## PREFACE

The Fifth Population and Housing Census, initially due in March 1991, was conducted from 2-18 March 1998 throughout the country including Federally Administered Tribal Areas, Northern Areas and Azad Kashmir. During the first three days i.e., from 2nd to 4th March houselisting was carried out where in each house was physically numbered and registered as an inventory for conduct of the census from 5th to 18th March. The inventory served as a guideline for the supervisors besides ensuring complete coverage, during the census operation.

There were 3 separate questionnaires used for houselisting and collection of information on population and housing characteristics. Form-1 (Annex-A) was used for houselisting. Form-2 i.e., short form (Annex-B) was used for collection of information about all persons on core questions such as name, relationship with the head of the household, residential status, sex, age, marital status, nationality, religion, mother tongue, literacy, educational attainment and possession of national identity card, number of rooms, tenure, period when constructed, construction material of walls and roofs and source of drinking water-inside or outside, source of light, fuel used, type of kitchen, bathroom and toilet facilities and watching of TV and radio and reading of newspapers.

Form-2-A i.e., long form (Annex-C) was used for obtaining additional information about migration alongwith its reasons, field of education, economically active population, fertility, disability and inoculation of children against 5 diseases were asked on sample basis. About 8 percent single stage stratified sample was drawn with slightly more representation given to small provinces, districts and urban areas to make it a representative sample. Necessary definitions and concepts relating to the above mentioned questionnaires/forms are given at (Annex-D) for information of the readers.

The report mainly consists of three sections viz write up which carries general description of the district and some analysis of population and housing data, second section comprises tables while third section provides additional information about these sections in the form of annexures.

The write up section contains three main parts viz (i) general description about the district, (ii) broad analysis of population census data and (iii) broad analysis of housing census data. The general description covers location, boundary, area, geography, climate, rainfall, ethnicity, administrative set-up, agriculture, flora and fauna, health, industries, communication system, infra structure beside introducing the district. The broad analysis of population census data deal with population size, growth and distribution, other demographic and socio-economic characteristics.

The broad analysis of housing census data throw light on housing units/households, in terms of information on number of rooms, population density per housing unit and per room, tenure, period since constructed, construction material used on walls and roofs, source of drinking water, source of lighting, cooking fuel used in kitchen, availability of kitchen, toilet and bathroom facilities and assessment of media reach etc.

The report comprises 52 tables in all, 40 relate to population data, 12 to housing data. Of 52 tables 27 are based on complete count information while remaining on sample count information. Because of space problem the tables on occupation and industries are given in coded form. Therefore, after mentioning occupation and industries in coded form on the tables the detail occupational groups and industry divisions and district/sub-division map are appended at Annex-E, F & G respectively.

Census taking was a gigantic task which involved the whole nation in one way or the other which is commendable as a team work. The role of Provincial Governments was very vital and without their active cooperation, the operation would not have been successful. The meritorious services rendered by the field staff in addition to their own jobs, are also appreciable. The services rendered by the staff and officers of Federal Bureau of Statistics in training and data processing was helpful. I am personally indebted to the Federal Government who inculcated in me a sense of responsibility to conduct the census in March 1998, and releasing the data as early as possible for the benefits of all users.

The Armed Forces supported the Population and Housing Census work on hundred percent basis therefore, I extend my gratitude to their officers/staff involved in this operation.

I also thank the International Agencies like UNFPA, UNDP, UNICEF for their financial assistance in acquiring equipment & machinery and technical support in the form of consultancy services, training and study visits abroad.

Finally I thank the officers and staff members of the Population Census Organization for their relentless efforts to complete the census successfully.

Dated: 15th March, 2000

**PART - I**  
**GENERAL DESCRIPTION**  
**OF THE DISTRICT**

## **1. GENERAL DESCRIPTION OF THE DISTRICT**

### **1.1 GEOGRAPHY**

#### **1.1.1 Name, Location, Boundary and Area**

At the time of 1981 Census, Musakhel was a tehsil of the then, Loralai district. In January, 1992, Loralai district was divided into Loralai, Barkhan and Musakhel districts. Musakhel district derives its name from its headquarters town.

