *kamiz shalwar* with *chaddar* over the heads.

1.4.6 Dwellings

Almost 92 percent of the population resides in villages. A typical village comprises several dwelling units located close to each other and occupied by a single class or sub-tribe.

1.4.7 Occupation

Agriculture and livestock raising are the major occupations and sources of income and employment. Employment, in public and private sectors, is the second most important source of income. Business is run only by a small section of the population, hardly one percent and mostly by Hindus.

1.4.8 Customs and Traditions

The joint family system predominates in the society particularly in the rural areas. The nuclear families, are in a limited and insignificant number, and found mainly in urban area. All traditions and customs are intact and a little or no change has taken place in this regard in the agency since the creation of Pakistan. The custom of vulvar is still persistent and sardari system is fully existing in the agency. The conflicts and conquest are resolved normally through the traditional ways by involving the elders, Jirga and Syeds and referred to the courts rarely. Carrying arms is a tradition which include various kinds of pistols, rifles, shotguns etc. whereas the Sardar's/Chief's keep machine guns and even rocket launchers.

The role of women is limited in decision making regarding family matters, there is no tradition of granting right of inheritance to the women in the society.

1.4.9 Betrothals and Marriages

Very strong customs exist in the agency especially regarding marriages, parents make selection of male or female life partner. Vulvar system is still a common practice which is not viewed as a price for the bride but considered as a customary/traditional contribution of the bridegroom towards marriage expenses. The vulvar is normally used for the preparation of bride's ornaments, clothing and furniture as well as expenditure of wedding feast is met through it. The parents of bride also contribute in the marriage expenses.

1.5 ADMINISTRATIVE SET-UP

1.5.1 District Administration

The agency's administration is headed by a Political Agent (Deputy Commissioner). The Political Agent is the custodian of law and order in the agency and is the overall coordinator of the various government departments. The district comprises 3 sub-division cum tehsils and 5 sub-tehsils. The detail of various administrative levels in the agency is as under:-

1.5.2 Police Department

For enforcement of law and order, the agency has the regular provincial police as well as federal (frontier constabulary) and provincial (levies) forces.

Dera Bugti agency/district has only one intermediate college where co-education system exists. Although the cultural milieu of the area does not allow co-education, a few families have allowed their daughters to gain college education together with boys, but the phenomenon necessitates the need for a Girls College in Dera Bugthi agency separately.

1.8 IMPORTANT/HISTORICAL PLACES

There is no place of tourist interest in Dera Bugti agency except the fort of Nawab Muhammad Akbar Khan Bugti and the Sui Gas installation at Sui town, which has given it an international fame.

BROAD ANALYSIS OF
POPULATION CENSUS DATA

2. BROAD ANALYSIS OF POPULATION CENSUS DATA

2.1 POPULATION SIZE, GROWTH AND DISTRIBUTION

2.1.1 Population Size and Growth

The Population of Dera Bugti agency/district, has emerged at 181.31 thousands in 1998 as compared to 103.82 thousands in 1981, recording a significant increase of 74.64 percent over a period of 17 years i.e., 1981-1998. In contrast to this a relatively higher increase of 96.94 percent occurred during intercensal period 1972-81 as against 64.50 percent during 1961-72. However, in the long run, a substantially high increase of 465.73 percent (12.59 percent per annum) has taken place during 37 years; 1961-98, depicting a highly upward trend over the time.

The annual average growth rate of population has declined at 3.33 percent during intercensal period 1981-1998 in comparison to 8.35 percent during 1972-1981 and 4.37 percent in 1961-72. Although, the annual average growth rate has declined considerably in 1981-98, it is still high enough and the population of the district will double in next 21 years if it continues to grow at this rate i.e., 3.33 percent per annum.

Table 2.1 shows the population and intercensal increase since 1961.

Fig 2.1 reflects the population of last 4 censuses.

Fig 2.2 demonstrates the trend of population growth rate since 1961.

2.1.3 Rural/Urban Distribution

The rural population of the district, in 1998 census stands at 165.82 thousands, constituting 91.45 percent of its total population. It has grown at an annual average growth rate of 2.79 percent during 1981-98 which has come down from a substantially high rate of 8.60 percent during 1972-81 whereas the rate was 4.50 percent during 1961-72.

The urban population of the district is 15.50 thousands, constituting 8.55 percent of its total population. Dera Bugti is the only urban locality in the district with a town committee status as well as district, sub-division & tehsil head quarters with a population of 15495. Fig 2.3 reflects the rural/urban proportion of population in, 1998.

