PREFACE

The Fifth Population and Housing Census, initially due in March 1991, was conducted from 2-18 March 1998 throughout the country including Federally Administered Tribal Areas, Northern Areas and Azad Kashmir. During the first three days i.e., from 2nd to 4th March houselisting was carried out where in each house was physically numbered and registered as an inventory for conduct of the census from 5th to 18th March. The inventory served as a guideline for the supervisors besides ensuring complete coverage, during the census operation.

There were 3 separate questionnaires used for houselisting and collection of information on population and housing characteristics. Form-1 (Annex-A) was used for houselisting. Form-2 i.e., short form (Annex-B) was used for collection of information about all persons on core questions such as name, relationship with the head of the household, residential status, sex, age, marital status, nationality, religion, mother tongue, literacy, educational attainment and possession of national identity card, number of rooms, tenure, period when constructed, construction material of walls and roofs and source of drinking water-inside or outside, source of light, fuel used, type of kitchen, bathroom and toilet facilities and watching of TV and radio and reading of newspapers.

Form-2-A i.e., long form (Annex-C) was used for obtaining additional information about migration alongwith its reasons, field of education, economically active population, fertility, disability and inoculation of children against 5 diseases were asked on sample basis. About 8 percent single stage stratified sample was drawn with slightly more representation given to small provinces, districts and urban areas to make it a representative sample. Necessary definitions and concepts relating to the above mentioned questionnaires/forms are given at (Annex-D) for information of the readers.

The report mainly consists of three sections viz write up which carries general description of the district and some analysis of population and housing data, second section comprises tables while third section provides additional information about these sections in the form of annexures.

The write up section contains three main parts viz (i) general description about the district, (ii) broad analysis of population census data and (iii) broad analysis of housing census data. The general description covers location, boundary, area, geography, climate, rainfall, ethnicity, administrative set-up, agriculture, flora and fauna, health, industries, communication system, infra structure beside introducing the district. The broad analysis of population census data deal with population size, growth and distribution, other demographic and socio-economic characteristics.

The broad analysis of housing census data throw light on housing units/households, in terms of information on number of rooms, population density per housing unit and per room, tenure, period since constructed, construction material used on walls and roofs, source of drinking water, source of lighting, cooking fuel used in kitchen, availability of kitchen, toilet and bathroom facilities and assessment of media reach etc.

The report comprises 52 tables in all, 40 relate to population data, 12 to housing data. Of 52 tables 27 are based on complete count information while remaining on sample count information. Because of space problem the tables on occupation and industries are given in coded form. Therefore, after mentioning occupation and industries in coded form on the tables the detail occupational groups and industry divisions and district map are appended at Annex-E, F & G respectively.

Census taking was a gigantic task which involved the whole nation in one way or the other which is commendable as a team work. The role of Provincial Governments was very vital and with out their active cooperation, the operation would not have been successful. The meritorious services rendered by the field staff in addition to their own jobs, are also appreciable. The services rendered by the staff and officers of Federal Bureau of Statistics in training and data processing was helpful. I am personally indebted to the Federal Government who inculcated in me a sense of responsibility to conduct the census in March 1998, and releasing the data as early as possible for the benefits of all users.

The Armed Forces supported the Population and Housing Census work on hundred percent basis therefore, I extend my gratitude to their officers/staff involved in this operation.

I also thank the International Agencies like UNFPA, UNDP, UNICEF for their financial assistance in acquiring equipment & machinery and technical support in the form of consultancy services, training and study visits abroad.

Finally I thank the officers and staff members of the Population Census Organization for their relentless efforts to complete the census successfully.

PART - I
GENERAL DESCRIPTION OF THE DISTRICT

1 GENERAL DESCRIPTION OF THE DISTRICT

1.1 GEOGRAPHY.

1.1.1 Name, Location, Boundary and Area

Lasbela was notified as a district on 30th June, 1954. The district derives its name from 'LAS' signifying a plain and "Bela" its principal town. with "Uthal" as its headquarters.

The district Lasbela is situated on the southern coast of Balochistan between 24° 53' to 26° 42' north latitudes and 65° 15' and 67° 27' east longitudes. It is bounded on the north by Khuzdar district, on the east by Dadu, Malir and Karachi (West) districts of Sindh province, on the south by the Arabian sea and on the west by Gawadar and Awaran districts.

Total area of the district is 15153 square kilometers. The district is 16 to 295 feet high from the sea level.

The district consists of four sub-divisions namely Bela, Dureji, Hub, and Kanraj.

1.1.2 Physical Features and Topography

Topographically, Lasbela district can be divided into three parts, the north eastern mountains and hilly areas, the south western hilly area and the central plain.

More than half of the area of the district is occupied by the north eastern mountains and hills; these are the western slopes of the Kirthar mountains which lie along the extreme north eastern boundary of the district. From Kirther to west wards, the other important ranges are the Bhedu, the Hameling, the Lakhan, the Pub and the Moro. In between the ranges, important valleys are the winder valley, the Wirahab valley and the Hub valley.

The hills located in the extreme south west, in a narrow belt along the Arabian sea, are the southern slopes of Makran coastal range running in an east-west direction. These hills are locally known as the Taloiband and the Gurangatti.

The plain area lies in the central west of the district. The area is drained by the rivers and streams flowing from the hills of Moro and Pub ranges in the north and

east of the plain and Haro and Hala ranges lying close to the western boundary of the district. The local tradition says that in the remote past the valley was an inlet of the sea which is evident from its extreme flatness, alluvial formation and small elevation above the sea level.

Another feature of special interest along Lasbela coast are Chandra Gups or Chanra Kups (mud volcanoes). In persian, they are called "Daria cham" means the eye of the sea. In the south of the plain, a large marohy area is situated which is innundated by the sea through the Miani Har, an inlet of the sea.

1.1.3 Rivers and Streams

The main drainage of the district is carried out by the Porali river and its tributaries, the Winder and the Wirhab rivers. The Phor and the Hingol rivers rise from the hills of Awaran district and flow for a short distance in Lasbela before falling into the Arabian sea.

At Shah Lakhra, a dam has been constructed known as "Hub Dam," about 89 kilometers north of Shah Lakhra a branch of the Porali river, known as the Titian river, takes off and eventually flows into the Siranda Lake.

1.1.4 CLIMATE

The climate of the district normally remains hot in summer and moderate in winter but the coastal area of the district including Somiani, Hub and Gaddani remains more moderate and moist than the interior. The summer lasts from April to October with June as the hottest month. The winter extends from November to March, January being the coldest month while the climate remains moderate in February and March. The north-western wind (Gorich) blows from October to February and becomes particularly strong towards the end of the cold season while it becomes a burning hot during April and May and is known as Liwar. Annual rainfall is uncertain. Normally, most of the rain fall is received in summer, however, winter rainfall is received during December - March. Meteorological data recorded at Khuzdar district can be used for analytical purpose be-cause of similar climate. The annual mean maximum and minimum temperature remains around 17° C and 3° C in January and above 38° C and 24° C in June respectively. The total annual mean precipitation is above 243 milimeters while the relative humidity about 35 percent as appears for table 1.1.

1.1.5 Flora

The flora of the district consists of desolate shrubs. The area has a variety of bushes and trees. The common trees found are *kirri* (tamarix articulate), *Kand* or *Jand* (prosopis spicigera), *Wilayati kikar* mesquil (prosops glandulosa), acacia arabic (babal kikar), salvadora (pilo) and zizy phus (ber).

1.1.6 Fauna

The wild life includes, the ibex (wild goat), deer, reptiles (snakes) lizards etc, foxes, jackals, *sessees*, partridges, titers, sand grouses, houbaras, bustards (migratory), mallards, ducks (migratory) and pelicans (migratory) are found in the district. The tiger and cheeta have disappeared due to excessive hunting. Many varieties of fish are also caught off the coast.

1.2 AGRICULTURE AND RELATED SECTOR

1.2.1 Agriculture

The agriculture is the major sector of economy and majority of the population of the district particularly in the central and northern parts of the district is involved in

this field. The major crops grown in Rabi season are wheat, vegetable, fodder, rape seed and mustard. Crops grown in kharif season are rice, jowar, bajra, sesame, castor seed, mong, fruits, onion, chillies, fodder, guar seed and sugar cane.