The district lies from 30° 13' to 31° 27' north latitudes and from 69° 29' to 70° 18' east longitudes. It is bounded on the north by Zhob district and tribal area adjoining Dera Ismail Khan district, on the east by Dera Ghazi Khan district of the Punjab province and tribal area adjoining Dera Ismail Khan district, on the South by Barkhan and Loralai districts and on the west by Zhob district. The total area of the district is 5728 square kilometers.

#### **1.1.2 Physical Features/Topography**

The topography of the district is dominated by the mountains and hills of the Sulaiman range. The terrain is rugged and divided into basins by ranges from 900 to 3000 metres above sea level. The highest peak in the district is 3109 metres above sea level. There are a series of plains in between the parallel ranges. There are several other important ranges the Spara or Sohar range runs from north to south on the eastern border of the district. The Surghar range extends from north-east to south-west on the western border of the district.

The Torghar, Shinghar and Morga ranges are in the upper north. The Nathaghar and Lakhighar ranges are in the southern portion of the district. The Bujgar, Sputoghar, Dhaulighar and Galaisar are on the south-east. Land along Razanni river, from Palosi Punga in the north up to Musakhel town in the south, is a fertile plain. There are also several river valleys. The Ispangla valley is situated in the eastern portion of the district. Lime stone, shale and sand stone are the main types of rocks involved in the formation of the area.

#### **1.1.3 Rivers and Streams**

The main rivers and streams, which drains the Musakhel district, are Razanni, Loe Lahar, Lori Tang, Kingri and Sarin. The general flow of the rivers and streams is from west to east. During the monsoon these streams are flooded resulting in wide spread losses of live-stock and property.

### 1.1.4 Climate

The climate of the district is hot in summer and cold in winter. Summer starts in April and ends in October. June is the hottest month with mean maximum and minimum temperature of about 38°C and 24°C respectively. Winter months are from November to March. January is the coldest month with mean maximum and minimum temperature of about 16°C and 4°C respectively. The district lies outside the monsoon area, therefore, the rainfall is light.

The data on temperature and rainfall is not available for Musakhel. Therefore, the monthly 30 years mean maximum and minimum temperature, precipitation and relative humidity recorded at Barkhan station which is adjacent to Musakhel district is given in the following table 1.1:-

**TABLE 1.1: MONTHWISE 30 YEARS MEAN TEMPERATURE, PRECIPITATION AND RELATIVE HUMIDITY RECORDED AT BARKHAN STATION**

### 1.1.5 Flora

The climate of Musakhel is conducive for all types of flora. Wild plants are generally seen on the mountains and hillsides. Grass and fodder plants are fairly numerous in the district. The most important of these are barwaz, barara, barav, buski, ghalmae, ganderae, khar or zmai, lukha etc. Important trees growing in the district are palosa (*acacia modesta*), showan (olive), ghaz (*tamarix orientalis*), halanae, makhae (*caragana*), manri, angur (*vitis vinifera*), karkanra (*zizyphus nummularia*), ber (*zizyphus jujuba*), pastawana (*grewia oppositifolia*), wanna (*pistacia cabulica*), wulla (*salix*), tali (*dalbergia sissoo*) etc.

### 1.1.6 Fauna

The wild animals found in the district are striped hyena, Chilton markhor and Suleman markhor. Game birds are also found in the area.

