PREFACE

The Fifth Population and Housing Census, initially due in March 1991, was conducted from 2-18 March 1998 throughout the country including Federally Administered Tribal Areas, Northern Areas and Azad Kashmir. During the first three days i.e., from 2nd to 4th March houselisting was carried out wherein each house was physically numbered and registered as an inventory for conduct of the census from 5th to 18th March. The inventory served as a guideline for the supervisors besides ensuring complete coverage, during the census operation

There were 3 separate questionnaires used for houselisting and collection of information on population and housing characteristics. Form-1 (Annex-A) was used for houselisting. Form-2 i.e., short form (Annex-B) was used for collection of information about all persons on core questions such as name, relationship with the head of the household, residential status, sex, age, marital status, nationality, religion, mother tongue, literacy, educational attainment and possession of national identity card, number of rooms, tenure, period when constructed, construction material of walls and roofs and source of drinking water-inside or outside, source of light, fuel used, type of kitchen, bathroom and toilet facilities and watching of TV and radio and reading of newspapers.

Form-2-A i.e., long form (Annex-C) was used for obtaining additional information about migration alongwith its reasons, field of education, economically active population, fertility, disability and inoculation of children against 6 diseases were asked on sample basis. About 8 percent single stage stratified sample was drawn with slightly more representation given to small provinces, districts and urban areas to make it a representative sample. Necessary definitions and concepts relating to the above mentioned questionnaires/forms are given at (Annex-D) for information of the readers.

The report mainly consists of three sections viz write up which carries general description of the district and some analysis of population and housing data, second section comprises tables while third section provides additional information about these sections in the form of annexures.

The write up section contains three main parts viz (i) general description about the district, (ii) broad analysis of population census data and (iii) broad analysis of housing census data. The general description covers location, boundary, area, geography, climate, rainfall, ethnicity, administrative set-up, agriculture, flora and fauna, health, industries, communication system, infra structure beside introducing the district. The broad analysis of population census data deal with population size, growth and distribution, other demographic and socio-economic characteristics.

The broad analysis of housing census data throw light on housing units/households, in terms of information on number of rooms, population density per housing unit and per room, tenure, period since constructed, construction material used on walls and roofs, source of drinking water, source of lighting, cooking fuel used in kitchen, availability of kitchen, toilet and bathroom facilities and assessment of media reach etc.

The report comprises 52 tables in all, 40 relate to population data, 12 to housing data. Of 52 tables 27 are based on complete count information while remaining on sample count information. Because of space problem the tables on occupation and industries are given in coded form. Therefore, after mentioning occupation and industries in coded form on the tables the detail occupational groups and industry divisions and district/sub-division map are appended at Annex-E, F & G respectively.

Census taking was a gigantic task which involved the whole nation in one way or the other which is commendable as a team work. The role of Provincial Governments was very vital and with out their active cooperation, the operation would not have been successful. The meritorious services rendered by the field staff in addition to their own jobs, are also appreciable. The services rendered by the staff and officers of Federal Bureau of Statistics in training and data processing was helpful. I am personally indebted to the Federal Government who inculcated in me a sense of responsibility to conduct the census in March 1998, and releasing the data as early as possible for the benefits of all users.

The Armed Forces supported the Population and Housing Census work on hundred percent basis therefore, I extend my gratitude to their officers/staff involved in this operation.

I also thank the International Agencies like UNFPA, UNDP, UNICEF for their financial assistance in acquiring equipment & machinery and technical support in the form of consultancy services, training and study visits abroad.

Finally I thank the officers and staff members of the Population Census Organization for their relentless efforts to complete the census successfully.

(Kamran Zafar)
Chief Census Commissioner

PART - I
GENERAL DESCRIPTION OF THE DISTRICT

1. GENERAL DESCRIPTION OF THE DISTRICT

1.1 GEOGRAPHY

1.1.1 Name, Location, Boundary and Area

Killa Saifullah was declared as a separate administrative district on 14-12-1988. Prior to that it was part of the then Zhob district. It derives its name from a mud fort, at Killa Saifullah town built by Saifullah Khan, an influential of Khoidadzai tribe a sub-tribe of Sanzar Khel Kakars.

The district lies between 30° 31' to 31° 22' north latitudes and from 67° 29' to 69° 20' east longitudes. It is bounded on the north and east by Zhob district, on the south by Loralai district and on the west by Pishin district and Afghanistan. The total area of the district is 6831 square kilometers.

1.1.2 Physical Features/Topography

The greater part of the district is mountainous intersected by the Zhob valley. The valley is an immense stretch of alluvial plain. The hills mainly belongs to Toba Kakar range and lie in the north and north-west of the district. The principal ranges are Toghar, Azak, Baliaraghar, Spinghar, Shorghar, Churmaghar, Kand, Surghund, Marzaghan, Malkand, Sraghar, Sharan and Sakir. The general elevation of the district is 2000 to 3000 meters above sea level. The highest point is near Kan Mehtarzai, which is 3339 meters above sea level.

