PREFACE

The Fifth Population and Housing Census, initially due in March 1991, was conducted from 2-18 March 1998 throughout the country including Federally Administered Tribal Areas, Northern Areas and Azad Kashmir. During the first three days i.e., from 2nd to 4th March houselisting was carried out wherein each house was physically numbered and registered as an inventory for conduct of the census from 5th to 18th March. The inventory served as a guideline for the supervisors besides ensuring complete coverage, during the census operation.

There were 3 separate questionnaires used for houselisting and collection of information on population and housing characteristics. Form-1 (Annex-A) was used for houselisting. Form-2 i.e., short form (Annex-B) was used for collection of information about all persons on core questions such as name, relationship with the head of the household, residential status, sex, age, marital status, nationality, religion, mother tongue, literacy, educational attainment and possession of national identity card, number of rooms, tenure, period when constructed, construction material of walls and roofs and source of drinking water-inside or outside, source of light, fuel used, type of kitchen, bathroom and toilet facilities and watching of TV and radio and reading of newspapers.

Form-2-A i.e., long form (Annex-C) was used for obtaining additional information about migration alongwith its reasons, field of education, economically active population, fertility, disability and inoculation of children against 6 diseases were asked on sample basis. About 8 percent single stage stratified sample was drawn with slightly more representation given to small provinces, districts and urban areas to make it a representative sample. Necessary definitions and concepts relating to the above mentioned questionnaires/forms are given at (Annex-D) for information of the readers.

The report mainly consists of three sections viz write up which carries general description of the district and some analysis of population and housing data, second section comprises tables while third section provides additional information about these sections in the form of annexures.

The write up section contains three main parts viz (i) general description about the district, (ii) broad analysis of population census data and (iii) broad analysis of housing census data. The general description covers location, boundary, area, geography, climate, rainfall, ethnicity, administrative set-up, agriculture, flora and fauna, health, industries, communication system, infra structure beside introducing the district. The broad analysis of population census data deal with population size, growth and distribution, other demographic and socio-economic characteristics.

The broad analysis of housing census data throw light on housing units/households, in terms of information on number of rooms, population density per housing unit and per room, tenure, period since constructed, construction material used on walls and roofs, source of drinking water, source of lighting, cooking fuel used in kitchen, availability of kitchen, toilet and bathroom facilities and assessment of media reach etc.

The report comprises 52 tables in all, 40 relate to population data, 12 to housing data. Of 52 tables 27 are based on complete count information while remaining on sample count information. Because of space problem the tables on occupation and industries are given in coded form. Therefore, after mentioning occupation and industries in coded form on the tables the detail occupational groups and industry divisions and district/sub-division map are appended at Annex-E, F & G respectively.

Census taking was a gigantic task which involved the whole nation in one way or the other which is commendable as a team work. The role of Provincial Governments was very vital and with out their active cooperation, the operation would not have been successful. The meritorious services rendered by the field staff in addition to their own jobs, are also appreciable. The services rendered by the staff and officers of Federal Bureau of Statistics in training and data processing was helpful. I am personally indebted to the Federal Government who inculcated in me a sense of responsibility to conduct the census in March 1998, and releasing the data as early as possible for the benefits of all users.

The Armed Forces supported the Population and Housing Census work on hundred percent basis therefore, I extend my gratitude to their officers/staff involved in this operation.

I also thank the International Agencies like UNFPA, UNDP, UNICEF for their financial assistance in acquiring equipment & machinery and technical support in the form of consultancy services, training and study visits abroad.

Finally I thank the officers and staff members of the Population Census Organization for their relentless efforts to complete the census successfully.

PART - I
GENERAL DESCRIPTION OF THE DISTRICT

1. GENERAL DESCRIPTION OF THE DISTRICT

1.1 GEOGRAPHY

1.1.1 Name, Location, Boundary and Area

Khuzdar district was created on 25th February, 1974. Prior to that it was a part of, the then, Kalat district. In November, 1992 it was further bifurcated into two districts namely Khuzdar and Awaran. It derives its name from the headquarters town.

The district lies between 25° 43' and 28° 52' north latitudes and 65° 42' and 67° 29' east longitudes. It is bounded on the north and north-west by Kalat and Kharan districts, on the east by Bolan, Jhal Magsi and Lasbela districts and Larkana and Dadu districts of Sindh province, on the south by Lasbela district and on the south-west by Awaran district. The total area of the district is 35380 square kilometers.

