PREFACE

The Fifth Population and Housing Census, initially due in March 1991, was conducted from 2-18 March 1998 throughout the country including Federally Administered Tribal Areas, Northern Areas and Azad Kashmir. During the first three days i.e., from 2nd to 4th March houselisting was carried out wherein each house was physically numbered and registered as an inventory for conduct of the census from 5th to 18th March. The inventory served as a guideline for the supervisors besides ensuring complete coverage, during the census operation.

There were 3 separate questionnaires used for houselisting and collection of information on population and housing characteristics. Form-1 (Annex-A) was used for houselisting. Form-2 i.e., short form (Annex-B) was used for collection of information about all persons on core questions such as name, relationship with the head of the household, residential status, sex, age, marital status, nationality, religion, mother tongue, literacy, educational attainment and possession of national identity card, number of rooms, tenure, period when constructed, construction material of walls and roofs and source of drinking water-inside or outside, source of light, fuel used, type of kitchen, bathroom and toilet facilities and watching of TV and radio and reading of newspapers.

Form-2-A i.e., long form (Annex-C) was used for obtaining additional information about migration alongwith its reasons, field of education, economically active population, fertility, disability and inoculation of children against 6 diseases were asked on sample basis. About 8 percent single stage stratified sample was drawn with slightly more representation given to small provinces, districts and urban areas to make it a representative sample. Necessary definitions and concepts relating to the above mentioned questionnaires/forms are given at (Annex-D) for information of the readers.

The report mainly consists of three sections viz write up which carries general description of the district and some analysis of population and housing data, second section comprises tables while third section provides additional information about these sections in the form of annexures.

The write up section contains three main parts viz (i) general description about the district, (ii) broad analysis of population census data and (iii) broad analysis of housing census data. The general description covers location, boundary, area, geography, climate, rainfall, ethnicity, administrative set-up, agriculture, flora and fauna, health, industries, communication system, infra structure beside introducing the district. The broad analysis of population census data deal with population size, growth and distribution, other demographic and socio-economic characteristics.

The broad analysis of housing census data throw light on housing units/households, in terms of information on number of rooms, population density per housing unit and per room, tenure, period since constructed, construction material used on walls and roofs, source of drinking water, source of lighting, cooking fuel used in kitchen, availability of kitchen, toilet and bathroom facilities and assessment of media reach etc.

The report comprises 52 tables in all, 40 relate to population data, 12 to housing data. Of 52 tables 27 are based on complete count information while remaining on sample count information. Because of space problem the tables on occupation and industries are given in coded form. Therefore, after mentioning occupation and industries in coded form on the tables the detail occupational groups and industry divisions and district/sub-division map are appended at Annex-E, F & G respectively.

Census taking was a gigantic task which involved the whole nation in one way or the other which is commendable as a team work. The role of Provincial Governments was very vital and with out their active cooperation, the operation would not have been successful. The meritorious services rendered by the field staff in addition to their own jobs, are also appreciable. The services rendered by the staff and officers of Federal Bureau of Statistics in training and data processing was helpful. I am personally indebted to the Federal Government who inculcated in me a sense of responsibility to conduct the census in March 1998, and releasing the data as early as possible for the benefits of all users.

The Armed Forces supported the Population and Housing Census work on hundred percent basis therefore, I extend my gratitude to their officers/staff involved in this operation.

I also thank the International Agencies like UNFPA, UNDP, UNICEF for their financial assistance in acquiring equipment & machinery and technical support in the form of consultancy services, training and study visits abroad.

Finally I thank the officers and staff members of the Population Census Organization for their relentless efforts to complete the census successfully.

Dated: 17th August, 2000 .

PART - I
GENERAL DESCRIPTION OF THE DISTRICT

1. GENERAL DESCRIPTION OF THE DISTRICT

1.1 GEOGRAPHY

1.1.1 Name, Location, Boundary and area

Pishin was formed as an administrative district in 1975 by combining Pishin and Chaman tehsils of the then Quetta/Pishin districts. In 1994, it was further bifurcated to form Killa Abdullah district. The present Pishin district is, therefore, left with only old Pishin tehsil and Barshore and Karezat sub-tehsils. Pishin is the modernized form of the word Pushang, which is an old Persian for the Arabic word of Fushang. Myth attributes the origin of the name to a son of the Emperor Afrasiab Fushang. The district derives its name from its headquarters town.

