

1998
DISTRICT CENSUS REPORT
OF
NASIRABAD

Census Publication No. 26

POPULATION CENSUS ORGANIZATION
STATISTICS DIVISION
GOVERNMENT OF PAKISTAN
ISLAMABAD

AUGUST
1999

PREFACE

The Fifth Population and Housing Census, initially due in March 1991, was conducted from 2-18 March 1998 throughout the country including Federally Administered Tribal Areas, Northern Areas and Azad Kashmir. During the first three days i.e., from 2nd to 4th March houselisting was carried out where in each house was physically numbered and registered as an inventory for conduct of the census from 5th to 18th March. The inventory served as a guideline for the supervisors besides ensuring complete coverage, during the census operation.

There were 3 separate questionnaires used for houselisting and collection of information on population and housing characteristics. Form-1 (Annex-A) was used for houselisting. Form-2 i.e., short form (Annex-B) was used for collection of information about all persons on core questions such as name, relationship with the head of the household, residential status, sex, age, marital status, nationality, religion, mother tongue, literacy, educational attainment and possession of national identity card, number of rooms, tenure, period when constructed, construction material of walls and roofs and source of drinking water-inside or outside, source of light, fuel used, type of kitchen, bathroom and toilet facilities and watching of TV and radio and reading of newspapers.

Form-2-A i.e., long form (Annex-C) was used for obtaining additional information about migration alongwith its reasons, field of education, economically active population, fertility, disability and inoculation of children against 5 diseases were asked on sample basis. About 8 percent single stage stratified sample was drawn with slightly more representation given to small provinces, districts and urban areas to make it a representative sample. Necessary definitions and concepts relating to the above mentioned questionnaires/forms are given at (Annex-D) for information of the readers.

The report mainly consists of three sections viz write up which carries general description of the district and some analysis of population and housing data, second section comprises tables while third section provides additional information about these sections in the form of annexures.

The write up section contains three main parts viz (i) general description about the district, (ii) broad analysis of population census data and (iii) broad analysis of housing census data. The general description covers location, boundary, area, geography, climate, rainfall, ethnicity, administrative set-up, agriculture, flora and fauna, health, industries, communication system, infra structure beside introducing the district. The broad analysis of population census data deal with population size, growth and distribution, other demographic and socio-economic characteristics.

The broad analysis of housing census data throw light on housing units/households, in terms of information on number of rooms, population density per housing unit and per room, tenure, period since constructed, construction material used on walls and roofs, source of drinking water, source of lighting, cooking fuel used in kitchen, availability of kitchen, toilet and bathroom facilities and assessment of media reach etc.

The report comprises 52 tables in all, 40 relate to population data, 12 to housing data. Of 52 tables 27 are based on complete count information while remaining on sample count information. Because of space problem the tables on occupation and industries are given in coded form. Therefore, after mentioning occupation and industries in coded form on the tables the detail occupational groups and industry divisions and district map are appended at Annex-E, F & G respectively.

Census taking was a gigantic task which involved the whole nation in one way or the other which is commendable as a team work. The role of Provincial Governments was very vital and with out their active cooperation, the operation would not have been successful. The meritorious services rendered by the field staff in addition to their own jobs, are also appreciable. The services rendered by the staff and officers of Federal Bureau of Statistics in training and data processing was helpful. I am personally indebted to the Federal Government who inculcated in me a sense of responsibility to conduct the census in March 1998, and releasing the data as early as possible for the benefits of all users.

The Armed Forces supported the Population and Housing Census work on hundred percent basis therefore, I extend my gratitude to their officers/staff involved in this operation.

I also thank the International Agencies like UNFPA, UNDP, UNICEF for their financial assistance in acquiring equipment & machinery and technical support in the form of consultancy services, training and study visits abroad.

Finally I thank the officers and staff members of the Population Census Organization for their relentless efforts to complete the census successfully.

Dated: 17th August, 1999

(JAVID AKRAM)
Chief Census Commissioner

Annex-F	Pakistan Standard Classification of Industries for the 1998 Population Census
Annex-G	District and Tehsil maps

PART-I
GENERAL DESCRIPTION
OF THE DISTRICT

1. GENERAL DESCRIPTION OF THE DISTRICT

1.1 GEOGRAPHY

1.1.1 Name, Location and Area

Nasirabad is named after the Baloch Leader Nasir Khan Noori. Previously, it was a part of Kachhi (Kalat) district. Nasirabad district had undergone many administrative changes since its creation in 1974. It started functioning in 1975; the present Jaffarabad district was also a part of it. Later on, it was divided into two districts, namely, Tamboo and Jaffarabad in 1987. After 1990, the name of the district was, however, changed from Tamboo to Nasirabad with its headquarters at Dera Murad Jamali. Nasirabad also possesses the divisional status and comprises four districts including Nasirabad; the other districts are Jaffarabad, Bolan and Jhal Magsi. The Nasirabad district comprises two sub-divisions, namely, Dera Murad Jamali and Chattar.

The district lies between $29^{\circ} - 16'$ and $30^{\circ} - 05'$ north latitudes and $68^{\circ} - 08'$ and $69^{\circ} - 36'$ east longitudes. It is bounded in the north by Bolan district, in the east by Dera Bugti and Jaffarabad districts, in the south by Jaffarabad district and in the west by Jhal Magsi district.

Total area of the district is 3,387 square kilometres. The district and tehsil maps are annexed as G.

1.1.2 Physical Features/Topography

Nasirabad has no mountains or hilly area. Its land is flat plain which slopes from north to south and elevates from 50 to 100 meters above sea level, in the south-north direction. The soil of the district falls under the category, "soils of Pediment Plains". On the basis of soil reconnaissance Survey, the soil in the command area, (canal irrigated), comprising mostly the Dera Murad Jamali sub-division, can be classified as sandy and loamy. It is more loamy in dense agricultural field. The area in Chatter sub-division is characterised as sandy and clay-loam.

1.1.3 River and Streams

There are numerous streams and hill torrents originating from Dera Bugti hills and passing through Dera Bugti and Bolan districts whereas the Chattar river enters the plain in Nasirabad district and flows towards south across Chattar tehsil; several other streams also join it. The water of these streams is the major source of irrigation, specially in the north-east of the Chattar tehsil.

1.1.4 Climate

The climate of the district is very hot specially during May to September; however, June is the hottest month when the temperature exceeds 50 °C, even at night, it remains above 30 °C. The western hot winds locally called "lukh" blow, particularly in the months of June and July. Dust storms also blow during the hot weather but their frequency and intensity has been reduced due to increased vegetation. The winter season is mild and pleasant. The northern winds blow during winter season which are locally called "Utterwah or Kohiwah". Rainfall is inadequate but relatively higher in July and August due to monsoon. The humidity increases in summer, particularly, in the area adjacent to the Pat Feeder canal.

Since there is no meteorological station at Nasirabad, the meteorological data recorded at Jacobabad station has been used for the analysis purpose due to similar climate.

The annual mean, maximum and minimum temperature varies around 34 °C and 20 °C respectively. The total, annual average rainfall is above 110 millimetres while the annual relative humidity is about 48 percent. Table, below shows the meteorological data based on 30 years; 1961-90

TABLE 1.1 : NAME OF DISTRICT: NASIRABAD STATION: JACOBABAD

Month	Mean Temperature (°C)		Precipitation (Millimetres)	Relative Humidity (Percent)
	Maximum	Minimum		
January	22.60	7.68	3.10	50.88
February	25.24	10.48	7.03	48.23
March	31.28	16.30	10.32	42.76
April	38.00	22.33	1.93	33.01
May	43.08	26.74	1.74	30.93
June	44.33	29.38	4.70	41.16
July	40.56	29.22	36.79	56.18
August	38.24	28.25	26.31	62.20
September	37.00	25.85	11.21	59.38
October	35.32	20.29	2.31	48.87
November	30.06	14.08	1.14	45.75
December	24.11	8.74	3.69	52.73
Annual	34.15	19.95	110.40	47.70

1.1.5 Flora

The main species of trees are eucalyptus, acacia, dalbergia, zizyphis, albizzia, azadricha and sesbania. The shrubs include halaxylon SPP, alhagae and camalorum. "Trooh"

which is known as "Gapanch" in balochi and "Hanzal" in urdu is grown in abundance. Besides, mundhari, mitra and "Aak" are also found which are used in medicines, locally prepared by Hakims.

1.1.6 Fauna

The wild animals of the district include wolves, jackals, and hares, but not as much as there used to be. Migratory birds including ducks and houbaras as well as non-migratory birds including brown partridges are found.

1.2 AGRICULTURE AND RELATED SECTORS

1.2.1 Agriculture

As regards the agriculture, Nasirabad is the most developed district in the province. The district has a vast area of 831,870 acres with 2,97,668 acres as command area, irrigated by Pat Feeder canal which has a network of channels/water courses. The traditional Rabi and Kharif crops are cultivated in the area. The major crops grown in the canal fed area are rice, wheat, oil seeds, pulses and cotton. The Chattar sub-division is less developed in agriculture as it lacks irrigation water and depends on rainfalls. The major crops grown are wheat, fodder and oil seeds.