2.1.4 Religion

The population of the district is almost muslim which constitutes 99 percent of its total population: The muslim population in rural areas is 99.44 percent while that is 92.83 percent in urban area. 2.2 SEX, AGE AND MARITAL STATUS

2.2.1 Sex Ratio

Sex ratio is defined as the "number of males per hundred females". The overall sex ratio in the district is 115.90 in 1998 census which is a little higher in urban area at 117.08 in comparison to 115.75 in rural areas.

The ratio varies significantly at various age brackets. It rises sharply at 00-04 age group, from 87.59 to 126.31, at age group 05-09 and reaches 174.97 at ages 10-14, thereafter it shows a continuous declining trend up-to ages 35-39 and retreats at 99.52. However, it rises up again at 136.72 at age group 50-54. At advanced ages (60+) it ranges from 104.20 to 183.94 and touches the peak by depicting a highly up-ward trend. This may be attributed, either to high death rate, under reporting or age misreporting of females at various age brackets owing to cultural constraints or some other reasons.

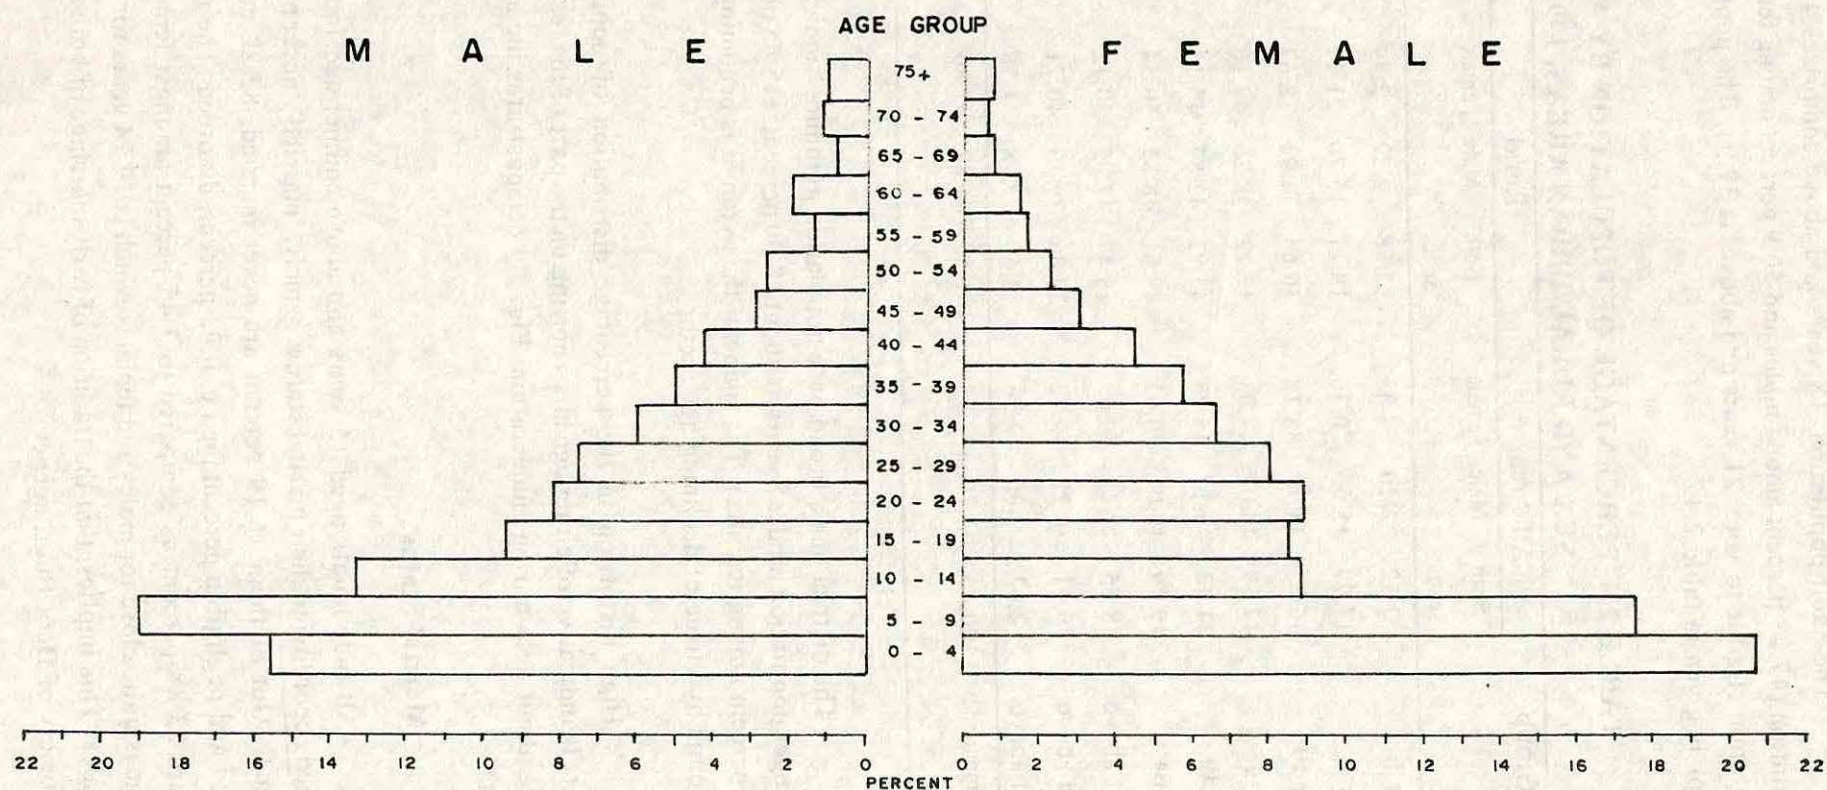

2.2.2 Age Structure

The age structure of the district shows that population below 15 years, is 47.59 percent; of which 17.99 percent is below 5 years of age including 2.72 percent infants. The Population of 65 years and above is 2.63 percent. The population of working age groups (15 -64 years), has emerged at 49.79 percent giving a high age dependency ratio of 100.86 percent.

The age dependency ratio is still higher in rural areas at 101.55 percent as compared to the over all ratio in the district as well as in urban area at 93.65 percent. It varies moderately in favour of females in rural areas in contrast to males, in urban area.

Fig : 2.4

POPULATION PYRAMID DERA BUGTI DISTRICT AGE AND SEX STRUCTURE 1998

The adult population, 18 years and above comprises 48.55 percent of the total population (47.23 percent among males and 50.9 percent among females). the percentage of population eligible to vote, 21 years and above, is 39.91. The population by important age groups is given in table 2.4.

The district has a broad base population pyramid, indicating a high proportion of younger population, under 5 years at about 18.00 percent, (15.65 percent among males and 20.70 percent among females). The shape of the pyramid is becoming narrower at advanced age groups by virtue of declining age factor.

High distortion in the percentage distribution of population at various age brackets is indicative of either age misreporting on the part of the respondents or the lack of probing about ages during enumeration. Fig. 2.4 demonstrates the age sex structure in the district.

