PREFACE

The Fifth Population and Housing Census, initially due in March 1991, was conducted from 2-18 March 1998 throughout the country including Federally Administered Tribal Areas, Northern Areas and Azad Kashmir. During the first three days i.e., from 2nd to 4th March houselisting was carried out where in each house was physically numbered and registered as an inventory for conduct of the census from 5th to 18th March. The inventory served as a guideline for the supervisors besides ensuring complete coverage, during the census operation.

There were 3 separate questionnaires used for houselisting and collection of information on population and housing characteristics. Form-1 (Annex-A) was used for houselisting. Form-2 i.e., short form (Annex-B) was used for collection of information about all persons on core questions such as name, relationship with the head of the household, residential status, sex, age, marital status, nationality, religion, mother tongue, literacy, educational attainment and possession of national identity card, number of rooms, tenure, period when constructed, construction material of walls and roofs and source of drinking water-inside or outside, source of light, fuel used, type of kitchen, bathroom and toilet facilities and watching of TV and radio and reading of newspapers.

Form-2-A i.e., long form (Annex-C) was used for obtaining additional information about migration alongwith its reasons, field of education, economically active population, fertility, disability and inoculation of children against 5 diseases were asked on sample basis. About 8 percent single stage stratified sample was drawn with slightly more representation given to small provinces, districts and urban areas to make it a representative sample. Necessary definitions and concepts relating to the above mentioned questionnaires/forms are given at (Annex-D) for information of the readers.

The report mainly consists of three sections viz write up which carries general description of the district and some analysis of population and housing data, second section comprises tables while third section provides additional information about these sections in the form of annexures.

The write up section contains three main parts viz (i) general description about the district, (ii) broad analysis of population census data and (iii) broad analysis of housing census data. The general description covers location, boundary, area, geography, climate, rainfall, ethnicity, administrative set-up, agriculture, flora and fauna, health, industries, communication system, infra structure beside introducing the district. The broad analysis of population census data deal with population size, growth and distribution, other demographic and socio-economic characteristics.

The broad analysis of housing census data throw light on housing units/households, in terms of information on number of rooms, population density per housing unit and per room, tenure, period since constructed, construction material used on walls and roofs, source of drinking water, source of lighting, cooking fuel used in kitchen, availability of kitchen, toilet and bathroom facilities and assessment of media reach etc.

The report comprises 52 tables in all, 40 relate to population data, 12 to housing data. Of 52 tables 27 are based on complete count information while remaining on sample count information. Because of space problem the tables on occupation and industries are given in coded form. Therefore, after mentioning occupation and industries in coded form on the tables the detail occupational groups and industry divisions and district/sub-division map are appended at Annex-E, F & G respectively.

Census taking was a gigantic task which involved the whole nation in one way or the other which is commendable as a team work. The role of Provincial Governments was very vital and with out their active cooperation, the operation would not have been successful. The meritorious services rendered by the field staff in addition to their own jobs, are also appreciable. The services rendered by the staff and officers of Federal Bureau of Statistics in training and data processing was helpful. I am personally indebted to the Federal Government who inculcated in me a sense of responsibility to conduct the census in March 1998, and releasing the data as early as possible for the benefits of all users.

The Armed Forces supported the Population and Housing Census work on hundred percent basis therefore, I extend my gratitude to their officers/staff involved in this operation.

I also thank the International Agencies like UNFPA, UNDP, UNICEF for their financial assistance in acquiring equipment & machinery and technical support in the form of consultancy services, training and study visits abroad.

Finally I thank the officers and staff members of the Population Census Organization for their relentless efforts to complete the census successfully.

PART - I
GENERAL DESCRIPTION OF THE DISTRICT

1. GENERAL DESCRIPTION OF THE DISTRICT

1.1 GEOGRAPHY

1.1.1 Name, Location, Boundary and Area

Jaffarabad got the status of district on 01-07-1987. The district is named after Mir Jaffar Khan Jamali, a close associate of Quaid-e-Azam, who is buried in Rojhan Jamali, the native village of Jamali tribe.

Jaffarabad district is situated on the border of Sind - Balochistan provinces with its headquarter at Dera Allah Yar. The district has two sub-divisions namely: Jhat Pat and Usta Muhammad with their heaquarters at Dera Allah Yar and Usta Muhammad respectively.