1.1.2 Physical Features/Topography

The district is a vast mountainous region consisting of a large number of ridges and hills, formed of folded sandstone and shale. In the northern part of the district, the important ranges are the Harboi range and the central Brahui range, both running from north to south. The Moola hills in the east of Jhalwan forms an offshoot of the Harboi range. In the southern part of the district, the important ranges are the Khudo, the Chapar and the Pub. These run from north-west to south-east and enter in Lasbela district in the extreme south.

The Kirthar range runs along the eastern boundary of the district in the north south direction. The Garr hills form the western boundary of the district. The general elevation of the district is about 1800 to 3000 meters above sea level.

In the plain between the ridges, the soil is generally fertile and suitable for growing wheat, fruit and vegetables.

1.1.3 Rivers and Streams

There are a few rivers and a large number of streams. The dominant direction of the drainage is from north to south. The most important river is the Hub which rises in the Pub hills in Jhalwan area. It runs southward and enters Lasbela district. In its lower course it flows along the boundary of Lasbela distrtict and Karachi division up to the sea. The Moola river rises in the Harboi hills. It runs first from north to south and then to the north and east into the Kachhi plain. The Sukleji and the Malghawa rivers rise in the Harboi hills. They run

towards the south and to join down stream. The Porali river rises from the central Jhalwan range near Wadh. It flows to the south and enters Lasbela district to flow in the Lasbela plain. The Bangari river rises in the Garr hills. It runs southward and joins the Nal river before entering into Awaran district. The other important seasonal rivers and streams are Kohan, Saruna, Labil, Dara, Hator and Bini.

1.1.4 Climate

The climate of the district is warm in summer and cold in winter. Summer is milder in the south of Khuzdar. There is a great variation between day and night temperature. June is the hottest month with mean maximum and minimum temperature of about 38° C and 25° C respectively. January is the coldest month with mean maximum and minimum temperature of about 17° C and 3° C respectively. The winds in winter blow from the north and are known as *Goorich* while in summer its direction is from south and south east known as *Nambi*. The rainfall is scanty and mostly occurs in winter. The annual average rainfall is about 243 milimeters. The mean 30 years maximum and minimum temperature, precipitation and relative humidity recorded at Khuzdar station is as under in table 1.1:-

1.1.5 Flora

In Khuzdar district wild olive, tamarisk and dwarf palm are found. Some varieties of acacia, parpuk or loiro and the belellium-producing guggul trees are also seen.

1.1.6 Fauna

Wildlife in the district include Balochistan black bear, urial, houbara bustard, caracal, Sind ibex, chikor, red fox, grey partridge and see see partridge.

1.2 AGRICULTURE AND RELATED SECTORS

1.2.1 Agriculture

Agriculture is fairly strong sector in Khuzdar. The main crops are wheat, rice, jowar and barley, pulses and vegetables. The land is fertile but due to shortage of irrigation water the amount of arable land is small. Recently, the agriculturists of some areas tested the cotton crop which gave good results.

There are two main cultivation seasons i.e. rabi and kharif. The rabi crops which are wheat, barley, cumin and masoor, sown in winter and are harvested in early summer. The kharif crops are rice, jowar, bajra, moong, mash, moth and onion. Vegetable seeds and fodder are produced throughout the year. Acreage, production and yield of major rabi and kharif crops grown in Khuzdar district for the year 1997-98 is given in the following tables 1.2 and 1.3 respectively:-

1.2.2 Irrigation

The main source of irrigation in the district is flood water and rain. Permanent irrigation sources include tube wells, karezes and springs.

1.2.3 Forestry

The forestry activities are limited in Khuzdar district. The total state forest area is about one percent of the total geographical area of the district. A few woodlands are found in the northern (Moola) central (Khuzdar) and western (Nal) parts of the district. Five forest areas are at Zaidi, Chari, Shasar, Sasol and Kheradori. In addition there are four game sanctuaries at Chorani, Dhura, Kacher and Shahshan. No commercial forestry exists in the district.