The Agriculture department has launched various schemes to educate the farmers about the modern techniques of cultivation. Resultantly, the mechanized farming has become popular, as well as the use of better seeds and fertilizer has increased the agricultural production. Table 1.2 shows the area, production and average yield of important Rabi crops while table 1.3 of Kharif crops in the district.

TABLE 1.2 AREA, PRODUCTION AND AVERAGE YIELD OF IMPORTANT RABI CROPS, 1997-98

Crops	Total Area (Hectares)	Production (Tonnes)	Yield/Hectare (K ilograms)
Wheat	69,900	188,220	2,693
Barley	2,302	3,570	1,551
Rape Seed and Mustard	8,810	6,345	720
Gram	7,410	6,100	823
Pulses	2,010	1,379	602 *
Vegetables	125	2,395	19,160
Fodder	1,410	70,600	50,071

Potato	100	1630	16300
Vegetables	70	1120	16000
Fodder	410	13790	33634
Cotton	4634	6908	1491
Sugarcane	120	7400	61667
Others	1269	5337	-

Source: Agriculture Statistics of Balochistan, 1997-98.

1.2.2 Irrigation

The sources of irrigation in the district are Pat-Feeder, Khirther and Uch canals. However, the major source of irrigation is Pat Feeder canal; which is the largest irrigation system in the Balochistan. The Pat Feeder canal irrigation system was constructed in 1965 as a part of the Guddu Barrage Project by WAPDA and came into operation in 1969. Its proposed command area is 42,500 acres. The maximum capacity of this canal is 6700 cusecs, and its length is 166 kilometers.

1.2.3 Horticulture

In the past there was no trend of plantation of fruits in the district but nowadays the land owners are taking keen interest in this field. They have planted fruit trees, specially of citrus and mango and at present, such gardens exist at various places in the district. Flower growing at commercial level does not exist however, the people, having such taste, grow the flowers in their houses, otherwise, there are no such gardens/parks in any part of the district. Table 1.4 shows the area, production and average yield of important fruits.

TABLE 1.4 AREA, PRODUCTION AND AVERAGE YIELD OF FRUITS, 1997-98

Fruits	Area (Hectares)	Production (Tonnes)	Yield/Hectare (Kilograms)
Dates	18	79	8,750
Guava	47	46	9,167
Mangoes	103	300	10,000
Citrus	383	2,375	10,841
Other Fruits	90	594	10,426

Source: Agricultural Statistics of Balochistan, 1997-98.

1.2.4 Forestry

Forest department raised strip plantation in sixties, between highway and railway line from Dera Murad Jamali to Dera Allah Yar. It was successful but the forest greatly damaged due to negligence. Most of the area is now free from forest. The agriculturists usually grow the trees locally known as : sheesham, kandi, beer, peepal, neem, keekar, bab-bar, kerar, laee, bar, talli and mushk bed". There is no commercial forestry either at government or private enterprise level. The area however, has the potential for commercial forestry. The main species of trees are eucalyptus, acacia, dalbergia, zizyphis, albizzia, azadricha and sesbania. the shrubs include presepis, juiiflora, panicumantidentals, halexylon spp, alhagae and camalorum. Eucalyptus and kikar are already grown around the highway.

1.2.5 Livestock

Livestock potential has not explored that large as it should be in the area. The large ruminant sector, including cows and buffaloes, provides a backbone to the villagers as it meets the domestic requirement of milk and flesh as well as serves the commercial purposes. The species of cows called Bhag Narri is very popular. Buffaloes are held in the areas with plenty of water while cows with fodder in abundance. The small ruminants, including sheep and goats are however, popular in rain fed areas and is the major source of livelihood in Chattar. However, in the command area mostly cows are held for dairy purposes. The private poultry sector has also developed. Poultry farming in rural areas is very common and women generally take care of it and earn money by selling eggs and chickens in the nearby markets. Pigeons and quails are bred as a hobby. Table 1.5 shows the livestock position in the district.

**TABLE 1.5 LIVESTOCK POPULATION
IN NASIRABAD, DISTRICT, 1996**

S.No.	Livestock	Number
1.	Cattle	87061
2.	Buffalo	46185
3.	Sheep	119610
4.	Goat	175055
5.	Camel	1699
6.	Horse	4620
7.	Mule	263
8.	Ass	13537
9.	Poultry	188394

Source: Live Stock Census, 1996
Agriculture Census Organization.

There is no separate veterinary office for disease control in Nasirabad. In total, there are 18 veterinary dispensaries, but some of them are not functioning.

1.3 INDUSTRY AND TRADE

1.3.1 Industry

There is no large or small scale industry in this district. Cottage industry like embroidery work exists as well as caps are prepared in the rural areas.

1.3.2 Mining

No minerals have been found so far in the area. the OGDC (Oil and Gas Development Corporation) has started surveying the area for exploration of oil and gas.

1.3.3 Trade

There is no large scale trade or for that matter any well known trading centre in Nasirabad district.

1.3.4 Communication

The district has Railway link with Provincial Headquarters (Quetta) as well as Sindh and Punjab Provinces. Moreover, National Highway of about 50 kilometres passes

A TRADITIONAL WAY OF TRAVELLING ON HORSE BACK

through the district. There are pacca and kachha roads in the interior which play important role in transporting the agriculture produce to the markets (mandis). The entire area being agricultural area requires farm to market roads at various places in the interior. Nasirabad has a helipad but there is no regular service. There is no T.V., or Radio station in the district. Radio is the major source of information, however, number of television sets is increasing rapidly including dish antennas. Telecommunication services are available in the district. D.M. Jamali is linked with direct dialing system. There is main post office at D.M. Jamali and branches exist at villages which provide service to the population of the area. Courier service is also available at the D.M. Jamali town, a few branches of banks as well as National Savings Centre exist there too. Electricity is distributed from Guddu and gas from Sui, 3 grid stations have been installed at Usta Muhammad, D.M. Jamali and Rojahan Jamali.

1.4 HISTORY, ETHNICITY/TRIBES AND CULTURE

1.4.1 History

Nasirabad derives its name from the great Baloch leader Nasir Khan Noori who was the founder of the Baloch confederation and ruled over the Kalat Khanate from 1747 to 1794. The district was notified in 1974. For three years, from 1987 till 1990, the district was known as Tamboo, which is a small village 40 kms west from the district's headquarters Dera Murad Jamali. The name of the district was changed from Tambo to Nasirabad after 1990.

1.4.2 Ethnicity/Tribes

Baloch, Brauhi and Jamote are the main tribes in Nasirabad district. These can be sub-divided into sub-sections as follows.

Main Tribes	Sub-section	Main Tribes	Sub-section
Baloch	1. Rind	Brauhi	1. Mengal
	2. Marri		2. Lehri
	3. Jamali		3. Bangulzai
	4. Magsi		4. Raisani
	5. Bugti		5. Padarani
	6. Umrani		6. Qambrani
	7. Khosa		7. Sassoli
	8. Domki		8. Jattak
	9. Lashari		
Jamote	1. Abra		
	2. Soomro		
	3. Bhangar		
	4. Burrara		
	5. Pechoha		

A significant number of settlers in the district belongs to other parts of the country which includes Sindhis, Saraikis, Punjabis as well as Pushto and Urdu speaking people. The Sindhi settlers have claimed local status; jamotes and syeds are akin to sindhi culture.

Balochi and sindhi are spoken as mother tongue by 55 and about 31 percent population of the district while Brauhi and Saraiki are important mother tongues spoken in the area. Urdu is used as a medium of education and as a means of communication between people of different ethnic backgrounds. There is also a small number of Pushto speaking population.

Hindus are also residing in Nasirabad district who are mostly engaged in trade.

1.4.3 Culture, Customs and Traditions

The population of Nasirabad district is multi-ethnic and some of the characteristics are common among the major ethnic groups. The society in Nasirabad district is predominantly patriarchal. Tribal affiliation remains strong. The tribes living in the district are not engaged in tribal blood feuds. There are wealthy land owners in the district, but with lesser influence. The sardari system is nominal. The old customs of co-operation are no more in practice, though, Biradari system still exists. The people live in a close homogeneity particularly, in rural areas.

The joint family system predominates in the district, though the number of nuclear families is increasing in literate house holds. Nasirabad district is comparatively a open society. Marriages are arranged on the basis of vulvar.

Women play a nominal role in the decision-making or any other tribal matter. However, they play a significant role in the household activities as well as agriculture work. The observance of the veil (purdah) is flexible in the district.

The majority of people living in Nasirabad district belongs to the sunni sect of Islam, the shia population also exists but in small proportion. The population of Nasirabad district, religiously is less conservative. The religious or sectarian differences are nominal.

The traditional institutions and norms which existed in the past, have either collapsed or no longer functioning. The sense of group homogeneity and self-reliance among tribes or intra-tribe has ceased in large.

There are two major channels for conflict resolution in the district. One is the government channel, the Judicial system, and the other is private.