2.2.3 Marital Status

All individuals aged 15 years and above enumerated in the 1998 Census were classified according to their marital status; namely, 'married' 'never married' 'widowed' and 'divorced'. Out of them 16.19 percent are never married, 82.22 currently married, 1.56 widowed and negligible percentage i.e. 0.03 percent, divorced. The never married amongst males are 23.88 percent as compared to 7.45 percent amongst females. The mean age at marriage is quite close for males and females which is 19.74 years for males and 19.47 years for females. This implies, that the tradition of early marriage of both sexes is still persistent in the society of Dera Bugti agency.

2.2.4 Females of Reproductive Ages by Marital Status

Of the total female population in the district, 45.23 percent is in the reproductive ages, i.e. 15 - 49 years; the percentage is a little higher in urban at 46.22 as compared to 45.13 in rural areas. Among the females in reproductive ages, 8.32 percent are never married, 90.91 percent currently married, 0.74 widowed and only 0.03 percent divorced.

More than 36 percent of the ever married women of reproductive ages are found without any child, 13.71 percent have 1 child, followed by 13.05 percent, having 2 children, while 11.80 percent have reported 4 children and 11.38 percent 3 children. However, 13.49 percent of the ever married women have reported more than 5 children.

2.2.5 Disabled Persons

The disabled persons, 2384 in all, constitute 1.32 percent of the total population in the district. Among the disabled persons, 59.31 percent are males against 40.69 percent females. The percentage of blinds among the total disabled persons is the highest at 12.08, (12.45 percent among males and 11.55 percent among females), followed by crippled 4.95, deaf and mute, 4.36 and insane, 3.90. The percentage of mentally retarded is 3.39 while 2.59 percent of the total disabled population suffered with more than one disability. However, about 69 percent among the disabled have reported some other categories of disability.

2.3 LITERACY AND EDUCATIONAL ATTAINMENT

2.3.1 Literacy

Literacy, in census 1998, is defined as the "ability to read a newspaper and write a simple letter in any language". It is measured in terms of "literacy ratio": computed as the percentage of literate persons among the population aged 10 years and above.

Literacy ratio in respect of Dera Bugti agency/district has yielded at 11.73 percent in 1998 census. It varies significantly for males as high as 18.89 percent in contrast to as low as 2.97 percent, for females.