1.2.4 Horticulture

Due to supply of electricity, the agriculturists of some areas like Baghbana, Zehri, Nal and Wadh, have installed tubewells for irrigation purpose. The farmers have planted fruit

trees particularly in Baghbana/Tootak and Zehri areas which have given good results. Acreage, production and yield of major fruits grown in Khuzdar district for the year 1997-98 is given below in table 1.4:-

1.2.5 Livestock

Khuzdar has a great potential in livestock. The areas of Nal, Zehri, Wadh and Moola are suitable for livestock development, as fodder is produced in large quantity in these areas. Livestock farming is a traditional activity here. Sheep, goat and cattle are widely bred. Most of the nomadic families and people in rural area keep small ruminants. Cow is preferred for milk. Livestock population of Khuzdar district according to Livestock Census, 1996 is given in the following table 1.5:-

1.3 INDUSTRY AND TRADE

1.3.1 Industry

The only major industrial enterprise functioning at Khuzdar is the Bolan Mining Enterprise engaged in the mining and milling of barite since 1971. Small scale and cottage industry in the area include carpet making, woodwork and mazri making. Embroidery work and needle craft is widely practiced by women folk and it fetches a good price in the markets of Quetta and Karachi. Two tile factories are also functioning at Khuzdar.

1.3.2 Mining

The district has many minerals such as barite, chromite, granite, marble and building stone. There is much potential for mineral production. Presently chromite, barite and marble are mined.

1.3.2 Communication

Khuzdar is connected to other parts of the country by road and air. No railway exists in the district. Telecommunication and postal facilities are available in all major towns of the district. Khuzdar has a considerable length of roads, most of these are shingle roads except RCD Highway which passes from Khuzdar district. RCD Highway connecting Quetta with Karachi passes through Khuzdar. The road has lot of development impact on the district lying almost in the centre. During the rainy season, these shingle roads cause much difficulties for the general public.

A radio station with a high power transmittor is functioning in the district. Also, a TV booster shows programs telecast from the Quetta T.V station to the viewers in the Khuzdar district. Khuzdar is linked to the rest of the country through a NWD system and telephone exchanges are available at Zehri, Wadh and Nal.

Being a district and divisional headquarter a General Post Office is functioning at Khuzdar. In addition to it 6 posts offices and 18 branch post offices are spread throughout the district.

A large number of villages in Khuzdar have been electrified by WAPDA. Feeders of 8, 11, 33 KV are functioning in the district. However, Khuzdar has not been connected to natural gas distribution network.

1.3.3 Trade and Trade Centres

Agricultural produce and minerals are sent to Karachi and Quetta. Almost all the consumer items are brought in from Karachi, Quetta and other cities of the country.

1.4 HISTORY, ETHNICITY/TRIBES AND CULTURE

1.4.1 History

Historical references to Khuzdar are shrouded in obscurity. Very little definite information is available about the area before the advent of the Arabs who ousted the Rai dynasty of Sindh in the 7th Century. It is possible that some parts of the army of Alexander the Great traversed the country when the conqueror was in the Indus valley (presently upper Sind). The central position of Khuzdar as the point of convergence of roads from Multan (via Moola pass) Makran and Kandhar (province of Afghanistan) made it a very important staging ground for the Arab armies invading India. It is probable too, that its moderate climate made the locality acceptable to them. In the time of the Arabs, Khuzdar was protected by a small fortress. The fortress was probably on the peak overlooking the valley, which is now known as Bradari (Shahi Bagh). An Arab poet thus wrote about Khuzdar " What a beautiful country is Kusdar (Khuzdar), how distinguished are its inhabitants".

The Arabs made frequent attacks upon Khuzdar in 664 AD. In 976 AD, Khuzdar was governed by an Arab named Muin bin Ahmed. During the reign of Mir Mehmood Khan, Pottinger visited Jhalawan in 1810 AD, travelling to Kalat via Bela and Khuzdar. He described Khuzdar as a small town not having more than 500 houses. Khuzdar region was full of karezes and lush green cultivation. At that time it was a province of Khurasan.

In 1903, the British government appointed a Political Agent at Khuzdar to carry out the administrative affairs of the government. This administrative system continued till the partition of India.

Before March, 1974 Khuzdar was a sub-division of Kalat district. To serve the people and solve their problems at their door step, Khuzdar was awarded the status of district on 1st March, 1974. Now Khuzdar is the divisional headquarter of Kalat division.