There is also a " Mehr system ". The offer for Mehr is initiated by the offender's side. He will beg for mercy. He may be accompanied by a number of notables as a token of endorsement for his wish to reach a settlement. An offer for Mehr may be accepted with or without conditions or rejected. Another way of conflict resolution known as Biradiri system (Brotherhood), where a few close family members or fellow tribesmen, or notables can mediate and settle the dispute.

A large number of weapons are in possession of the people. In case one becomes destitute (to pay compensation for murder) then the people help each other by cash or cattle which is called "phoree"

Usually in winter season the people sit together and the old men narrate the old famous legends of Yousaf Zulekha, Laila Majnoon, Sassi Punoo, Heer Ranjha, Shereen Farhad, Momal Rana etc., for entertainment.

1.4.4 Food

The food habits of the local population are almost the same as in any other district of Balochistan. There are three eating times, morning for breakfast, mid-day for lunch and after sunset for dinner. The people in rural areas mostly use vegetables grown in their fields, butter, milk and sometime mutton.

1.4.5 Dress

The men and women both use shalwar (trousers) and kameez (shirt). women also wear cloth (chaddar) covering head and body. Embroidery shirts are commonly worn. Men also wear caps or turbans on their heads.

1.4.6 Dwellings

The people in rural areas are mostly settled on their lands. The poor people live in hutments or kachha houses while the rich people have constructed pacca houses with all modern amenities including bathrooms, kitchen etc. Usually a drawing room, known as autaq, is also constructed as a part of the house.

1.4.7 Occupation

The majority of the population in Nasirabad district lives in rural areas. Dera Murad Jamali is the only urban centre. Mostly the population is engaged in agriculture. The educated youth prefers to get some government jobs. In towns the skilled people are engaged in different jobs to earn their livelihood.

1.4.8 Betrothals and Marriages

In Nasirabad district marriages are, usually, arranged. vulvar system is practiced in the area. The girls parents or guardians spend the vulvar on buying dowry for the bride. There are no rules about the amount of vulvar. It varies from case to case and situation to situation also depends on the physical characteristics of the girl. It may be paid by the bridegroom, his parents/guardians or relatives.

There is a system of Ata Wata (exchange marriages). the system is much practiced in the lower and middle classes of society to avoid vulvar.

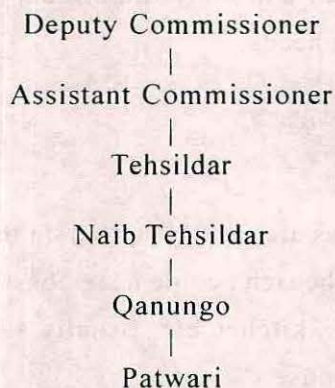

Under the vulvar and Ata Wata system, girls proposed to, are left with no choice, except to bow down their heads for marriages without their consent.

1.5 ADMINISTRATIVE SET-UP

1.5.1 District Administration

The district is headed by a Deputy Commissioner, who is also the District Magistrate as well as the Collector of the area. Nasirabad is the district as well as division with the headquarters, at Dera Murad Jamali.

The Nasirabad district comprises Dera Murad Jamali and Chattar sub-divisions, under the administrative control of Assistant Commissioner/Sub-Divisional Magistrate. The administrative setup of the district is as under:

1.5.2 Police Department

In notified " A " area i.e. D.M. Jamali township area of 5050 acres, the crimes are investigated by the Police while in the remaining " B " area it is done by the Tehsildar/Naib Tehsildar, incharge of the tehsil/sub-tehsil. All challans are submitted to the competent court through the Assistant Commissioner/SDM. There is no Qazi court in the district.

1.5.3 Judicial System

Before introduction of "Qisas and Diat" Ordinance, in 1992 the criminal cases used to be dealt with, under the provisions of the Criminal Law (Special Provisions) Ord:II of 1968, the Deputy Commissioner was competent to dispose of cases on the recommendations of the tribunal. Presently, all cases are being tried under regular Law by the district and session judge, Jaffarabad and district and session judge at Dera Murad Jamali. The District and Session Judge as well as Additional D&S Judge and Judicial Magistrates are also having courts at Dera Murad Jamali.

1.5.4 Revenue System

Land Revenue Act, 1967 is applicable and the revenue administration is governed through the provision of this Act. Balochistan Revenue Manual also envisages clear and exhaustive provisions on all matters concerning Revenue Administration. The girdawari of the crops, its checking and fixation of demand of Ushar/Water rate etc., recovery thereof and maintenance of essential revenue record is done according to the provisions of these laws. The Tehsildars/Naib Tehsildars exercise the powers of Assistant Collector grade-II while the Assistant Commissioners are invested with powers of Assistant Collector grade-I. The Deputy Commissioner is the Collector of the district for the purpose of revenue administration.

1.6 HEALTH

The population of the district largely depends on government run hospital, dispensaries, BHU etc. for free medical service; the medical resources in the district are in adequate for the rural areas. There is one hospital in Dera Murad Jamali with some advanced medical services.

The break up of the health services provided by the government is as under:

1.	District HQ Hospital, DeraMurad Jamali	01
2.	Basic Health Units	11
3.	Rural Health Unit	01
4.	Civil Dispensaries	12
5.	Mother and Child Care (MCHs) Centres	02
6.	School Health Services Unit	01
7.	Health Auxiliary	01

Source: Health Department, Government of Balochistan, 1997-98

1.7 EDUCATION

The educational level in the district is comparatively low. The enrolment of both boys and girls at primary level is below average as compared to that of the province as a whole. However, the government is making sincere efforts to increase literacy rate in the district. the education statistics of the district are as under:

**TABLE 1.6 NO. OF SCHOOLS AND YEAR-WISE ENROLMENT

1.8 IMPORTANT/HISTORICAL PLACES

There are as such no important/historical places in this district.

PART-II
BROAD ANALYSIS OF
POPULATION DATA

2. BROAD ANALYSIS OF POPULATION CENSUS DATA

2.1 POPULATION SIZE GROWTH AND DISTRIBUTION

2.1.1 Population Size and Growth

The Population of Nasirabad district, has emerged at 245.89 thousands in 1998 as compared to 129.11 thousands in 1981, recording a significant increase of 90.45 percent during 17 years i.e. 1981-98. In contrast to this, a substantially high increase of 194.14 percent registered during intercensal period 1972-81 and 104.56 percent during 1961-72. In the long run, the population of the district has increased rapidly showing as much high increase as 1045.93 percent during 37 years i.e., 1961-98, depicting a peculiar high trend over the time.

The annual average growth rate of Population in the district has declined to 3.86 percent during intercensal period 1981-98 as against 13.61 percent during 1972-81 and 6.35 percent in 1961-72. Despite a considerable decline, the rate of growth of Population is still, high enough and the population of the district will double in next 18 years if it continues to grow at this rate i.e. 3.86 percent per annum.

Table : 2.1 Shows the population and intercensal increase since 1961.

Fig : 2.1 Presents the population of last 4 censuses

Fig : 2.2 Demonstrates the annual average growth rate of population during intercensal periods.

TABLE 2.1 POPULATION AND INTERCENSAL INCREASE SINCE 1961

Description	1961	1972	1981	1998
Population (in Thousands)	21.46	43.89	129.11	245.89
Intercensal Increase (Percent)	-	104.56	194.14	90.45
Cumulative Increase (Percent)	-	104.56	501.70	1045.93
Average Annual Growth Rate (Percent)	-	6.35	13.61	3.86

Note: Population of previous censuses is adjusted according to current geographical boundaries of the district.

The Nasirabad district consists of two sub-divisions-Dera Murad Jamali and Chattrar. The Population of Dera Murad Jamali sub-division is 195.86 thousands in 1998 while that of chattrar sub-division is 50.03 thousands. The area of the district is 3,387 Sq.Kms, with a population density (persons per sq. Kilometre) as 72.6 in 1998 as compared to 38.12 in 1981.