The Zhob valley is an immense stretch of alluvial plain extending from Kan Mehterzai pass up to Gomal river at the north-eastern boundary of Zhob district. Several small valleys run from either side of the great Zhob valley into the surrounding hills. A considerable part of the soil in these valleys consists of virgin land. Pasture lands are found almost everywhere in the district.

1.1.3 Rivers and Streams

The main drainage is carried off from west to east by the Zhob river and it tributaries. The main tributaries are Kundar, Wali, Murgha Toi, Kamchughai, Rod Faqirzai and Marzaghan beside numerous hill torrents.

1.1.4 Climate

The district falls in semi arid belt with a relatively low precipitation. The climate of the district is warm in summer and cold in winter. Winter generally lasts longer than the

summer. The winter season commences from mid October and lasts till April. Frost is common. Kan Mehterzai with an altitude of more than 3000 meters above sea level remains snow-clad during January and February. January is the coldest month with mean maximum and minimum temperatures of about 11°C and -3°C respectively. The summer season is not very hot. June is the hottest month with mean maximum and minimum temperatures of about 35°C and 16°C respectively. The average annual rainfall is about 261 milimeters.

There is no meteorological station in the district, therefore, the monthly 30 years mean temperature, precipitation and relative humidty recorded at nearby station of Quetta is given in the table 1.1:-

1.1.5 Flora

The major species of trees and plants found in the district include *lachi* (eucalyptus), *sufaida* (popular), *toot* (mulberry), *bakain*, *more pankhi*, Quetta pines and *suroo*.

1.1.6 Fauna

Wildlife includes ravine deer or chinkara and chikor. The species which have been declared endangered include pallas's cat, urial, Suleman markhor, houbara bustard and sandgrouse.

1.2 AGRICULTURE AND RELATED SECTORS

1.2.1 Agriculture

The usual cropping pattern of rabi and kharif crops is also found in Killa Saifullah district. Rabi crops are sown in winter and harvested in late winter or during early summer. Kharif crops are sown in summer and harvested in late summer or early winter. The major rabi crops of the district include wheat, barley and cumin. Kharif crops in Killa Saifullah district include potato, tobacco, maize, onion, melon, chilli, jowar and pulses including mash and moong. Vegetables and fodder are cultivated throughout the year. Acreage, production and yield of major crops grown in the district during the year 1997-98 is as under in table 1.2:-

1.2.2 Irrigation

Tube-wells constitute the major source of irrigation in the district, and almost half of the land is irrigated by tube wells. A small proportion of land is irrigated by water from open surface wells, and karezes. Springs also irrigate some land in the district while the remaining land is *khushkaba* or *sailaba* depending on rainfall. Karezes exist in Muslim Bagh area only.

Flood irrigation is another major source of irrigation. In flood irrigation, rain-water is collected by raising embankments in the fields. This provides enough moisture for cultivation of crops like wheat, jowar and barley.

The irrigation department has also constructed some delay action dams in the district. These dams are built with the objective of recharging ground water.

1.2.3 Horticulture

Horticulture is the leading sub-sector of the district. All the fruits are produced in Kharif season. Killa Saifullah is very famous for its apple orchards. Acreage, production and yield of major fruits grown in the district during 1997-98 is shown in the following table 1.3:-

1.2.4 Forestry

Exact data regarding total area under forest in Killa Saifullah district is not available. However, very little area has been declared as state forest. This situation can be improved by introducing more community based measures such as social forestry, etc.

1.2.5 Livestock

The raising of livestock is another important sector in the district. About one third of the total area of the district is classified as range land and therefore the situation is very conducive for livestock raising.

Communities that raise livestock have a semi-nomadic life style. They are on the move the year round, in search for new pastures as the existing one is exhausted and their wandering carries them to many parts of the province and even to Afghanistan. Some households who combine agriculture and livestock raising also migrate to other areas but only in winter season. Livestock population of Killa Saifullah district according to the Livestock Census, 1996 is as under in table 1.4:-

1.3 INDUSTRY AND TRADE

1.3.1 Industry

No major industry occurs in the district. Factors inhibiting the growth of industry and manufacturing among others include non-availability of skilled labour, and lack of training institutions.

1.3.2 Mining

At present some minerals, like chromite and magnesite are being mined in the district. Scattered deposits of soapstone, limestone, calcite, manganese and coal also found in the district.

1.3.3 Communication

Killa Saifullah, is connected by roads with other parts of the country. Both towns of the district i.e., Killa Saifullah and Muslim Bagh, are situated on the national highway and various forms of transport including buses, vans and pick-ups ply on these roads.