1.4.2 Ethnicity and Tribes

The district is inhabited by Brahvi speaking tribes. The principal tribes are Zehri, Mengal, Muhammad Hasani, Bizenjo, Qambrani, Baloch, Sasoli, and Qalandrani. The tribes are divided into a number of groups/branches. Each tribe has its own leader. The *Sardar* (Chief) of the whole tribe is assisted by *Mirs/Takries* of the branches who are the headmen of their respective branches. The positions of *Sardar, Mir, Mutabar* and *Takri* are hereditary, while the leadership of smaller groups generally depends on the age, influence and intelligence of person.

People not belonging to a tribe but living in geographical proximity to it are known as *Hamsya* (neighbours) who share hardships and moments of happiness with the tribe.

1.4.3 Food

The majority of the people have only two meals a day i.e. one in the morning between 10 and 12 a.m. and the other at sunset. During spring when milk is abundant many of the flock owners have only one solid meal in the evening, and mainly milk or milk products for the morning meal. Only well-to-do families and urban people take a third meal called *Nihari* (breakfast) in the early morning.

1.4.4 Dress

The people of the district always dress in the same style, despite the changes in weather over the years. Clothes comprise of a loose white shirt, a pair of trousers of the same texture and a turban cap. The dress of a female consists of a long shirt and a pair of trousers both of cotton. The front of a female shirt is generally embroidered.

1.4.5 Dwellings

Cemented dwellings are a common sight in Khuzdar town, while people living in rural areas still use mud and pish mats for the construction of their houses.

1.4.6 Occupations

The major occupations in the district revolve round agriculture, livestock, construction, mining and social services.

1.4.7 Culture, Custom and Traditions

Both the joint and nuclear family systems are common in Khuzdar. A growing trend towards nuclear households can be witnessed in the urban areas while in the rural areas and people with low literacy still prefer to live in extended/ joint family system. The decision of the head of family is considered final in all domestic affairs. The tribal chiefs also have full authority in decision making at community and tribal level.

In the tribal society of Khuzdar every man marries as soon as he is able to meet the expenses of his wedding. In general, the bride is supposed to be four to five years younger than the groom. Polygamy is not a common practice, which may be the result of the high level of the *Lab* (bride price). The groom has nothing to say in the selection of his bride. The search of bride is the responsibility of the groom's parents. Among the lower class marriage takes place at an advanced age. The bride price is paid in form of cash, sheeps, camels and agricultural land according to the position of the both parties and the age appearance and qualities of the bride. The *Haq-e-Mehr* is also fixed in form of cash, house or agriculture land for which the husband or his parents are bound to pay. Besides, a custom regarding *Adla-Badla* is also prevalent in the area according to which the sister of the groom is married to the brother of the bride.

The bride's parents generally present her with a dress and a few ornaments, bedding and some house hold articles. Clothes are also given to the bridegroom. Wealthy families give several dresses, ornaments and household articles to the bridegroom.

The fellow tribesmen and relatives give out some money to the bride according to their capacity which is known as *Bijjar*. Before the *Nikah*, a dinner is arranged by bothsides separately and on this occassion the invitees and relatives give money as per their capacity as a gift known as *Sarguasht / Gour*.

In some areas of the Khuzdar district, there is the custom of *purs* which is paid on occassion of someone's death as an aid/assistance to his or her family.

The majority of the population is sunni muslims. To resolve the conflicts two systems exist, one the official (at the government level) and the other un-official (at the community level).

2.5.2 Un-Employment

The un-employment rate (42.30 percent) as percentage of un-employed labour force(i.e looking for work and laid off) to the total labour force reflects a high degree of un-employment in the district which is much higher for male i.e 42.39 percent compared to female of 24.18 percent. The un-employment rate in the rural areas is fairly higher at 42.79 percent as compared to 40.98 percent in urban areas.

2.5.3 Employed Population by Occupation

Among the employed class in the district the highest percentage 59.17 belongs to Major Occupation Group-6 "skilled agricultural and fishery workers", followed by Group-9 "elementary occupations" and Group-0 "workers not classified by occupation" comprising 21.26 and 7.04 percent respectively. The next higher is Group-5 "services workers and shop and market sales workers" sharing 6.32 percent. The rest 6.21 percent of the employed popualtion are engaged in the remaining occupational groups.