1.2.2 Irrigation

The main sources of irrigation are tubewells, rainy flood water, karezes and canals. The potential for the development of underground water sources is there, but the cost of the installation of tubewells is very high. Due to scanty rainfall large area in the district remains uncultivated.

WHEAT CROP BELA

COCONUT FARM, UTHAL

1.2.3 Forestry

The terrain of the district is favourable for forestry, the rainfall is reasonable and the climate is good. Bushes are found abundantly in the district. The common trees found are *kirri, Kand* and *wilayati kikar*.

Forestry has much potential in Lasbela, but due to lack of water and technical know-how the sector has not been developed so far.

The reforestation projects have been executed in Bela, Lakhra and Hub. National and International NGOs are also involved in reforestation in the area. Various Government schemes are under consideration to develope commercial forestry in the district. In the private sector very limited commercial forestry is functioning at Bela and Lakhra.

1.2.4 Horticulture

The main fruits grown in the district are shown in the following table:-

1.2.5 Livestock

Livestock sector is the second largest sector of economy after agriculture. The nomadic population mostly residing in the northern parts of the district mainly dependents on the livestock sector.

Due to limited means of communication in some areas people depend on camels, horses, mules and oxen for draught and transportation.

The district has three veterinary hospitals at Bela, Hub and Uthal; In addition, there are 16 dispensaries, two Artificial insemination centres (AIC) at Bela and one Disease Investigation unit (DIU).

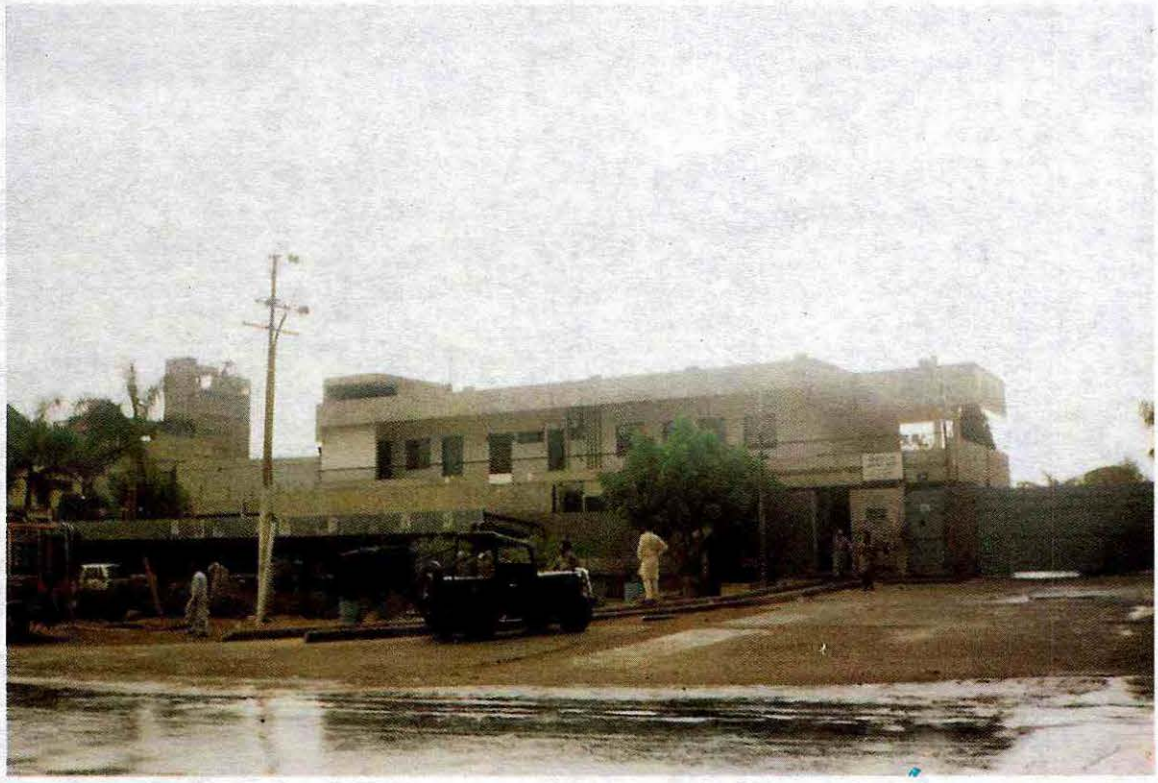
1.3 INDUSTRY AND TRADE

1.3.1 Industry

The major Industrial Estates in the district are Hub and Windor. More than 166 industrial units are functioning in the Industrial Estate of Hub, Winder and Uthal. Lasbela Industrial Estate Development Authority (LIEDA) is giving proper attention in providing technical know-how to establish the industrial units in the area. Ship breaking industries are also functioning at Gaddani.

The main industries are textile, auto parts, Uthal Electronic Cables and Chemicals, Ghee Mills, Plastics. The production of these industries not only fulfils the demand for these products in Pakistan but are also exported.

Small enterprises include Balochi embroidery, manufacturing of caps, carpets etc. Mostly men are employed in these enterprises.



GATRON INDUSTRY

SHIP BREAKING GADDANI

1.3.2 Mining

In Lasbela district, minerals found are shale, marble, limestone, serpentine, barite, basalt, quartzite, magnesium, building stone and red ocher.

1.3.3 Communication

Lasbela district has national highway and Provincial roads. Lasbela's major life line is the National Highway from Quetta to Karachi, a distance of some 689 kilometers, of which 215 kilometers runs through Lasbela. In total there is 322 kilometers of black topped road. The major part of the roads (1095 kilometers) is shingle roads. A road from Bela to Awaran is under construction. All parts of the district are accessible throughout the year. There is no link via railway and air. There is no radio or T.V Station in district Lasbela. However, every second house in the urban areas has a T.V set with Satellite dish. In the rural areas, upper and middle class people possess television. Telecommunication facilities are also available in all towns of the district. The Pakistan Telecommunication Company Limited (PTCL) has established a network of telephones in the district. Five VHF (very high frequency) Systems have been installed at Lakhra, Shah Noorani, Somiani, Wayaro and Oreru. Direct dialing facilities are available at Hub, Uthal and Bela towns.

The district has seven sub post offices and thirteen branch post offices functioning at Hub, seven at Winder, one at Uthal and four at Bela.

Electricity is provided by the KESC (Karachi Electric Supply Corporation). The only grid station in the district is located at Uthal. The Hub power project started in February 1997. This project when completed will supply power to industry; far-flung areas have no electricity. Gas is provided only in the industrial area of Hub.

1.3.4 Trade and Trade Centres

The Lasbela district has a great potential for both small and large scale trade. The small scale trade is Handicrafts including embroidery work on women's dresses, jackets and cotton chadars. On large scale, Export products of the district are plastic goods, leather items, textile, ready made garments and other goods. Hub is well known trading centre for many items. At present, 36 companies are enlisted in Karachi Stock Exchange to deal with 166 manufacturing units functioning at Hub, Winder and Uthal.

1.4 HISTORY, ETHNICITY/TRIBES AND CULTURE

1.4.1 History

The early history of Lasbela is obscure for the most part till the rise of the Aliani family of the Jamoot tribe in the middle of the eighteenth century, only a few facts are known about the early history of Lasbela district.

Alexander passed through Lasbela on his way back from India, and according to Sir Thomas Holdich, he left Patala in Sindh in the beginning of Sept. 326 B.C. After Alexander's death, one of his generals, Seleukas Nickator, became ruler of Central and Western Asia. The Sub-Continent and Lasbela were presumably included in his inheritance. In 305 B.C he crossed the Indus and was defeated by Chandragupta and obliged to cede Makran and several other provinces including Lasbela to him. For many centuries after this nothing can be traced of the history of Lasbela.