## 1.2 AGRICULTURE AND RELATED SECTORS

### 1.2.1 Agriculture

Musakhel has fertile soil which consists of soft clay, but that of a hilly tract is mixed with gravel. Rabi crops (spring harvest) consist of wheat and barley. The Kharif crops (autumn harvest) consists of maize, jowar, moong, and bajra. Wheat in rabi and maize and moong in Kharif are the principal crops. Agricultural machinery used in the area includes tractor, thresher, and some tube wells operated by diesel engines. Acreage, production and yield of major rabi and kharif crops grown in the district for the year 1997-98 is as under in table 1.2:-

**TABLE 1.2: ACREAGE, PRODUCTION AND YIELD OF MAJOR CROPS

### 1.2.2 Irrigation

Twelve streams and seven springs with permanent flow irrigate 35 percent of the area. The remaining is *khushkaba* or *sailaba* (land depending upon rainfall). Other significant source of irrigation are tube-wells and open surface wells. Irrigation sources are scarce and there is a great need of small dams. Adequate fertile land is lying for want of water.

### 1.2.3 Forestry

The district is devoid of forests. The forest department has declared a small piece of land in Sarkandi area as reserved forest. There is neither state forest nor commercial forestry in the district. Organized afforestation is needed in the area, in order to check soil erosion from torrential rains. Many wild trees grow in the district which provide fruit, fuel-wood and timber to the people.

### 1.2.4 Horticulture

As the winter season is mild, some of the fruits of cold areas are produced in the district including apple, almond, apricot, grape and pomegranate. A major portion of the produce is consumed locally. The absence of a proper road network is a major hinderance in the marketing of fruits. Acreage, production and yield of major fruits grown in the district for the year 1997-98 is shown in the following table 1.3:

**TABLE 1.3: ACREAGE, PRODUCTION AND YIELD OF MAJOR FRUITS GROWN IN MUSAKHEL DISTRICT (1997-98)**

### 1.2.5 Livestock

Majority of the population is involved in livestock raising. The population engaged in agriculture also raise cattle and small ruminants to fulfil their milk and meat requirements. Livestock raising communities live throughout the district specially in the hillsides of Musakhel, Drug, Kingri and Toisar areas. There is enough pasture land in Musakhel. The veterinary treatment facilities are also rare. Livestock population of the district according to Livestock Census, 1996 is as under in table 1.4:-

## 1.3 INDUSTRY AND TRADE

### 1.3.1 Industry

There is no industrial unit in Musakhel and the commercial activities are limited due to the absence of infrastructure. Roads, electricity, credit facilities, skilled manpower and technical support are considered the prerequisite for enterprise development but these all are severely lacking in Musakhel.

### 1.3.2 Communication

Only Musakhel, town, is connected with other parts of the province and the country by black top as well as shingle roads. However, the load frequency of traffic is very low on these roads. Only 72 kilometres of the National Highway (N-70) passing through the Kingri

area of the district is metalled. All other roads are shingle and are in a very poor condition. Kingri to Musakhel road is now under construction by Rural Access Road Project. Other important road/tracks are Musakhel-Durg- Karkana road, 62 kilometres (2) Musakhel - Toisar road, 52 kilometres and (3) Musakhel to Morgha Kibzai road, 45 kilometres. These vital shingle roads are in dire of being black topped because development of any area cannot take place without roads.

The district has neither railway nor air link to other parts of the province or country.

The Pakistan Telecommunication Limited (PTCL) has established four exchanges in the district i.e. at Musakhel, Drug, Kingri and Rarasham. The digital telephone exchange is being established at Musakhel. Fax service is not available in the district.

The Pakistan Postal Services Corporation has established four post offices in the district i.e. at Musakhel, Drug, Kingri and Rarasham and some other localities. Delays in the delivery of mail is a common complaint due to poor transport system. No special or express courier service is available in the district.

The Kingri, sub-tehsil of Musakhel has a regular electricity supply but the remaining district including the headquarter is deprived of electricity. The generating unit at Musakhel often remains out of order. The poles erected from Kingri grid station to Musakhel town in 1996 have yet to be energized, for want of funds for wiring. Electricity is the most demanded facility both for lighting and tube wells to irrigate the fields.

