JUNE
1999

PREFACE

The Fifth Population and Housing Census, initially due in March 1991, was conducted from 2-18 March 1998 throughout the country including Federally Administered Tribal Areas, Northern Areas and Azad Kashmir. During the first three days i.e., from 2nd to 4th March houselisting was carried out where in each house was physically numbered and registered as an inventory for conduct of the census from 5th to 18th March. The inventory served as a guideline for the supervisors besides ensuring complete coverage, during the census operation.

There were 3 separate questionnaires used for houselisting and collection of information on population and housing characteristics. Form-1 (Annex-A) was used for houselisting. Form-2 i.e., short form (Annex-B) was used for collection of information about all persons on core questions such as name, relationship with the head of the household, residential status, sex, age, marital status, nationality, religion, mother tongue, literacy, educational attainment and possession of national identity card, number of rooms, tenure, period when constructed, construction material of walls and roofs and source of drinking water-inside or outside, source of light, fuel used, type of kitchen, bathroom and toilet facilities and watching of TV and radio and reading of newspapers.

Form-2-A i.e., long form (Annex-C) was used for obtaining additional information about migration alongwith its reasons, field of education, economically active population, fertility, disability and inoculation of children against 5 diseases were asked on sample basis. About 8 percent single stage stratified sample was drawn with slightly more representation given to small provinces, districts and urban areas to make it a representative sample. Necessary definitions and concepts relating to the above mentioned questionnaires/forms are given at (Annex-D) for information of the readers.

The report mainly consists of three sections viz write up which carries general description of the district and some analysis of population and housing data, second section comprises tables while third section provides additional information about these sections in the form of annexures.

The write up section contains three main parts viz (i) general description about the district, (ii) broad analysis of population census data and (iii) broad analysis of housing census data. The general description covers location, boundary, area, geography, climate, rainfall, ethnicity, administrative set-up, agriculture, flora and fauna, health, industries, communication system, infra structure beside introducing the district. The broad analysis of population census data deal with population size, growth and distribution, other demographic and socio-economic characteristics.

The broad analysis of housing census data throw light on housing units/households, in terms of information on number of rooms, population density per housing unit and per room, tenure, period since constructed, construction material used on walls and roofs, source of drinking water, source of lighting, cooking fuel used in kitchen, availability of kitchen, toilet and bathroom facilities and assessment of media reach etc.

The report comprises 52 tables in all, 40 relate to population data, 12 to housing data. Of 52 tables 27 are based on complete count information while remaining on sample count information. Because of space problem the tables on occupation and industries are given in coded form. Therefore, after mentioning occupation and industries in coded form on the tables the detail occupational groups and industry divisions and district map are appended at Annex-E, F & G respectively.

Census taking was a gigantic task which involved the whole nation in one way or the other which is commendable as a team work. The role of Provincial Governments was very vital and with out their active cooperation, the operation would not have been successful. The meritorious services rendered by the field staff in addition to their own jobs, are also appreciable. The services rendered by the staff and officers of Federal Bureau of Statistics in training and data processing was helpful. I am personally indebted to the Federal Government who inculcated in me a sense of responsibility to conduct the census in March 1998, and releasing the data as early as possible for the benefits of all users.

The Armed Forces supported the Population and Housing Census work on hundred percent basis therefore, I extend my gratitude to their officers/staff involved in this operation.

I also thank the International Agencies like UNFPA, UNDP, UNICEF for their financial assistance in acquiring equipment & machinery and technical support in the form of consultancy services, training and study visits abroad.

Finally I thank the officers and staff members of the Population Census Organization for their relentless efforts to complete the census successfully.

Dated: 15th June, 1999

(JAVID AKRAM)
Chief Census Commissioner

Annexure-G	District and Tehsil maps

PART-I
GENERAL DESCRIPTION
OF THE DISTRICT

1 GENERAL DESCRIPTION OF THE DISTRICT

1.1 GEOGRAPHY

1.1.1 Name, Location, Boundary and Area

Kohlu agency was a deserted area without any permanent human settlement before the in-habitation of Marris in this area; by that reason, the history of Kohlu district is primarily a history of the Marri tribe. However, Kohlu town and its surroundings have been predominantly occupied by Zarkoons- a Pushtoon tribe.

Kohlu agency is located between $29^{\circ} .16'$ to $30^{\circ} .05'$ north latitudes and $68^{\circ} .08'$ to $69^{\circ} .36'$ east longitudes. It is bounded in the north by Loralai district, in the north-east by Barkhan district, in the south-east and south by Dera Bugti district, in the south-west by Bolan district and in the west by Sibi district. Total area of the district is 7,610 square kilometres. The district comprises of three sub-divisions i.e. Kohlu, Mawand and Kahan with its headquarters at Kohlu. The maps of the district and tehsils are Annexed as G.

1.1.2 Physical Features/Topography

Physically the district is characterized as barren and rugged. It is situated at the southern end of the famous Suleman range, in the north - south direction, which forms gradual slope into the plains. The land of Kohlu district mainly consists of narrow parallel ridges and closely packed hills, intersected by numerous hill torrents and deep ravines. The eastern half of the district comprising high mountain ranges descending towards east forming a series of lime stone ridges with more or less parallel valleys. The upper eastern half includes, Katamari, Mar and Jordan ranges. In this region some of the hill peaks attain a height about 1800 meters wherein the valley of Kohlu is located. In the lower eastern half, hill ranges attain the height of more than 2400 meters wherein the notable valleys are Makhmar, Nisau and Kakan. In the western half, the important range is Bambor Ghar which lies along the southern boundary of the district.

The soil of Kohlu, mainly falls in the category of arid and semi arid zones; soil of some of the valleys and plains is fertile and mostly alluvial.

1.1.3 Rivers and Streams:

The major streams include Beji, Manjra (Known also Karmari, Sundimari and Chakkar), Sori Kaur (Joined by Makhmar nallah from north to west as Khattan river) and Sohrab nallah (Known as Kasband and Tarantani); with the exception of stream Nisau, Phelawah and Janatali which flows to east; the main direction of rivers/streams is almost to the west.

1.1.4 Climate

Kohlu is located 600-1200 meters above sea level. It's climate can be categorised as "Arid with warm summer and cool winter". In summer, the mean temperature remains

moderate, however, in June; the mean maximum temperature rises upto 38° C. Usually, the summer lasts for seven months; April -October. In winter, the mean minimum temperature falls at a lower level. In January, the coldest month, the mean maximum and minimum temperature remains at 16° C and 4° C and even reaches the freezing point. However, it may drop below zero degree centigrade during cold spells.

Since, there is no meteorological station in Kohlu, the rainfall data and other informations recorded at meteorological station-Barkhan, is used for climatic analysis.

The rainfall data pertaining to 30 years i.e. 1961-90. reflects the total annual average precipitation at 398.27 millimetres, however, the level generally remains below it in Kohlu district due to lesser vegetation than Barkhan. The total average annual precipitation mainly caused by monsoon, in summer, remains below 250 mm in most of the areas of the district except the areas surrounding Kohlu town. The annual relative humidity on the average remains around 41 percent. The data regarding mean temperatures, annual rainfall and relative humidity is shown in the following table:

TABLE : 1.1 NAME OF DISTRICT: KOHLU			METEOROLOGICAL STATION: BARKHAN	
Month	Mean Temperature (°C)		Precipitation (Millimetres)	Relative Humidity (%)
	Maximum	Minimum		
January	16.09	3.95	11.10	42.36
February	17.34	6.12	21.29	42.55
March	23.67	11.19	32.93	40.43
April	30.06	17.19	28.76	36.54
May	35.02	21.67	16.96	32.54
June	37.90	24.13	30.52	37.45
July	35.48	23.76	100.16	54.09
August	34.55	23.24	87.65	56.37
September	33.57	20.40	45.63	46.82
October	30.00	15.94	5.01	35.75
November	24.26	10.28	5.04	36.13
December	19.02	5.59	8.15	40.40
Annual	28.08	15.28	398.27	41.40

1.1.5 Flora

Some of the plants and trees found in Kohlu are angur, barar, barau, ber, ghozera, girdae butae, gulab, khar, khokhae, kirar, leghunae, lukha, makkae, manri, mashkanri, mazari, pah, palosa, pilu, wild olive, titok, etc.

A VIEW OF SHRINE OF MAST TAWAKALI AT MAIDAN GARI, (KOHLU)

AN AERIAL VIEW OF KOHLU TOWN

1.1.6 Fauna

The wild animals of the district include jackals and red foxes. Whereas striped hyena and chinkara are rarely found. Urial has been declared as an endangered specie. A few other game birds are also found in the area.

1.2 AGRICULTURE AND RELATED SECTORS

1.2.1 Agriculture

Agriculture had not been a major economic sector in Kohlu earlier as the majority of the population was not permanently settled at any place; rather they were used to move from one place to the other in search of pasture lands. With the advent of the tube wells, people diverted their attention to agriculture.

In Kohlu, Rabi and Kharif crops are cultivated according to their seasons. Rabi crops are sown in winter and harvested in late winter or during early summer. Kharif crops are sown in summer and harvested in late summer or early winter. Vegetables and fodder are cultivated throughout the year. Fruits are produced in Kharif season only.

Agriculture is predominantly carried by the men, however, women also assist. Agriculture machinery used in the district includes tractors, threshers and tube wells. Most of the agriculture produce is consumed locally, however, fruits, tomatoes and cotton are exported to the neighbouring districts. The non-availability of roads is major hindrance in proper marketing of agriculture produce. Table 1.1 shows area, production and average yield per hectare of important Rabi and Kharif crops.

TABLE 1.1 AREA, PRODUCTION AND AVERAGE YIELD OF CROPS IN 1997-98

Crops	Area (Hectares)	Production (Tonnes)	Yield/Hectare (Kilograms)
RABI CROPS			
1. Wheat	10200	13580	1331
2. Barley	545	633	1161
3. Vegetables	274	4660	17007
4. Fodder	81	2490	30741
KHARIF CROPS			
1. Jowar	1876	1600	853
2. Bajra	90	76	822
3. Maize	240	245	1021
4. Pulses	2185	2179	997 *
5. Vegetables	177	2700	15254
6. Fodder	755	18530	24545
7. Cotton	1050	1542	1469
8. Tobacco	2	2	1000
9. Others	397	4552	11466 *

Source: Agriculture Statistics of Balochistan, 1997-98.

* Average

Kohlu district has vast potential for agriculture development provided irrigation facilities and technical inputs are extended alongwith motivation of farmers is carried out.

1.2.2 Irrigation

In Kohlu, agriculture land can be classified into irrigated and un-irrigated. Irrigated land has permanent sources of water like tubewells, open surface wells, karezes, springs and lohras (flood water channels). Un-irrigated land in Kohlu district is either rain-fed, locally called khushkaba, or flood irrigated (sailaba).