In the seventh century the ruler of Armanbel, (present town of Bela) was a "Buddhist samani descended from the agents of Rai Sahiras, the King of Hind, whom the Rai had elevated for his loyalty and devotion" Chach, who usurped the throne of Rai dynasty of Sindh marched to Bela in 636 A.D. with the view of demarcating the boundary of kirman and also perhaps of making himself sure of the allegiance of the outlying province. Chach was cordially received at Bela and well impressed with the show of loyalty, he passed on westward into Makran.

The district lies on the route followed by the Arab General, Muhammad-Bin-Qasim who entered Makran in the begining of the eighth century and Buddhism probably gave place to Islam about this time. On his way to Sindh, Muhammad-Bin-Qasim marched through Bela accompanied by Muhammad Haroon, the Governor of Makran who died later in Bela and his tomb is there. Muhammad-Bin-Qasim returned to Bela which seems to have used as a base for an advance into the interior of the country. The power of the Arabs lasted till towards the end of the tenth century.

Afterwards, the district appears to have come under the influence of the Sumras and Sammas of Sindh, who asserted their independence when the power of the Abbaside Caliphs declined. The Sumras gained a position of supremacy in the middle of the eleventh Century and its chiefs exercised sovereign authority in the Indus Delta area during the greater part of three centuries. They were eventually overthrown by the Sammas under Jam Umer in 1333 A.D. The Sammas held away till about 1523 AD, when they

were defeated and their power completely broken by Shah Hussain Arghun. The succeeding period is lost in obscurity but Chiefs of the Gujar, Runjha, Gunga and Burfat tribes which are still to be found in Lasbela are said to have exercised a semi-independent power previous to the rise of the Aliani family of the Jamoot tribe, to which the present Jam of Lasbela belongs. There is little record of any these Chiefs but the last of the Gunga chiefs were Jam Dinar and Jam Ibrahim.

Owing to quarrel over the division of certain plundered property, the head of his own tribe murdered Ibrahim. To avenge his death, his uncle Pahar Khan, Chief of the Burfat tribe attacked and nearly exterminated the Gungas in the vicinity of Uthal. Pahar Khan then ruled Bela and after him the Chiefship descended to Mir Izzat Khan and to his son. As the latter was minor, the authority was vested in Bibi Chaguli, his mother. But Jam Ali, Sardar of Jamoot tribe, applied to Muhabat Khan the Khan of Kalat, to assist him in taking Bela. Muhabat Khan dispatched the Akhund; Mulla Muhammad Hayat to Bela in command of a strong force of Brahuis and with the assistance of this force Jam Ali succeeded in establishing his authority. This took place in 1742-43. The half share of the revenues of Bela was made over to Jam Ali and Chief-ship of Lasbela has since remained in this family, who claim descent from one Abdul Manaf of the Qureshi tribe of Arabs.

Jam Ali Khan-I, surnamed Kathuria ruled until his death in 1766. His eldest son, Jam Ghulam Shah who died of smallpox at Kalat in 1776, succeeded him and his remains were afterwards removed to Bela and entered into Sanjarwala garden near Gondrani where his tomb can be seen to the present.

Jam Mir Ali Khan-I, the younger son of Jam Ali Khan Kathuria, succeeded to the Chief-ship in 1776, and married Bibi Sultan Khatun daughter of Mir Nasir Khan-I, and the Khan conferred upon him the other half of the revenue of Bela which had been realised by the Khan of Kalat since 1772. He died in 1818 and was succeeded by his son, Jam Ali Khan-II, who ruled for about twelve years and died about 1830. He was succeeded by Jam Mir Khan-II, who was by far the most prominent Jam of the Aliani family and proved himself a skilful Organizer during his long reign. Jam Mir Khan-II died in January 1888 leaving three sons, the elder Jam Ali Khan. The succession was disputed on the death of Jam Mir Khan, the later having disinherited Jam Ali Khan and appointed a younger son as successor. Pending a decision of the matter by the Government of India, Rai Bahadur Hittu Ram, C.I.E, was deputed to Bela to conduct the affairs of the state and held this post to the great benefit of the administration from the 11th February, 1888 to the 21st of January, 1889, on which date Haji Jam Ali Khan was installed at Bela by Sir

Robert Sandeman, Agent to the Governor General of Balochistan. Haji Jam Ali Khan agreed to conduct the administration of the state in accordance with the advice of the Agent to the Governor General Balochistan.

Sir Haji Jam Ali Khan, died in 1894 from an attack of pneumonia, and was succeeded by his son Jam Kamal Khan, who subsequently ruled over the state for 50 years. His successors, first his son, Jam Mir Ghulam Muhammad Khan and later his grand-son Jam Ghulam Qadir Khan continued to hold the post Masnad under the same conditions and with out any significant event until Pakistan came into existence on 14th August, 1947. At this time Lasbela along with Kharan and Kalat states acceded to Pakistan and later became part of the Balochistan Province.

1.4.2 Ethnicity and Tribes

The social set-up in the district is tribal. All the tribes other than Baloch and Brahui, Med, Khoja and Hindus who have settled in Lasbella are known as "Lasi". The principal Lasi tribes are only five in number. The Jamoot, Runjhas, Sheikh, Angaria and the Burra. Together they are called the Panjraj and constitute a tribal confederation, under each 'raj' are a large number of heterogeneous groups. The following table shows the combinations.

1.4.3 Food

The food consists principally of juari mixed with moong, wheat or bajra, or rice and butter milk and fish and dates along the coastal areas. Nowadays, the use of wheat is increasing in place of juari and bajra. Well-to-do families eat meat and fish as well. Mostly, the people take food twice a day but in towns the people take food three times a day. The use of tea and buttermilk is also very common.

1.4.4 Dress

The common people's dress consists of a cottonshirt with open sleeves, a pair of indigo blue cotton trousers, cotton turban, cotton chadar, a sadri (waist coat) and a pair of country-made leather shoes or sandals. The dress of womenslightly differs from that of men. It includes loose trousers, but the shirt is much longer and has silk embroidery. Women also wear silver ornaments.

1.4.5 Dwellings

In Lasbela district there are five towns: Bela, Uthal, Gaddani, Winder and Hub. In these urban areas, majority of the housing units is pacca having more than one room houses are being constructed with concrete blocks made of cement. The roofs in such buildings are constructed with RCC or iron girders.

1.4.6 Occupations

The people are predominantly engaged in the agriculture and livestock activities. However, some people are engaged in industries, public services, petty traders and informal sector.

The Hindus are mainly traders. They have also acquired land, by purchase or mortgage, which is cultivated by their tenants. They are all of the Arora Castes.

1.4.7 Culture, Customs and Traditions

In Lasbela district society is structured on kinship basis and each group is attached to a particular tradition, founded on different principles of social organization. Most of these have undergone a considerable transformation over time.

The political system is built upon two principals, hereditary authority and personal bonds of allegiance in which protection is exchanged for loyalty. Many elected representatives are tribal chiefs and Sardars.

The people of Lasbela co-operate and assist each other at the time of marriage by giving gifts and cash money to the groom. People also assist the family of a dead person by providing his family with food for three days till *soyum*. People also pay some money at the time of fatiha. Contributions are made in cash and kind, depending on the person's financial abilities.

The majority of the people of the area are Sunni. The religious leaders are the most influentialpersons in the rural areas.

The shrines of Mai Goudrani and Shah Bilawal are very famous in the area. People visit them with solemnity. A fair is held at Shah Bilawal on the 11th of Ramzan every year. Other important shrines and places where fairs are held are Pir Boher and Pir Hassan.

There are two main systems of conflict resolution in the district; one is official, The government system functions through Civil and Qazi courts, the other is traditional system which is based on the traditional *biradri* system.

Among the Lasis, marriage generally takes place when the boy is about 17 and the girls are about 12 years old. Among the Meds, children between 14 and 15 years of age are married. The parents arrange marriages. The marriage date is fixed with the consent of girl's parents. Certain social ceremonies, are performed. On the marriage day, the bridegroom, with his friends and relatives, proceeds to the bride's house or at the wedding place. They are entertained there at the expense of the bridegroom's parents and the nikah is performed. The bridegroom presents a dress to the bride and her parents present her with a dowry (jahez) consisting of a few dresses and articles of bedding and household furniture. They also present a suit to the bridegroom.