The district does not have access to natural gas pipeline, nor there is any permanent agency for Liquified Petroleum Gas (LPG) in the district. Only some well-to-do families buy gas cylinders from Loralai or Dera Ghazi Khan.

Only some people have T.V sets and radio. There is no local radio station. Transmission from Multan and Dera Ismail Khan radio stations can be heard only during day time.

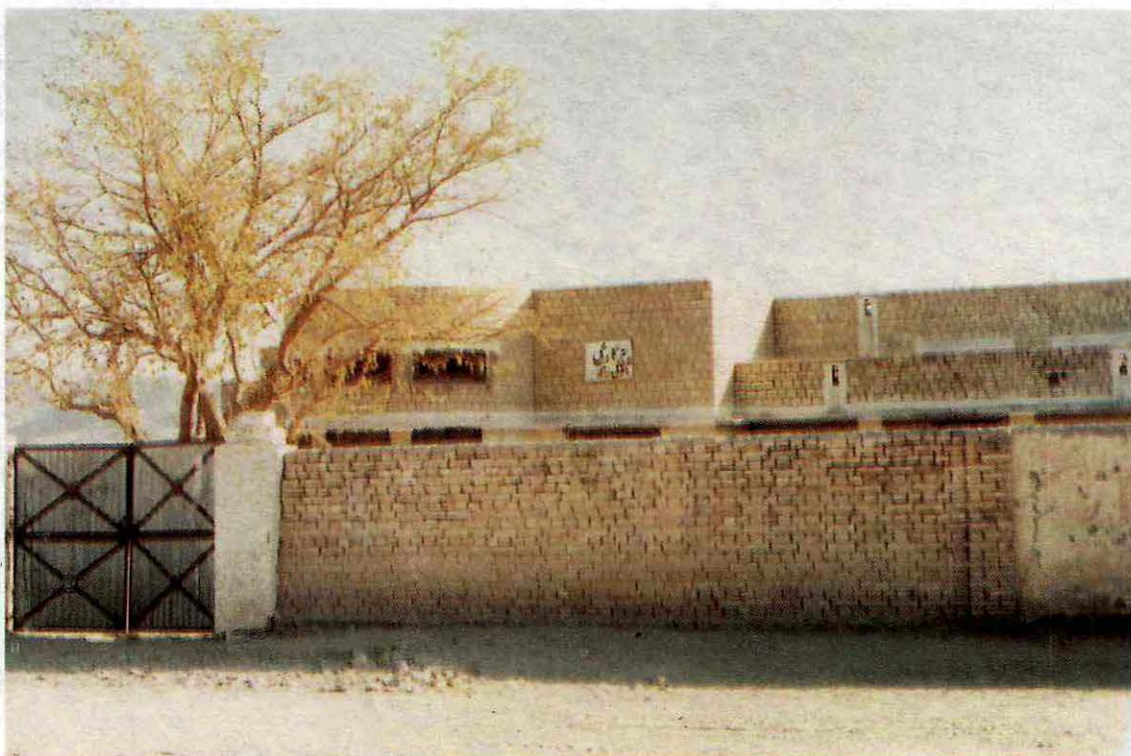

### **1.3.3 Trade and Trade Centres**

No trading centre exists in the district and most of the commodities are brought in from Punjab. Wool, leather, ropes (made of dwarf palm leaves) and onion are exported to Punjab.