The district lies from 27° 54′ to 28° 40′ north latitudes and 67° 40′ and 68° 55′ east longnitudes. It is bounded on the north by Nasirabad district, on the north-east by Dera Bugti district, on the south by Jacobabad and Larkana districts of Sindh province, and on the west by Jhal Magsi district. The total area of the district is 2445 square kilometres.

1.1.2 Physical Features/Topography

Jaffarabad district, as a whole, is a flat plain. It is a part of Kachhi basin (plain). The land slopes from north to south with elevation of 50 to 100 meters above sea level. It is formed of alluvial soil. Soil in the district can be classified as silt, clay, silt loam, clay loam, and sandy loam. The majority of the land, however, is sandy and clay loam. There is more loamy soil in dense agricultural areas. According to Fazale Karim Khan's classification of soils in Balochistan, the district comes under the category of the " soils of pediment plains".

1.1.3 Rivers and Streams

The Pat feeder canal originating from Guddo barrage passes along the north-eastern border of the district. The main canal, passing through the district, is the Kirthar branch (North Western Canal) brought out from the Indus river at Sukkur barrage. It enters the district north of Usta Muhammad town. A large area of Usta Muhammad and Jhat Pat sub-divisions is irrigated by these canals.

1.1.4 Climate

The climate of the district is very hot in summer but pleasant in winter. The summer months are from April to October. June is the hottest month with mean maximum and minimum temperature of about 44°C and 29°C respectively. In summer, the himidity is high. Dust storms are also common during summer and generally followed by rain. The winter season lasts from November to March. January is the coldest month, having mean maximum and minimum temperatures of about 23°C and 8°C respectively.

The monsoon winds do not pass through the district, therefore, it receives inadequate rainfall. The average annual rainfall is about 110 millimeters.

The data on temperature and rainfall is not available for Jafarabad district. Therefore, the monthly 30 years mean maximum and minimum temperature, precipitation and ralative humidity recorded at Jacobabad station which is adjacent to Jaffarabad district is as under in table 1.1:-

1.1.5 Flora

The major species of trees found in the district are eucalyptus, acacia, dalbergia, zizyphus, albizzia, azadricha, sesbania spp: alkagae camalorum, *kikar* (acadia arabica), and *kandi*. The growth of mesquite is common in the canal area that is affected by water logging and salinity.

1.1.6 Fauna

Wildlife in the area includes migratory and non-migratory species. The migratory birds include seasonal duck and houbara bustard. In mustard seeds season, wild pigeon are common. The non-migratory bird include brown partridge. Quail migrate in the beginning of winter till the end of summer.

1.2 AGRICULTURE AND RELATED SECTORS

1.2.1 Agriculture

Agriculturally, Jaffarabad district is the most fertile and productive district of Balochistan. Agriculture is also a major source of income in the district. More than 90 percent of the population is directly or indirectly involved in this sector. The cultivated area comes to 476180 acres and uncultivated is 64461 acres. A number of canals and sub-canals irrigate the area. The canal fed area is designated as the "Command Area". Both rabi and kharif crops are grown in the district. The major crops are rice, wheat, pulses, oil seed and cotton. The main market for the agriculture produce of the district is Jaccobabad and to a lesser extent Shahdad Kot. Acreage, production and yield of major rabi and kharif crops grown in the district for the year 1997-98 is given in the following tables 1.2 and 1.3 respectively.

1.2.2 Irrigation

The major source of irrigation in the district are the Pat feeder, Kirthar and Shahi canals. Pat feeder has a capacity of 6700 cusic water while Kirthar has a capacity of 2400 cusic. The command area of Pat feeder canal is 458380 acres and that of Kirthar 186000 acres. A sizeable area is also irrigated through Manjhoti and Uch canals.

1.2.3 Forestry

Forestry has been a neglected sector in the district and exists on a very limited scale. Before the advent of the canal system the area was a dry, parched plain. However,even after canal water became available the people of the area did not demonstrate any interest in growing and maintaining forests. State forests are non existent and trees are only found growing along the canals or road sides. Although there is a potential for commercial/social forestry yet no initiative has been taken in this regard, either in the government or private sector.