The Lasis do not pay a bride price, but other ethnic groups do. The system of exchange of girls for marriage is also prevalent. Divorce is rare among the Lasis, but not uncommon among the Meds, and is usually given by a husband for reasons such as infidelity or disagreement with the wife.

The Lasis do not allow any share of inheritance to a daughter. A woman who becomes a widow receives the share to which the Islam (Shariat) entitles her and also her deferred dower. Among the Meds, a widow is only entitled to her lab or bride price and the wedding presents given to her by her parents.

1.5 ADMINISTRATIVE SET UP.

1.5.1 District Administration

The district is under the General charge of the Deputy Commissioner who combines the functions of a District Magistrate as well as Collector. He is also responsible for the co-ordination of the functions of all nation-building departments in the district for administration purposes; Lasbela district is divided into following sub-divisions, tehsils and sub-tehsils.

	Name of Sub-Division	Tehsils/Sub-Tehsils
1.	Bela	1. Bela Tehsil
		2. Uthal Tehsil
		3. Lakhra Tehsil

1.5.2 Police Department

The Deputy Commissioner is also ex-officio member (in most cases head) of almost all the important committees and forums in the district.

For maintenance of law and order in the district, Lasbela is divided into two areas: "A" and "B". Hub, Bela and Uthal areas are under the control of police department and are as such called "A" area while rural areas, known as "B" areas are controlled by the levies. They are under the control of the Assistant Commissioners and Tehsildars. Levy ranks are Sepahi, Hawaldar, Dafeedar, Jameedar and Risaldar. In the tribal system, levies is an effective force to maintain law and order in the far-flung areas.

The overall law and order situation is good in the district however, over time the number of crimes is increasing. Law and order situation in Lasbela district is supervised by a Superintendent of Police (SP).

1.5.3 Judicial System

Justice is administered through regular as well as through Qazi courts. Qazi Adalat (Court) is functioning at Uthal and the Civil Court resides at Hub. There is no Court at Bela town.

1.5.4 Revenue System

Over all Lasbela is one of the best districts of Balochistan in respect of revenue collection. Town committee Hub receives more than 150 million rupees in octroi, which is the highest revenue of a town committee. Bela and Uthal have limited income on the other side. Provincial government is responsible for the collection of property tax and land revenue.

BROAD ANALYSIS OF POPULATION CENSUS DATA

2 BROAD ANALYSIS OF POPULATION CENSUS DATA

2.1 POPULATION SIZE, GROWTH AND DISTRIBUTION.

2.1.1 Population Size and Growth

The Population of Lasbela district, is 312.70 thousands in 1998 as compared to 188.14 thousands in 1981, recording an increase of 66.21 percent during 17 years i.e. 1981-98. The equal increase of around 50 percent was observed during intercensal periods 1972-81 and 1961-72. The increase during 1951-61 was much less about 22 percent. Over all, the population of the district has increased quite rapidly showing substantial increase of 358.57 percent during the last 47 years i.e. 1951-98. Which is more than four times.

The average annual growth rate of Population in the district has substantially declined to 3.03 percent during intercensal period 1981-98 as against 4.93 percent during 1972-81 and 3.59 percent in 1961-72. If the population of the district keep up growing at an average annual growth rate of 3.03 percent it will double in about 23 years time.

Table: 2.1 Shows the population and intercensal increase since 1951.

2.2 SEX, AGE AND MARITAL STATUS

2.2.1 Sex Ratio

Sex ratio is defined as the " number of males per hundred females ". The sex ratio in Lesbala district has emerged at 115.32 in 1998. It is higher in urban at 123.12 as against 111.00 in rural areas.

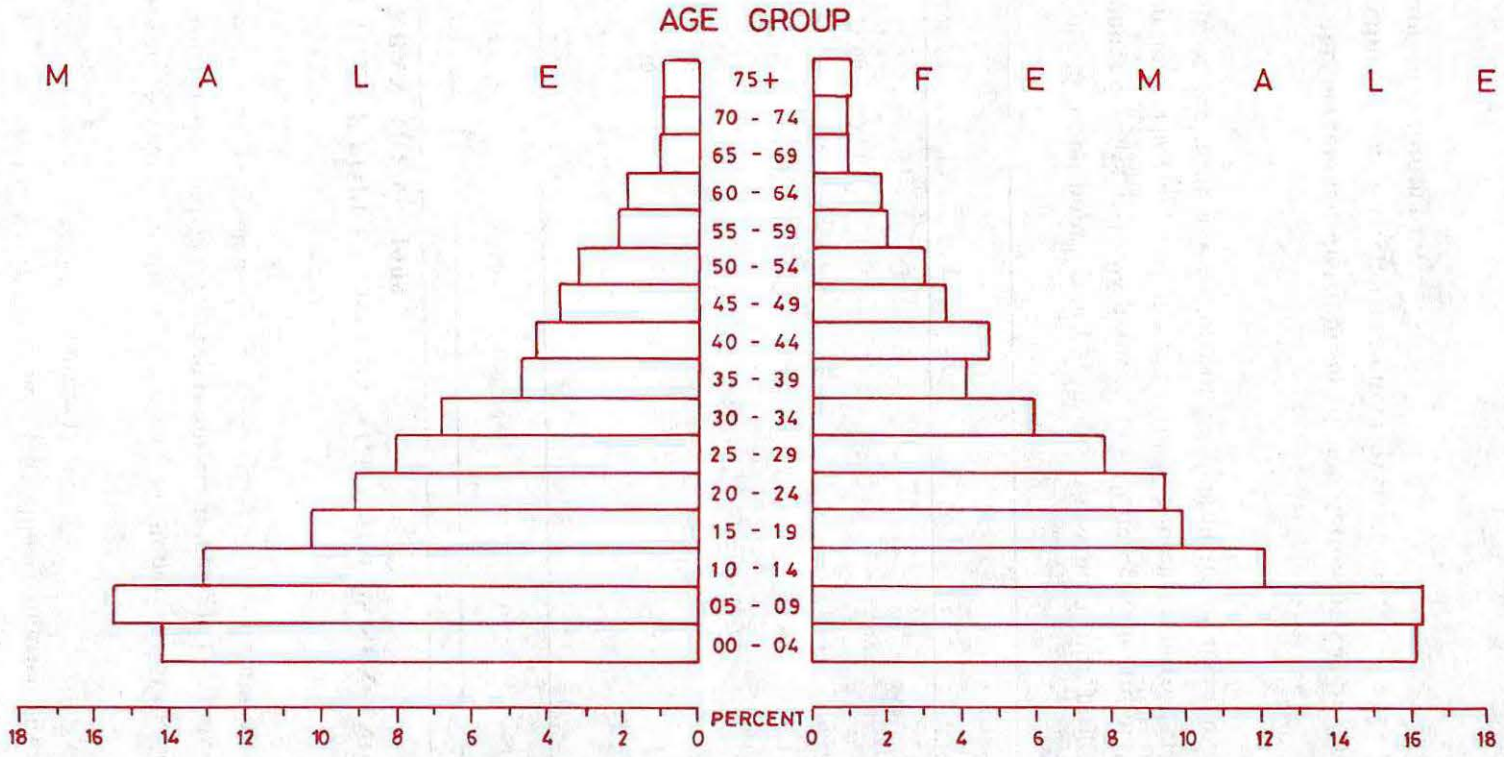
The ratio varies significantly at various age brackets. It rises sharply from 101.56 at ages 00-04 and reaches 125.69 at 10-14 age group and then declines gradually upto 112.39 at ages 20-24 thereafter it reflects an irregular trend at various age brackets and touches the peak. 132.21 at age group 30-34 start declining to the lowest 78.18 at age group 60-64 and after showing increase at 117.14 at 65-69 again declined upto 101.47 at advanced ages of 75 +. Un-even distribution of population by sex and age may be the impact of age misreporting or under reporting of females by the respondents or lack of probing about their ages during enumeration.

2.2.2 Age Structure

The age structure of the district indicates that the population below 15 years, is 43.61 percent: including 2.08 percent infants. The population of working age groups (15- 64 years), has emerged at 53.42 percent with an age dependency ratio of 87.21 percent.