Fig 2.1

NASIRABAD DISTRICT

POPULATION SINCE 1961

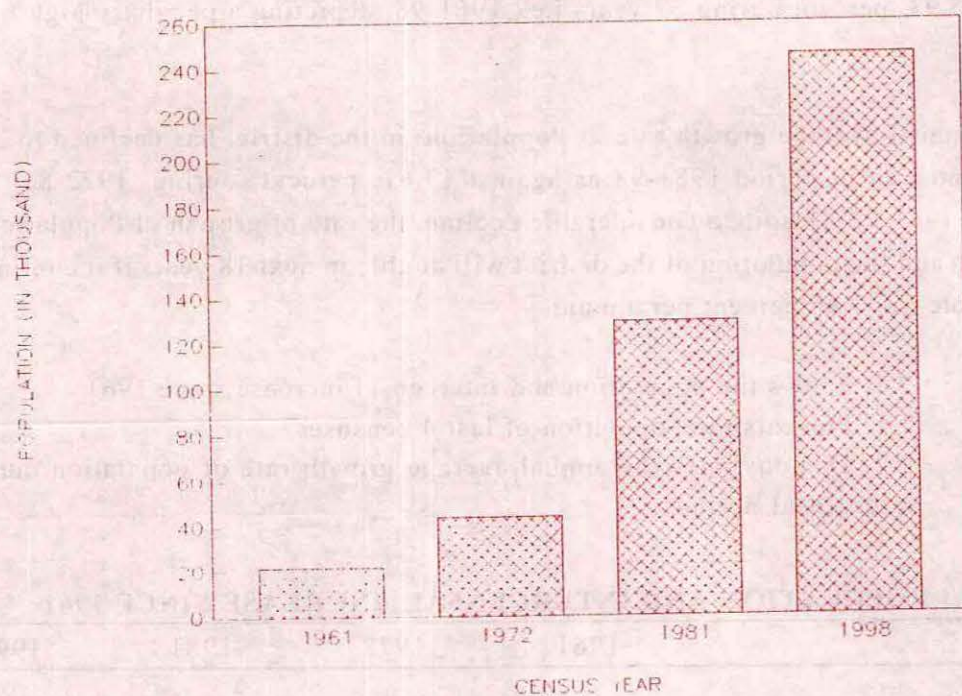

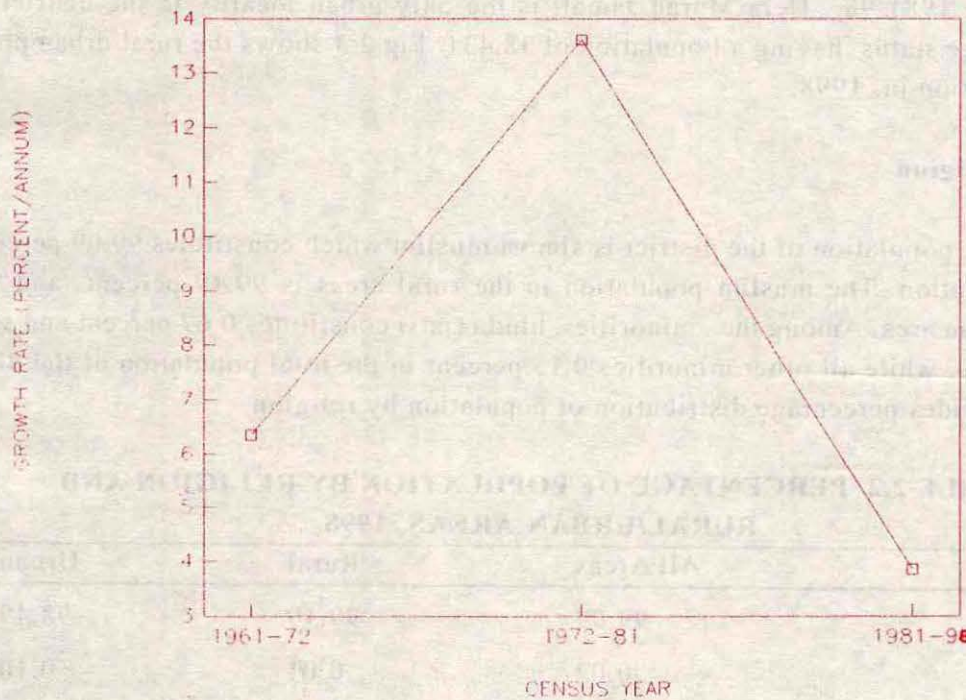

Fig 2.1

NASIRABAD DISTRICT INTERCENSAL GROWTH RATE

2.1.2 Household Size

The average household size of the district is 6.4 in 1998. The household size between rural and urban areas varies at 6.1 and 7.9 respectively, implying more congestion in urban area.

2.1.3 Rural/Urban Distribution

The rural population of the district, is 207.46 thousands, in 1998 census constituting 84.37 percent of its total population. It has grown at an annual average growth rate of 3.27 percent during intercensal period 1981-98.

The urban population stands at 38.43 thousands in 1998 constituting 15.63 percent of the district population. It has grown at a high rate of growth, 8.81 percent per annum, during 1981-98. Dera Murad Jamali is the only urban locality in the district with town committee status having a Population of 38,431. Fig 2.3 shows the rural/urban proportion of population in, 1998.

2.1.4 Religion

The population of the district is almost muslim which constitutes 99.09 percent of its total population. The muslim population in the rural areas is 99.19 percent and 98.49 percent in urban area. Among the minorities, hindu (jati) constitutes 0.67 percent and scheduled caste 0.09, while all other minorities 0.15 percent in the total population of the district Table 2.2 provides percentage distribution of population by religion.

TABLE 2.2 PERCENTAGE OF POPULATION BY RELIGION AND RURAL/URBAN AREAS, 1998

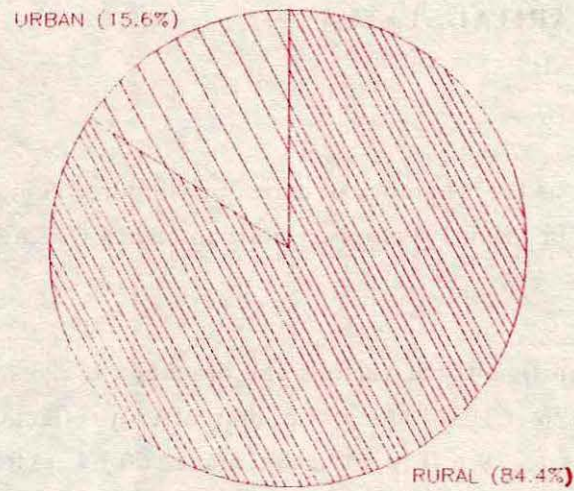

Religion	All Areas	Rural	Urban
Muslim	99.09	99.19	98.49
Christian	0.02	0.01	0.10
Hindu (Jati)	0.67	0.56	1.29
Ahmadi (Qadiani)	0.03	0.02	0.03
Scheduled Caste	0.09	0.10	0.02
Others	0.10	0.12	0.07

2.1.5 Mother Tongue

Balochi is the spoken mother tongue of the majority as reported by 54.94 percent of the population in the district followed by Sindhi at 30.50 and Saraiki at 6.08 percent while

Fig 2.3

NASIRABAD DISTRICT
RURAL-URBAN POPULATION 1998

Punjabi and Pushto is spoken by 0.29 and 0.19 percent respectively. Urdu 0.15 and others are spoken by 7.85 percent of the district population. Table 2.3 shows the distribution of population by mother tongue.

**TABLE 2.3 PERCENTAGE OF POPULATION BY MOTHER TONGUE AND
RURAL/URBAN AREAS, 1998**

Area	Urdu	Punjabi	Sindhi	Pashto	Balochi	Sariki	Other
All Areas	0.15	0.29	30.50	0.19	54.94	6.08	7.85
Rural	0.12	0.19	30.20	0.20	59.52	3.25	6.52
Urban	0.30	0.84	32.07	0.17	30.17	21.37	15.07

2.2 SEX, AGE AND MARITAL STATUS

2.2.1 Sex Ratio

Sex ratio is defined as the "number of males per hundred females". The sex ratio for Nasirabad district is 111.1 in 1998. It is higher in urban at 114.6 as against 110.5 in rural areas.

The ratio varies significantly at various age brackets. It rises sharply from 99.24 at ages 00-04 and reaches 148.76 at 10-14 age group, thereafter it reflects an irregular trend and ranges from 90.35 at ages 15-19 to 140.13 between ages 60-64. After some shortfall, it touches the peak (159.22) at age group 70-74. It again declined at 116.17 at advanced ages (75 +) which is still high and reflects a peculiar demographic trend. Un-even distribution of population by sex and age may be the impact of age misreporting or under reporting of females by the respondents or lack of probing about their ages during enumeration.

2.2.2 Age Structure

The age structure of the district indicates that the population below 15 years, is 44.58 percent; including 1.92 percent infants. Thus the population of working age groups 15-64 years, has emerged at 52.62 percent with a high age dependency ratio of 90.06 percent.

The age dependency ratio is still higher in urban areas at 91.98 percent as compared to the over all ratio as well as in rural areas at 89.71 percent. It is higher for males as compared to that for females both in rural and urban areas.

The adult population, 18 years and above comprises 52.38 percent of the total population (50.82 percent among males and 54.11 percent among females). the percentage of population eligible to vote, 21 years and above, is 42.13. The population by important age groups is given in table 2.4.