1.2.4 Horticulture

Mango, citrus and guava are grown in the district as both the soil and the climate are suitable for these fruits. However, production on a commercial scale is still a distant dream primarily on account of the luke-warm interest exhibited by the cultivators in this regard. Acreage, production and yield of major fruits grown in the district for the year 1997-98 is as under in table 1.4:-

TABLE 1.4: ACREAGE,PRODUCTION AND YIELD OF MAJOR FRUITS GROWN IN JAFFARABAD DISTRICT, 1997-98

1.2.5 Livestock

Although the livestock unit density per square kilometer is among the highest in Balochistan, the ownership of livestock units per capita is far below the average of the whole of Balochistan.

There are a total of 24 veterinary dispensaries and 3 veterinary hospitals in the district. Livestock population of the district according to Livestock Census, 1996 is as under in table 1.5:-

1.3 INDUSTRY AND TRADE

1.3.1 Industry

The industrial sector in the district is not yet developed, although the infrastructure such as land, roads, railways, electricity is available and therefore, there is a potential for establishment of agro-based industry. However, little interest has been shown by the investors so far. The only item being exported in bulk out of the district is rice. It is exported largely to the northern areas of Balochistan and Afghanistan.

No mining or mineral extraction activity is being carried out in the district.

1.3.2 Communication

The leading market for Jaffarabad district is Jacobabad as it takes only 20 minutes journey from Dera Allah Yar to Jacobabad. Other markets are Larkana and Shikarpur.

A network of metalled roads links all major towns and villages in the district and because of its smaller size the district has comparatively better roads, than any other district of Nasirabad division. The total length of *pacca* roads comes to 365 kilometers and about 75 kilometers *katcha* roads. Highway portion located within the district is only 20 kilometers.

The district is served by rail as it is located on the main railway line between Quetta and Jacobabad which links Balochistan with Punjab and Sindh. A total of 15 kilometers of rail track passes through the district from Shahi police post (the border between Jaffarabad and Nasirabad district) to Saim Shaik. There is a railway station at Dera Allah Yar.

There is no airport in the district. The fokkar PIA service from Jaccobabad to Karachi and other cities caters to the needs of the area. Alternatively the PIA boeing service from Sukkur to other parts of the country is also available.

The TV broadcasts come through the TV booster in Shikarpur. No radio station or TV station exists in the district. However, the radio constitutes a major source of entertainment and information for the population of the district. A growing number of dish antenas, are bringing international T.V broadcasts to the region showing the number of houses where TV is watched.

QUETTA - JACOBABAD ROAD PASSING THROUGH DERA ALLAH YAR BAZAR, JAFFARABAD

RAILWAY STATION BUILDING, DERA ALLAH YAR, JAFFARABAD

A telephone sub-division for the two districts of Nasirabad and Jaffarabad is functioning at D.M. Jamali. Three micro waves repeaters with towers of 60 meters are located at D.M. Jamali, Belpat and Lindsay. Dera Allah Yar and Usta Mohammad are linked to the NWD direct dialing system.

The postal service in Jaffarabad is relatively well developed. There are six sub-post offices with regular services at Dera Allah Yar, Usta Mohammad, Shoubatpur, Manjipur, Kandaka and Bhanwar-Shanri.

Electricity in the district is transmitted from Guddo and gas from Sui. There are grid stations in Usta Mohammad Dera Murad Jamali, and Rojhan Jamali. The gas supply in Jaffarabad district is mainly to Dera Allah Yar, Usta Mohammad, and Shoubatpur.

1.3.3 Trade and Trade Centres

No large scale trading activity exists in the district therefore, there is no trading centre worth mentioning here. The only item being exported in bulk outside the district is rice.

1.4 HISTORY, ETHNICITY/TRIBES AND CULTURE

1.4.1 History

During the "One-Unit" period, the region had the status of a sub-division(Jhat pat sub-division) and was part of Jaccobabad district of Sindh. Jhat pat as a sub-division is very old. It was raised to sub-division level on 12 January, 1932 with Captain Hoc Bland as the first Assistant Commissioner. On the dissolution of "One-Unit" in 1970 it was included in Sibi district and remained within the jurisdiction of Sibi district till January 1975. In 1975, when Nasirabad district came into existence, Jhat pat was included in Nasirabad district. While Usta Mohammad sub-division was a part of Sindh until quite recently, Usta Mohammad is named after Maulvi Usta Mohammad.