Fig : 2.4

POPULATION PYRAMID OF LASBELA DISTRICT, 1998



The age dependency ratio is higher in rural areas at 90.12 percent as compared to the over all ratio in the district as well as in urban areas at 82.45 percent. It is higher for females at 90.58 as compared to 84.38 for males, particularly in urban areas it is significantly higher at 91.43 in contrast to 75.75 percent.

The adult population, 18 years and above comprises 51.90 percent of the total population (52.45 percent among males and 51.27 percent among females). The percentage of population eligible to vote, 21 years and above, is 43.02. The population by important age groups is given in table 2.4.

The district has a broad based population pyramid, showing a high proportion of younger population, under 5 years at 15.08 percent, (14.19 percent among males and 16.11 percent among females). The shape of the pyramid is becoming narrower at advanced age groups by virtue of declining age factor.Fig.2.4 demonstrates the age sex structure in the district.

High distortion in the percentage distribution of population at various age brackets may be the impact, either of age misreporting under/over statement of ages by respondents during enumeration in recording the ages.

2.2.3 Marital Status

All individuals aged 15 years and above enumerated in the 1998 Population Census were classified according to their marital status; namely, 'married' 'never mar-

ried' 'widowed' and 'divorced'. Out of them 29.38 percent are never married, 64.73 currently married, 5.65 widowed and a little percentage, 0.24 reported as divorced. The never married amongst males are 35.40 percent as compared to 22.23 percent amongst females. It appears that trend of early marriages has declined over the time since nearly thirty percent of the Population aged 15 years and above has been reported as never married in the district. This fact is also supported by mean age at marriage which is 20.89 years for females as against 25.15 years for males.

2.2.4 Females of Reproductive Ages by Marital Status

Of the total female population in the district, in 1998 Census 45.58 percent is in the reproductive ages, (15 - 49 years), the percentage is little higher in urban areas at 46.19 as against 45.24 in rural areas. Among the females in reproductive ages, 26.21 percent are never married, 70.67 percent currently married, 0.03 percent widowed and only 0.34 percent divorced.

Among the ever married women of reproductive ages 10.90 percent had reported no birth while 12.22 percent 1 child, 13.11 percent 2 children,12.09 percent 3 children and 11.79 percent 4 children. However, 39.90 percent of the ever married women reported 5 or more children.

2.2.5 Disabled Persons

The disabled persons,in the district are 3091 in all, which constitute 0.99 percent of its total population. Among the disabled persons, 61.02 percent are males against 38.98 percent females. The percentage of crippled among the total disabled persons is the highest at 36.65, (31.28 percent among males and 45.06 percent among females), followed by blind 13.13, mentaly retarted 8.38 and insane 5.79 percent. The percentage of Deaf and Mute is 5.37 while 7.60 percent of the total disabled population suffered with more than one disability. However, 23.07 percent have reported some other unspecified categories of disability

2.3 LITERACY AND EDUCATIONAL ATTAINMENT

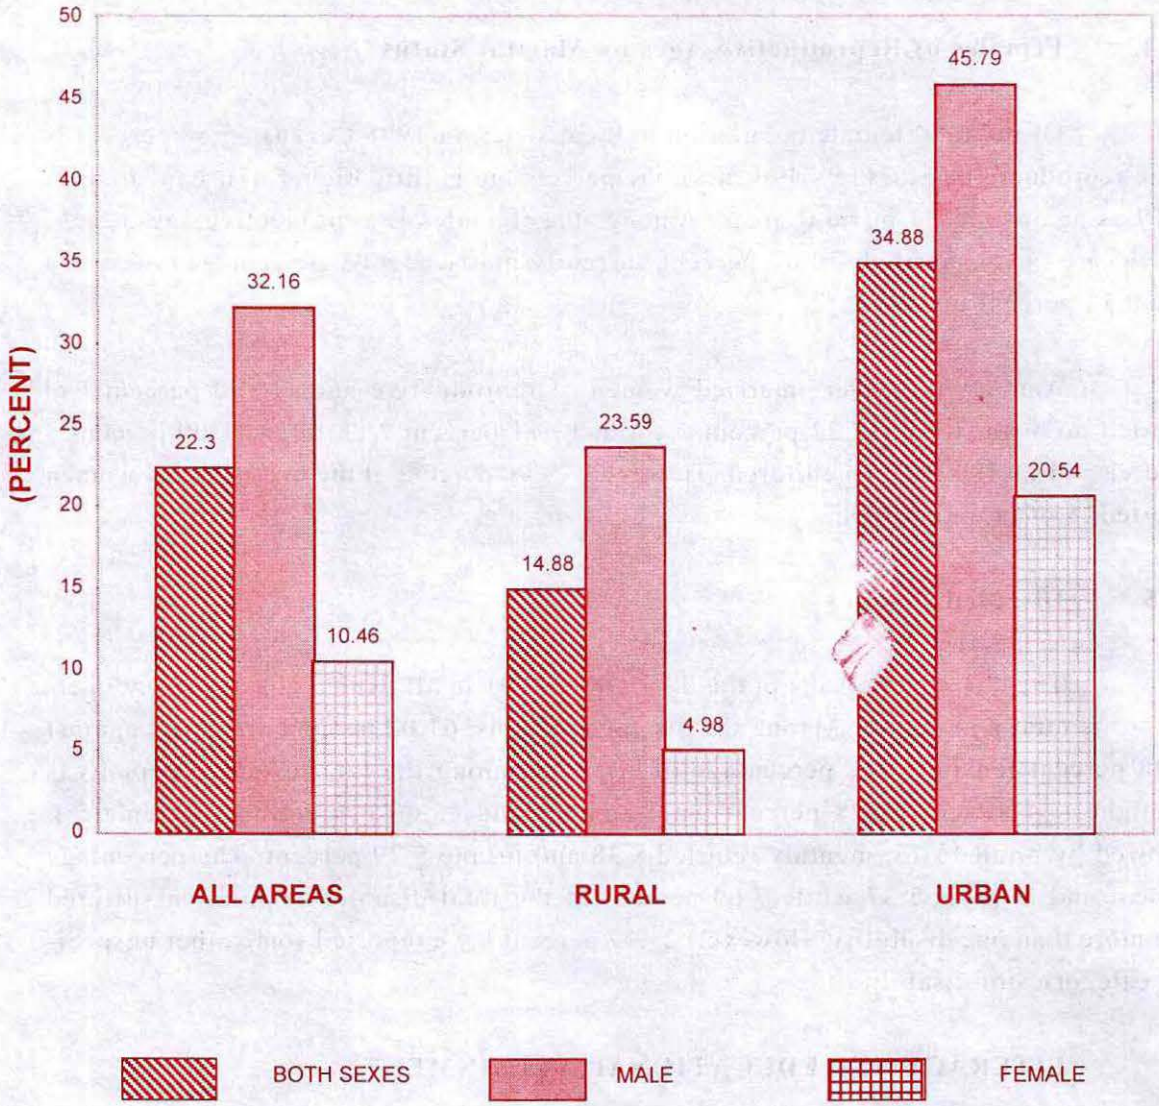
2.3.1 Literacy

Literacy, in 1998 Census is defined as the "ability to read a newspaper or a similar statement and write a simple letter in any language". It is measured in terms of " literacy ratio"; computed as ratio of literate persons among the population aged 10 years and above.

Fig : 2.5

LASBELA DISTRICT

LITERACY RATIO, 1998



Literacy ratio in Lasbela district has emerged at 22.30 percent in 1998. It varies significantly for males at 32.16 percent in contrast to females at 10.46 percent.

TABLE 2.5 : LITERACY RATIOS BY SEX AND RURAL/URBAN AREAS, 1998

Area	Both sexes	Male	Female
All Areas	22.30	32.16	10.46
Rural	14.88	23.59	4.98
Urban	34.88	45.79	20.54

A high disparity appears in the literacy level by area and gender. The literacy ratio in urban areas is at 34.88 percent which is more than double than in rural areas at 14.88 percent. A significant sex differential also exists in favour of males, both in urban and rural areas. The male literacy level is more than double to that of females in urban areas and nearly five time in rural areas. However, the gap between two ratios is wider at about 26 percentage points in urban areas in comparison to 19 percentage points in rural areas. Figure 2.5 illuminates the literacy ratios by sex and area.