2.5.4 Employed Population by Industry

Most of the working population i.e. 52.03 percent is engaged in the Major Industrial Division-1 "agriculture, forestry,hunting and fishing". Out of the remaining, 22.78 percent are engaged in Division-9 "community, social and personal services", 11.71 percent engaged in Major Division-5 "construction", 6.28 percent associated with Major Division-4 "electricity, gas and water" and 4.43 percent in Major Division-6 "whole sale and retail trade and restaurants and hotels". The next higher is Major Division-3 "manufacturing" sharing 1.08 percent. The rest 1.69 percent engaged in the remaining industrial divisions.

2.5.5 Employed Population by Employment Status

The proportion of working or employed population (working and un-paid family helper) to population 10 years of age and above is 22.41 percent. Out of this 67.70 percent are self employed, 27.69 percent working as employees(Govt.Autonomous and Private) and 4.04 percent are un-paid family helper. The employer category is only 0.58 percent. If we compare rural/urban variations, the proportion of self employed is higher in rural areas while that of employee(Govt) is higher in urban areas. The percentage of un-paid family helpers is slightly higher in urban areas. Table 2.10 gives percantage of working population by employment status.

2.6 IMMUNIZATION

The question about immunization has been included in the 1998 Population Census for the first time to evaluate the vaccination programme launched by the Government from time to time. It is encouraging to note that 36.30 percent of the children under 10 years age have been reported as vaccinated, while 30.61 percent reported as not vaccinated leaving the rest i.e 33.08 reported as not known. The percentage of vaccinated male is slightly higher at 18.46 percent as against vaccinated females at 17.84 percent. Table 2.11 gives detail of immunization by sex and rural/urban area.

2.7 NATIONAL IDENTITY CARD

The question about National Identity Card was asked in the 1998 Population Census for the first time to see the coverage element of National Identity Card. The question was asked from population of 18 years age and above. According to the responses to the question it was found that 52.25 percent of the population aged 18 years and above have obtained National Identity Card. It was 59.81 percent for male and 44.13 percent for female. Table 2.12 gives the necessary detail by sex and area.

3 BROAD ANALYSIS OF HOUSING CENSUS DATA

3.1 TYPE OF HOUSING STOCK

3.1.1 Level of Congestion, Persons and Rooms

Forty eight point eighty two percent of the housing units in the Khuzdar district are single room houses. The percentage of single room houses is relatively higher at 56.64 in rural areas in comparison to that in urban areas at 22.12 percent. The percentage of housing units with 2 to 4 rooms is higher in urban areas at 66.06 percent as against 39.79 percent in rural areas. Similarly the percentage of houses with 5 or more rooms is higher in urban areas as compared to that in rural areas.

The number of rooms per housing unit is higher in urban areas at 2.7 as against 1.8 in rural areas. In contrast the level of congestion (persons per room) is higher in rural areas as compared to that in urban areas. The level of congestion in terms of persons per housing unit is also higher in urban areas at 6.6 in contrast to 5.0 in rural areas requiring construction of more housing units with additional rooms to reduce the level of congestion. Table 3.1 gives the indices of congestion in the 1998 Census.

The district has 79.44 percent housing units having outer walls made of unbacked bricks with earth bonding and 5.82 percent of the houses have the standard pacca walls made of bricks/blocks and stones with cement bonding. There is marked variation in the qualitative indices of construction between urban and rural areas. In urban areas 15.13 percent of the housing units have the standard pacca walls made of baked bricks/blocks and stones with cement bonding, 76.89 percent have walls of un-baked bricks with earth bonding and 5.93 percent have wooden walls while other categories are 2.04 percent. In contrast, the rural areas have 3.10 percent of the walls in the standard category of baked bricks/blocks and stone with cement bonding and 80.19 percent of walls are made of un-baked bricks with mud/earth bonding. 3.2 HOUSING FACILITIES

3.2.1 Source of Drinking Water

The easy access to potable/safe drinking water is one of the basic human needs. As per information gathered in 1998 Housing Census, the facility of drinking water inside the house is available to 29.21 percent of the housing units, while 70.79 percent of the housing units use outside source as drinking water. The facility inside the house is significantly higher in the urban areas as compared to the rural areas, where the majority of the households are depending on the source of drinking water outside the house. Table 3.5 gives detail of the source of drinking water by rural/urban areas.

Twenty three point twenty one percent of the households in urban areas have access to television, 38.96 percent radio and 17.15 percent newspaper as source of information. These percentages in rural areas are 3.39 percent for television, 39.78 percent radio and 6.84 percent for nawspaper.