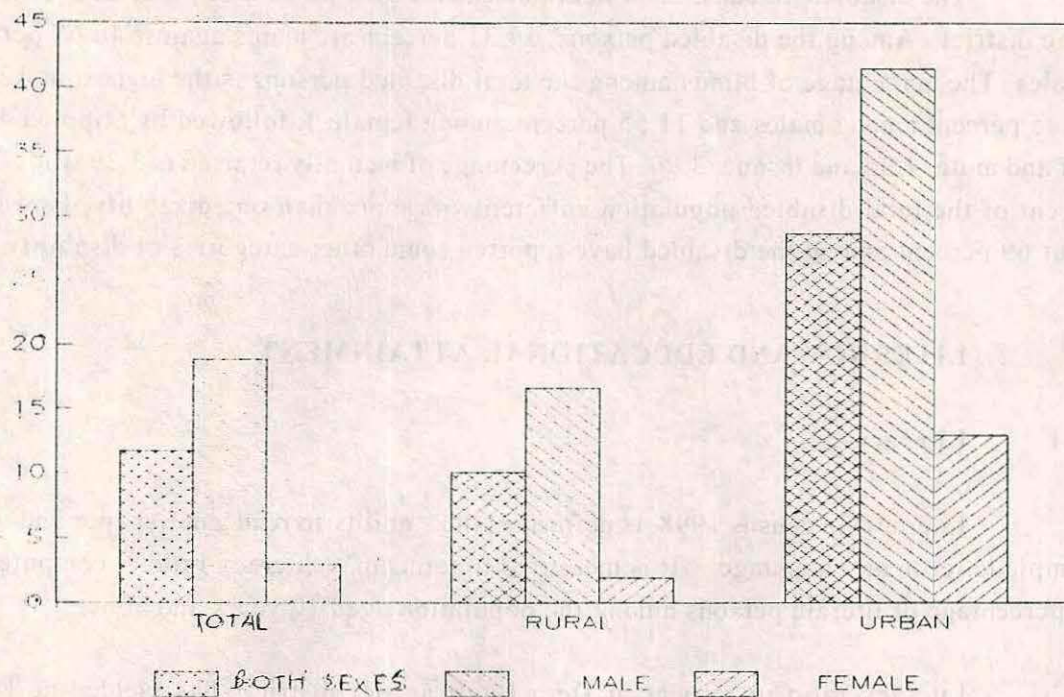

A high diversity in the literacy level exists between rural and urban areas as well as by gender as reflected in table 2.5.

The literacy ratio in urban area is almost three times at 28.71 percent as against 10.05 percent in rural areas. A wide sex differential persists both in rural and urban areas. However, it is more glaring in urban area as the male literacy ratio is significantly higher at 41.94 percent in contrast to female literacy ratio at only 12.94 percent. Although, the literacy ratio of males at 16.64 and females at 1.96 is not that high in rural areas as in urban, yet, the

Fig : 2.5

DERA BUGTI DISTRICT

LITERACY BY SEX AND RURAL/URBAN, 1998

gap between two ratios is comparatively narrower in favour of males, at about 15 against 29 percentage points in urban. The high illiteracy of females in the agency may be the outcome of traditional negative attitude towards female education as can be expected in any tribal or semi tribal society which demands effective remedial measures at official as well as private level. Table 2.5 reflects literacy ratios by sex and area in 1998. Fig 2.5 demonstrates literacy ratios.

Urban	28.71	41.94	12.94

2.3.2 Educational Attainment

A person who has attained any educational level among the population aged 10 years and above is treated as educated. The educated persons in the district are only 11.42 percent including those below primary; the remaining 88.58 percent, either, attained no educational level or have never attended any educational institution. A large variation exists in the ratios of educated persons in rural and urban areas as well as for males and females. The percentage of educated males is 18.50 and for females 2.70. As regards area, it is 9.70 percent for rural as against 28.51 percent for urban. Table 2.6 gives the ratio of educated persons.

Urban	28.51	41.69	12.80

2.3.3 Enrolment Ratio

The enrolment ratio, measured as percentage of students to population of ages 5-24 years, is worked out at 7.50 percent for the district. It is higher for males at 10.55 percent compared to 3.46 percent for females. The enrolment ratio is significantly higher in urban

at 23.87 percent compared to only 5.85 percent in rural areas. A vast difference appears between male and female enrolment ratios both in rural and urban areas. The ratio of male enrolment is more than double to that of females in urban and three and a half times in rural areas. Table 2.7 shows enrolment ratios.

2.3.4 Level of Education

Of the total educated persons in the district, 23.85 percent have passed primary, 25.20 middle, and 20.98 matriculation. After matriculation, the percentage falls to 4.93 for intermediate, 3.66 for graduates and 1.36 for post graduates while 2.81 percent are diploma/certificate holders. The situation, however, demands a lot of improvement to enhance the education base.