## 1.4 HISTORY, ETHNICITY/TRIBES AND CULTURE

### 1.4.1 History

A specific mention of Musakhel is hard to come by in the historical descriptions. However, study of the history of Kandahar and northern Balochistan provides scattered references to the area. Musakhel has remained a part of Kandahar province from 1383 to 1884. According to the early history, this area, being a part of Kandahar province, was ruled by the Ghaznavids, Maliks of Kurat dynasty, Amir Taimur and his successors (1383-1470 AD), Sultan Hussain Mirza of Herat (1470-1480 AD), and Amir Shuja-ud-Din Zunnun (1480-1504). In 1505 AD, the Mughals conquered the province of Kandahar and held it till 1559 AD when the Safavid kings of Persia acquired it. The Mughals regained the province in 1595 AD but lost it again in 1622 AD, to the Safavid kings of Persia. In 1709 AD, the Afghan inhabitants rose under Mir Wais Ghilzai and established the Ghilzai power in Kandahar. The Ghilzai power was terminated by Nadir Shah in 1737 AD. After the assassination of Nadir Shah in 1747 AD, the first democratic government was established in Kandahar by the Afghans as they elected Ahmed Shah Durrani as their ruler. In 1826, the first Amir of Afghanistan, Dost Muhammad Barakzai, took hold of the area and annexed it to Afghanistan.

After the first phase of the Afghan war of 1878-79 AD, the British took control of the northern areas of Balochistan under the treaty of Gandamak. During 1879-84 AD, efforts were made to extend the British influence over the Khetrans and Musakhels of the, now Musakhel territory. The people of Musakhel took part in outrages committed by the Kakars under Shah Jahan in 1884, but surrendered to the British government on the conclusion of the expedition in the same year. On 1st November 1887, the whole area was declared part of British India. Zhob agency was formed in 1890 and Musakhel territory was annexed to it. Later Musakhel was made a tehsil in 1892 and was transferred to Loralai district in October 1903.

Musakhel remained a tehsil of Loralai district till 1st January 1992 when it was notified as a district as a result of splitting Loralai district into 3 districts, Loralai, Musakhel, and Barkhan.

### 1.4.2 Ethnicity and Tribes

The major tribes of Musakhel are Musakhels the principal division of which are Belkhels and Laherzais, Jafar (Afghan), Isot (Afghan), Zimri (Afghan), Syed, Qaisrani (Baloch) and Buzdar (Baloch). The languages spoken are Pashto, Jafarki and Balochi.

### 1.4.3 Food

Majority of the people take two meals daily, one in the morning and other at sunset. Men and women generally eat separately. Only well-to-do families have a third meal (breakfast) early in the morning. Male members of the family are given preference over females in respect of food. Meal is made up of wheat and maize bread, milk, butter-milk (*Lassi*). Eating of *Landi* (a kind of biltong) is common during the winter. Sheep are specially fattened for the purpose, and are killed about the end of November. Fish are also found in Rode and Toi streams but the local people abstain from eating it. Use of vegetables is also rare.

### 1.4.4 Dress and Ornaments

The common dress of the people is *Shalwar* and *Qamiz*. The Musakhels, Isots and Zimris wear black and dark turbans, while the Jafars (only the oldmen) and the Balochs wear the white turbans. The women wear a wrapper and a long shirt reaching to the knee. The clothing standard is now getting improved.

### 1.4.5 Dwellings

Majority of inhabitants still retain their nomadic style and live in temporary settlements. Most of the people live in single room houses and huts with a boundary wall of stones or just wild shrubs. Separate bathroom, latrines and kitchen facilities are rare.

### 1.4.6 Occupations

The principal occupation is agriculture combined with flock owning. Now the people are getting jobs/services in government departments and the Army, particularly the Jafars who are more educated than the other tribes of the district.

### 1.4.7 Culture, Customs and Traditions

Musakhel is a kinship based society where the tribal system prevails. Once the Sardars had great influence over the people but with the passage of time this influence has decreased. However, the Sardar's family still enjoys a superior status because of their economic prosperity. The Musakhels, Jafars, Isots and Zimris draw their normative structure from the Pushtoon culture. The Jafars of Drug area have a distinct culture which has traces of the Baloch culture of people in Dera Ghazi Khan. The Jafar dance (specially the dance with sword) is very interesting. Their talent and interest in education is commendable and they demonstrate a civilized society.