The district lies between 30° 21' to 31° 13' north latitudes and 66° 46' to 67° 50' east longitudes. It is bounded on the north by Afghanistan and Killa Saifullah district, on the east by Killa Saifullah and Loralai districts, on the south by Ziarat and Quetta districts and on the west by Killa Abdullah district. The total area of the district is 7819 square kilometers.

1.1.2 Physical Features/Topography

The north-eastern part of Pishin district is covered by Toba Kakar range intersected by long narrow valleys. The hills are fairly uniform in character consisting of long central ridges from which frequent spurs descend, varying in elevation from 1800 to 2800 meters above sea level. The south-western part of the district is a plain area known as Pishin valley. It consists of flat plain with alluial soil in the centre, with pebbly slopes of varying length on either side to the surrounding hills.

1.1.3 Rivers and Streams

The drainage of the district in the upper part is towards the north and north-east while into lower part to the south-west. The Pishin Lora (river) flows in the south-western part of the district from north-east to south-west. The Surkhab river, which enters from eastern side into the district and flows westward and join the Pishin Lora river. The Barshore Lora flows towards west and also enters in Pishin Lora river. The Kurram river rises in the Toba Kakar range and enters into the distirct on the north-western corner and then flows towards the north into Psein river which form the boundary with Afghansitan. The Khush Dil Khan lake is in the north of Pishin city. A feeder cut from the Barshore river forms the chief source of supply of water to the Khush Dil Khan reservoir.

1.1.4 Climate

The climate of the district is warm in summer but very cold in winter. It lies outside the monsoon currents. Most of the rainfall is irregular in winter. However, it is scanty and irregular. Snowfalls occur during the months of January and February. July is the hottest month with mean maximum and minimum temperature of about 35°C and 19°C respectively. January is the coldest month with mean maximum and minimum temperature of about 10°C and -3°C respectively.

There is no meteorological station at Pishin, therefore, the monthwise 30 years mean temperature, precipitation and relative humidity recorded at Quetta station is given below in table 1.1 :-

TABLE 1.1: MONTHWISE 30 YEARS MEAN TEMPERATURE, PRECIPITATION AND RELATIVE HUMIDITY RECORDED AT QUETTA STATION

1.1.5 Flora

Plants found in the district include huma *(ephadra intermedia)*, shin shob *(menthe sylvestris)*, shezgi *(eremurus aucherianus)*, zawal *(Achillea santolina)*, khakshir *(susymrium sophia)*, makhi *(Caragana ambigna)*, etc.

1.1.6 Fauna

Wild life includes wolf, fox and jackal. A few ravine deer, mountain sheep, markhor and horse can also be seen. Common game birds include chikor, see-see, sandgrouse, bustard and duck.

1.2 AGRICULTURE AND RELATED SECTORS

1.2.1 Agriculture

Agriculture is the dominant and a flourishing sector in the district. There are two cropping seasons in Pishin. Kharif crops are sown in summer and harvested in late summer or early winter while rabi crops are sown in winter or during early summer and harvested in summer. Major rabi crops are wheat, barley, cumin, vegetables and fodder. Crops grown during kharif are melon, tobacco, potato, onion, vegetables and fodder. These are cash crops. The farmers of the area use scarce water resources in an efficient and effective manner. Acreage, production and yield of major crops grown in the district during the year 1997-98 is as under in table 1.2:-

1.2.2 Irrigation

Tube-wells constitute the major sources of irrigation in the district. During the British era a dam known as Khush Dil Khan reservoir and Shabo canal were constructed for providing irrigation water and are still operational. During the last quarter of 19th century, karezes were a major source of irrigation, but the construction of karezes and their maintenance is an expensive business and therefore they are gradually falling out of use.

1.2.3 Horticulture

Horticulture is the leading sub-sector of the district and massive quantities of good quality apples are produced. Fruit production is the dominant sector in the districts economy. The area under production and yield of major fruits grown in the district during 1997-98 is shown in the table 1.3:-

1.2.4 Forestry

APPLE ORCHARD, PISHIN

1.2.5 Livestock

The raising of livestock is another important sector in the district. It is a major source of income, as large number of small ruminants are exported to other province. The presence of pastures and grazing lands has proved highly conducive for livestock raising. Livestock population of the district according to the Livestock Census, 1996 is given in the following table 1.4:-

1.3 INDUSTRY AND TRADE

1.3.1 Industry

No major industry occurs in the district except for a few ice factories and one concrete pole factory.