According to local sources, the number of tubewells is increasing rapidly which are mostly operated by diesel engines. A very small proportion of land is irrigated with karezes as the old karezes have been dried up. Most of the arable land is khushkaba or saline, land depending upon rainfall. In flood irrigation, rain-water is collected in the fields by embanking them. This provides enough water for cultivation of crops like wheat, barley and masoor.

The government has assisted in water management in collaboration with the Japanese Government and the World Bank under the "On Farm Water Management Project", (88 percent share by the foreign donors and 12 percent by Government of Balochistan). The project has constructed 6 lined water channels, to avoid wastage of water during irrigation and 12 water tanks for collection of water.

1.2.3 Horticulture

The fruits are grown in Kharif season. During 1997-98 season fruits were grown over an area of 854 hectares with a total production of 7394 tonnes which is an important source of earning through export of these fruits to the neighbouring districts. Important fruits grown in the district alongwith the area and production are shown in the following table:

TABLE 1.2 AREA, PRODUCTION AND AVERAGE YIELD OF FRUITS, 1997-98

Fruits	Total Area (Hectares)	Production (Tonnes)	Yield/Hectare (Kilograms)
Almond	352	1349	4203
Apple	301	3718	14082
Apricot	35	584	17188
Grapes	56	493	10714
Peach	15	90	10000
Plum	12	100	10000
Pomegranate	52	880	20000
Mangoes	8	40	5000
Citrus	15	100	10000
Other Fruits	8	40	10000

Source: Agriculture Statistics of Balochistan, 1997-98.

1.2.4 Forestry

No official statistics is available on the size and types of forests in the agency. A large part of the agency is still un-reported.

1.2.5 Livestock

Livestock farming has been a centuries old occupation of a vast majority of the population in Kohlu. It was the only source of bread-winning for most of the households. Hence livestock farming continued even after the people settled down in villages and started agricultural activities.

Table 1.3 Livestock population in Kohlu district-1996

S.No.	Livestock	Number
1.	Cattle	99,278
2.	Buffalo	165
3.	Sheep	1,127,534
4.	Goat	575,443
5.	Camel	48,443
6.	Horse	7,926
7.	Ass	53,043
8.	Poultry	201,679

Source: Livestock Census 1996, Agriculture Census Organization.

Kohlu agency has one veterinary hospital and 72 dispensaries. A disease investigation laboratory unit is available at the veterinary hospital Kohlu while no artificial insemination facility is available in the district.

1.3 INDUSTRY AND TRADE

1.3.1 Industry

There is no industrial activity in Kohlu district. A few manufacturing units and routine commercial activities shape the economic life of the district.

1.3.2 Mining

A very limited mining activity has been carried out in the district. According to the Inspectorate of Mines, annually a total of 1513.36 metric tonnes of coal is being mined out from one mine in Kohlu. The inspectorate has also indicated the deposits of sulphur and salt as well as reports confirm the petroleum reserves in the district. However, further exploration of minerals has not been possible due to resistance and non co-operation by the local elite to any attempt towards exploration and exploitation besides resource constraint in this regard.

1.3.3 Trade

There is no large scale trade or for that matter any well known trading centre in Kohlu district. The banking facility is limited to Kohlu town only.

1.3.4 Communication

Kohlu, a rural district, is connected with other parts of the province and the country by a shingle road only.

Limited telephone and electric facilities are available in the district. Postal services are not available to all the villages. Radio and Television ownership is not registered. A booster station has been established in Kohlu to enhance the reception range of Pakistan television's transmission. The district has neither railway nor air links to other parts of the country.

1.4 HISTORY, ETHNICITY/TRIBES AND CULTURE

1.4.1 History

In early times Kalmati kupchani and other Baloch tribes roamed this land. Mir Chakar Khan, the Rind hero of Baloch romance, is the person from whom history of this area starts. After his quarrels with Lasharis and his expulsion from Sibi, he took refuge in this area. After sometime he migrated to the east of Indus alongwith his tribe but a small section of Puzh Rinds opted to stay in this area under the leadership of Bijar Khan. He had with him Ali Khan, Mando Khan and Khalu Khan, Rinds, a blacksmith (*Lohar*), a gardener called *kangra*, and a nagro named Shaheja. These men founded the Marri tribe in the first quarter of the sixteenth century. The Bijarani clan was founded by Bijar Khan, the Loharani by the blacksmith and the Ghazani by Gazzo or Ghazan, a Buledi boy adopted by Ali Khan. These small groups gradually increased and began a career of raiding and conquest, but later on as their strength became constantly lessened by raids and incursions it became necessary to recruit from outside. Thus Brahvis and Balochs from other parts of Balochistan, Khetrans, Afghans and Jats gained easy admission to the tribe which helped the tribe to maintain its strength.

The other, remarkable, tribe in Kohlu is the Zarkoon tribe. This tribe was once forced by the Bugti tribe to desert Kohlu but later Marris offered them a defensive and offensive alliance. According to a treaty the area surrounding Kohlu town was given to the Zarkoons.

It is claimed that the Marris were subjects of the Khan of Kalat and it was after the death of Mir Nasir Khan, that the Marris felt themselves free of any control. They started devastation in all directions and got engaged in wars and blood feuds with different tribes.

A CATTLE MANDI AT KOHLU

A HERD OF SHEEP

The Marri tribe gave much trouble to the British Government and kept on attacking the British interests. The British army occupied Kahan in May 1840 but shortly afterwards they were forced by the Marris to evacuate the place. On and off, the British authorities signed treaties with the Marris but the law and order situation could not be improved. The Marris always thought the British as illegal occupants of their territory. Thus everything related to the British-men, allies or installations was supposed to be attacked. In 1898 AD, Sardar Khair Bakhsh Khan Marri alongwith many of his tribesmen migrated to Kabul as a protest against the British occupation. However, they came back after sometime unconditionally.

After the Indo-Pak partition, this area remained a political agency. Kohlu was given the status of district on 6th February, 1974 and reshaped in July, 1983. At present, the district is comprised of three sub-divisions - Kohlu, Mawand and Kahan, with its headquarters at Kohlu.

1.4.2 Ethnicity/Tribes

The Balochs constitute an over whelming majority (above 91 percent) of the population in Kohlu district, out of which a significant majority belongs to Marri tribe. The Marris are divided into three main clans - Ghazani, Loharanai and Bijarani, which are further divided into many sub-clans. Another ethnic group residing in the district are Zarkoons who speak pushto.

1.4.3 Culture, Customs and Traditions

Kohlu has a tribal society based on a kinship system. It is the land of the Marri tribe and the Sardar of the Marri tribe is still a de facto powerful dignitary. He exercises a great influence over the people. Although internal dissension has dissolved absolute authority of the sardar, he still is the mediator, decision maker and political representative of the people. The Sardar's family enjoys a superior status also because of its economic prosperity. The tradition of presenting a goat or sheep to the sardar is still persistent.

However, with the Zarkoons, the influence of the sardar is not as strong as in Marri tribe.

The population of the district is almost muslim. The minorities include Christian, Ahmedi, Buddhist, Parsis and others. Sectarian violence is minimal as most of the people belongs to the Sunni sect of Islam.

In a tribal society like Kohlu, the men possess superior status whereas females are marginalised in every sphere of life; they have lesser opportunities for education and medical care as well as economic independence and inheritance of property.

Joint and extended family system is existing dominantly in the district. Male siblings reside in one household even after their marriage.

In Kohlu people try to solve their conflicts at community level by involving tribal elders, sardars or other influential people. Marraka is the dominant mode of arbitration. This means that the aggressor takes some unbiased and well respected elders to the victims house. The arbitrators listen to both sides and a decision is made which is usually accepted by all parties involved. Otherwise the aggrieved party can go to a court of law.

In Kohlu it is part of the culture that all men carry arms. No matter his age or economic status, every man is supposed to have some fire arm with him. Various types of, arms are freely and easily available. This situation has some times created problems for maintaining law and order, by the law enforcing agencies.

1.4.4 Food

The food habits of the local population are almost the same as in other rural parts of Balochistan. There are three usual eating times. *Sajji* (roasted mutton) is a speciality of the Baloch hill tribes and is taken on special festive occasions and offered to notable guests.

1.4.5 Dress

The majority of the people draw the normative structure from the Baloch, more specifically the Marri culture. Although Zarkoons differ in their culture from that of Marri, but many of traditions are common among them. The men wear *shalwar* (trousers), *qameez* (shirt) and turban, while the women wear a *frock* with *shalwar* and cover their heads with a *chaddar* (wide cloth). Although the same dress are worn by all the tribesmen and women, their tribal affiliation is distinguished by the embroidery on their shirts or *frocks*.

1.4.6 Dwellings

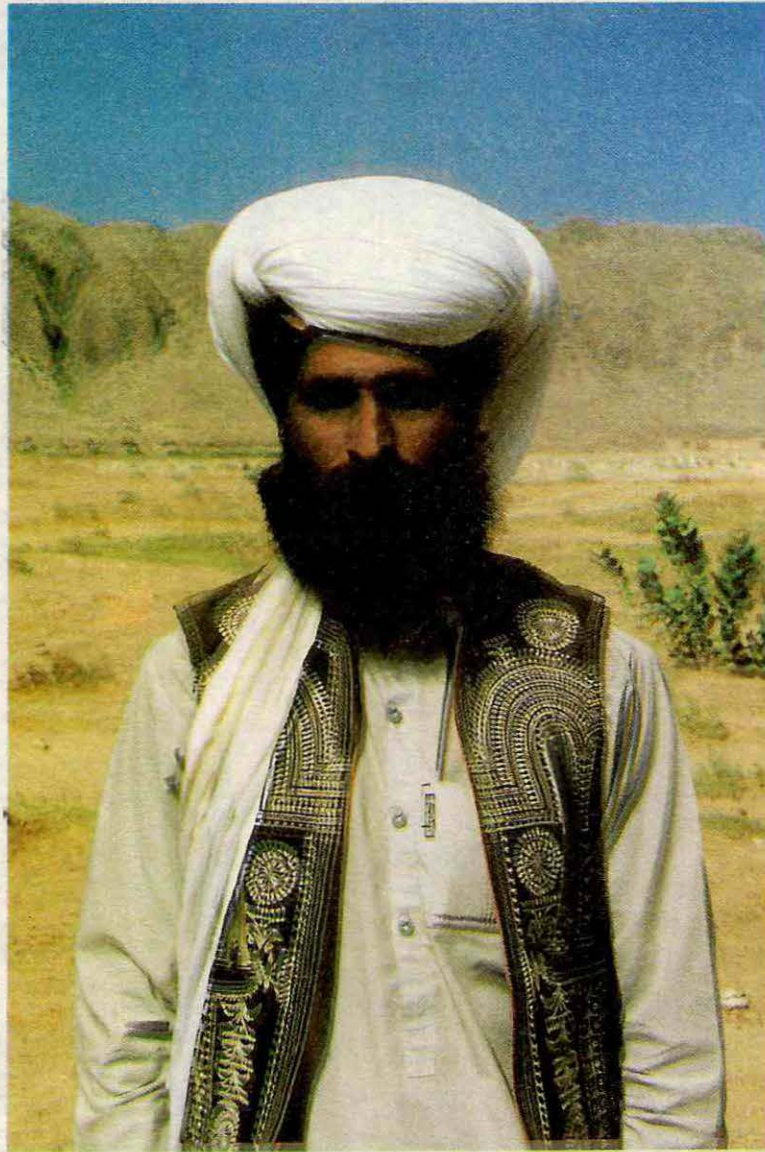

Kohlu district is entirely rural and people are deprived of even basic civic amenities. A typical village has several dwelling units located close to each other, and is inhabited by a single clan or sub-tribe. Most of the people live in huts or single room houses. The nomadic life style of the inhabitants does not allow them to built permanent houses.