2.3.2 Educational Attainment

A person, aged 10 year and above, is treated as an educated if he attains any educational level. The educated persons in the district are only 21.82 percent including those below primary; the remaining 78.18 percent either attained no educational level or have never attended any educational institution. A large variation exists in the ratio of educated persons by sex and area. The percentage of educated males is 31.69 and of females 10.00. It is 34.59 percent for urban as against 14.30 for rural areas. Table 2.6 shows the ratios of educated persons by area and sex.

TABLE 2.6 : PERCENTAGE OF EDUCATED PERSONS BY SEX AND RURAL/URBAN AREAS, 1998

All Areas	21.82	31.69	10.00
Rural	14.30	22.98	4.45
Urban	34.59	45.52	20.20

2.3.3 Enrolment Ratio

The enrolment ratio, of the district is measured as percentage of students to population of ages 5-24 years, which is 19.79 percent. It is higher for males i.e. 26.54 percent as compared to 11.95 percent for females. The enrolment ratio is higher in urban areas at 35.37 percent as against 10.45 percent in rural areas. A significant difference appears between male and female enrolment ratios both in rural and urban areas. The ratio of male enrolment is more than four times to that of females in rural areas while this difference is a little more than one and half times in urban areas. Table 2.7 shows to enrolment ratios.

TABLE 2.7 : ENROLMENT RATIO BY SEX AND RURAL/URBAN AREAS 1998

Area	Both Sexes	Male	Female
All Areas	19.79	26.54	11.95
Rural	10.45	16.35	3.80
Urban	35.37	42.89	26.17

2.3.4 Level of Education

Of the total educated persons in the district,27.85 percent have passed primary, 16.81 percent middle, and 15.86 percent matriculation. After matriculation, the percentage falls to 3.83 for intermediate, 2.09 for graduates and 0.80 for post graduates. In addition, 0.34 percent are diploma/ certificate holders and 2.35 percent all others. However, 30.08 percent dropped out before attaining the primary level.

2.4 MIGRATION

2.4.1 Migration

Migration data covers movement of population in terms of shifting the residence from one district to another in the same province and from one province to another. It does not cover persons who changed their place of residence within their own district.

2.4.2 Life Time Migrants

The total life time in-migrants in the district are 40034 (12.80 percent of the total population). The male and female life time in-migrants are 58.43 and 41.57 percent respectively. The persons who have migrated into the district during the last 5 years i.e.

after March, 1993, are 36.47 percent, while 20.74 percent had migrated earlier to 5 years but after 1988. The remaining 32.78 percent have migrated in, 10 years earlier i.e before March 1988.

The majority of life time in-migrants 64.53 percent, moved with head, 12.99 percent migrated for business 9.25 percent due to employment/transfer and 1.56 percent migrated into the district as a result of marriage and 0.06 percent returned home and only 1.64 percent migrated for study. However, 9.96 percent migrated due to some other reasons.

Majority of inmigrants i.e., 55.50 percent belong to the Balochistan while 33.01 percent migrated from other provinces. A little batch of 0.70 percent repatriated to home from other countries while 10.02 percent had not reported their place of previous residence.

2.5 ECONOMIC CHARACTERISTICS

2.5.1 Economically Active Population

Economically active population comprises the persons aged 10 years and above of either sex who are engaged in some work for pay or profit including unpaid family helpers as well as the un-employed; not working but looking for work and laid off during the reference period.

Economically active class among the population aged 10 years and above comprises 85270 persons (97.58 percent males and 2.42 percent females). It constitutes 27.27 percent of the total population in 1998 which is termed as the crude participation or activity rate; the remaining, 72.73 percent economically inactive population comprises 30.95 percent children below 10 years age, 31.42 percent domestic workers. In addition there are 5.33 percent students and 5.03 percent all other categories. Table 2.9 provides the percentages of population by economic category.

TABLE 2.9 : PERCENTAGE OF POPULATION BY ECONOMIC CATEGORY

Economic Category	All Areas			Rural			Urban		
	Both Sexes	Male	Female	Both Sexes	Male	Female	Both Sexes	Male	Female
Economically active population	27.27	49.68	1.42	28.08	51.90	1.65	25.88	46.07	1.01
Economically inactive population	72.73	50.32	98.58	71.92	48.10	98.35	74.12	53.93	98.99
Children below 10 years	30.95	29.69	32.40	31.13	30.37	31.97	30.64	28.59	33.17

All others	5.03	9.30	0.11	5.39	10.14	0.12	4.41	7.92	0.09
Refined Activity Rate	39.49	70.67	2.10	40.78	74.54	2.42	37.31	64.51	1.52
Un-employment Rate	27.24	27.88	1.60	28.25	29.02	1.36	25.36	25.77	2.29

The participation or activity rate measured as percentage of the economically active persons to the total population is termed as crude activity rate whareas the ratio of economically active persons to the population aged 10 years and above is termed as refined activity rate. The crude activity rate in the district is worked out as 27.27 percent while the refined activity rate is 39.49 percent. A high variation exists between the over all male and female activity rates at 70.67 and 2.10 respectively.

The activity rate is fairly high in rural areas at 40.78 percent as compared to 37.31 percent in urban areas. Similarly, the activity rates in respect of both males and females are significantly higher in rural areas than the corresponding rates in urban areas.

A vast sex differential of 73.12 and 62.99 percentage points in the activity rates exists in favour of males respectively in rural and urban areas. The low participation of females in the economic activity can be attributed either to their engagement in housekeeping activities or to the cultural milieu to some extent however, their role as unpaid family helper in farming, livestock raising and other economic activities cannot be ignored.

2.5.2 Un-Employment

The un-employment rate is measured as a percentage of the un-employed persons including those; not working but looking for work and laid off among the economically active population. The un-employment rate in Lesbala district is computed at 27.24 percent. The un-employment rate deviates significantly at 27.88 percent for males as campared to 1.60 percent for females. The un-employment rates are higher in rural areas

as compared to urban areas. Sex differential is significantly higher in favour of males both in rural and urban areas at 27.66 and 23.48 percentage points respectively.Table 2.9 shows the un employment rates.

2.5.3 Employed Population by Occupation

Among the employed class in the district, the highest percentage 43.93 belongs to Major Occupation Group-6 "Skilled Agricultural and Fishery Workers" followed by Group-9 "Elementry Occupations" and group-5 "Service Workers and Shop Market Sales Workers" comprising 33.61 and 8.64 percent respectively. The next higher.is Group-8 "Plant and Machine Operators and Assemblers" sharing 3.37 percent in the total employed population. The remaining 10.46 percent are in other occupational Groups. The male occupants follow almost similar pattern. However, the majority of females is associated with Group-7 "Craft and related Trades Workers" at 42.86 percent share followed by Group-6 at 21.36 percent and then Group-9 at 13.88 percent and finally Group-2 "Professionals" sharing 8.81 percent.

The pattern of occupational status varies in rural and urban. However, in rural areas it is similar to the overall pattern of the district as the maximum share is that of Group-6 at 62.81 percent followed by group-9 at 22.06 percent and Group-5 at 5.01 percent while Group-7 is at 2.53 percent. In urban areas, the pattern differs from the overall pattern except Group-8 at 5.16 percent with maximum share of 54.12 by Group-9 followed by group-5 at 15.13 and group-6 at 10.26 percent.

The sex differential regarding occupational status is quite visible within and across the rural/urban boundaries with varying degree of percentage share and category. The majority of males and females is associated with Group-9, and Group-7 respectively.

2.5.4 Employed Population by Industry

The majority of the employed Population in the district is associated with the Major Industrial Division-1."Agriculture, Forestry. Hunting and Fishing" with 35.39 percent share followed by Division-9 "Community Social and Personal Services" comprising 19.45 percent. Next comes the Division-5 " Construction" and Division-4 " Eletricity, Gas and Steam" contributing 12.57 and 11.83 percent respectively. The other industrial Divisions share 20.76 percent.