1.3.2 Mining

Potential of mining resources is very limited in Pishin district. Chromite, fluorite, and granite have been explored on very small scale.

1.3.2 Communication

Pishin district is well linked by road and rail with other parts of country via Kuchlak and Quetta. An extensive bus service links Pishin to almost all the main towns and villages. The total length of the railway track running through Pishin district is 42 kilometers. There

are three railway stations: Bostan, Yaro and Saranan. There is no air service but there is an old concrete runway strip which was built by the British for strategic purposes. No radio or TV station is operating in the district. Majority of the population listens to radio broadcast from Radio Pakistan Quetta. Television broadcasts from PTV Quetta can be seen in most part of the district.

The district is connected through Direct Dialing System to the rest of the province/country. The General Post Office is situated in Pishin which overseas a network of smaller post offices throughout the district. In far flung areas where it is not possible to establish a full scale post office, arrangements have been made whereby school teachers serve as part time post-masters.

Four grid stations are functioning in the district one each at Pishin, Yaro, Alizai and Khanozai. The facility of natural gas is available in Pishin city and some other parts of the district.

1.3.3 Trade and Trade Centres

Trade and trading activity in the district is largely in the informal sector (smuggling) because of proximity with Afghanistan. Regular formal trade is relatively limited and mostly confined to consumable items.

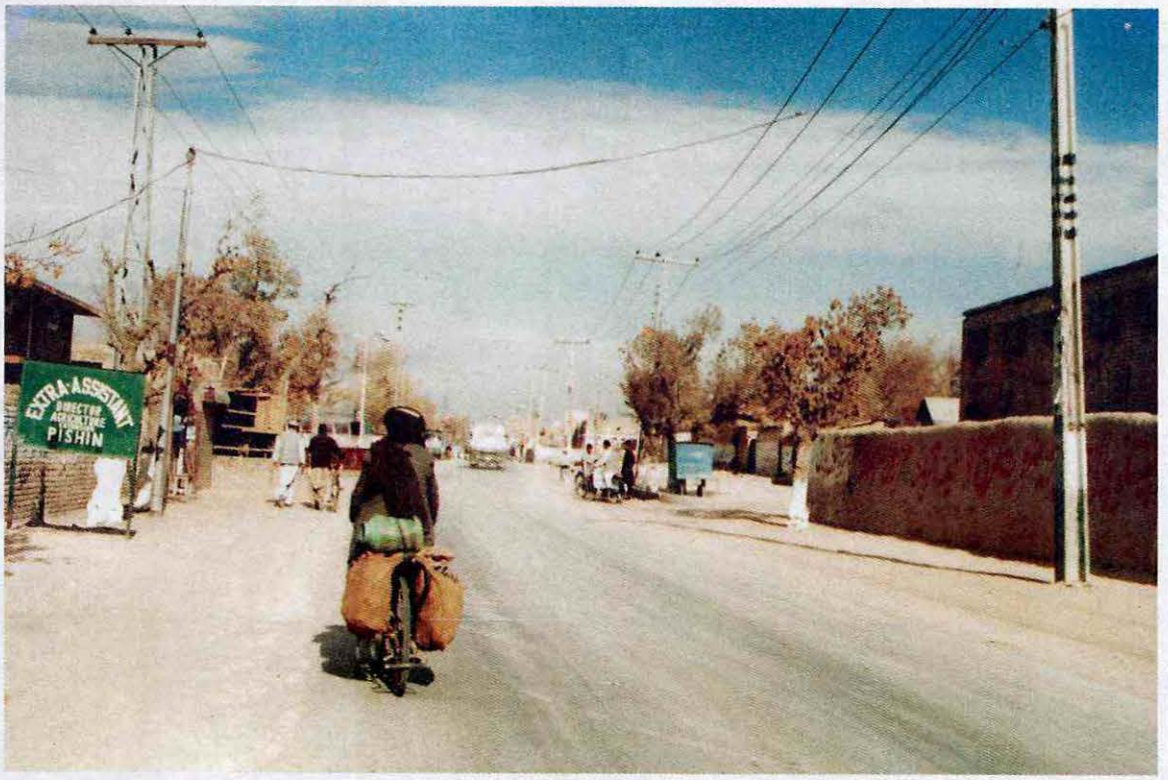
1.4 HISTORY, ETHNICITY/TRIBES AND CULTURE

1.4.1 History

During the first Afghan war in 1839, Quetta came under British occupation . After the British forces retired in 1842, Pishin and Shorarud were occupied by the Afghans. The first phase of the Afghan war closed with the signing of an agreement in May 1879 stating that the district of Pishin along with some other districts were to be ceded to the British government. It was in 1882 that final orders were given for the permanent retention of Pishin and British authority was extended over Shorarud valley.