1.4.7 Occupation

The principal occupation is agriculture combined with cattle raising. The bulk of population in Kohlu and Kahan tchsils is migratory and depends on sheep and goat raising.

1.4.8 Betrothals and Marriages

Desirably, a young man marries as soon as possible after puberty, some may have to wait for many years in case of no arrangement of *labb* by him or his family. The amount of *labb*, is decided upon the fathers of the bride and the bride groom, keeping in view the

A TRADITIONAL DRESS OF MARRI TRIBE

family background of the bride and her physical attraction. However, labb is not practised among Bahawalanzai Marris who do not give their girls to other Marris or to any other tribesmen except the families among the Mazari, Drishak and Dombki tribes of similar status. In rare cases the bride is given dowry from her parents which, in most cases, is not very expensive. Endogamy is a common practice. Sometimes marriages are arranged to mediate a rivalry in which girl from the aggressor's family—who is considered the honour of the family, is given in marriage to a member of the victim's family. Elopement is a taboo and both the girl and the boy are murdered if found by the relatives.

Mothers play, relatively, a small role in deciding about the marriage of their son or daughter. Neither the groom nor the bride is allowed to choose his or her life partner. The decision made by the parents is considered final. The parents of bride and bride groom finalize the details of the marriage, including the amount of labb and date of the wedding. With the Marris the amount of labb is relatively small compared to that of the Zarkoons. On the wedding day the wedding procession moves off to the bride's home where Nikah is performed. All the expenses for meals offered to the wedding guests are paid by the groom's family. In case of remarriage of a widow, no marriage ceremonies are observed.

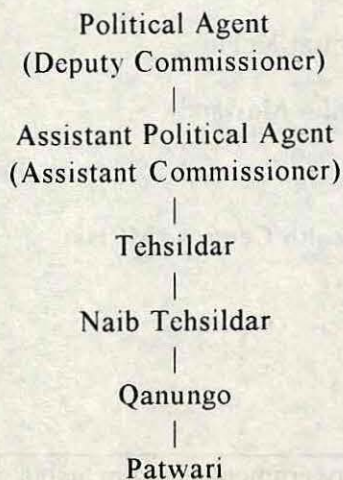

1.5 ADMINISTRATIVE SET-UP

1.5.1 Executive, Revenue and Judicial System

The Police, Judiciary and Revenue System make part of administration as discussed in the following sub-sections:-

1.5.2 District Administration

The Agency's administration is headed by a Political Agent (Deputy Commissioner). The Political Agent is the custodian of law and order in the agency and is the overall coordinator of the representatives of the various government departments. Kohlu district has three sub-divisions-cum tehsils, namely Kohlu, Mawand and Kahan. The district administrative set-up is as under:-

1.5.3 Police Department

Kohlu is divided into two areas as far as law enforcement is concerned. Area "A" is controlled by the Balochistan Police headed by a Deputy Superintendent of Police (DSP) Stationed at Kohlu. "B" Area is controlled by the levies force headed by the Political Agent (PA) in Kohlu. There is only one Police Station in Kohlu district, at Kohlu Town.

Levies force controls the remaining parts of the district. The Political Agent controls the levies through his Assistant Political Agent (Assistant Commissioner), Tehsildars and Naib-Tehsildars, in addition, Mawand Rifles, an armed forces contingent is also deputed in Kohlu.

1.5.4 Judicial System

Justice is administered through regular as well as Qazi courts. Regular courts provide justice under the civil and criminal laws of the state. The jirga system has officially been abolished.

1.5.5 Revenue System

Political Agent also collects revenue on the behalf of the government. In Kohlu, revenue is collected through various agencies. The local councils are responsible for collection of octroi and other related revenue. Provincial government collects some utility fees like water charges, electricity tariff etc. and telephone revenue are levied by the Federal Government.

1.6 HEALTH

The break-up of the Health services provided by the government is as under:

1. District Health Hospital Kohlu	01
2. Civil Hospitals (Kohlu, Mawand)	02
3. Basic Health Units	21
4. Mother and Child Health Centres (MCHs)	02
5. Dispensaries	34
6. Health Auxiliarys	04
7. T.B. Clinic	01

Source: Health Department, Government of Balochistan, 1998.

1.7 EDUCATION

The education statistics of the district are as under:

TABLE 1.5 NO. OF SCHOOLS AND ENROLMENT OF STUDENTS, 1993-98

	Years					
	1993	1994	1995	1996	1997	1998

Kohlu district has only one intermediate college where boys and girls are enrolled together. Although the cultural milieu of the area does not allow co-education, a few families have allowed their daughters to get a college education together with boys, but the phenomenon necessitates the need for a Girl College in Kohlu.

1.8 IMPORTANT/HISTORICAL PLACES

Kohlu Agency does not have many places of tourists interest except the Shrine of Mast Tawakali at Maidan Gari which is a place of interest in the district.

PART-II
BROAD ANALYSIS OF
POPULATION DATA

2 BROAD ANALYSIS OF POPULATION CENSUS DATA

2.1 POPULATION SIZE, GROWTH AND DISTRIBUTION

2.1.1 Population Size and Growth

The Population of Kohlu district, is 99.85 thousands in 1998 as compared to 71.27 thousands in 1981, recording a fairly high increase of 40.10 percent over a period of 17 years i.e. 1981-98. In contrast to this, the intercensal increase during 1972-81, had been of low tone i.e. 28.42 percent whereas a very high increase of 97.49 percent occurred during 1961-72. However, in the long run, a significant increase of 255.31 percent (6.90 percent per annum), has taken place over a period of 37 years since 1961.

The annual average growth rate of population in the district has reflected a continuous downward trend since 1961. It has declined to 2.00 percent during intercensal period 1981-98 from 3.00 and 6.03 percent during 1972-81 and 1961-72 respectively. If the population continues to grow at the 1981-98 rate, it will double in the next 35 years.

Table 2.1 shows the population and intercensal increase since 1961. Figure 2.1 demonstrates the trend of population growth rate since 1961.

TABLE 2.1 POPULATION AND INTERCENSAL, INCREASE SINCE 1961

Description	1961	1972	1981	1998
Population (In Thousands)	28.10	55.50	71.27	99.85
Intercensal Increase (Percent)	-	97.49	28.42	40.10
Cumulative Increase (Percent)	-	97.49	153.62	255.31
Average Annual Growth Rate (Percent)	-	6.03	3.00	2.00

Note: Population of previous censuses is adjusted according to current geographical boundaries of the district.

Kohlu district consists of three sub-divisions- Kahan, Kohlu and Mawand. Kohlu sub-division is the most populous with 49.03 thousand souls. The population of Kahan and Mawand sub-division is 26.76 and 24.06 thousands respectively.

The area of the district is 7610 Sq. Kms., yielding a very low population density (persons per Sq. Kilometre) at 13.12 in 1998 as compared to 9.37 in 1981.