**TABLE 2.4 PERCENTAGE OF POPULATION BY AGE GROUPS.
SEX AND RURAL/URBAN AREAS, 1998**

Age Group	All Areas			Rural			Urban		
	Both Sexes	Male	Female	Both Sexes	Male	Female	Both Sexes	Male	Female
Under 1	1.92	1.82	2.03	1.91	1.82	2.01	1.98	1.83	2.16
Under 5	16.55	15.66	17.54	16.22	15.37	17.16	18.32	17.20	19.59
Under 10	34.10	33.88	34.36	33.83	33.70	33.98	35.57	34.83	36.42
Under 15	44.58	45.78	43.25	44.33	45.66	42.86	45.95	46.44	45.39
15 - 49	45.69	44.16	47.40	45.62	43.91	47.52	46.06	45.47	46.74
15 - 64	52.62	51.28	54.10	52.71	51.23	54.35	52.09	51.55	52.71
18 years & above	52.38	50.82	54.11	52.67	51.01	54.51	50.80	49.84	51.90
21 years & above	42.13	41.14	43.24	42.37	41.30	43.55	40.87	40.29	41.54
65 years & above	2.80	2.94	2.65	2.96	3.11	2.79	1.96	2.01	1.90
Age Dependency Ratio	90.06	95.01	84.84	89.71	95.20	83.98	91.98	93.99	89.73

The district has a broad based population pyramid, showing a high proportion of younger population, under 5 years at 16.55 percent, (15.66 percent among males and 17.54 percent among females). The shape of the pyramid is becoming narrower at advanced age groups by virtue of declining age factor. Fig. 2.4 demonstrates the age sex structure in the district.

High distortion in the percentage distribution of population at various age brackets may be the impact, either of age misreporting by respondents or some shortfall during enumeration.

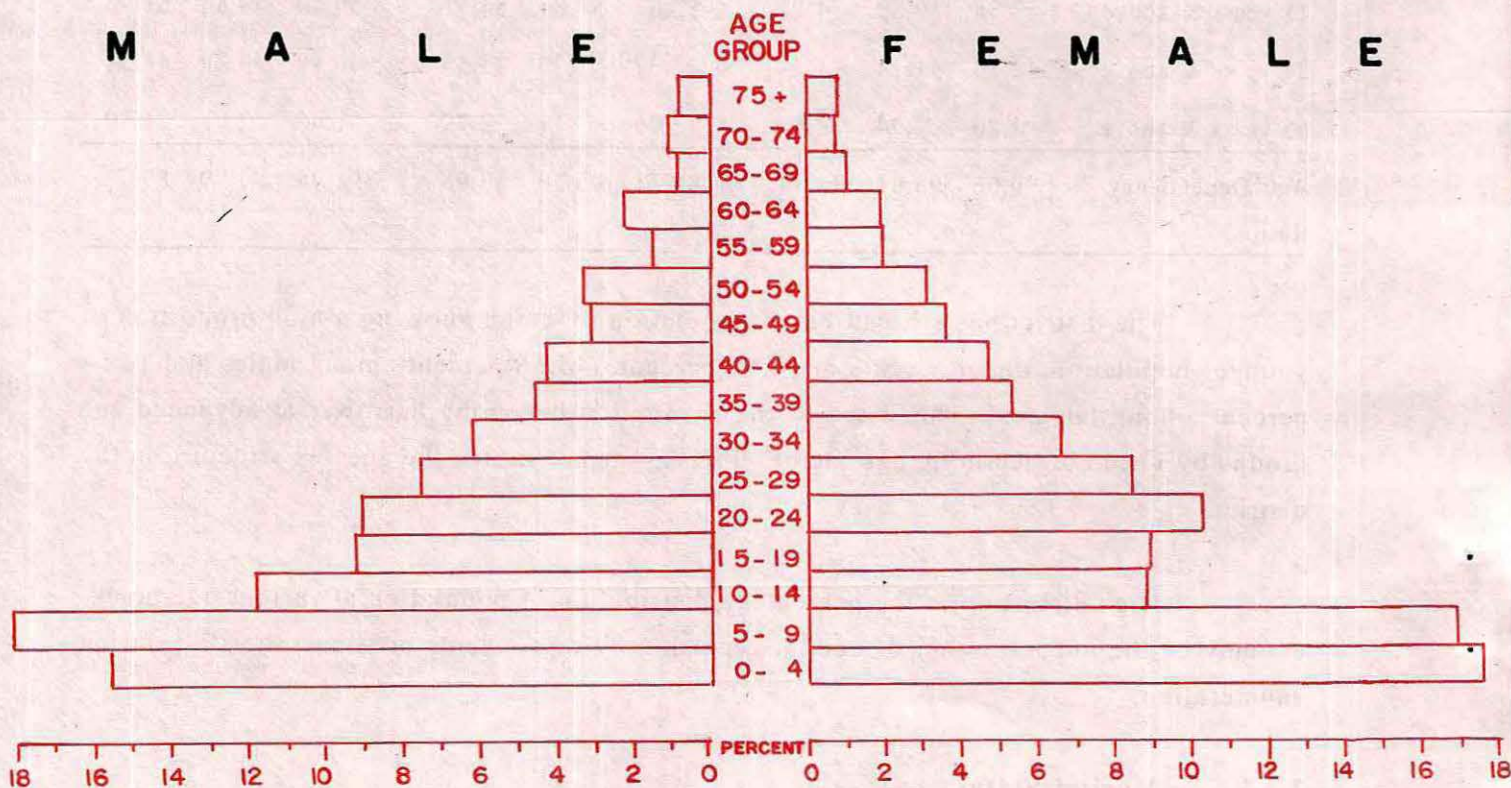

2.2.3 Marital Status

All individuals aged 15 years and above enumerated in the 1998 Population Census were classified according to their marital status; namely, 'married' 'never married'

POPULATION PYRAMID NASIRABAD DISTRICT

AGE AND SEX STURCTURE, 1998

Fig 2.4

'widowed' and 'divorced'. Out of them 19.32 percent are never married, 77.10 currently married, 3.53 widowed and negligible percentage, 0.06 percent, divorced. The never married amongst males are 25.63 percent as compared to 12.62 percent amongst females. The mean age at marriage closely varies for males and females which is 19.61 years for males as against 19.35 years for females. Implying, that the tradition of early marriages of both sexes is still existing in the society.

2.2.4 Females of Reproductive Ages by Marital Status

Of the total female population in the district, 47.40 percent is in the reproductive ages, (15 - 49 years), the percentage is a little higher in rural areas at 47.52 as against 46.74 in urban area. Among the females in reproductive ages, 14.21 percent are never married, 83.68 percent currently married, 2.04 percent widowed and only 0.07 percent divorced.

More than 19 percent of the ever married women of reproductive ages had reported no birth while 12.62 percent 1 child, 12.17 percent 2 children, 12.45 percent 3 and 12.72 percent 4 children. However, 31.02 percent of the ever married women reported 5 or more children.

2.2.5 Disabled Persons

The disabled persons, 1880 in all, constitute 0.77 percent of the total population in the district. Among the disabled persons, 57.66 percent are males against 42.34 percent females. The percentage of crippled among the total disabled persons is the highest at 31.33, (29.98 percent among males and 33.17 percent among females), followed by deaf & mute 20.27 percent, blinds, 16.60 percent and mentally retarded 3.88 percent. The percentage of insane is 3.30 while 3.35 percent of the total disabled population suffered with more than one disability. However, 21.28 percent have reported some other categories of disability.

2.3 LITERACY AND EDUCATIONAL ATTAINMENT

2.3.1 Literacy

Literacy, in census 1998, is defined as the "ability to read a newspaper and write a simple letter in any language". It is measured in terms of "literacy ratio"; computed as ratio of literate persons among the population aged 10 years and above.

Literacy ratio in Nasirabad district has emerged at 12.69 percent in 1998. It varies significantly for males at 19.51 percent in contrast to females at 5.06 percent.

Fig 2.5

NASIRABAD DISTRICT

LITERACY RATIO-1998

TABLE 2.5 LITERACY RATIOS BY SEX AND RURAL/URBAN AREA, 1998

Area	Both sexes	Male	Female
All Areas	12.69	19.51	5.06
Rural	11.05	17.06	4.39
Urban	21.78	32.77	8.86

A high disparity appears in the literacy level by area and gender. The literacy ratio in urban area at 21.78 percent is almost double than that in rural areas at 11.05 percent. A vast sex differential exists in favour of males, both in urban and rural areas. The male literacy level is almost four times to that of females in both the residential areas. However, the gap between two ratios is wider at 24 percentage points in urban in comparison to 14 percentage points in rural areas. High illiteracy of females may be the impact of their negligence in the field of education like other social sectors which needs to be improved through effective measures for the overall up-lift of females. Figure 2.5 illuminates the literacy ratio by sex and area.

2.3.2 Educational Attainment

A person, aged 10 years and above, is treated as an educated if he attains any educational level. The educated persons in the district are only 12.13 percent including those below primary; the remaining 87.87 percent either attained no educational level or have never attended any educational institution. A large variation exists in the ratio of educated persons by sex and area. The percentage of educated males is 18.93 and for females 4.53. It is 10.43 for rural as against 21.55 for urban areas. Table 2.6 gives the ratio of educated persons.

TABLE: 2.6 PERCENTAGE OF EDUCATED PERSONS BY SEX AND RURAL/URBAN AREAS, 1998

Area	Educated Persons as Percentage of Population 10 Years & Above		
	Both Sexes	Male	Female
All Areas	12.13	18.93	4.53
Rural	10.43	16.42	3.79
Urban	21.55	32.49	8.70

2.3.3 Enrolment Ratio

The enrolment ratio, of the district measured as percentage of students to population of ages 5-24 years, is 8.21 percent. It is higher for males i.e. 12.31 percent compared to 3.28 percent for females. The enrolment ratio is higher in urban areas at 19.97 percent as against 6.01 percent in rural areas. A vast difference appears between male and female enrolment ratios both in rural and urban areas. The ratio of male enrolment is more than five times to that of females in rural areas and more than two and a half times in urban area. Table 2.7 shows enrolment ratios.