1.4.2 Ethnicity and Tribes

Jaffarabad district is ethnically / tribally heterogeneous. There are three ethnic groups inhabiting the district. They are Baloch, Jamoot/Jat and Brauhi. The two leading Baloch tribes are Khosa and Jamali. The Khosa tribe lives mainly in the east of the district while the Jamali tribesmen live in the west. The Khosa tribe has a little numerical edge over the Jamali tribe. They are followed by Jamoot, Brauhi and Sindhi. Quite a few Syed families are also residing in the district. Other tribes and clans living in the district are: Gola, Mengal, Sasoli, Jattak, Lehri, Bungalzai, Shahwani, Kakar, Mengal, Jattak, and Rakhshani.

A tribe is distinguished by its political affluence. Politically, the Jamali tribe is more effective.

Sindhi is widely spoken while Balochi, Saraiki and Brauhi are also common. The Umrani and Jamali tribesmen speak Saraiki. The elite of Jamali tribe generally speak Saraiki. The Jamoots are both Sindhi and Saraiki speaking. Syeds speak Sindhi. The majority of the population is trilingual.

Sindhi culture has a strong influence on the population because of the proximity of the area to Sindh, moreover it has remained part of the Jacobabad district both before and after partition of Pakistan in 1947.

1.4.3 Food

Wheat and rice are the staple food in the district. Wheat is used for making bread, while potato and onion are consumed as main vegetables.

1.4.4 Dress

Dress, commonly worn by women and men is *shalwar* and *kameez*, which is light and helps to cope with excessive heat. Women's dresses have very little embroidery on them.

1.4.5 Dwellings

The majority of the houses in the district are built of baked bricks, which are coated with a thick layer of clay plaster. Mud built dwellings are common in the rural areas. They are affordable as far as the common man is concerned and are also heat resistant. Clay plastering is widely used even in brick-built houses for insulating them against the effects of heat. The roofs, walls and interiors are covered with a thick layer of mud/clay. An average house has two to three living rooms with a yard. The urban areas in Dera Allah Yar and Usta Muhammad is not very different from the rural areas. There are very few private houses having modern amenities.

1.4.6 Occupations

Major occupation in the district is farming with tenants and share croppers making up a sizeable majority and with small land owners, petty labourers, government servants and livestock raisers following them in that order.

1.4.7 Culture, Customs and Traditions

Jaffarabad district, when compared to other areas of Balochistan, is by and large an open society. Male dominance is prevalent. Marriages are arranged, particularly in the

rural areas. A few educated females may be privileged enough to be consulted with regards to their willingness or otherwise for marriage, but this practice strictly limited. Nevertheless, they remain under the patriarchal set-up where their fate is determined by their fathers, brothers, or close male relatives. Characterized by the lowest female literacy rate the area has the largest number of adolescence age marriages and the largest number of girls given in marriages to those much older in age. Childhood marriages are common in the rural areas.

Vulvar (bride-price) is widely practiced in the area. Money is paid by the groom, but the amount is not very big. As a rule this amount is spent on buying dowry for the bride by her guardians/parents. There is no fixed amount that is demanded by way of *Vulvar*. It may be quite substantial in case the one proposed to is very beautiful or the proposer is very rich and/ or the bridegroom is going for a second wife.

The system of *Wata Sata* (exchange marriages) is also fairly common particularly among the middle and lower strata of society. In the majority of the cases under the system, a girl is married to a man in exchange for a bride for her brother.

Under the *Vulvar* and *Wata-Sata* system, girls proposed to are left with no choice, and have to agree to a marriage. After marriage the parents become almost indifferent towards their daughter's welfare, who are placed at the mercy of their husband and in-laws.

Co-operation at times of death and marriage still exists. People contribute to arrange for meals for a number of days. Other traditional institutions and norms, which existed in the past have now fallen out of use.

The majority of people living in the district are Muslims belonging both to the Sunni and Shia sects. Hindus are also residing in Jaffarabad and are mostly engaged in trade.

There are two major levels of conflict resolution in the district: a government and a private. The *jirga* system though abolished, but the government, can still form a *jirga* for conflict resolution. "*Merh*" and *Biradri* system also exist in the district.