Fig. 2.1
KOHLU DISTRICT
INTERCENSAL GROWTH RATE

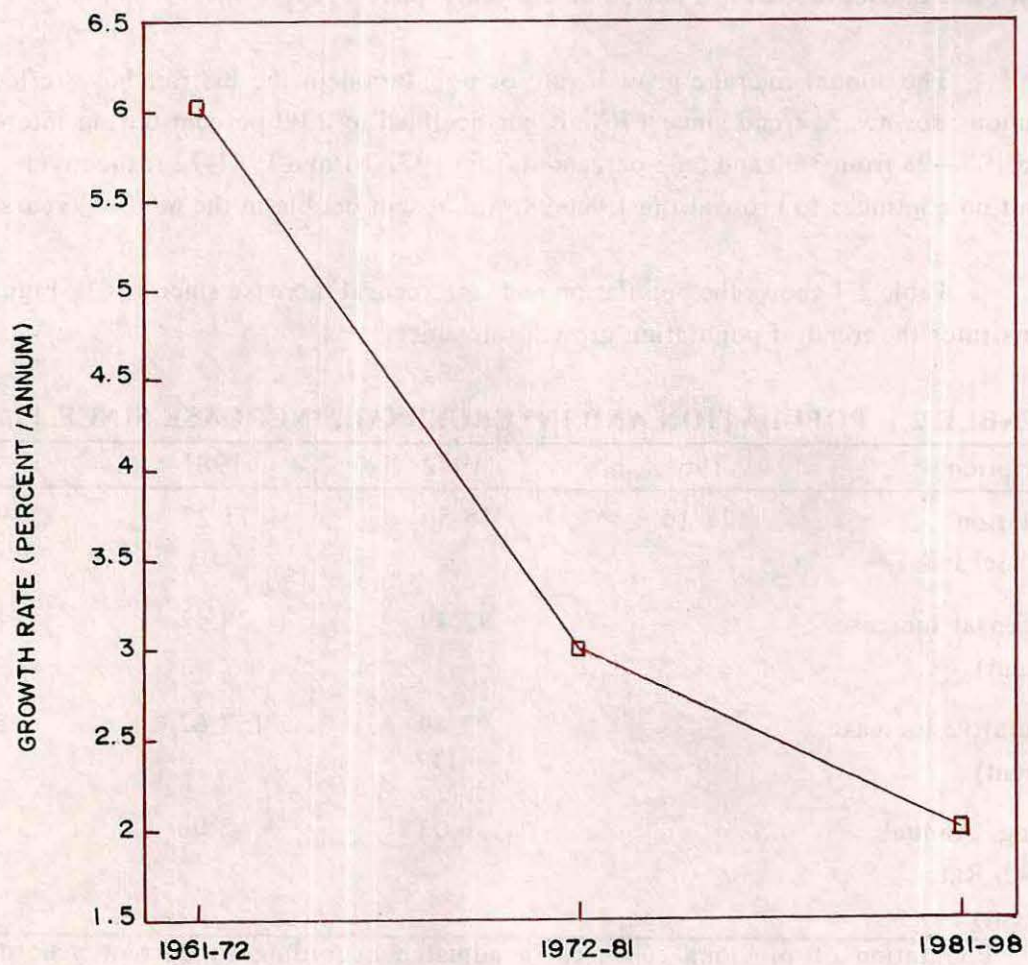

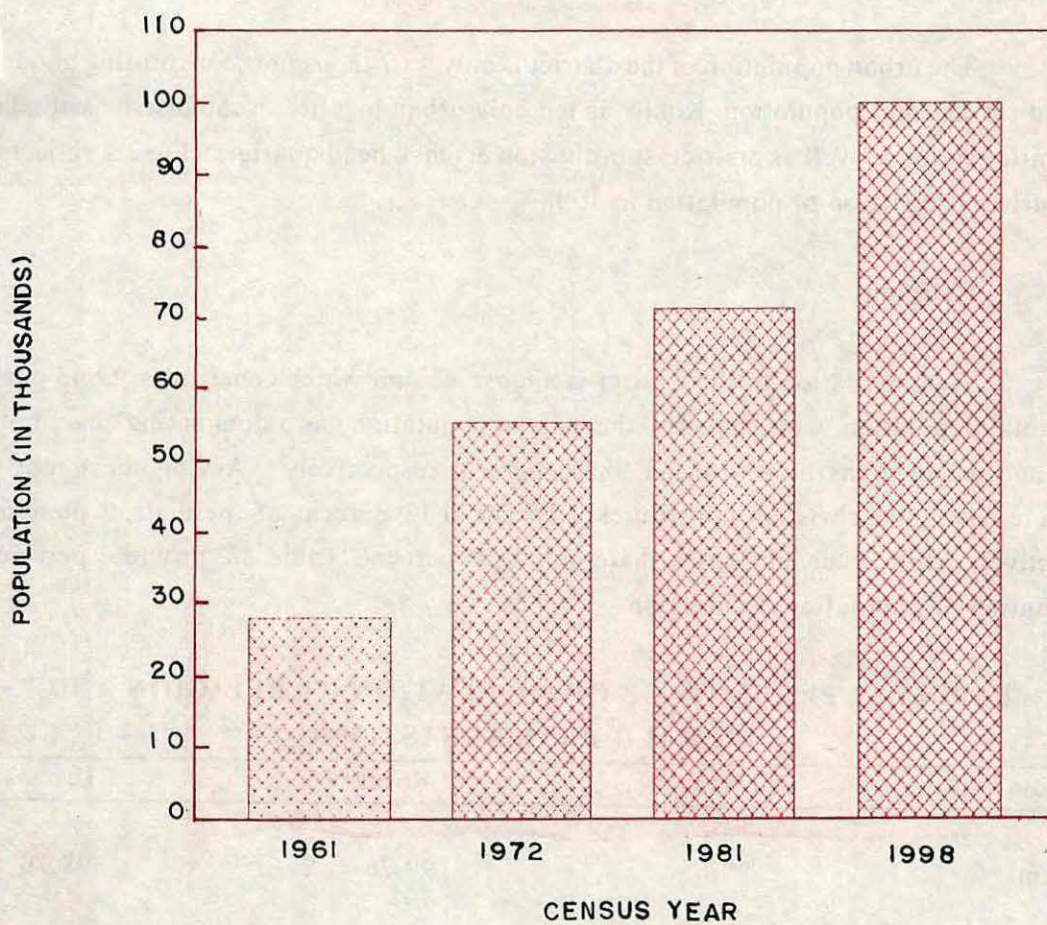

Fig. 2.1 (A)
KOHLU DISTRICT
POPULATION SINCE 1961

2.1.2 Household Size

The average household size of the district has marginally declined from 7.00 in 1981 to 6.4 in 1998. It is higher in urban at 9.7 compared to that in rural areas at 6.2, implying more congestion in urban area.

2.1.3 Rural/Urban Distribution

Earlier, Kohlu was entirely a rural district with no urban locality. The rural population of the district in 1998 stands at 90.18 thousands, constituting 90.32 percent of its total population.

The urban population of the district is only 9.67 thousands constituting about 9.68 percent of its total population. Kohlu is the only urban locality in the district with Town Committee status as well as district, sub-division & tehsil head quarters. Fig 2.2 reflects the rural/urban proportion of population in 1998.

2.1.4 Religion

The population of the district is almost muslim which constitutes 99.65 percent of its total population. Consequently, the muslim population has a dominating share both in rural and urban areas at 99.76 and 98.70 percent respectively. Among the minorities, schedule caste and christian constitutes 0.16 and 0.13 percent of the district population respectively while other minorities share only 0.06 percent. Table 2.2 provides percentage distribution of population by religion.

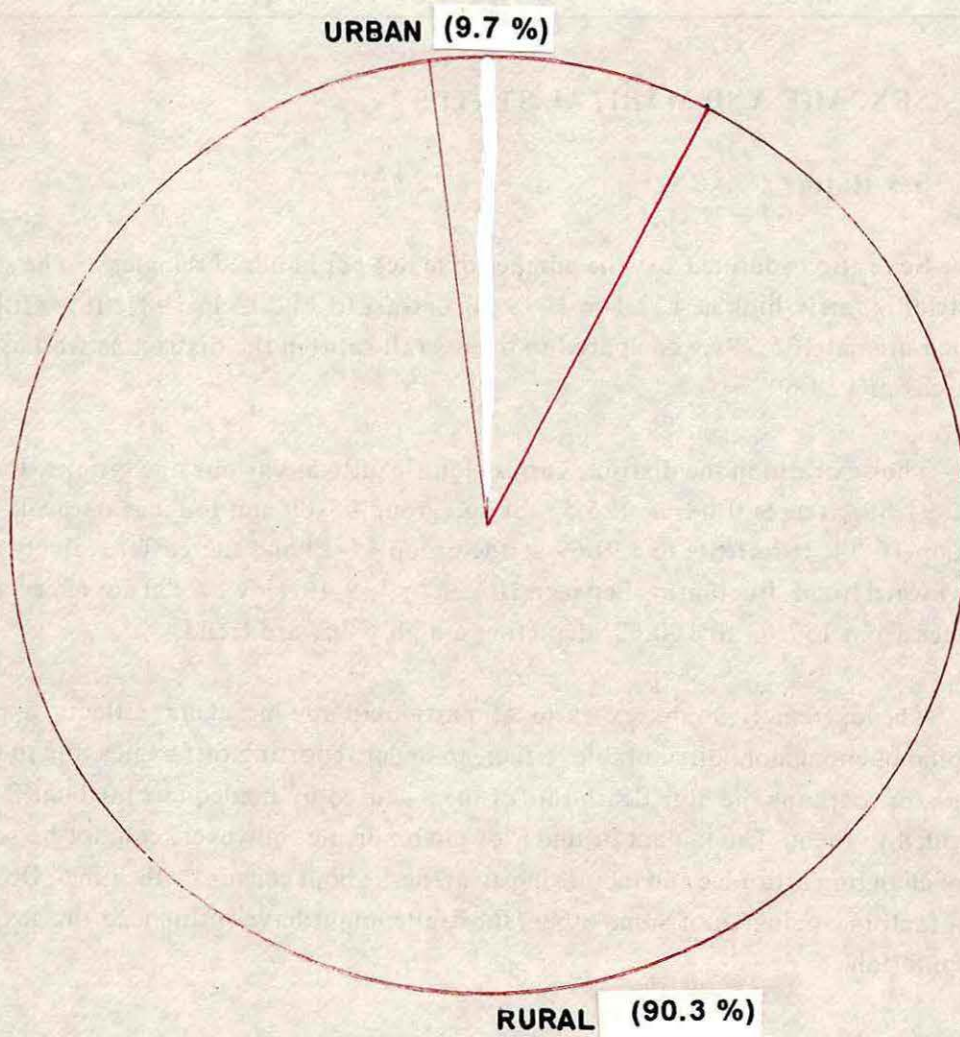

**TABLE: 2.2 PERCENTAGE OF POPULATION BY RELIGION AND
RURAL/URBAN AREAS, 1998**

Religion	All Areas	Rural	Urban
Muslim	99.65	99.76	98.70
Christian	0.13	0.02	1.17
Hindu (Jati)	0.01	0.01	0.01
Ahmadi (Qadiani)	0.04	0.03	0.09
Scheduled Caste	0.16	0.17	0.02
Others	0.01	0.00	0.01

Fig. 2.2

KOHLU DISTRICT

RURAL - URBAN POPULATION 1998

2.1.5 Mother Tongue

Balochi is the most commonly spoken mother tongue in the district as 91.23 percent of the population has reported it in 1998 census, while Saraiki is spoken by 0.45 percent. Urdu and others are spoken by 1.15 percent of the district population.

TABLE : 2.3 PERCENTAGE OF POPULATION BY MOTHER TONGUE AND RURAL/URBAN AREAS, 1998

Area	Urdu	Punjabi	Sindhi	Pushto	Balochi	Saraiki	Others
All Areas	0.09	0.54	0.04	6.63	91.23	0.45	1.02
Rural	0.04	0.25	0.03	2.37	96.26	0.00	1.04
Urban	0.55	3.30	0.13	46.39	44.27	4.59	0.76

2.2 SEX, AGE AND MARITAL STATUS

2.2.1 Sex Ratio

Sex ratio is defined as "the number of males per hundred females". The sex ratio in the district is fairly high at 122.1 in 1998 in contrast to 111.15 in 1981. It is still higher in the urban area at 135.79 as compared to the overall ratio in the district as well as to that in rural areas at 120.69.

The sex ratio in the district, varies significantly at various age groups. It sharply rises from 91.89, at ages 0-04, to 125.57, at age group 05-09 and touches its peak 192.30 at age group 10-14. It retreats to 139.69 at age group 15-19 and thereafter reflects more or less a downward trend, fluctuating between 103.26 to 139.46. However at advanced ages (60 +), it ranges from 137.03 to 190.03, depicting a highly upward trend.