TABLE 2.7 ENROLMENT RATIO BY SEX AND RURAL/URBAN AREAS 1998

Area	Both Sexes	Male	Female
All Areas	8.21	12.31	3.28
Rural	6.01	9.53	1.79
Urban	19.97	26.99	11.35

2.3.4 Level of Education

Of the total educated persons in the district, 23.98 percent have passed primary, 19.06 middle, and 20.75 matriculation. After matriculation, the percentage falls to 5.69 for intermediate, 3.26 for graduates and 1.61 for post graduates and 2.46 percent diploma/certificate holders including others. Indicating a weak education base like other districts in the province.

2.4 MIGRATION

2.4.1 Migration

Migration data covers movement of population in terms of shifting the residence from one district to another in the same province and from one province to another. It does not cover persons who changed their place of residence within their own district.

2.4.2 Life time Migrants

The total lifetime in-migrants in the district are 13858 (5.64 percent of the total population). They are 70.87 percent in rural and the remaining 29.13 percent in urban areas, the male and female lifetime in-migrants are 51.46 and 48.54 percent respectively. The persons who have migrated into the district during the last 5 years i.e. after March, 1993, are 43.88 percent, while 9.35 percent had migrated earlier to 5 years but after 1988. The remaining 46.77 percent have migrated in, 10 years earlier.

The majority of life time in-migrants 47.01 percent, moved with head, 10.79 percent migrated for business 3.54 percent due to employment/transfer and 3.00 percent migrated into the district as a result of marriage and 0.51 percent returned home and only 0.12 percent migrated for study. However, 35.03 percent migrated due to all other reasons.

Majority of immigrants i.e., 86.33 percent belongs to the Balochistan while 7.99 percent migrated from other provinces. A little batch of 0.07 percent repatriated to home from other countries while 5.61 percent had not reported their place of previous residence.

TABLE 2.8 PERCENTAGE OF MIGRANTS FROM OTHER PROVINCE/WITHIN PROVINCE BY RURAL/URBAN, 1998

Place of Previous Residence	All Areas	Rural	Urban
All Areas	100	100	100
Within Province	86.33	87.93	82.44
Other Provinces	7.99	6.55	11.52
AJK/NA	-	-	-
Other Countries	0.07	-	0.22
Not Reported	5.61	5.52	5.82

2.5 ECONOMIC CHARACTERISTICS

2.5.1 Economically Active Population

Economically active population comprises the persons aged 10 years and above of either sex who are engaged in some work for pay or profit including unpaid family helpers as well as the un-employed; not working but looking for work and laid off during the reference period.

Economically active class among the population aged 10 years and above comprises 57,229 persons (98.17 percent males and 1.83 percent females). It constitutes 23.27 percent of the total population in 1998 which is termed as the crude participation or activity rate; the remaining, 76.73 percent economically inactive population comprises 34.10 percent children below 10 years age, 31.63 percent domestic workers including 30.62 percent housewives, 2.92 percent students and 8.08 percent all other categories. Table 2.9 provides the percentages of population by economic category.

TABLE : 2.9 PERCENTAGE OF POPULATION BY ECONOMIC CATEGORY

Economic Category	All Areas			Rural			Urban		
	Both Sexes	Male	Female	Both Sexes	Male	Female	Both Sexes	Male	Female
Economically active population	23.27	43.42	0.90	23.06	43.18	0.82	24.45	44.64	1.32
Economically inactive population	76.73	56.58	99.10	76.94	56.82	99.18	75.55	55.36	98.68
Children below 10 years	34.10	33.88	33.36	33.83	33.70	33.98	35.57	34.83	36.42
Students	2.92	5.52	0.01	2.44	4.65	0.01	5.45	10.17	0.06

Refined Activity Rate	35.32	65.66	1.37	34.84	65.13	1.24	37.95	68.49	2.08
Un-employment rates	21.72	22.05	4.21	21.31	21.60	4.33	23.81	24.33	3.80

The refined activity rate as percentage of total economically active persons to the population aged 10 years and above is worked out at 35.32 percent for the district. A high variation exists between male and female activity rates at 65.66 and 1.37 percent respectively.

The activity rate is marginally higher in urban area at 37.95 percent as against 34.84 percent in rural areas. Similarly, the activity rates, both, for males and females are higher in urban area in comparison to the corresponding rates in rural areas as reflected in table 2.9.

A very distinct sex differential exists in the activity rates in favour of males i.e., 66.41 percentage points in urban and 63.89 percentage points in rural areas. Low participation of females in economic activity can be attributed to their engagement in house keeping work as well as to cultural milieu to some extent, however, their role as unpaid family helper cannot be ignored in farming and other economic activities, particularly in rural areas.

2.5.2 Un-employment

The un-employment rate is measured as a percentage of the un employed persons, including those; looking for work and laid off, among the total economically active population. The un-employment rate in Nasirabad district is computed at 21.72 percent. It deviates significantly at 22.05 percent for males in contrast to 4.21 percent for females. The unemployment rate is higher in urban than that in rural areas. A vast sex differential exists in the unemployment rates both in rural and urban areas. It is higher for males as compared to that for females by 20.53 percentage points in urban and 17.27 percentage points in rural areas. Table 2.9 shows the un employment rates.

2.5.3 Employed Population by Occupation

Among the employed class in the district, the highest percentage, 79.10, belongs to Major Occupation Groups-6 "Skilled Agricultural and Fishery Workers" followed by Group-9, "Elementary Occupants" at 13.07 percent and Group-5, "Service workers and Market Sales Workers" comprising 2.89 percent. The next higher is Group-2 "Professionals" sharing 1.66 percent in the total employed Population. The remaining 3.28 percent employed persons are associated with other occupational groups. A similar pattern is reflected both for males and females, however Group-5 is replaced by Group-2 in respect of females with 5.49 percent share.

The pattern of occupational status varies by area. In rural, it is similar to the overall pattern. However, in urban, it differs slightly as the maximum share is that of Group-9 at 45.32 percent followed by Group-6 at 32.12 percent while Group-5 "Service Workers and Shop and Market Sales Workers", shares 8.73 percent.

A visible sex differential by occupational status exists within and across the rural/urban boundaries with varying degree of percentage share and occupational category.

2.5.4 Employed Population by Industry

The majority of the employed class, about 78 percent, in the district, is associated with the Major Industrial Division-1, "Agriculture, Forestry, Hunting and Fishing" followed by Division-9, "Community, Social and Personal Services" comprising 7.82 percent. Next comes the Division-5, "Construction" sharing 6.65 percent. The other Major Industrial Divisions share 7.69 percent. Both, the employed males and females follow the same pattern with varying percentage share in the relevant Industrial Division.

Almost a similar industrial pattern emerges both in rural and urban areas as majority of employed population is associated with Major Industrial Division-1 followed by Division-9 and then Division-5, however, with significant differences in the percentage shares.

A sharp contrast exists between employed males and females by industrial classification within and across the rural/urban boundaries. The majority of females is engaged in Industrial Division-1 in rural areas and Industrial Division-9 in urban area at 91.07 and 46.93 percent shares in contrast to employed males at 86.64 and 29.67 percent share in the respective Division and area.

2.5.5 Employed Population by Employment Status

The percentage of employed population to the population aged 10 years and above in the district is 27.65 which is 78.28 percent of the total economically active population. Of this 82.74 percent is self-employed, 9.77 percent working as employee (Government, Autonomous and Private) and 6.16 percent as unpaid family helper and 1.33 percent as employer. Table 2.10 gives percentage of population by employment status.

The percentage of employed population by employment status varies significantly in rural and urban areas. In rural areas, the majority of 89.46 percent is self employed followed by 3.66 percent private employee and 1.40 percent Government employee and 4.85 percent un-paid family helper. on the other hand, in urban areas 47.40 percent are self employed and 19.62 percent Government employee compared to 13.84 percent private employee and 13.07 percent unpaid family helper. A significant sex differential is reflected regarding employment status of employed population in general as well as both in rural and urban areas.

TABLE 2.10 EMPLOYED POPULATION BY EMPLOYMENT STATUS, SEX AND RURAL/URBAN AREAS, 1998

Employment Status	All Areas			Rural			Urban		
	Both Sexes	Male	Female	Both Sexes	Male	Female	Both Sexes	Male	Female
All categories	100.00	100.00	100.00	100.00	100.00	100.00	100.00	100.00	100.00
Selfemployed	82.74	83.17	64.14	89.46	89.72	77.36	47.40	48.33	19.30

2.6 IMMUNIZATION

The question about immunization has been included in the 1998 population census for the first time to evaluate the vaccination programme launched by the govt. from time to time. It is accounted for that 52.58 percent of the children under 10 years age have been reported in 1998 census as vaccinated while 8.72 percent reported as not vaccinated leaving the rest i.e. 38.70 percent as not known. The percentage of vaccinated male and female children closely varies at 27.42 for males and 25.16 for females. The percentage of vaccination done in urban and rural areas is very close to each other. Similarly, for male and female children, with a little higher margin in respect of male children. Table 2.11 gives detail of immunization.