2.4 MIGRATION

2.4.1 Migration

Migration data covers movement of population in terms of shifting the residence from one district to another in the same province or from one province to another. It does not cover persons who changed their place of residence within their own district.

2.4.2 Lifetime Migrants

The total lifetime in-migrants in the district are 6793 (3.75 percent of the total population). They are 89.36 percent in rural and the remaining 10.64 percent in urban areas, the male and female lifetime in-migrants are 98.22 and 1.78 percent respectively. The persons who have migrated into the district during the last 5 years i.e. after March, 1998, are 48.14 percent, while 17.83 percent had migrated earlier to 5 years but after 1978. The remaining 34.03 percent have migrated in, 10 years earlier.

The majority of life time in-migrants i.e., 81.51 percent migrated in the district due to employment or transfers while 2.36 percent moved with head, 0.75 percent due to business, 0.16 percent migrated into the district as a result of marriage and 0.04 percent for education. The percentage of immigrants within the province is negligible i.e. 0.41 percent. The majority of the reported immigrants is from other provinces sharing at 16.89 percent in

the total life time immigrants. The maximum in-migrants i.e., 82.67 percent, however, had not reported their place of previous residence reflecting a very poor response to the question as well as lack of probing during enumeration.

2.5 ECONOMIC CHARACTERISTICS

2.5.1 Economically Active Population

Economically active population comprises the persons aged 10 years and above of either sex who are engaged in some work for pay or profit including unpaid family helpers as well as the un-employed persons; not working but looking for work and laid off during the reference period. Economically active population, in the district comprises 50131 persons (94.36 percent males and 5.64 percent females). It constitutes 27.65 percent of the total population in 1998, the remaining 72.35 percent economically inactive population comprises 36.32 percent children below 10 years age, 28.49 percent domestic workers including 27.03 percent housewives, 2.11 percent students and 5.43 percent all other categories. Table 2.9 provides the percentage of population by economic category.

Un-employment rates	23.77	25.12	1.17	23.98	25.41	1.1	21.09	21.60	1.08

The participation or activity rate measured as percentage of the economically active persons to the total population is called crude activity rate whereas the ratio of economically active persons to the population aged 10 years and above is termed as refined activity rate. The crude activity rate in the district is worked out at 27.65 percent while the refined activity rate is 43.42 percent. However, the refined active rate has been used for analysis purpose. A high variation exists between male and female activity rates at 74.45 and 5.45 percent respectively.

Amazingly, the activity rate is fairly high in rural areas at 44.18 percent as compared to 35.75 percent in urban area. Similarly, the activity rates in respect of both males and females are higher in rural areas than the corresponding rates in urban area.

A vast sex differential of 69.66 and 62.15 percentage points in the activity rates exists in favour of males respectively in rural and urban areas. The low participation of females in the economic activity can be attributed either to their engagement in housekeeping activities or to the cultural milieu to some extent, however, their role as unpaid family helper in farming as well as livestock raising cannot be ignored.

2.5.2 Un-employment

The un-employment rate is measured as a percentage of the un-employed persons including those not working but looking for work and laid off, among the economically active population. The un-employment rate in Dera Bugti agency/district is computed at 23.77 percent. The un-employment rate deviates significantly at 25.12 percent for males as compared to 1.17 percent for females. A minor variation in the rates exists in favour of rural areas. Sex differential is significantly higher in favour of males both in rural and urban areas at 24.24 and 20.52 percentage points respectively. Table 2.9 shows un-employment rates in the district.

2.5.3 Employed Population by Occupation

Among the employed class in the district, the highest percentage, 57.11, belongs to Major Occupation Group-6 "Skilled Agricultural and Fishery Workers" followed by Group-9, "Elementary Occupants" and Group-8, "Plant and Machine Operators and Assemblers" comprising 25.66 and 4.27 percent respectively. The next higher is Group-5 "Service Workers and Shop and Market Sales Workers" sharing 4.25 percent in the total employed Population. The remaining 8.71 percent are in other occupational Groups. The male occupants follow a similar pattern, except the Group-8 which is replaced by Group-4. However, the majority of females is associated with Group-8 at 50.25 percent share followed by Group-7 "Craft and Related Trades Workers" at 27.02 percent and then Group-6 at 12.99 percent.

The pattern of occupational status varies in rural and urban areas. However, in rural areas it is almost similar to the overall pattern of the district as the maximum share is that of Group-6 at 60.75 percent followed by Group-9 at 23.66 percent and Group-8, 4.32 percent while Group-5 is replaced by Group-7 "Craft and Related Trades Workers" with 3.61 percent share. In urban area, the pattern differs with the overall pattern, with maximum share of Group-9 at 49.71 percent followed by Group-5 at 19.14 and Group-6 at 13.31 percent.