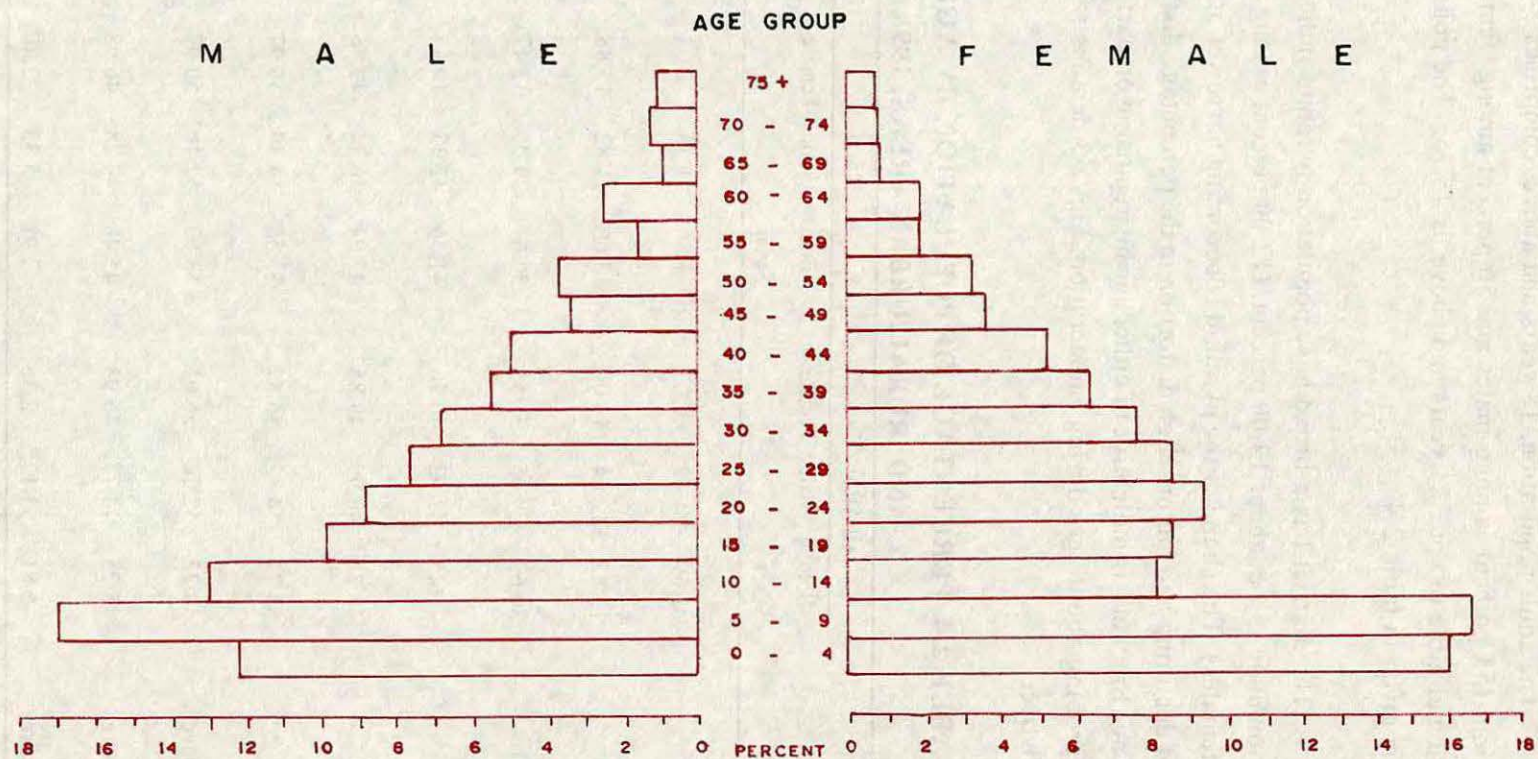

The extremely high sex ratio at particular age brackets reflects a peculiar demographic phenomenon: attributable, either, to under reporting of females due to cultural constraints, or, perhaps the high death rate of them caused by inadequate medical facilities/care provided to them. The impact of under or misreporting, however, can not be so strong because of changing attitudes and increasing awareness about census by the time. Obviously, the social factors, inclusive of some other shortfalls might have influenced the sex pattern of the population.

2.2.2 Age Structure

The age structure of the district shows high proportion of population below 15 years, i.e. 41.45 percent; of which 13.82 percent is below 5 years of age including 1.69 percent infants. The population of 65 years and above is 2.81 percent. The population of working age groups (15 - 64 years), is 55.74 percent thus giving an age dependency ratio of 79.40 percent.

Fig 2.8

POPULATION PYRAMID, KOHLU AGENCY AGE AND SEX STRUCTURE, 1998

The age dependency ratio, varies closely at 80.07 and 73.33 percent in rural and urban areas respectively. However, it differs significantly in favour of females in rural in contrast to males, in urban area.

The adult population, 18 years and above, comprises 54.22 percent, of the total population (53 percent among males and 56 percent among females). The percentage of population eligible to vote, 21 years and above, is 45.75. The population by important age groups is given in table 2.4.

The district has a broad base population pyramid indicating high proportion of population under 5 i.e. about 14.00 percent, (12.00 percent among males and 16.00 percent among females). The shape of the pyramid is becoming narrower at advanced age groups by virtue of declining age factor. High distortion in the percentage distribution of population at various age brackets is indicative of either age misreporting on part of the respondents or the lack of probing about ages during enumeration. Fig. 2.3 demonstrates the age sex structure in the district.

**TABLE 2.4 PERCENTAGE OF POPULATION BY AGE GROUPS, SEX
AND RURAL/URBAN AREAS, 1998**

Age Group	All Areas			Rural			Urban		
	Both Sexes	Male	Female	Both Sexes	Male	Female	Both Sexes	Male	Female
Under-1	1.69	1.42	2.03	1.66	1.36	2.03	1.97	1.98	2.05
Under-5	13.82	12.04	16.00	13.66	11.82	15.88	15.36	14.55	17.17
Under-10	30.62	29.05	32.53	30.61	29.06	32.47	30.71	30.02	33.11
Under-15	41.45	42.02	40.76	41.56	42.33	40.63	40.42	40.68	42.06
15 to 49	48.25	46.99	49.85	47.94	46.34	49.86	51.47	54.73	49.72
15 to 64	55.74	54.82	56.87	55.53	54.34	56.97	57.69	61.20	55.92
18 & Above	54.22	52.76	56.01	53.93	52.16	56.07	56.98	60.27	55.43
21 & Above	45.75	44.77	46.93	45.48	44.28	46.93	48.24	52.01	46.96
65 & Above	2.81	3.17	2.36	2.91	3.33	2.40	1.88	1.84	2.02
Age Dependency Ratio	79.40	82.43	75.83	80.07	84.02	75.53	73.33	69.49	78.84

2.2.3 Marital Status

All individuals aged 15 years and above enumerated in the 1998 Census were classified according to their marital status; namely, 'married', 'never married', 'Widowed' and 'divorced'. Out of all, 23.23 percent are never married, 74.47 currently married, 2.23 widowed and negligible percentage i.e. 0.07 percent, divorced. The never married amongst males are 31.87 percent as compared to 12.91 percent amongst females. This differential is also reflected through the mean age at marriage which is 22.36 years for males compared to 18.45 for females. This implies, that the tradition of early marriages of females is still persistent in the society in Kohlu district.

2.2.4 Females of Reproductive Ages by Marital Status

Out of the female population in the district, 49.85 percent is in the reproductive ages, i.e. 15 to 49 years; the percentage is relatively higher in rural at 49.86 compared to 49.72 in urban area. Among the females in reproductive ages, 14.55 percent are never married, 84.37 percent currently married, 1.04 percent widowed and only 0.04 divorced.

More than 35 percent of the ever married women of reproductive ages are found without any child, 14.24 percent have 2 children followed by 14.01 percent having 3 children, While 13.23 percent have reported 1 child. However, 23.50 percent of the ever married women have reported 4-6 or more children.

2.2.5 Disabled Persons

The disabled persons, 1622 in all, constitute 1.62 percent of the total population in the district. Among the disabled persons, 57.9 percent are males against 42.91 percent females. The percentage of crippled among the total disabled persons is the highest at 28.24 (58.30 percent among males and 41.70 percent among females), followed by insane, 7.03 percent, mentally retarded, 2.96 percent and blinds 2.10 percent. The percentage of deaf and mute is 1.91 while 1.79 percent of the total disabled population suffered with more than one disability and about 56 percent have some other categories of disability.

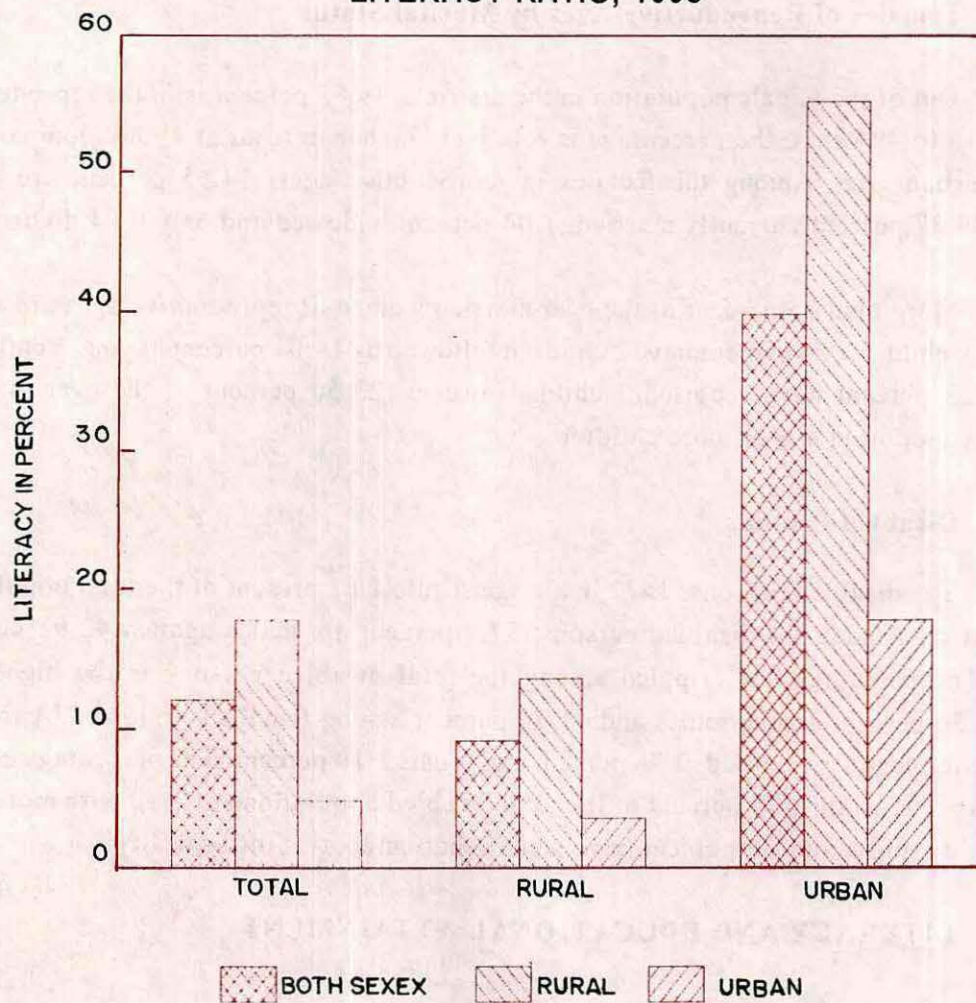

2.3 LITERACY AND EDUCATIONAL ATTAINMENT

2.3.1 Literacy

Literacy in census 1998 is defined as the ability; "to read a Newspaper and write a simple letter in any language". It is measured in terms of "literacy ratio"; computed as percentage of literate persons among the population aged 10 years and above.

Literacy ratio in respect of Kohlu district has evolved at 12.15 percent in 1998 as against 2.9 percent in 1981 which varies for males at 17.83 percent compared to 4.85 percent for females.