**TABLE 2.11 PERCENTAGE OF POPULATION (LESS THAN 10 YEARS) BY
IMMUNIZATION, SEX AD RURAL/URBAN AREAS, 1998**

Area	Population Under 10 years	Both Sexes			Male			Female		
		Vacci- nated	Not Vacci- Known	Not Known	Vacci- nated	Not Vacci- nated	Not Known	Vacci- nated	Not Vacci- nated	Not Known
All areas	83.858	52.58	8.72	38.70	27.42	4.55	20.31	25.16	4.17	18.39
Rural	70.189	52.66	9.11	38.23	27.37	4.80	20.10	25.29	4.31	18.13
Urban	13.669	52.16	6.74	41.10	27.65	3.28	21.36	24.51	3.46	19.74

2.7 NATIONAL IDENTITY CARD

The question about National Identity Card was asked in the 1998 population census for the first time to see the coverage element of I.D.Cards. The question about NIC was asked from population aged 18 years and above. According to the response to the question it was found that 41.87 percent of the population aged 18 years and above had obtained NIC; 49.94 percent among males and 33.44 percent among females.

Variation by area shows that, 59.79 percent of urban population have obtained NIC as compared to 38.67 percent in rural. The coverage in urban area is also higher for both, males and females at 68.36 and 50.34 percent respectively in contrast to the corresponding percentage at 46.55 and 30.52 in rural areas. Table 2.12 gives necessary details by sex and area.

**TABLE 2.12 PERCENTAGE OF POPULATION (18 YEARS AND ABOVE)
HOLDING NATIONAL IDENTITY CARD BY AGE, SEX AND
RURAL/URBAN AREAS, 1998**

Area	Both Sexes			Male			Female		
	Population 18 +	N.I.Card Obtained	N.I.Card Not Obtained	Population 18 +	N.I.Card Obtained	N.I.Card Not Obtained	Population 18 +	N.I.Card Obtained	N.I.Card Not Obtained
All Areas	128.801	41.87	58.13	65,772	49.94	50.06	63.029	33.44	66.56

PART-III
BROAD ANALYSIS
OF HOUSING DATA

3. BROAD ANALYSIS OF HOUSING CENSUS DATA

3.1 TYPE OF HOUSING STOCK

3.1.1 Level of Congestion-persons and Rooms

More than 57 percent of the housing units in Nasirabad district are single room houses. The percentage of single room houses is more than double in rural areas in comparison to that in urban area. On the contrary, the percentage of housing units with 2 to 4 rooms is almost double in urban area at 65.70 percent as against 36.55 percent in rural areas. Similarly, the percentage position of houses with 5 or more rooms is nearly three times in urban as compared to that in rural areas. The number of rooms per housing unit is also higher in urban areas at 2.3 as against 1.6 in rural areas. However, the level of congestion (persons per room) is slightly higher in rural areas at 3.81 in contrast to 3.44 in urban and 3.77 in the district. The level of congestion in terms of persons per housing unit is however higher in urban area at 7.9 in contrast to 6.1 in rural areas requiring construction of more housing units with additional rooms to reduce the level of congestion. Table 3.1 gives the indices of congestion in 1998 census.

TABLE 3.1 INDICES OF CONGESTION IN 1998 CENSUS

Indices of congestion	1998		
	All Areas	Rural	Urban
Persons per Housing Unit	6.4	6.1	7.9
Persons per room	3.77	3.81	3.44
Rooms per Housing Unit	1.7	1.6	2.3
Housing Units with one room (percentage)	57.34	61.49	28.54
Housing Units with 2-4 rooms (percentage)	40.21	36.55	65.70
Housing Units with 5 rooms and more (percentage)	2.45	1.97	5.76

3.1.2 Nature of Tenure

There were 38605 housing units in the Nasirabad district in 1998 census, 33742 (87.40 percent) in rural and 4863 (12.60 percent) in urban areas. As classified by tenure,

69.02 percent of the total housing units were owned. The percentage of ownership in urban area was significantly higher at 86.94 as against 66.44 in rural areas. Similarly the percentage of rented housing units in urban is fairly higher than that in rural areas. However, in rural areas 33.19 percent housing units were rent free as compared to the corresponding percentage of 5.31 in urban area. Table 3.2 provides the data by nature of tenure.

TABLE 3.2 NATURE OF TENURE BY RURAL/URBAN 1998

Tenure	All areas	Rural	Urban
All types	100.00	100.00	100.00
Owned	69.02	66.44	86.94
Rented	1.30	0.37	7.75
Rent Free	29.68	33.19	5.31

3.1.3 Period of Construction

Of the total owned housing units (26646) in the district, 56.41 percent, were built before 10 years, 22.91 percent during the last 5-10 years, 19.67 percent during the last five years and only 1.01 percent houses were found under construction. The percentage of houses constructed in rural areas before 10 years was marginally higher at 56.95 as compared to that in urban at 53.57. However, the percentage of houses constructed during last 5-10 years was higher in urban at 26.56 as against 22.22 in rural areas. Implying a little high tendency of construction in urban area in comparison with rural areas which needs to be improved in order to reduce the level of congestion in terms of number of persons per room as well as per housing unit.

3.1.4 Construction Material - Outer Walls

The quality indices of construction of outer walls are not that high in the district as to be considered up to the mark. There is marked variation in the qualitative indices of construction between urban and rural areas. In urban areas above one fifth of the housing units have the standard pucca walls made of baked bricks/blocks and stones with cement bonding; about two third have walls of un-baked/bricks and earth bonded only 10 percent have wooden walls while other categories are about 5 percent. In contrast, to this rural areas have only 4 percent of the walls in the standard category of baked bricks/blocks and stone with cement bonding and more than three fourth of walls are made of un-baked bricks with mud bonding. The wooden category is about 14 percent and the un-specified category of material used is about 5 percent. Table 3.3 gives details of construction material used in the outer walls.

**TABLE 3.3 MATERIAL USED IN OUTER WALLS BY
RURAL/URBAN 1998 (PERCENTAGE)**

Construction Material	All areas	Rural	Urban
All categories	100.0	100.0	100.0
Baked Bricks/Blocks/Stones	5.80	3.65	20.71
Unbaked Bricks/Earth Bond	75.64	77.24	64.55
Wood/Bamboo	13.84	14.40	9.91
Others	4.72	4.70	4.83

3.1.5 Construction Material-Roofs

The standard of construction of roofs significantly differs in rural and urban areas as reflected from table 3.4. As regards, category wise construction, above four fifth of the housing units in rural and more than two third in urban area have used baked bricks supported by girder or wooden log/bamboo in the construction of roofs. However, in urban area 8.90 percent houses have used RCC/RBC in the construction of roofs, percentage use of this category in rural is marginally at 1.67. The use of cement/iron sheets is 12.44 percent in urban area as against 3.88 percent in rural areas. However, the use of unspecified material in the construction of roofs is marginally higher at 13.36 percent in rural areas as compared to 8.14 percent in urban area.

**TABLE: 3.4 MATERIAL USED IN ROOFS BY RURAL/URBAN-1998
(PERCENTAGE)**

Construction material	All areas	Rural	Urban
All Categories	100.00	100.00	100.00
RCC/RBC	2.58	1.67	8.90
Cement/Iron Sheet	4.96	3.88	12.44
Wood/Bamboo	79.76	81.10	70.51
Others	12.70	13.36	8.14

3.2 HOUSING FACILITIES

3.2.1 Source of Drinking Water

The easy access to potable/safe drinking water is one of the basic human needs. As per information gathered in 1998 Housing Census, the facility of piped water both inside

and outside the houses is available to 16.18 percent of the housing units in the district. The hand pump, well and pond are other common sources of drinking water both in urban and rural areas.

In urban areas 50.69 percent housing units get piped water, with 49.02 percent inside the houses, in comparison to rural areas at 11.21 percent with 10.34 percent inside the houses. Two important sources of drinking water both inside and outside the houses are hand pump and well which fulfill the need of 14 percent housing units in rural and about 6 percent houses in urban area. The use of other sources is higher in urban at about 21 percent as against 18 percent in rural areas. However, the pond is the single largest source of drinking water outside the houses which is used by more than 56 percent rural and 23 percent urban housing units. Implying that a majority of the population is deprived of safe drinking water particularly in the rural areas which needs a lot of development.

TABLE 3.5 HOUSING UNITS PERCENTAGE BY SOURCE OF DRINKING WATER, BY RURAL/URBAN, 1998.