The male employed population follows a similar Industrial pattern. However, the majority of females is associated with Division-3 with 43.60 percent share followed by Division-1 at 20.92 percent, Division-9 sharing 19.19 and Division-6 at 5.81 percent.

The rural empolyed population follow almost similar industrial pattern compared to over all pattern in the district. However Division-1 shares the maximum at 48.63 percent followed by Division-4. Division-9 and Division-5. On the contrary, in urban areas the pattern is entirely changed, except with Division-2. The maximum share is that of Division-9 at 25.76 followed by Division-5 and Division-0 with 22.79 and 15.16 percent shares respectively.

A sharp contrast exists between employed males and females by industrial classification within and across the rural/urban boundries. The majority of females is engaged in Industrial Division-9 in rural areas at 54.84 percent and Industrial Group-9 at 56.34 percent shares in contrast to males only at 0.48 and 25.04 percent shares in the respective division and areas. However, the employed males share maximum at 49.52 percent in Division-1 in rural areas as compared to 25.04 percent in Industrial Division-9 in urban areas.

2.5.5 Employed Population by Employment Status

The percentage of employed population to the population aged 10 years and above in the district is 28.74. Of this 59.68 percent is self-emploed, 33.76 percent working as employee (Government, autonomous and Private) and 5.20 percent as unpaid family helper and only 1.36 percent as employer. Table 2.10 gives percentage of population by employment status.

The percentage of employed population by employment status varies significantly in rural and urban areas. In rural areas the majority, 73.22 percent is self employed followed by 10.22 percent, Employee (Govt.) and 7.54 percent Employee (Private) and 6.79 percent un-paid family helper. On the other hand, in urban areas 38.18 percent are Employee (Private) and 35.55 percent Self employed compared to 19.62 percent Employee (Govt.) and 2.00 percent unpaid family helper.

A significant sex differential is reflected regarding employment status in general as well as both in rural and urban areas. It is however, common that majority of both, the males and females, is associated with the self-employed category but with varying percentage share.

2.6 IMMUNIZATION

The question about immunization has been included in the 1998 Population Census for the first time to evaluate the vaccination programme launched by the Govt. from time to time. It is accounted for that 43.58 percent of the children under 10 years age have been reported in 1998 census as vaccinated while 24.39 percent as not vaccinated leaving behind 32.03 percent, the status of which, is as not known. The percentage of vaccinated male and female babies among the children below 10 years varies at 21.94 for males and 21.63 for females. The percentage of vaccination done in urban areas is fairly higher at 58.95 as against 34.72 in rural areas. Similarly, for male and female children, the percentage of vaccination is higher in urban areas as compared to that in rural areas. The high percentage of non response regarding vaccination i.e. 32.03, is indicative of careless attitude of parents about the health of their kids or the poor quality of interviewing/probing by the enumerators in this regard. Table 2.11 gives detail of immunization.

2.7 National Identity Card

The question about National Identity Card was asked in the 1998 population census for the first time to see the coverage of I.D.Cards. The question about NIC was asked from population aged 18 years and above. According to the response to the question, it was found that 64.34 percent of the population aged 18 years and above had obtained NIC; (72.23 percent among males and 55.03 percent among females).

Variation by area shows that,66.20 percent of urban population have obtained NIC as compared to 63.24 percent in rural. The coverage is also higher for males at 70.55 and 74.82 percent in rural as well as urban areas in contrast to the corresponding percentage for females at 55.22 and 54.67 in rural areas. Table 2.12 shows necessary details by sex and area.

PART - III
BROAD ANALYSIS OF HOUSING CENSUS DATA

3 BROAD ANALYSIS OF HOUSING CENSUS DATA

3.1 Type of Housing Stock

3.1.1 Level of Congestion-persons and Rooms

Seventy two percent of the housing units in the Lasbela district are single room houses. The percentage of single room houses is 30 percent higher in rural areas in comparison to that in urban areas. On the contrary, the percentage of housing units with 2 to 4 rooms is more than two and a half in urban areas at 45.12 percent as against 17.30 percent in rural areas. Similarly, the percentage position of houses with 5 or more rooms is above three times in urban as compared to that in rural areas. The number of rooms per housing unit is also higher in urban areas at 1.9 as against 1.3 in rural areas. However, the level of congestion (persons per room) is slightly higher in rural areas at 4.5 in contrast to 3.8 in urban. The level of congestion in terms of persons per housing unit is however higher in urban areas at 7.3 in contrast to 5.8 in rural areas requiring construction of more housing units in urban with additional rooms to reduce the level of congestion. Table 3.1 gives the indices of congestion in 1998 census.

TABLE 3.1 : INDICES OF CONGESTION IN 1998

Congestion	All Areas	Rural	Urban
Persons per Housing Unit	6.2	5.8	7.3
Persons per room	4.1	4.5	3.8
Rooms per Housing Unit	1.5	1.3	1.9
Housing Units with one room (percentage)	72.03	81.66	50.54
Housing Units with 2-4 rooms (percentage)	25.91	17.30	45.12
Housing Units with 5 rooms and more (percentage)	2.06	1.04	4.34

3.1.2 Nature of Tenure

There were 49171 housing units in the Lasbela district in 1998 census, 33966 (69.08 percent) in rural areas and 15205 (30.92 percent) in urban areas. As classified by tenure, 90.41 percent of the total housing units were owned. The percentage of ownership in rural areas was significantly higher at 97.54 as against 74.48 in urban areas. The percentage of rented housing units in urban is fairly higher than that in rural areas. Similarly, in urban areas 10.61 percent housing units were rent free as compared to the corresponding percentage of 1.98 in rural areas. Table 3.2 provides the data by nature of tenure.

TABLE 3.2 : NATURE OF TENURE BY RURAL/URBAN 1998

Rented	4.94	0.48	14.90
Rent Free	4.65	1.98	10.61

3.1.3 Period of Construction

Of the total owned housing units (44457) in the district, 51.88 percent, were built more then 10 years earlier, 28.15 percent during the last 5-10 years, 19.41 percent during the last five years and only 0.56 percent houses were found under construction. The percentage of houses constructed in rural areas before 10 years was significantly higher at 53.72 as compared to that in urban area at 46.47. The percentage of houses constructed during last 5-10 years was also slightly higher in rural at 28.55 as against 26.97 in urban areas. In the later periods i.e less than five years and under construction the percentage in urban areas are higher.

3.1.4 Construction Material - Outer Walls

There is marked variation in the qualitative indices of construction between urban and rural areas. In urban areas 51.91 percent of the housing units have the standard pucca walls made of baked bricks/blocks and stones with cement bonding; a little more than one fifth have walls of un-baked bricks with earth bonding and about 24 percent have wooden walls while other categories are 3.21 percent. In contrast, the rural areas have about 11 percent of the walls in the standard category of baked bricks/ blocks and stone with cement bonding and around two third of walls are made of unbaked bricks with mud bonding. The wooden category is about 26 percent and the unspecified category of material used is about 5 percent. Table 3.3 gives details of construction material used in the outer walls.

TABLE 3.3 : MATERIAL USED IN OUTER WALLS BY RURAL/URBAN 1998 (PERCENTAGE)

Others	4.15	4.58	3.21

3.1.5 Construction Material-Roofs

The construction pattern of roofs significantly differs in rural and urban areas as reflected from table 3.4. As regards, category-wise construction, above 80 percent of the housing units in rural and 43 percent in urban areas have used baked bricks supported by girder or wooden log/bamboo in the construction of roofs. However, in urban areas more than 20 percent houses have used RCC/RBC in the construction of roofs. The use of this category in rural areas is nearly 2 percent . The use of cement/iron sheets is 31 percent in urban areas as against 8 percent in rural areas. The use of unspecified material in the construction of roofs is relatively higher at about 10 percent in rural areas as compared to about 5 percent in urban areas.

3.2 HOUSING FACILITIES

3.2.1 Source of Drinking Water

The easy access to potable/safe drinking water is one of the basic human needs. As per information gathered in 1998 Housing Census, the facility of piped water both inside and outside the houses is available to 20.64 percent of the housing units in the district. The hand pump, well and pond are other common sources of drinking water both in urban and rural areas.