1.5 ADMINISTRATIVE SET UP

1.5.1 Executive, Judisiary and Revenue System

The district is controlled by the Deputy Commissioner who is assisted by the Assistant Commissioners, Tehsildars and Naib Tehsildars. The Deputy Commissioner is overall coordinator of various government departments and also collects revenue on behalf of government. From the administrative point of view the district is divided into following sub-divisions tehsils and sub-tehsils.

Name of Sub-division	Name of Tehsil/Sub-Tehsil
1. Usta Muhammad	1- Usta Muhammad Tehsil
	2- Gandakha Sub-Tehsil
2. Jhat Pat	1- Jhat Pat Tehsil
	2- Panhwar Sub-Tehsil

Jaffarabad district is the only district in Balochistan which does not have the so-called "B" area. The entire area of the district is designated as "A" area under police jurisdiction, so there is no levies force in the area. The Superintendent of Police is responsible for maintenance of law and order in the district. The strength of the police force in the district stands next to Quetta.

Justice is administered through regular courts. Criminal cases/appeals are submitted in the court of the Session Judge at Dera Allah Yar and to the Additional Session Judge at Usta Muhammad. Judicial Magistrates at Dera Allah Yar and Usta Muhammad and a Civil Judge in Dera Allah Yar and Usta Muhammad are also working. There is no Qazi court in the district.

The general condition of law and order in the district is satisfactory. However, there are tribal feuds and enmities, in which many lives are lost every year.

Tax administration in the district follows the same pattern as in other districts. Revenue is collected through various departments. Deputy Commissioner of the district is also collector in revenue matters, Assistant Commissioner is Assistant Collector grade-I and Tehsildar and Naib Tehsildar are Assistant Collector grade-II officers.

2.5.2 Un-Employment

The un-employment rate (17.44 percent) as percentage of un-employed labour force(i.e looking for work and laid off) to the total labour force reflects a high degree of un-employment in the district which is still higher for male i.e 17.92 percent compared to female of 5.20 percent. The un-employment rate in the urban areas is relatively higher at 22.75 percent as compared to 16.20 percent in rural areas.

2.5.3 Employed Population by Occupation

Among the employed class in the district the highest percentage 67.54 belongs to Major Occupation Group-6 "skilled agricultural and fishery workers", followed by Group-9 "elementary occupations" and Group-5 "service workers and shop and market sales workers" comprising 20.68 and 4.02 percent respectively. The next higher is Group-7 "craft and related trades workers" sharing 2.05 percent. The rest 5.71 percent of the employed popualtion are engaged in the remaining occupational groups.

2.5.4 Employed Population by Industry

Most of the working population i.e 70.87 percent is engaged in the Major Industrial Division-1 "agricultural, forestry, hunting and fishing". Out of the remaining 29.13 percent, 12.18 percent are engaged in Division-9 "community, social and personal services" followed by 8.13 percent engaged in Major Division-5 "construction" and 3.69 percent associated with Major Division-6 "wholesale and retail trade and restaurants and hotels". The next higher is Major Division-3 "manufacturing" sharing 1.71 percent. The rest 3.44 percent engaged in the remaining industrial divisions.

2.5.5 Employed Population by Employment Status

The proportion of working or employed population (working and un-paid family helper) to population 10 years of age and above is 30.67 percent. Out of this 75.99 percent are self employed.16.47 percent working as employees(Govt.Autonomous and Private) and 5.93 percent are un-paid family helper. The employer category is only 1.61 percent. If we compare rural/urban variations, the proportion of self employed is higher in rural areas while that of employee(Govt) is higher in urban areas. The percentage of un-paid family helpers is higher in rural areas. Table 2.10 gives percantage of working population by employment status.

2.6 IMMUNIZATION

The question about immunization has been included in the 1998 Population Census for the first time to evaluate the vaccination programme launched by the Government from time to time. It is encouraging to note that about 49.34 percent of the children under 10 years age have reported as vaccinated, while 13.21 percent reported as not vaccinated leaving the rest i.e 37.46 reported as not known. The percentage of vaccinated male is slightly higher at 25.22 percent as against vaccinated females at 24.12 percent. Table 2.11 gives detail of immunization by sex and rural/urban area.

2.7 NATIONAL IDENTITY CARD

The question about National Identity Card was asked in the 1998 Population Census for the first time to see the coverage element of National Identity Card. The question about National Identity Card was asked from population of 18 years age and above. According to the responses to the question it was found that 39.82 percent of the population aged 18 years and above have obtained National Identity Card. It was 48.50 percent for male and 30.91 percent for female. Table 2.12 gives the necessary detail by sex and area.