Source of drinking water	All areas	Rural	Urban
All sources	100.00	100.00	100.00
Inside	20.64	15.94	53.26
Pipe (Nul)	15.21	10.34	49.02
Hand Pump	3.11	3.33	1.65
Well	2.32	2.28	2.59
Outside	79.36	84.06	46.74
Pipe (Nul)	0.97	0.87	1.67
Hand Pump	0.48	0.45	0.72
Well	7.32	8.28	0.68
pond	52.36	56.58	23.07
Other	18.23	17.89	20.60

3.2.2 Source of Lighting

Electricity, as an important source of lighting, is available to above 60 percent of the housing units in the district, the percentage in urban areas is significantly higher at 93 in

A TRADITIONAL SOURCE OF DRINKING WATER

FETCHING OF WATER FROM WELL

comparison to rural areas at 56. In rural areas about 38 percent of the housing units still use kerosene oil as source of lighting as against only 4 percent in urban areas. The use of other sources for lighting is also higher in rural at 6.17 percent in contrast to 2.63 percent in urban. Table 3.6 provides percentage of housing units by source of lighting.

**TABLE 3.6 PERCENTAGE OF HOUSING UNITS BY SOURCE OF LIGHTING
RURAL/URBAN, 1998**

Source of Lighting	All areas	Rural	Urban
All sources	100.00	100.00	100.00
Electricity	60.62	55.94	93.09
Kerosene Oil	33.65	37.89	4.28
Others	5.73	6.17	2.63

3.2.3 Cooking Fuel Used

About 80 percent of the housing units in the district use wood/brush wood as fuel for cooking, the percentage of which is still higher in rural areas at 83 percent as compared to above 58 percent in urban areas. Above 5 percent use gas, 4 percent kerosene oil and remaining 10 to 11 percent use other sources. The use of gas is significantly higher at 33 percent in urban as against only one and a half percent in rural areas. Kerosene Oil is used as cooking fuel by 4 percent housing units in rural as compared to 2 percent in urban area. Table 3.7 provides percentage of housing units by source of cooking fuel used.

**TABLE 3.7 PERCENTAGE OF HOUSING UNITS BY SOURCE OF COOKING
FUEL USED BY RURAL/URBAN, 1998**

Cooking Fuel Used	All areas	Rural	Urban
All Categories	100.00	100.00	100.00
Wood	79.96	83.07	58.36
Kerosene Oil	3.88	4.14	2.08
Gas	5.46	1.47	33.13
Others	10.70	11.31	6.44

3.2.4 Availability of Separate Kitchen, Bath room and Latrine

In modern living, the provision of kitchen, bath room and latrine is the basic necessity particularly in residential housing units. As per census information, about 12 percent

of the housing units have the facility of kitchen, 12 percent of Bath room and a little above 12 percent of latrine as a separate category in the district. The percentage of shared kitchen is 18, while 17 percent houses have shared bath rooms and about 14 percent have shared latrine. Above 70 percent of the houses are still deprived of these basic amenities in the district. The position of the rural areas is still worst in this regard. The status of urban houses regarding the provision of these facilities is however, better as about 29 percent housing units had a separate kitchen, 31 percent a separate bath room and 35 percent an independent latrine. The percentage of shared facilities is further higher in urban area than that in rural areas. Table 3.8 provides details of availability of housing facilities.

TABLE 3.8 PERCENTAGE OF HOUSING UNITS BY KITCHEN, BATH ROOM AND LATRINE FACILITIES BY RURAL/URBAN, 1998

None	74.17	81.29	24.82

3.2.5 Source of Information

The question about source of information has been asked for the 1st time in the 1998 Census to assess the media coverage. Among the total households in the district, about 20 percent households have access to Television, more than 29 percent to Radio and above 8 percent to the Newspapers. In urban area, about 41 percent housing units use T.V. as source of

information however, its coverage is limited to only 16 and a half percent housing units in rural areas. The access to Radio as a second important source of information is also marginally higher in urban as compared to that in rural areas at 30 against 29 percent houses. Similarly, the availability of News papers is higher at about 20 percent in urban houses as compared to 7 percent in rural houses.

Table 3.9 provides the data about source of information.

**TABLE 3.9 PERCENTAGE OF HOUSE HOLDS BY SOURCE
OF INFORMATION AND RURAL/URBAN, 1998**

[illegible]

[illegible]

DEFINITIONS AND CONCEPTS

Urban Areas

All localities which were either metropolitan corporation, municipal corporation, municipal committee, town committee or cantonment at the time of the census, were treated as urban.

Household

A household means a group of persons living together who have collective arrangement for eating. A person living alone was also considered to constitute a household. The distinguishing characteristic of a household is its common cooking arrangement.

Housing Unit

A housing unit means a separate and independent place of abode, inhabited by one household and, if vacant, meant for habitation by one household. It does not necessarily mean a separate building. A building may have one or more housing units. Furthermore, any place not intended for habitation but occupied by a household at the time of census was also treated as a housing unit.

Room

A room is defined as a space in a housing unit having a roof and walls from roof to floor. This includes sleeping, dining, drawing, study, children's and servant's rooms but excludes kitchen, bathroom, latrine, store, balcony, porch and motor garage.

Age

Age is recorded as of the last birthday.

Marital Status

Marital status has been classified into never-married, married, widowed and divorced. Never-married applies to persons who have never been married. Married includes all persons who are at present married and living as husband and wife as well as those married persons living apart but having a living wife/husband. Those couples, whose marriage (Nikah) had been solemnized but giving away ceremony had not taken place, were also treated as married. Widowed applies to a person whose husband or wife was dead but who had not married again. Divorced applies to both divorcer and divorcee, if not remarried.

Religion

Religion is recorded and tabulated as informed by the respondents.

Literate

A person who can read a newspaper and write a simple letter, in any language, is treated as literate.

Field of Education

(a) General Education

It includes educational programmes of primary, middle, matriculation, intermediate and bachelor's degree in arts or science.

(b) Technical/Engineering

It includes engineering educational programmes in the fields of electrical, electronic, industrial, metallurgical, mining, mechanical, agricultural, forestry, chemical, petrochemical, aviation, nautical, etc. It also includes programmes in survey, drafting and designing, all types of engineering technician programmes, all types of trade, craft and industrial programmes. Architectural and town planning programmes are also included.

(c) Medicine/Tib

It includes educational programmes of medical diagnostic and treatment techniques, medicine and surgery, medical X-ray techniques, dentistry, pharmacy, etc.

(d) Health

It includes educational programmes of public health, nursing, mid-wifery and other health related auxiliary programmes.

(e) Commerce/Business Administration

It includes educational programmes of typing, shorthand, clerical, secretarial, operation of office machines, book keeping, accountancy, electric data processing, business administration, marketing and sales, financial management and investment analysis, public administration, institutional administration, personal administration and other commercial, business and public administration programmes.

(f) Teaching

It includes all educational programmes which enable the teachers to teach all types of subjects to all categories of students. It includes education science programmes.

(g) Agriculture/Forestry/Animal Husbandry

It includes educational programmes of agriculture, forestry and fishing including general agriculture, animal husbandry, horticulture and gardening, crop husbandry, agricultural technology, food sciences and technology, veterinary, medicine, fishery science and technology, etc.

(h) Law

It includes educational programmes in jurisprudence, history of law, international law, labour law and maritime law and other laws.

(i) Economically Active Population

The economically active population comprises the persons aged 10 years and above of either sex who are engaged in some work for pay or profit including un-paid family helpers as well as those not working but looking for work and laid off.

The Crude Activity Rate is measured as the percentage of economically active persons to the total population while the Refined Activity Rate is measured as the proportion of economically active persons among the population exposed to the risk of entering the economic life.

In collection of the data on economic activities "usual status" approach has been adopted as against the approach of labour force surveys, where data is usually collected on "current status" basis.

(j) Occupation

Occupation means the main job, profession, trade or kind/type of work usually performed by a person. In case of more than one occupation, the principal occupation is recorded. The principal occupation is that in which the person works most of the time.

(k) Industry

Industry means the activity of the organization, or business in which a person usually works.

Employment Status

(a) Self-employed

Self-employed is a person who operates his own farm, business, or industry or practices a profession but does not employ any hired help, paid either in cash or kind.

(b) Government employee

A Government employee is a person who works in any Government/Semi-Government Organization for pay.

(c) Private employee

A Private employee is a person who works, for pay, for person/farm/shop/firm/organization/office which is not run or managed by the Federal/Provincial/Local Government/Autonomous body.

(d) Employer

Employer means a person who operates his own farm, business or industry or practices a profession and who employs one or more persons for the purpose.

(e) Un-paid Family Helper

Un-paid family helper means a person who works, without pay or profit, on family farm, business or industry.

Migrant Population

The migrant population mean those who have moved out their residence from one administrative district to another administrative district. It excludes population who have moved within a district.

Disability

Disability refers to the physical and organic handicap of a person due to natural deformity or deficient functioning of any limb resulting from accident, disease, etc. For census purposes it refers to visible malfunctioning of any organ of the body. It includes blind, deaf and mute, crippled, mentally retarded and insane.

PAKISTAN STANDARD CLASIFICATION OF OCCUPATIONS FOR THE 1998 POPULATION CENSUS