Fig. 2.4
KOHLU DISTRICT
LITERACY RATIO, 1998

A sharp contrast does exist in the literacy level by area and sex; the literacy ratio in urban area is significantly higher at 39.84 percent as against 9.19 percent in rural areas. As regards, the sex, differential, It is very glaring, in favour of males at 37.39 percentage points in urban and 10.04 percentage points in rural areas.

Although, a considerable improvement of 9.25 percentage points has occurred in the over all literacy level in the district over the time: since 1981, yet, the situation is far from satisfactory. The low level of literacy of females especially in rural areas merely at 3.57 percent, reflects inaccessibility of women to education even at the advent of 21st century. The high illiteracy of females may be attributed to the traditional negative attitude towards female education in the society. Table 2.5 gives literacy ratios. Figure 2.4 demonstrates the literacy ratios by sex and area.

TABLE 2.5 LITERACY RATIO BY SEX AND RURAL/URBAN AREAS, 1981 AND 1998

Area	1981			1998		
	Both Sexes	Male	Female	Both Sexes	Male	Female
All Areas	2.9	4.8	0.44	12.15	17.83	4.85
Rural	2.9	4.8	0.44	9.19	13.61	3.57
Urban	-	-	-	39.84	55.15	17.76

2.3.2 Educational Attainment

A person who has attained any educational level is treated as educated. The data gathered in 1998 census shows that there are only 11.75 percent educated persons in the district among the total population aged 10 years and above including those below primary; the remaining 88.25 percent, either attained no educational level or have never attended any educational institution. A large variation exists in the ratios of educated persons in rural and urban areas as well as for males and females. The percentage of educated males to the total population is 17.38 and for females 4.51. It is 8.77 for rural as against 39.53 for urban areas as shown in table 2.6.

TABLE 2.6 PERCENTAGE OF EDUCATED PERSONS BY SEX AND RURAL/URBAN AREAS, 1998

Area	Educated Persons as Percentage of Population 10 Years & Above		
	Both Sexes	Male	Female
All Areas	11.75	17.38	4.51
Rural	8.77	13.16	3.21
Urban	39.53	54.74	17.58

2.3.3 Enrolment Ratio

The enrolment ratio, of the district, measured as percentage of students to population of ages 5-24 years, is 5.18 percent. It is higher for males i.e. 7.19 percent compared to 2.39 percent for females.

The enrolment ratio is significantly higher in urban area at 35.98 percent compared to only 1.87 percent in rural areas. A high variation appears between male and female enrolment ratios both in rural and urban areas. The enrolment ratio of males, as compared to females, is almost seven times in rural and more than double in urban area. Table 2.7 gives enrolment ratios.

TABLE 2.7 ENROLMENT RATIO BY SEX AND RURAL/URBAN AREAS, 1998

Area	Both Sexes	Male	Female
All Areas	5.18	7.19	2.39
Rural	1.87	2.94	0.39
Urban	35.98	47.27	20.70

2.3.4 Level of Education

Out of the total educated persons in the district 16.54 percent are below primary and 23.80 percent have passed primary, 20.80 middle, and 23.72 matriculation. After matriculation, the percentage falls to 7.18 for intermediate, 3.58 for graduates and 1.54 for post graduates while 2.85 percent are diploma/certificate holders and others, implying an overall low education profile, particularly in rural areas and especially concerning the females.

2.4 MIGRATION

2.4.1 In-Migration

Migration data covers the movement of population in terms of shifting the residence from one district to another in the same province or from one province to another. It does not cover persons who changed their place of residence within their own district.

2.4.2 Life time Migrants

The total life time in-migrants in the district are 3573 souls, (3.58 percent of the total population). Among them, 56.42 percent are from rural areas and remaining, 43.58 percent from urban. The male and female life time in-migrants are 89.73 and 10.27 percent

respectively. The persons who have migrated into the district during the last 5 years i.e. after March, 1993, are 37.25 percent, while 7.47 percent had migrated before 5 years but after 1988. The highest percentage of 51.39 have migrated in, 10 years earlier.

Out of the total life time in-migrants, 73.47 percent shifted due to employment/transfer, 16.04 percent moved with head, 4.59 percent migrated into the district as a result of marriage, while 0.31 for business and 0.50 percent for education.

Majority of life time immigrants is from NWFP i.e. 73.64 percent followed by Punjab, 13.97 and Balochistan, 8.37 whereas FATA, 1.62 and AJK 0.34 percent. A small percentage, 0.08 repatriated from other countries. However, 1.79 percent of the total life time in-migrants have not reported their place of previous residence. The maximum flow of migrants was towards the rural areas. Table 2.8 provides data on lifetime in-migrants.

**TABLE 2.8 PERCENTAGE OF MIGRANTS FROM OTHER PROVINCE/
WITHIN PROVINCE BY RURAL/URBAN, 1998**

2.5 ECONOMIC CHARACTERISTICS

2.5.1 Economically Active Population

The economically active population comprises the persons aged 10 years and above of either sex who are engaged in some work for pay or profit, including un-paid family helpers as well as un-employed, not working but looking for work and laid off. There are 282.46 economically active persons in the districts (93.42 percent males and 6.58 percent females) which constitute, 28.29 percent of the total population in 1998. The remaining,

71.71 percent economically inactive persons include 30.62 percent children below 10 years age, 30.06 percent domestic workers including 28.37 percent housewives, 1.40 percent students and 9.63 percent all other categories. Table 2.9 provides the percentage distribution of population by economic category.

TABLE 2.9 PERCENTAGE OF POPULATION BY ECONOMIC CATEGORY, 1998

Economic Category	All Areas			Rural			Urban		
	Both Sexes	Male	Female	Both Sexes	Male	Female	Both Sexes	Male	Female

* Activity rate	40.77	67.77	6.12	40.74	67.81	6.4	41.12	67.71	2.77
Un-employment rates	19.00	20.27	0.97	18.97	20.32	0.9	19.24	19.79	-

* Refined Activity Rate

The percentage of economically active persons to the total population of the district i.e., 28.29, is termed as the crude activity rate.

The ratio of the economically active persons to the population aged 10 years and above is termed as refined participation or activity rate. Refined activity rates have been used for the analysis of 1998 census data which is worked-out at 40.77 percent for the district. A high variation exists in the overall activity rates between males and females at 67.77 and 6.12 percent respectively. The low participation of females in the economic activity is mainly because of the cultural constraints as well as their engagement in the house keeping work. There is no significant difference in the activity rates by area as they vary at 40.74 and 41.12 percent in rural & urban areas respectively.

The sex differential, regarding activity rates, is significantly higher in favour of males by 61.41 percentage points in rural and 64.94 percentage points in urban area.

2.5.2 Un-employment

The un-employment rate, is measured as a percentage of un-employed persons including those-looking for work and laid off to the total economically active population. The overall un-employment rate in the district is computed at 19.00 percent. The un-employment rates by sex deviate significantly at 20.27 percent for males in contrast to 0.97 percent for females.

The variation in the rates by rural/urban area is almost negligible. However, sex differential in favour of males is quite distinct both in rural and urban areas and similar to the overall pattern existing in the district.

2.5.3 Employed Population by Occupation

Of the total employed persons in the district, the highest percentage, 57.65, is associated with the occupation groups-6- "Skilled Agricultural and Fishery Workers" followed by group-9, "Elementary Occupants" and group-3, "Technicians and Associate Professionals" at 26.78 and 4.14 percent respectively. The remaining 11.43 percent are in other occupational groups. The male occupants follow a similar pattern, However, it changes slightly for females.

The pattern of employment by occupations varies in rural and urban areas. In rural, it is similar to the overall pattern of the district with varying percentage shares. However, in urban area, the pattern changes with the maximum share of group-9 at 37.28 percent followed by group-10 and group-6 at 26.71 and 9.04 percent respectively while group-5 "Service workers and Shop and Market Sales Workers", shares 6.38 percent.

Sex differential regarding occupational status is quite visible within and across the rural/urban boundaries with varying degree of percentage share and category.

2.5.4 Employed Population by Industry

The majority of employed population in the district is engaged in the Major Industrial Division-1, "Agriculture, Forestry, Hunting and Fishing" with 47.66 percent share, followed by Major Division-9, "Community, Social and Personal Services" comprising 17.65 percent. Next comes the Division-5, "Construction" and Division-4 "Electricity, Gas and Water", contributing 15.10 percent each. The other Industrial Divisions share only, 4.49 percent.

The male employed population follows exactly the same pattern with varying percentage shares while the majority of females, i.e. 45.65 percent, participates in Division-9. Followed by Division-1 at 44.40 percent while Division-3 "Manufacturing" and Division-4 shares 4.13 and 4.08 percent respectively.

In rural areas, the pattern of Industrial classification of employed persons is similar to the overall pattern of the district with a little change, as Division-1, shares maximum at 51.90 percent followed by Division-4 and Division-5 and then Division-9. In urban area, the pattern differs with Division-9 at the maximum i.e., 61.02 percent, followed by Division-5, Division-1 and Division-6 with 19.78, 8.32 and 5.53 percentage shares respectively.

A sharp contrast occurs between employed males and females by industrial classification within and across the rural/urban limits. The majority of females is engaged in Industrial Division-1 in rural and Division-9 in urban at 45.92 and 71.05 percentage share, respectively in contrast to males at 52.45 and 60.66 percent share in the corresponding Industrial Division, and respective area.

2.5.5 Employed Population by Employment Status

The percentage of employed population comprising those working and unpaid family helpers, to the total economically active population in the district comes to be 81.00 percent. (91.96 percent among males and 8.04 percent among females). Of the total employed population in the district, 73.32 percent are self-employed, 15.35 percent working as government employees while 5.72 percent are autonomous and private employees, leaving behind, 5.39 percent unpaid family helpers and 0.21 percent employers. The percentage share of males is higher in respect of all employment categories except self-employment status because 92.66 percent of employed females are associated with it as against 71.63 percent males.

The percentage of employed population by employment status varies significantly between rural and urban areas. In rural areas majority is self-employed i.e. 78.51 percent followed by government employee, 10.69 percent and private employee at 5.03 percent whereas the unpaid family helpers share 5.58 percent. On the other-hand, in urban area 25.18 percent are self-employed. The government-employees are 58.63 percent as compared to private employee at 11.51 percent whereas 3.55 percent are unpaid helpers.

Sex differential by employment status, do occurs at a high extent, both, in rural and urban areas; Even, a marked difference is observed by employment status among males as well as females across the rural and urban boundaries.

TABLE 2.10 EMPLOYED POPULATION BY EMPLOYMENT STATUS, SEX AND RURAL/URBAN AREAS, 1998

Employment Status	All Areas			Rural			Urban		
	Both Sexes	Male	Female	Both Sexes	Male	Female	Both Sexes	Male	Female

2.6 IMMUNIZATION

The question about immunization was included in the 1998 census for the first time to evaluate the vaccination programme launched by the Govt. from time to time. Only, 22.72 percent of the children under 10 years age, have been reported as vaccinated while 24.72 percent as not vaccinated and 52.57 percent reported as not known. The overall percentage of vaccinated male and female children is not so different as it varies at 11.15 for males and 11.57 for females, however, a marginal sex differential is reflected in both rural and urban areas. A sharp difference of 66.97 percentage points, exists in favour of urban area regarding vaccination done. Table 2.11 provides data on immunization.