The sex differential regarding occupational status is quite visible within and across the rural/urban boundaries with varying degree of percentage share and category. However, majority of males is associated with Group-6 followed by Group-9 and Group-5 in contrast to females participating in Group-9 followed by Group-8 and Group-1.

2.5.4 Employed Population by Industry

The majority of the employed persons in the district is associated with the Major Industrial Division-1, "Agriculture, Forestry, Hunting and Fishing" with 53.18 percent share followed by Division-4, "Electricity, Gas and Water" comprising 17.92 percent. Next comes the Division-9, "Community, Social and Personal Services" and Division-3 "Manufacturing", contributing 13.39 and 6.61 percent respectively. The other industrial Divisions share 8.90 percent.

The male employed population follows a similar pattern with a slight change of Division-5 instead of Division-4 at 4.97 percent share. However the majority of females is associated with Division-3 with 80.14 percent share followed by Division-1 at 15.3 percent share.

The rural employed population follows the overall industrial pattern in the district, however Division-1 shares maximum at 56.64 percent followed Division-9, Division-4 and Division-3. On the contrary, in urban area, the pattern is entirely changed, with Division-9 at the maximum share of 42.90 percent, followed by Division-5, Division-1 and Division-7. "Transport, Storage and Communication" with 26.50, 11.54 and 3.06 percent shares respectively.

A sharp contrast exists between employed males and females by industrial classification within and across the rural/urban boundaries. The majority of females is engaged in Industrial Division-3 in rural areas and Division-5 in urban area at 82.61 and 43.48 percent shares respectively in contrast to males only at 0.73 and 25.94 percent shares in the respective division and area. However, the employed males share maximum at 60.06 percent in Division-1 in rural areas and Division-9 in urban area at 43.45 percent as compared to 15.47 and 26.08 percent employed females in the corresponding division and respective area.

2.5.5 Employed Population by Employment Status

The percentage of employed population to the population aged 10 years and above in the district is 33.10 which is 76.23 percent of the total economically active population. Of this 69.14 percent is self-employed, 26.23 percent working as employee (Government, Autonomous and Private) and 4.38 percent as unpaid family helper and only 0.25 percent as employer. Table 2.10 gives percentage of population by employment status.

The percentage of employed population by employment status varies significantly in rural and urban areas. In rural areas, the majority 71.20 percent is self employed followed by 16.11 percent Atonomous and 6.81 percent Government employee and 4.12 percent unpaid family helper. On the other hand, in urban areas 44.30 percent are self employed and 37.56 percent Government employee compared to 8.04 percent private employee and 7.56 percent unpaid family helper.

A significant sex differential is reflected regarding employment status in general as well as, both in rural and urban areas. It is however, commom that majority of both, males and females, is associated with the self-employed category but with varing percentage share.

2.6 IMMUNIZATION

The question about immunization has been included in the 1998 population census for the first time to evaluate the vaccination programme launched by the govt. from time to time. It is accounted for that 27.26 percent of the children under 10 years age have been reported in 1998 census as vaccinated while 20.53 percent reported as not vaccinated leaving the rest i.e. 52.21 percent as not known. The percentage of vaccinated male and female

children closely varies at 13.04 for males and 14.22 for females. The percentage of vaccination done in urban area is double at 50.54 than that in rural areas at 25.31. Table 2.11 gives the detail of immunization. The response to the question about immunization is less than 50 percent which implies that the quality of enumeration is not upto the mark, for which both, the respondents and enumerators are held responsible.

2.7 NATIONAL IDENTITY CARD

The question about National Identity Card was asked in the 1998 census for the first time to see the coverage element of I.D. Cards. The question about NIC was asked from population aged 18 years and above. According to the response to the question it was found that 52.55 percent of population aged 18 years and above had obtained NIC, among which 30.22 percent were males and 22.33 percent females.

Variation by area shows that 76.77 percent of urban population has obtained NIC as compared to 50.24 percent in rural. The coverage in urban areas is also higher for both males and females at 80.34 and 72.65 percent respectively in contrast to the corresponding percentages at 55.67 and 44.35 in rural areas. Table 2.12 gives necessary details by sex and area. Sex differential of 11 and about 8 percentage points between card holder, males and females exists in favour of males respectively in rural and urban area.