The tradition of *Vulvar* (bride-price), rivalries which transcend generations, hospitality and keeping of fire arms are still prevalent in Musakhel. Musakhel is a male dominated society where male children are preferred. This preference results in discrimination against female children in education, health, nutrition and other aspects of life. The birth of a male child is announced by gunshots. The custom of *Haal* (latest intelligence) which the Balochs are bound to communicate to others) is common amongst the Balochs, when they met each other. The immediate neighbours of the Balochs the Isots, Jafars, Zimris and Laherzais also follow this custom to some extent.

The whole population of the district belongs to the sunni sect of Islam. Generally the people practice Islam according to its fundamental principles. But the daughters are not given their property rights according to the principles of Islam. All Islamic festivals are celebrated with religious zeal and fervour.

The tradition of *Vulvar* is common. Many youngsters have to wait for years before they can afford to pay *Vulvar*. In rare cases the bride is given some dowry from her parents. Endogamy is a common practice. Sometimes marriages are arranged to mediate a rivalry in which girl from the aggressor's family, is given in marriage to a member of the victims family. Elopement is a taboo and both the girl and the boy are murdered if found by the relatives. Neither the groom nor the bride is allowed to choose his/her life partner. The decision is made by the parents or guardians. All the expenses for entertainment of the wedding guests are paid for by the grooms family.

## **1.5 ADMINISTRATIVE SET UP**

### **1.5.1 Executive, Judiciary and Revenue System**

The district is under the charge of Deputy Commissioner, who is assisted by an Assistant Commissioner, a Tehsildar and two Naib-Tehsildars one each at Musakhel and Kingri. The district has one sub-division (Musakhel) which is further divided into one tehsil (Musakhel) and one sub-tehsil (Kingri).

Deputy Commissioner is also the overall coordinator of various government, departments and also collects revenue on behalf of government.

The district is divided into two areas as far as law enforcement is concerned. Area "A" is controlled by the Balochistan Police headed by a Deputy Superintendent of Police stationed at Loralai. "B" area is controlled by the Balochistan Levies Force headed by the Deputy Commissioner in Musakhel. There are ten levies thanas at Musakhel (HQ), Toisar, Drug, Zimri Plasin, Tangisar, Sarkandi, Kot Khan Muhammad, Khajuri, Kingri and Rarasham. The total strength of levies force in the district is 210.

There is only one police station in Musakhel town and rest of the district is controlled by levies force. The Deputy Commissioner controls the levies through his Assistant Commissioner, Tehsildar and Naib-Tehsildars. In addition, a company of Loralai scouts is deputed at Musakhel.

Musakhel has been characterized by violence, murders and tribal feuds but since it has been declared a district and the office of Deputy Commissioner has been established, the law and order situation has improved to some extent.

On the judicial side, only one Qazi court is operating at Musakhel. The district falls under the jurisdiction of Session Division, Loralai. Appeal against decisions of Qazi courts can be made before a *Majilis-e-Shoora* which comprises of two Qazis under the chairmanship of District and Session Judge. Both types of courts work in complete harmony.

Another old justice delivery mechanism used to be the *jirga* system which has officially been abolished. The *jirga* was headed by a nominee of the Deputy Commissioner. The Deputy Commissioner and afterwards the Commissioner was the appellate authority. This system was both effective and economical.

Revenue is collected through various agencies. The local councils were responsible for collection of octroi and other revenue until recently. Some utility fees are collected by the provincial government like water charges and livestock cess. Income tax is levied by the federal government.

### 2.5.2 Un-Employment

The un-employment rate ( 55.60 percent) as percentage of un-employed labour force(i.e looking for work and laid off) to the total labour force reflects a high degree of un-employment in the district which is much higher for male i.e 55.92 percent compared to female of 29.59 percent. The un-employment rate in the rural areas is relatively higher at 55.79 percent as compared to 52.26 percent in urban areas.