**TABLE 2.11 PERCENTAGE OF POPULATION (LESS THAN 10 YEARS)
BY IMMUNIZATION, SEX AND RURAL/URBAN AREAS, 1998**

Employment Status	Total Population	Both Sexes			Male			Female		
		Vaccinated	Not Vaccinated	Not Known	Vaccinated	Not Vaccinated	Not Known	Vaccinated	Not Vaccinated	Not Known
Total	30572	22.72	24.72	52.57	11.15	12.85	28.16	11.57	11.87	24.41
Rural	27604	16.22	27.09	56.69	7.54	14.08	30.31	8.68	13.01	26.38

2.7 NATIONAL IDENTITY CARD

The question about national identity cards was asked in the 1998 population census for the first time to assess the coverage of I.D.Cards. The question about NIC was asked from population of 18 years and above. According to the responses to the question it was found that 34.04 percent of the population aged 18 years and above had obtained N.I.Cards among which 25.04 percent were males and only 9.00 percent females.

Variation by area shows that 63.17 percent urban and 30.74 percent rural population have obtained N.I.Cards. Sex differential regarding NIC holders within rural and urban areas is significantly higher in respect of males as compared to females. Table 2.12 gives necessary details by sex and area.

**TABLE 2.12 PERCENTAGE OF POPULATION (18 YEARS AND ABOVE)
HOLDING NATIONAL IDENTITY CARD BY AGE, SEX AND
RURAL/URBAN AREAS, 1998**

Area	Total Population	Both Sexes		Male		Female

Rural	48633	30.74	69.26	22.63	30.26	8.11	39.00
Urban	5507	63.17	36.83	46.34	12.40	16.83	24.42

PART-III
BROAD ANALYSIS
OF HOUSING DATA

3 BROAD ANALYSIS OF HOUSING CENSUS DATA

3.1 TYPE OF HOUSING STOCK

3.1.1 Level of Congestion-persons and Rooms

Of the total housing units in the Kohlu district, 45.47 percent are single room houses; the percentage in rural areas is much higher at 47.46 percent as against 14.12 percent in urban area. The percentage of housing units with 2 to 4 rooms on the reverse is, relatively higher, in urban area at 61.89 percent as compared to 43.90 percent in rural areas. A similar pattern emerges as regards housing units with 5 or more rooms.

The level of congestion, in terms of rooms per housing unit as well as persons per room, is higher in urban areas compared to that in rural areas. Table 3.1 gives the indices of congestion in 1998 census.

Table 3.1 INDICES OF CONGESTION IN 1998 CENSUS

Congestion	Total	Rural	Urban
Persons per Housing Unit	6.4	6.2	9.7
Persons per room	2.9	2.9	3.0
Rooms per Housing Unit	2.2	2.1	3.2
Housing Units with one room (percentage)	45.47	47.46	14.12
Housing Units with 2-4 rooms (percentage)	44.98	43.90	61.89
Housing Units with 5 rooms and more (percentage)	9.55	8.64	24.00

Level of congestion, regarding persons per housing unit has emerged at 6.4 in 1998 as against 7.0 in 1981, showing 0.6 percentage points decline. The level is significantly higher in urban area at 9.7 as compared to 6.2 in rural areas. The higher level of congestion particularly in urban area is indicative of low housing profile which demands more housing units with additional rooms to be constructed.

3.1.2 Nature of Tenure

There are 15,400 housing units in the district as enumerated in 1998 census, 94.02 percent in rural and 5.98 percent in urban area. As classified by tenure, 90.68 percent of the total housing units were owned. The percentage of ownership in rural areas was significantly

higher at 92.87 as compared to that in urban, at 56.24. However, the percentage of rent free, and rented housing units, is significantly higher in urban than the corresponding percentages in rural areas. Table 3.2 provides the data by nature of tenure.

Table: 3.2 NATURE OF TENURE BY RURAL/URBAN 1998.

Tenure	Total	Rural	Urban
All categories	100.00	100.00	100.00
Owned	90.68	92.87	56.24
Rented	1.84	0.64	20.63
Rent Free	7.48	6.49	23.13

3.1.3 Period of Construction

Of the total owned housing units (13,965) in the district, 42.49 percent were built before 10 years, 24.75 percent during the last 5-10 years, and 31.01 percent during last five years, whereas only 1.75 percent houses were found under construction.

The percentage of houses constructed in urban before 10 years was higher at 75.29 as compared to that in rural areas at 41.23, however, the percentage of houses constructed during the last 5-10 years was higher in rural at 25.07 as against 16.41 in urban areas.

The maximum construction, during last 5 years i.e. before census, 31.90 percent took place in rural areas as compared to only 7.92 percent in urban area during the corresponding period. Implying a progressive trend of construction in rural areas, resulting in, relatively, a low level of congestion i.e. persons per housing unit, in 1998.

3.1.4 Construction Material-Walls

There is sharp contrast in the qualitative indices of construction between urban and rural areas. In urban, 22.48 percent of the housing units have the standard pucca walls made of backed bricks/blocks and stones with cement bonding. The highest percentage, 68.84, have walls of un-backed/bricks and earth bonded and only 8.03 percent have wooden walls. In contrast, the rural areas have only 5.44 percent of the walls in the standard category of backed bricks/blocks and stone with cement bonding while 34.62 percent of the walls are made of un-backed bricks with mud bonding. The highest percentage is of wooden category at 48.04 percent, the un-specified category of material, used, is 11.90 percent. Table 3.3 gives the details of construction material used in outer walls.

**TABLE: 3.3 MATERIAL USED IN OUTER WALLS BY RURAL/URBAN
1998 (PERCENTAGE)**

Construction Material	Total	Rural	Urban
All categories	100.00	100.00	100.00
Baked Bricks/Blocks/Stones	6.45	5.44	22.48
Unbaked Bricks/Earth Bond	36.66	34.62	68.84
Wood/Bamboo	45.65	48.04	8.03
Others	11.23	11.90	0.65

3.1.5 Construction Material-Roofs

The standard of construction of roofs significantly varies in rural and urban areas. Table 3.4 shows that in rural areas about 86 percent of the housing units have used baked bricks supported by girder or wooden log/bamboo while the percentage use of this material in urban area is 78.28 percent. On the contrary, in urban area 13.68 percent houses have roofs constructed with cement/iron sheets against 1.02 percent in rural areas. However, the use of RCC/RBC in the construction of roofs in urban area is fairly high at 7.17 percent as compared to 0.41 percent in rural areas.

TABLE: 3.4 MATERIAL USED IN ROOFS BY RURAL/URBAN-1998 (PERCENTAGE)

All categories	Total	Rural	Urban
All categories	100.00	100.00	100.00
RCC/RBC	0.81	0.41	7.17
Cement/Iron Sheet	1.78	1.02	13.68
Wood/Bamboo	85.34	85.79	78.28
Others	12.07	12.78	0.87

3.2 HOUSING FACILITIES

3.2.1 Source of Drinking Water

The easy access to potable/safe drinking water is one of the basic human needs. As per information gathered in 1998 Housing Census, the facility of piped water both inside and outside the houses in the district, is available to only 8.31 percent of the housing units. However, the wells, at 7 percent inside and 9 percent outside the houses are important source of drinking water in the district, both in rural and urban areas. The ponds are the most common source outside the houses which fulfil the demand of drinking water of 69 percent housing units in the district.

There is a vast difference between rural and urban areas regarding sources of availability of drinking water. In urban areas a little above 66 percent housing units receive piped water, with 57.55 percent inside the houses, in comparison to rural areas at 4.64 percent, with only 3.90 percent inside the houses. The rest of the houses have to rely on Wells,

Hand pumps, ponds and other sources. The percentage use of ponds is significantly higher in rural areas at 72.46 as against 10.53 in urban areas. It is the single largest source of drinking water outside the housing units both in rural and urban areas, indicating a short supply of safe drinking water in the district, however, the situation is relatively better in urban area; but still requires much improvement. Table 3.5 provide percentage of housing units by source of drinking water.

TABLE: 3.5 HOUSING UNITS PERCENTAGE BY SOURCE OF DRINKING WATER, BY RURAL/URBAN, 1998.

Source	Total	Rural	Urban
<u>Source of drinking water</u>			
All sources	100.00	100.00	100.00
<u>Inside</u>	<u>15.26</u>	<u>12.05</u>	<u>65.69</u>
Pipe (Nul)	7.10	3.90	57.55

Hand Pump	1.58	1.51	2.82
Well	8.81	9.03	5.21
Pond	68.76	72.46	10.53
Other	4.38	4.21	7.17

3.2.2 Source of Lighting

Electricity, as the most common source of lighting, is available to only 13.87 percent of the housing units in the district. The percentage is significantly higher in urban area at 84.58 in comparison to rural areas only at 9.37. In rural area, the use of kerosene oil as source of lighting is still very common as about 63 percent of the total housing units reported its use as against only 13.03 percent in urban area. Table 3.6 provides percentage of housing units by source of lighting.

TABLE: 3.6 PERCENTAGE OF HOUSING UNITS BY SOURCE OF LIGHTING RURAL/URBAN, 1998.

Source	Total	Rural	Urban
<u>Source of light</u>			
All sources	100.00	100.00	100.00

Kerosene Oil	60.01	62.99	13.03
Others	26.12	27.63	2.39

WELL
A TRADITIONAL SOURCE OF DRINKING WATER

3.2.3 Cooking Fuel Used

About 90 percent of the housing units in the district use wood/brush wood as fuel for cooking. Only 6 percent housing units use kerosene oil for cooking and less than 1 percent use gas and the remaining, about 4 percent, use other sources. The percentage of wood/brush wood is higher in urban areas at 96.20 as compared to 89.51 in rural areas.

The use of gas is very limited. Only less than 1 percent houses, both in urban and rural areas, use gas. While Kerosene Oil is used as cooking fuel by 5.88 percent housing units in rural areas as compared to 2.28 percent in urban areas. Table 3.7 provides percentage of housing units by source of cooking fuel.

TABLE 3.7 PERCENTAGE OF HOUSING UNITS BY SOURCE OF COOKING FUEL USED BY RURAL/URBAN, 1998.