PART - III
BROAD ANALYSIS OF
HOUSING CENSUS DATA

3. BROAD ANALYSIS OF HOUSING CENSUS DATA

3.1 TYPE OF HOUSING STOCK

3.1.1 Level of Congestion-persons and Rooms

About 56 percent of the housing units in the Dera Bugti agency/ district are single room houses; the percentage is almost three times in rural areas in comparison to that in urban area. On the contrary, the percentage of housing units with 2 to 4 rooms is significantly higher at 67.19 in urban area as against 39.07 in rural areas. Similarly, the position of houses with 5 or more rooms is four folds in urban as compared to that in rural areas. The number of rooms per housing unit is higher in urban area at 2.5 as against 1.7 in rural areas. However, the level of congestion (persons per room) is slightly higher in rural areas at 3.53 in contrast to 3.52 in urban and 3.44 in the district. The level of congestion in terms of persons per housing unit is higher in urban at 8.8 in contrast to 6.0 in rural areas. Table 3.1 gives the indices of congestion in 1998 census.

TABLE 3.1 INDICES OF CONGESTION IN 1998 CENSUS

Level of Congestion	1998		
	All Areas	Rural	Urban
Persons per Housing Unit	6.2	6.0	8.8

Housing Units with one room (percentage)	55.92	58.17	21.55
Housing Units with 2-4 rooms (percentage)	40.79	39.07	67.19
Housing Units with 5 rooms and more (percentage)	3.28	2.76	11.25

3.1.2 Nature of Tenure

There were 28673 housing units in the Dera Bugti agency/ district in 1998 census, 26914 (93.86 percent) in rural areas and 1759 (6.14 percent) in urban area. As classified by tenure, 90.73 percent of the total housing units were owned. The percentage of ownership in rural areas was almost one and a half times i.e. 92.60 as against 62.19 in urban area. However, the percentage of rent free and rented housing units in urban is significantly higher than that in rural areas. In urban 35.70 percent housing units were rent free and 2.10 percent

rented as compared to the corresponding percentage of 6.85 and 0.55 in rural areas. Table 3.2 provides the data by nature of tenure.

TABLE 3.2 NATURE OF TENURE BY RURAL/URBAN, 1998

Rent Free	8.62	6.85	35.70

3.1.3 Period of Construction

Of the total owned housing units (26016) in the agency 41.44 percent were built before 10 years, 29.25 percent during the last 5-10 years, 28.72 percent during last five years and only 0.59 percent houses were found under construction. The percentage of houses constructed in urban before 10 years was higher at 50.64 as compared to that in rural at 41.04, similarly, the percentage of houses constructed during last 5-10 years was higher in urban at 32.08 as against 29.12 in rural areas. Implying a better construction trend in urban area which needs to be improved in order to reduce the high level of congestion in terms of number of persons per room as well as per housing unit.

3.1.4 Construction Material - Outer Walls

The quality indices of construction of outer walls are not that high in the agency as to be considered satisfactory. There is marked deviation in the qualitative indices of construction between urban and rural areas. In urban areas above 23 percent of the housing units have the standard pucca walls made of backed bricks/blocks and stones with cement bonding; 45 percent have walls of un-backed/bricks and earth bonded and 29 percent have wooden walls. In contrast to this, rural areas have only 12.21 percent of the walls in the standard category of backed bricks/blocks and stone with cement bonding and 40.68 percent of the walls are made of un-backed bricks with mud bonding. The wooden category is 31.05 percent and the un-specified category of material used is 16.05 percent. Table 3.3 gives details of construction material used in the outer walls.

TABLE 3.3 MATERIAL USED IN OUTER WALLS BY RURAL/URBAN, 1998 (PERCENTAGE)

All categories	100.0	100.0	100.0

Others	15.21	16.05	2.33

3.1.5 Construction Material-Roofs

The standard of construction of roofs significantly differs in rural and urban areas as appears from table 3.4 below. As regards the categories, both in rural and urban areas, above three fourth of the housing units have used baked bricks supported by girder or wooden log/bamboo in the construction of roofs. However, in urban area 17.62 percent houses have used RCC/RBC in the construction of roofs while percentage use of this category in rural is marginally at 2.60. The use of cement/iron sheets is 4.66 percent in urban area as against 1.22 percent in rural areas. However, the use of unspecified material in the construction of roofs is significantly higher at 20.31 percent in rural areas as compared to 2.39 percent in urban area.

3.2 HOUSING FACILITIES

3.2.1 Source of Drinking Water

The easy access to potable/safe drinking water is one of the basic human needs. As per information gathered in 1998 Housing Census, the facility of piped water both inside and outside the houses is available to only 21.19 percent of the housing units in the Dera Bugti agency/district. The hand pump and well inside or outside the houses and pond outside the houses are other common sources of drinking water both in urban and rural areas.