### 2.5.3 Employed Population by Occupation

Among the employed class in the district the highest percentage 62.22 belongs to Major Occupation Group-6 "skilled agricultural and fishery workers", followed by Group-9 "elementary occupations" and Group-5 "service workers and shop and market sales workers" comprising 21.97 and 8.00 percent respectively. The next higher is Group-2 "professionals" sharing 3.01 percent. The rest 4.81 percent of the employed population are engaged in the remaining occupational groups.

### 2.5.4 Employed Population by Industry

Most of the working population i.e 57.68 percent is engaged in the Major Industrial Division-1 "agriculture, forestry, hunting and fishing". Out of the remaining 42.32

percent, 20.55 percent are engaged in Division-9 "community, social and personal services" followed by 8.16 percent engaged in Major Division-5 "construction", 6.66 percent associated with Major Division-4 "electricity, gas and water" and 5.82 percent in Major Division-6 "wholesale and retail trade and restaurants and hotels". The next higher is Major Division-7 "transport, storage and communication" sharing 0.62 percent. The rest 0.51 percent engaged in the remaining industrial divisions.

### 2.5.5 Employed Population by Employment Status

The proportion of working or employed population (working and un-paid family helper) to population 10 years of age and above is 18.79 percent. Out of this 66.71 percent are self employed, 21.55 percent working as employees (Govt. Autonomous and Private) and 9.88 percent are un-paid family helper. The employer category is only 1.85 percent. If we compare rural/urban variations, the proportion of self employed is higher in rural areas while that of employee (Govt) is higher in urban areas. The percentage of un-paid family helpers is higher in rural areas. Table 2.10 gives percentage of working population by employment status.

## 2.6 IMMUNIZATION

The question about immunization has been included in the 1998 Population Census for the first time to evaluate the vaccination programme launched by the Government from time to time. About 34 percent of the children under 10 years age have reported as vaccinated, while 28.42 percent reported as not vaccinated leaving the rest i.e 37.44 reported as not known. The percentage of vaccinated female is slightly higher at 17.18 percent as against vaccinated males at 16.96 percent. Table 2.11 gives detail of immunization by sex and rural/urban area.

The question about National Identity Card was asked in the 1998 Population Census for the first time to see the coverage element of National Identity Card. The question about National Identity Card was asked from population of 18 years age and above. According to the responses to the question it was found that 37.23 percent of the population aged 18 years and above have obtained National Identity Card. It was 46.29 percent for male and 27.36 percent for female. Table 2.12 gives the necessary detail by sex and area.

### 3. BROAD ANALYSIS OF HOUSING CENSUS DATA

#### 3.1 TYPE OF HOUSING STOCK

##### 3.1.1 Level of Congestion, Persons and Rooms

About thirty five percent of the housing units in the Musakhel district are single room houses. The percentage of single room houses is relatively higher at 35.71 in rural areas in comparison to that in urban areas at 23.92 percent. The percentage of housing units with 2 to 4 rooms is higher in urban areas at 67.74 percent as against 52.16 percent in rural areas. ## 3.2 HOUSING FACILITIES

### 3.2.1 Source of Drinking Water

The easy access to potable/safe drinking water is one of the basic human needs. As per information gathered in 1998 Housing Census, the facility of drinking water inside the house is available to 15.54 percent of the housing units, while 84.46 percent of the housing units use outside source as drinking water. The facility inside the house is significantly higher in the urban area as compared to the rural areas, where the majority of the households are depending on the source of drinking water outside the house. Table 3.5 gives detail of the source of drinking water by rural/urban areas.

The question about source of information has been asked for the first time in the 1998 Population Census to assess the media coverage. About two percent of the households in rural areas have access to television, 13.55 percent radio and 1.36 percent newspaper as source of information. The percentage figures of media reach for urban areas especially for radio and newspaper are relatively higher i.e. 31.27 percent and 7.88 percent respectively. Table 3.9 provide percentage of housing units by source of information by rural/urban areas.