Source	Total	Rural	Urban
<u>Cooking Fuel Used</u>			
All sources	100.00	100.00	100.00
Wood	89.91	89.51	96.20
Kerosene Oil	5.66	5.88	2.28
Gas	0.66	0.67	0.54
Others	3.77	3.94	0.98

3.2.4 Availability of Separate Kitchen, Bath room and Latrine

In modern living, availability of Kitchen, Bathroom and Latrine is among the basic necessities. According to 1998 census, about 28 percent of the housing units have the facility of kitchen, 23 percent of Bath room and about 14 percent of latrine as separate or shared in the district. In rural areas, about 15 percent housing units had separate kitchen, and above 14 percent separate bath room whereas 8 percent separate latrine. The situation is however much better in urban areas as above 26 percent of the housing units had separate kitchen, above 23 percent separate bath room and about 22 percent independent latrine. The percentage of shared facilities regarding kitchen, bath room and latrine is most significantly higher in urban areas at 62.65 percent, 57.22 and 49.51 percent respectively. Table 3.8 provides details of availability of housing facilities.

TABLE: 3.8 PERCENTAGE OF HOUSING UNITS BY KITCHEN, BATH ROOM AND LATRINE FACILITIES BY RURAL/URBAN, 1998.

Housing Facilities	Total	Rural	Urban
<u>Kitchen</u>			
All sources	100.00	100.00	100.00

Separate	8.80	7.99	21.50
Shared	5.19	2.38	49.51
None	86.01	89.63	28.99

3.2.5 Source of Information

The question about source of information was asked for the 1st time in the 1998 Census to assess the media coverage. Among the total households in the Kohlu district, 7.01 percent household have access to Television, 20.08 to Radio and 3.83 percent to Newspapers; implying that radio is the most common and accessible source of information in the district. In urban areas, maximum households 35.61 percent, have access to Radio as compared to 19.10 percent in rural areas. T.V. is the most powerful media, however, its coverage is limited to 33.88 percent households in urban as against 5.30 percent household in rural areas. The access to Newspapers is also higher in urban at 14.12 percent households compared to 3.18 percent households in rural areas. Table 3.9 provides the data regarding source of information.

Table 3.9 PERCENTAGE OF HOUSE HOLDS BY SOURCE OF INFORMATION AND RURAL/URBAN, 1998.

Area	Total Households	T.V.	Radio	Newspapers
All Areas	15400	7.01	20.08	3.83
Rural	14479	5.30	19.10	3.18
Urban	921	33.88	35.61	14.12

DEFINITIONS AND CONCEPTS

Urban Areas

All localities which were either metropolitan corporation, municipal corporation, municipal committee, town committee or cantonment at the time of the census, were treated as urban.

Household

A household means a group of persons living together who have collective arrangement for eating. A person living alone was also considered to constitute a household. The distinguishing characteristic of a household is its common cooking arrangement.

Housing Unit

A housing unit means a separate and independent place of abode, inhabited by one household and, if vacant, meant for habitation by one household. It does not necessarily mean a separate building. A building may have one or more housing units. Furthermore, any place not intended for habitation but occupied by a household at the time of census was also treated as a housing unit.

Room

A room is defined as a space in a housing unit having a roof and walls from roof to floor. This includes sleeping, dining, drawing, study, children's and servant's rooms but excludes kitchen, bathroom, latrine, store, balcony, porch and motor garage.

Age

Age is recorded as of the last birthday.

Marital Status

Marital status has been classified into never-married, married, widowed and divorced. Never-married applies to persons who have never been married. Married includes all persons who are at present married and living as husband and wife as well as those married persons living apart but having a living wife/husband. Those couples, whose marriage (Nikah) had been solemnized but giving away ceremony had not taken place, were also treated as married. Widowed applies to a person whose husband or wife was dead but who had not married again. Divorced applies to both divorcer and divorcee, if not remarried.

Religion

Religion is recorded and tabulated as informed by the respondents.

Literate

A person who can read a newspaper and write a simple letter, in any language, is treated as literate.

Field of Education

(a) General Education

It includes educational programmes of primary, middle, matriculation, intermediate and bachelor's degree in arts or science.

(b) Technical/Engineering

It includes engineering educational programmes in the fields of electrical, electronic, industrial, metallurgical, mining, mechanical, agricultural, forestry, chemical, petrochemical, aviation, nautical, etc. It also includes programmes in survey, drafting and designing, all types of engineering technician programmes, all types of trade, craft and industrial programmes. Architectural and town planning programmes are also included.

(c) Medicine/Tib

It includes educational programmes of medical diagnostic and treatment techniques, medicine and surgery, medical X-ray techniques, dentistry, pharmacy, etc.

(d) Health

It includes educational programmes of public health, nursing, mid-wifery and other health related auxiliary programmes.

(e) Commerce/Business Administration

It includes educational programmes of typing, shorthand, clerical, secretarial, operation of office machines, book keeping, accountancy, electric data processing, business administration, marketing and sales, financial management and investment analysis, public administration, institutional administration, personal administration and other commercial, business and public administration programmes.

(f) Teaching

It includes all educational programmes which enable the teachers to teach all types of subjects to all categories of students. It includes education science programmes.

(g) Agriculture/Forestry/Animal Husbandry

It includes educational programmes of agriculture, forestry and fishing including general agriculture, animal husbandry, horticulture and gardening, crop husbandry, agricultural technology, food sciences and technology, veterinary, medicine, fishery science and technology, etc.

(h) Law

It includes educational programmes in jurisprudence, history of law, international law, labour law and maritime law and other laws.

(i) Economically Active Population

The economically active population comprises the persons aged 10 years and above of either sex who are engaged in some work for pay or profit including un-paid family helpers as well as those not working but looking for work and laid off.

The Crude Activity Rate is measured as the percentage of economically active persons to the total population while the Refined Activity Rate is measured as the proportion of economically active persons among the population exposed to the risk of entering the economic life.

In collection of the data on economic activities "usual status" approach has been adopted as against the approach of labour force surveys, where data is usually collected on "current status" basis.

(j) Occupation

Occupation means the main job, profession, trade or kind/type of work usually performed by a person. In case of more than one occupation, the principal occupation is recorded. The principal occupation is that in which the person works most of the time.

(k) Industry

Industry means the activity of the organization, or business in which a person usually works.

Employment Status

(a) Self-employed

Self-employed is a person who operates his own farm, business, or industry or practices a profession but does not employ any hired help, paid either in cash or kind.

(b) Government employee

A Government employee is a person who works in any Government/Semi-Government Organization for pay.

(c) Private employee

A Private employee is a person who works, for pay, for person/farm/shop/firm/organization/office which is not run or managed by the Federal/Provincial/Local Government/Autonomous body.

(d) Employer

Employer means a person who operates his own farm, business or industry or practices a profession and who employs one or more persons for the purpose.

(e) Un-paid Family Helper

Un-paid family helper means a person who works, without pay or profit, on family farm, business or industry.

Migrant Population

The migrant population mean those who have moved out their residence from one administrative district to another administrative district. It excludes population who have moved within a district.

Disability

Disability refers to the physical and organic handicap of a person due to natural deformity or deficient functioning of any limb resulting from accident, disease, etc. For census purposes it refers to visible malfunctioning of any organ of the body. It includes blind, deaf and mute, crippled, mentally retarded and insane.

**PAKISTAN STANDARD CLASIFICATION OF OCCUPATIONS
FOR THE 1998 POPULATION CENSUS**

MAJOR GROUP 1- LEGISLATORS, SENIOR OFFICIALS AND MANAGERS

- 11 Legislators and Senior Officials
- 12 Corporate Managers
- 13 General Managers

MAJOR GROUP 2- PROFESSIONALS

- 21 Physical, Mathematical and Engineering Science Professionals
- 22 Life Science and Health Professionals
- 23 Teaching Professionals
- 24 Other Professionals

MAJOR GROUP 3- TECHNICIANS AND ASSOCIATE PROFESSIONALS

- 31 Physical and Engineering Science Associate Professionals
- 32 Life Science and Health Associate Professionals
- 33 Teaching Associate Professionals
- 34 Other Associate Professionals

MAJOR GROUP 4- CLERK

- 41 Office Clerk
- 42 Customer Services Clerks

MAJOR GROUP 5- SERVICE WORKERS AND SHOP AND MARKET SALES WORKERS

- 51 Personal and Protective Services Workers
- 52 Models, Salespersons and Demonstrators

Major Group 6- SKILLED AGRICULTURAL AND FISHERY WORKERS

- 61 Market-oriented skilled agricultural and Fishery Workers
- 62 Subsistence Agricultural and Fishery Workers

Major Group 7- CRAFT AND RELATED TRADES WORKERS

- 71 Extraction and building trades workers
- 72 Metal, Machinery and related trades workers
- 73 Precision, Handicraft, printing and related trades workers
- 74 Other Craft and Related Trades Workers

Major Group 8- PLANT AND MACHINE OPERATORS AND ASSEMBLERS

- 81 Stationary-plant and related operators
- 82 Machine operators and Assemblers
- 83 Drivers and mobile-plant operators

MAJOR GROUP 9- ELEMENTARY OCCUPATIONS

- 91 Sales and services elementary occupations
- 92 Agricultural, fishery and related labourers
- 93 Labourers in Mining, Construction, Manufacturing and Transport

MAJOR GROUP 0- WORKERS NOT CLASSIFIED BY OCCUPATION

- 01 Workers not classified by occupation

**PAKISTAN STANDARD CLASSIFICATION OF INDUSTRIES
FOR THE 1998 POPULATION CENSUS**

MAJOR DIVISION 1- AGRICULTURE, FORESTRY, HUNTING AND FISHING

- 11 Agricultural, Livestock and Hunting
- 12 Forestry and logging
- 13 Fishing

MAJOR DIVISION 2- MINING AND QUARRYING

- 21 Coal Mining
- 22 Crude Petroleum and Natural Gas Production
- 23 Metal Ore Mining
- 29 Other Mining

MAJOR DIVISION 3- MANUFACTURING

- 31 Manufacture of Food, Beverages and Tobacco
- 32 Textile, Wearing Apparel and Leather Industries
- 33 Manufacture of Wood and Wood Products including Furniture
- 34 Manufacture of Paper and Paper products, printing and Publishing
- 35 Manufacture of Chemicals and Chemical, Petroleum, Coal, Rubber and Plastic Product
- 36 Manufacture of Non-metallic Mineral products except Petroleum and Coal
- 37 Basic Metal Industries
- 38 Manufacture of Fabricated Metal Product, Machinery and Equipment
- 39 Other Manufacturing Industries and Handicrafts

MAJOR DIVISION 4- ELECTRICITY, GAS AND WATER

- 41 Electricity, Gas and Steam
- 42 Water Works and Supplies

MAJOR DIVISION 5- CONSTRUCTION

- 51 Building Construction and related activities
- 52 Construction, Repair, Maintenance of Streets, Roads, Highways and Bridges
- 53 Construction, Repair, Maintenance of Irrigation, Flood Control, Drainage, Reclamation and Hydro Electric Projects
- 54 Construction, Repair and Maintenance of Docks and Communications Projects
- 59 Construction of Projects n.e.c.

MAJOR DIVISION 6- WHOLESALE AND RETAIL TRADE AND RESTAURANTS AND HOTELS

- 61 Wholesale Trade
- 62 Retail Trade
- 63 Restaurants and Hotels