When Quetta district came into existence on April 1883, it was combined with Pishin into a single administrative charge and Sir H.S.Barnes was appointed the first Political Agent.

QUETTA-PISHIN ROAD



BAZAR, PISHIN

Before its occupation in 1878 and its subsequent assignment in 1879, Pishin always formed part of the province of Kandahar. The Batezai Tarins played important part as Governors. After British occupation and upto 1882, it was under an Assistant to the Governor General and following its merger with Quetta in 1883, the Political Agent/Deputy Commissioner Quetta/Pishin became the administrative head.

This administrative arrangement persisted till 1975. In 1975, Pishin was separated from Quetta and was given the status of a district. In 1994 Pishin was further bifurcated into Pishin and Killa Abdullah districts.

1.4.2 Ethnicity and Tribes

Pishin district is mostly inhabited by Pashtoons. Major tribes include Kakar, Tarin, Syed and Achakzai. There is no ethnic difference among them, as all of them speak the same language, 'Pushto'. However, tribal differences exist which have been further accentuated by inter-tribal fueds.

1.4.3 Food

The majority of people have two meals daily, one in morning and other at sunset. Wheat is the staple food and is used in the form of *Chapati*, *Nan* and *Takkai* (a special kind of bread prepared in ashes). Meat, vegetables and lentils are used alongwith bread. In summer yoghurt and *Lassi* are also part of the daily diet. *Landi*, (dried meat) is commonly used during winter.

1.4.4 Dress

The majority of male population wear turban, *shalwar* and *kameez* through out the year, with a *chadder* thrown across the shoulders. Women wear *shalwar* and *kameez* with a shawl covering their heads.

1.4.5 Dwellings

Mud built houses are a common sight even in urban areas. Unbaked bricks are mostly used with little or no sanitary or drainage facilities and narrow streets. Majority of population is settled in killies/villages. Both in rural and urban areas the majority of houses are owner occupied.

1.4.6 Occupations

Agriculture, and trading of goods are major areas in which majority of people are involved. Flock owning is also an important occupation. In fact, the prosperity of Quetta in trade, commerce and transport is due to investments made by the residents of Pishin.

1.4.7 Culture, Custom and Traditions

The joint family system is prevalent. The decision making authority lies with the senior male member of the family.

Generally marriages are arranged. Parents are fully authorized to select spouses, both for men and women. *Vulvar* is commonly paid to the bride's family. The amount however varies and such factors as the family background of bride and bridegroom, beauty of the bride and her other qualities, whether the bride is a virgin or a widow and whether it is an exchange marriage are decisive. The system of exchange marriages is common among the tribes. This is known as 'Sarai' in Pushto.

Divorce carries a social stigma and is highly undesirable. However, polygamy is practiced among the well-to-do. The birth of male child is celebrated with great enthusiasm.

The inhabitants of Pishin district are Muslims. Customs of cooperation prevail among community members at times of death and marriage and in construction and maintenance of houses and karezes.

Conflicts are resolved by different methods one of them is known as *nana wathi* (where a group of person goes to the house of an aggrieved person to mediate). The option acceptable to the involved parties is adopted. Disputes are also resolved through the legal system.

1.5 ADMINISTRATIVE SET UP

1.5.1 District Administration

The district is under the overall control of the Dupty Commissioner who combines the functions of a District Magistrate as well as Collector. He is also responsible for the coordinating the functions of all nation-building departments in the district. For administration purposes, Pishin district is divided into following sub-divisions, tehsils and sub-tehsils.

Name of Sub-divisions	Name of Tehsils/Sub-Tehsils
1. Pishin	1. Pishin tehsil
	2. Hurramzai sub-tehsil

2.6 IMMUNIZATION

The question about immunization has been included in the 1998 Population Census for the first time to evaluate the vaccination programme launched by the Government from time to time. It is encouraging to note that 55.09 percent of the children under 10 years age have reported as vaccinated, while 21.41 percent reported as not vaccinated leaving the rest i.e 23.50 reported as not known. The percentage of vaccinated male is higher at 30.55 percent as against vaccinated females at 24.54 percent. Table 2.11 gives detail of immunization by sex and rural/urban area.