3. BROAD ANALYSIS OF HOUSING CENSUS DATA

3.1 TYPE OF HOUSING STOCK

3.1.1 Level of Congestion, Persons and Rooms

Sixty point seventy one percent of the housing units in the Jaffarabad district are single room houses. The percentage of single room houses is significantly higher at 66.02 in rural areas in comparison to that in urban areas at 29.79 percent. The percentage of housing units with 2 to 4 rooms is higher in urban areas at 65.48 percent as against 33.00 percent in rural areas. The percentage of houses with 5 or more rooms is also higher in urban areas as compared to that in rural areas.

The number of rooms per housing unit is slightly higher in rural areas at 4.47 as against 4.32 in urban areas. In contrast the level of congestion (persons per room) is higher in urban areas at 2.2 as against 1.5 in rural areas. The level of congestion in terms of persons per housing unit is relatively higher in urban areas at 9.5 in contrast to 6.7 in rural areas requiring construction of more housing units with additional rooms to reduce the level of congestion. Table 3.1 gives the indices of congestion in 1998 Census.

The district has 73.05 percent housing units having outer walls made of unbaked bricks with earth bonding and 11.47 percent of the houses have the walls made of the wood/ bamboo. There is marked variation in the qualitative indices of construction between urban and rural areas. In urban areas 36.43 percent of the housing units have the standard pacca walls made of baked bricks/blocks and stones with cement bonding, 55.87 percent have walls of un-baked bricks with earth bonding and 6.27 percent have wooden walls while other categories are 1.43 percent. In contrast, the rural areas have 4.63 percent of the walls in the standard category of baked bricks/blocks and stone with cement bonding and 76.01 percent of walls are made of un-baked bricks with mud/earth bonding. The wooden category is 12.36 percent and the un-specified category of material used is 7.00 percent. Table 3.3 gives detail of construction material used in outer walls.

The predominant material used for construction of roof in the district is wooden log/bamboo by 79.95 percent housing units while 10.91 percent of housing units have their roof built with un-specified material.

The standard of construction of roofs significantly differs in rural and urban areas. Eighty two point forty three percent of the housing units in rural and 64.20 percent in urban areas have used baked bricks supported by girder or wooden log/bamboo in the construction of roofs. Similarly the use of un-specified material in the construction of roofs is higher at 12.25 percent in rural areas as compared to 3.12 percent in urban areas.

However, in urban areas 14.94 percent houses have used RCC/RBC in the construction of roofs. The use of this category in rural areas is only 1.58 percent. The use of cement/iron sheets is 17.74 percent in urban areas as against 3.75 percent in rural areas. Table 3.4 gives detail of material used in roofs by rural/urban areas.

3.2 HOUSING FACILITIES

3.2.1 Source of Drinking Water

The easy access to potable/safe drinking water is one of the basic human needs. As per information gathered in 1998 Housing Census, the facility of drinking water inside the house is available to 30.83 percent of the housing units, while 69.17 percent of the housing units use outside source as drinking water. The facility inside the house is significantly higher in the urban area as compared to the rural areas, where the majority of the households are depending on the source of drinking water outside the house. Table 3.5 gives detail of the source of drinking water by rural/urban areas.

Nine point thirty nine percent of the housing units in the district had a separate kitchen, 9.31 percent had separate bathroom and 10.99 percent had independent latrine. The figures for urban areas for separate kitchen, separate bathroom and separate latrine are 24.30, 28.15 and 33.73 percents respectively which are higher as compared to rural areas. Similarly the percentages of shared facilities for kitchen, bathroom and latrine are higher in urban areas at 35.98, 39.88 and 43.13 percents respectively in comparison to that in rural areas. The question about source of information has been asked for the first time in the 1998 Population Census to assess the media coverage. Twenty three point eighty eight percent of the households in rural areas have access to television, 36.05 percent radio and 9.58 percent newspaper as source of information. The percentage figures of media reach for urban areas especially for TV and Newspaper are significantly higher i.e. 44.52 percent and 22.42 percent respectively. Table 3.9 provide percentage of housing units by source of information by rural/urban areas.