In urban areas 49.36 percent housing units get piped water, with 36.86 percent inside the houses, in comparison to rural areas at 7.77 percent with 2.11 percent inside the houses. Two important sources of drinking water both inside and outside the houses are hand pump and well which fulfill the need of 51.18 percent housing units in rural and about 20.46 percent houses in urban area. The use of other sources is higher in rural at 24.07 percent as against 23.83 percent in urban areas. However, the pond is the single largest source of drinking water outside the houses which is used by more than 16 percent rural and 6.35 percent urban housing units.

3.2.2 Source of Lighting

Electricity as an important source of lighting, is available to above 29 percent of the housing units in the district, the percentage in urban areas is significantly higher at 68.68 in comparison to rural areas at 11.11. In rural areas above 87 percent of the housing units still use kerosene oil as source of lighting as against 28.07 percent in urban areas. The use of other sources for lighting is also higher in urban at 3.25 percent in contrast to 1.68 percent in rural areas. Table 3.6 provides percentage of housing units by source of lighting.

Others	2.17	1.68	3.25

3.2.3 Cooking Fuel Used

More than 88 percent of the housing units in the district use wood/brush wood as fuel for cooking, the percentage of which is still higher in rural areas at 95.20 percent as compared to 74.62 percent in urban areas. The use of gas is 15.64 percent in urban houses as against only 0.33 percent in rural areas. Kerosene Oil is used as cooking fuel by 7.16 percent housing units in urban as compared to 3.33 percent in rural areas. The use of other sources is in 2.58 percent houses in urban and 1.14 percent houses in rural areas. Table 3.7 provides percentage of housing units by source of cooking fuel used.

3.2.4 Availability of Separate Kitchen, Bath room and Latrine

In modern living, the provision of kitchen, bath room and latrine is the basic necessity particularly in residential housing units. As per census information, above 40 percent of the housing units have the facility of kitchen, 39 percent of bath room and about 20 percent of latrine as a separate category in the district. The percentage of shared kitchen is 38.97 while 34.21 percent houses have shared bath rooms and 23.30 percent shared latrine. Above 20 percent of the houses have still no kitchen and bothroom facility in the district and above 56 percent have no latrine facility. The position of the rural areas is still worst in this regard. The status of urban houses regarding the provision of these facilities are however, better as above 41 percent housing units have a separate kitchen, 39 percent a separate bath room and 35 percent an independent latrine. The percentage of shared facilities except kitchen is further higher in urban areas than that in rural areas. Table 3.8 provides details of availability of housing facilities.

3.2.5 Source of Information

The question about source of information has been asked for the Ist time in the 1998 Census to assess the media coverage. Among the total households in the district, about 14 percent households have access to Television, 31 percent to Radio and 15 percent to the Newspapeas. In urban areas. about 34 percent housing units use T.V. as source of information however, its coverage is limited to only 5 percent housing units in rural areas. The access to Radio as a second important source of information is also higher in urban as compared to that in rural areas at 37 against 29 percent houses. Similary, the availability of News papers is higher at about 27 percent in urban houses as compared to 10 percent in rural houses.

Table 3.9 provides the data about source of information.

DEFINITIONS AND CONCEPTS

Urban Areas

All localities which were either metropolitan corporation, municipal corporation, municipal committee, town committee or cantonment at the time of the census, were treated as urban.

Household

A household means a group of persons living together who have collective arrangement for eating. A person living alone was also considered to constitute a household. The distinguishing characteristic of a household is its common cooking arrangement.

Housing Unit

A housing unit means a separate and independent place of abode, inhabited by one household and, if vacant, meant for habitation by one household. It does not necessarily mean a separate building. A building may have one or more housing units. Furthermore, any place not intended for habitation but occupied by a household at the time of census was also treated as a housing unit.

Room

A room is defined as a space in a housing unit having a roof and walls from roof to floor. This includes sleeping, dining, drawing, study, children's and servant's rooms but excludes kitchen, bathroom, latrine, store, balcony, porch and motor garage.

Age

Age is recorded as of the last birthday.

Marital Status

Marital status has been classified into never-married, married, widowed and divorced. Never-married applies to persons who have never been married. Married includes all persons who are at present married and living as husband and wife as well as those married persons living apart but having a living wife/husband. Those couples, whose marriage (Nikah) had been solemnized but giving away ceremony had not taken place, were also treated as married. Widowed applies to a person whose husband or wife was dead but who had not married again. Divorced applies to both divorcer and divorcee, if not remarried.

Religion

Religion is recorded and tabulated as informed by the respondents.

Literate

A person who can read a newspaper and write a simple letter, in any language, is treated as literate.

Field of Education

(a) General Education

It includes educational programmes of primary, middle, matriculation, intermediate and bachelor's degree in arts or science.

(b) Technical/Engineering

It includes engineering educational programmes in the fields of electrical, electronic, industrial, metallurgical, mining, mechanical, agricultural, forestry, chemical, petrochemical, aviation, nautical, etc. It also includes programmes in survey, drafting and designing, all types of engineering technician programmes, all types of trade, craft and industrial programmes. Architectural and town planning programmes are also included.

(c) Medicine/Tib

It includes educational programmes of medical diagnostic and treatment techniques, medicine and surgery, medical X-ray techniques, dentistry, pharmacy, etc.

(d) Health

It includes educational programmes of public health, nursing, mid-wifery and other health related auxiliary programmes.

(e) Commerce/Business Administration

It includes educational programmes of typing, shorthand, clerical, secretarial, operation of office machines, book keeping, accountancy, electric data processing, business administration, marketing and sales, financial management and investment analysis, public administration, institutional administration, personal administration and other commercial, business and public administration programmes.

(f) Teaching

It includes all educational programmes which enable the teachers to teach all types of subjects to all categories of students. It includes education science programmes.

(g) Agriculture/Forestry/Animal Husbandry

It includes educational programmes of agriculture, forestry and fishing including general agriculture, animal husbandry, horticulture and gardening, crop husbandry, agricultural technology, food sciences and technology, veterinary, medicine, fishery science and technology, etc.

(h) Law

It includes educational programmes in jurisprudence, history of law, international law, labour law and maritime law and other laws.

(i) Economically Active Population

The economically active population comprises the persons aged 10 years and above of either sex who are engaged in some work for pay or profit including un-paid family helpers as well as those; not working but looking for work and laid off.

The Crude Activity Rate is measured as the percentage of economically active persons to the total population while the Refined Activity Rate is measured as the proportion of economically active persons among the population exposed to the risk of entering the economic life.

In collection of the data on economic activities "usual status" approach has been adopted as against the approach of labour force surveys, where data is usually collected on "current status" basis.

(j) Occupation

Occupation means the main job, profession, trade or kind/type of work usually performed by a person. In case of more than one occupation, the principal occupation is recorded. The principal occupation is that in which the person works most of the time.

(k) Industry

Industry means the activity of the organization, or business in which a person usually works.

Employment Status

(a) Self-employed

Self-employed is a person who operates his own farm, business, or industry or practices a profession but does not employ any hired help, paid either in cash or kind.

(b) Government employee

A Government employee is a person who works in any Government/Semi-Government Organization for pay.

(c) Private employee

A Private employee is a person who works, for pay, for person/farm/shop/firm/organization/office which is not run or managed by the Federal/Provincial/Local Government/Autonomous body.

(d) Employer

Employer means a person who operates his own farm, business or industry or practices a profession and who employees one or more persons for the purpose.

(e) Un-paid Family Helper

Un-paid family helper means a person who works, without pay or profit, on family farm, business or industry.

Migrant Population

The migrant population mean those who have moved out their residence from one administrative district to another administrative district. It excludes population who have moved within a district.

Disability

Disability refers to the physical and organic handicap of a person due to natural deformity or deficient functioning of any limb resulting from accident, disease, etc. For census purposes it refers to visible malfunctioning of any organ of the body. It includes blind, deaf and mute, crippled, mentally retarded and insane.