2.7 NATIONAL IDENTITY CARD

The question about National Identity Card was asked in the 1998 Population Census for the first time to see the coverage element of National Identity Card. The question was asked from population of 18 years age and above. According to the responses to the question it was found that 52.85 percent of the population aged 18 years and above have obtained National Identity Card. It was 64.09 percent for male and 41.77 percent for female. Table 2.12 gives the necessary detail by sex and area.

3 BROAD ANALYSIS OF HOUSING CENSUS DATA

3.1 TYPE OF HOUSING STOCK

3.1.1 Level of Congestion, Persons and Rooms

Slightly more than eighteen percent of the housing units in the Pishin district are single room houses. The percentage of single room houses is relatively higher at 18.36 in rural areas in comparison to that in urban areas at 12.70 percent. The percentage of housing units with 2 to 4 rooms is slightly higher in urban areas at 67.88 percent as against 66.66 percent in rural areas. Similarly the percentage of houses with 5 or more rooms is higher in urban areas as compared to that in rural areas.

The number of rooms per housing unit is higher in urban areas at 3.2 as against 2.8 in rural areas. Similarly the level of congestion (persons per room) is higher in urban areas as compared to that in rural areas. The level of congestion in terms of persons per housing unit is also higher in urban areas at 9.1 in contrast to 6.6 in rural areas requiring construction of more housing units with additional rooms to reduce the level of congestion. Table 3.1 gives the indices of congestion in 1998 Census.

There were 54048 housing units in the Pishin district in the 1998 Census, 51520 (95.32 percent) in rural areas and 2528 (4.68 percent) in urban areas. As classified by tenure, 92.82 percent of the total housing units were owned. The percentage of ownership in rural areas is relatively higher at 93.38 as against 81.37 in urban areas. The percentage of rented housing units in urban areas is significantly higher than that in rural areas. Similarly the percentage of rent free houses in urban areas is slightly higher at 5.85 percent as compared to the rural areas at 5.64 percent. Table 3.2 provides the data by nature of tenure.

The district has 85.19 percent housing units having outer walls made of unbacked bricks with earth bonding and 6.03 percent of the houses have the standard pacca walls made of bricks/blocks and stones with cement bonding. There is marked variation in the qualitative indices of construction between urban and rural areas. In urban areas 31.69 percent of the housing units have the standard pacca walls made of baked bricks/blocks and stones with cement bonding, 46.24 percent have walls of un-baked bricks with earth bonding and 21.12 percent have wooden walls while other categories are 0.95 percent. In contrast, the rural areas have 4.77 percent of the walls in the standard category of baked bricks/blocks and stone with cement bonding and 87.10 percent of walls are made of un-baked bricks with mud/earth bonding. The wooden category is 5.53 percent and the un-specified category of material used is 2.61 percent. Table 3.3 gives detail of construction material used in outer walls.

The standard of construction of roofs significantly differs in rural and urban areas. Ninety one point fifteen percent of the housing units in rural and 67.68 percent in urban areas have used baked bricks supported by girder or wooden log/bamboo in the construction of roofs. Similarly the use of un-specified material in the construction of roofs is higher at 4.42 percent in rural areas as compared to 2.25 percent in urban areas.

In urban areas 11.55 percent houses have used RCC/RBC in the construction of roofs. The use of this category in rural areas is only 1.12 percent. The use of cement/iron sheets is 18.51 percent in urban areas as against 3.31 percent in rural areas. Table 3.4 gives detail of material used in roofs by rural/urban areas.

DEFINITIONS AND CONCEPTS

Urban Areas

All localities which were either metropolitan corporation, municipal corporation, municipal committee, town committee or cantonment at the time of the census, were treated as urban.

Household

A household means a group of persons living together who have collective arrangement for eating. A person living alone was also considered to constitute a household. The distinguishing characteristic of a household is its common cooking arrangement.

Housing Unit

A housing unit means a separate and independent place of abode, inhabited by one household and, if vacant, meant for habitation by one household. It does not necessarily mean a separate building. A building may have one or more housing units. Furthermore, any place not intended for habitation but occupied by a household at the time of census was also treated as a housing unit.

Room

A room is defined as a space in a housing unit having a roof and walls from roof to floor. This includes sleeping, dining, drawing, study, children's and servant's rooms but excludes kitchen, bathroom, latrine, store, balcony, porch and motor garage.

Age

Age is recorded as of the last birthday.

Marital Status