In urban areas above 78 percent housing units get piped water, with more than 72 percent inside the houses, in comparison to rural areas at 17.46 percent with only 10.08 percent inside the houses. The second important source of drinking water both inside and outside the houses is well which fulfills the need of 16 and 2 percent houses in rural and urban areas respectively. The percentage of other sources is marginally higher by 3 percentage point in rural areas as against to that in urban area. The contribution of hand pump is almost

negligible i.e., below 1 percent both in rural and urban areas. However, the pond is the major source of drinking water outside the houses which is used by 48.70 percent rural and 5.46 percent urban housing units. Implying that a significant number of housing units and ultimately the inhabitants are deprived of safe drinking water in the agency particularly in rural areas; the situation thus, requires effective steps to be taken for supply of safe drinking water which will ultimately improve the health conditions in the area.

3.2.2 Source of Lighting

Electricity, as most important source of lighting is, available to only 15.65 percent of the housing units in the agency/district, the percentage in urban area is significantly higher at 85.28 in comparison to rural areas only at 11.09. In rural areas more than 53 percent of the housing units still use kerosene oil as source of lighting as against only 9.15 percent in urban area. The use of other sources for lighting is also very high in rural areas at 35.90 percent in contrast to merely 5.59 percent in urban area. Table 3.6 provides percentage of housing units by source of lighting.

3.2.3 Cooking Fuel Used

About 85 percent of the housing units in the district use wood/brush wood as fuel for cooking, the percentage use of which is higher in rural areas at 88.90 as compared to only 22.23 in urban area. About 8 percent houses use gas, 2 percent kerosene oil and the remaining 5.54 percent use other sources. The use of gas is significantly higher at 66.46 percent in urban as against only 4.11 percent in rural areas, while Kerosene Oil is used as cooking fuel by 2.62 percent housing units in urban as compared to 1.66 percent in rural areas. Table 3.7 provides percentage of housing units by source of cooking fuel.

3.2.4 Availability of Separate Kitchen, Bath room and Latrine

In modern living, the provision of kitchen, bath room and latrine is the basic necessity particularly in the residential housing units. As per census information, 12 percent of the housing units in 1998 had the facility of kitchen, 9 percent of Bath room and about 8 percent of latrine as a separate category in the agency whereas the percentage of shared facility was 17, 12 and about 8 respectively.

A similar pattern is reflected in rural areas with minor percentage differences, regarding availability of all facilities. However, the maximum number of housing units i.e. more than 73 to above 88 percent, are deprived of these modern amenities in any form in rural areas. The situation is however, better in urban area since 26 percent of the total housing units have a separate kitchen, 26 percent a separate bath room and 37 percent an independent latrine whereas above 40 percent of the houses have each facility in shared form. Anyhow one third of the urban houses have no facility of kitchen and bathroom while one fifth have no latrine either in separate or in shared form. Table 3.8 provides details of availability of housing facilities.

3.2.5 Source of Information

The question about source of information has been asked for the 1st time in the 1998 Census to access the media coverage. Among the total households in the Dera Bugti agency/district, 9.91 percent household have access to Television, 20.81 to Radio and 5.12 percent to Newspapers. Implying that radio is the major source of information in the district.

However, in urban area, the major source of information is the T.V. as 59.52 percent of the housing units have access to it while 55.43 percent of the housing units have reach to Radio and 30.24 percent houses to Newspapers. In contrast to this, Radio is the most common source of information in rural areas which covers 18.55 percent housing units followed by T.V., at 6.67 and Newspapers at 3.48 percent coverage. Implying that the media coverage is significantly higher in urban area in comparison to that in rural areas which needs to be extended for rural areas since the larger part of population resides there.

DEFINITIONS AND CONCEPTS

Urban Areas

All localities which were either metropolitan corporation, municipal corporation, municipal committee, town committee or cantonment at the time of the census, were treated as urban.

Household

A household means a group of persons living together who have collective arrangement for eating. A person living alone was also considered to constitute a household. The distinguishing characteristic of a household is its common cooking arrangement.

Housing Unit

A housing unit means a separate and independent place of abode, inhabited by one household and, if vacant, meant for habitation by one household. It does not necessarily mean a separate building. A building may have one or more housing units. Furthermore, any place not intended for habitation but occupied by a household at the time of census was also treated as a housing unit.

Room

A room is defined as a space in a housing unit having a roof and walls from roof to floor. This includes sleeping, dining, drawing, study, children's and servant's rooms but excludes kitchen, bathroom, latrine, store, balcony, porch and motor garage.

Age

Age is recorded as of the last birthday.

Marital Status

Marital status has been classified into never-married, married, widowed and divorced. Never-married applies to persons who have never been married. Married includes all persons who are at present married and living as husband and wife as well as those married persons living apart but having a living wife/husband. Those couples, whose marriage (Nikah) had been solemnized but giving away ceremony had not taken place, were also treated as married. Widowed applies to a person whose husband or wife was dead but who had not married again. Divorced applies to both divorcer and divorcee, if not remarried.