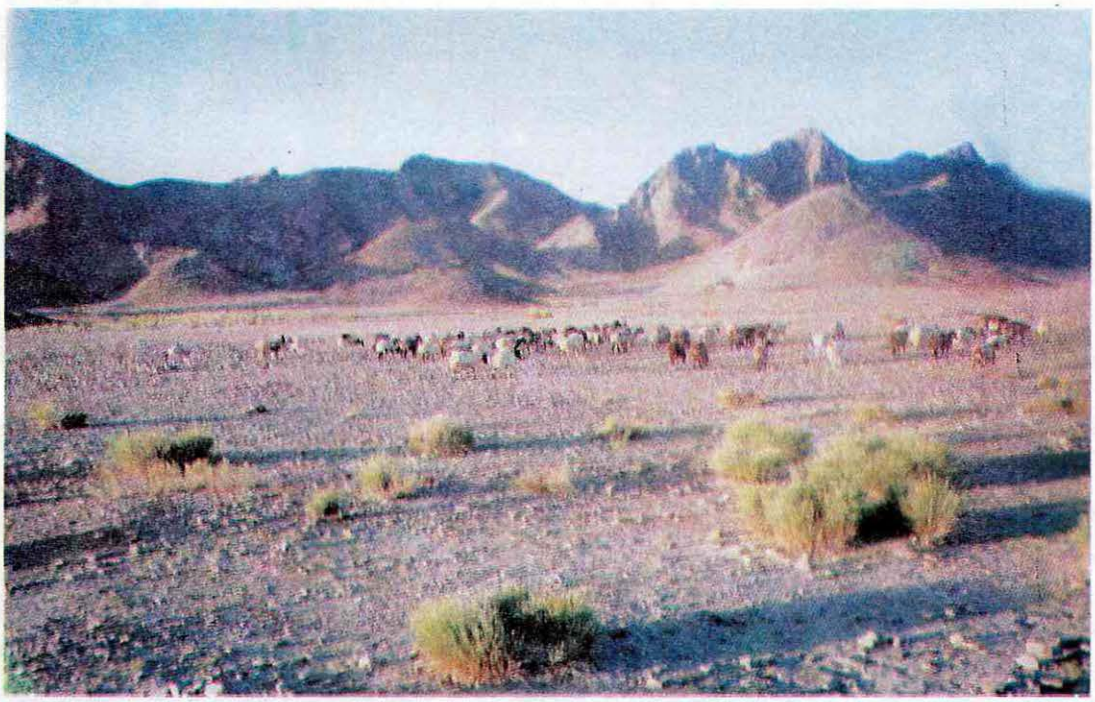
The total length of roads within the district is 405.5 kilometers only half of which (219.5 kilometers) are metalled (black top). The national highway which connects Quetta with Dera Ismail Khan has a 195 kilometers track through Killa Saifullah district. Again a 21 kilometers length of another national highway connecting Killa Saifullah with Dera Ghazi Khan via Loralai runs through the district. However, for the most part these roads are poorly maintained and their capacity to handle the required traffic load is severely restricted because of their narrow width. Further, within the district, road-links are almost absent. There are only dirt tracks connecting various settlements with Killa Saifullah town. This factor has served to considerably restrain the marketing potential of horticultural produce of the district, as large, quantities of fruits and vegetables which could have brought substantial profit to the growers are wasted, all because of inadequate transportation facilities.

The district does not have air linkage facility. However, Zhob airport is with-in easy reach of the residents of Killa Saifullah town.

A narrow gauge railway line (295 kilometers long) was built by the British colonial government between Bostan and Zhob in 1928, but Pakistan railways stopped the service on this section in June 1985, on the grounds that it was uneconomical. The railway line had the potential of serving as a tourist attraction, a role which narrow-gauge railways, the world over are now being made to perform, but this aspect was not given any consideration when the decision to abandon the service was taken. The consequences have been awesome. Large tracks of railway line has been stolen. All the way side installations have been cannibalized by the local residents who have carried away iron girders, beams, doors and window frames for their own use and thus a historic monument has been allowed to be ravaged and destroyed.

The district is out of the Pakistan television's transmission range. A low range television booster has been installed at Muslim Bagh but the signal is very weak and reception is poor. Most of the television owners watch satellite-received television programmes.

APPLE ORCHARDS, KILLA SAIFULLAH.



LIVESTOCK RAISING, KILLA SAIFULLAH.

There is no radio station in the district. The broadcast of the Radio Pakistan Quetta is received throughout the district made possible by the high power radio transmitter at Yaru near Pishin.

NWD system is available in Killa Saifullah and Muslim Bagh while a few local exchanges are operating in some villages and settlements.

There are two post offices in Killa Saifullah district, one at Killa Saifullah and the other at Muslim Bagh. Three branch offices are also working one each at Khilgai, Kalu Killa and Sharan Jogizai. Special mail services are not yet available in the district.

Two grid stations one each at Killa Saifullah and Muslim Bagh are functioning in the district, which are providing electricity to various parts of the district. Killa Saifullah, Allozai and Patozai feeders get electricity from Killa Saifullah grid while Muslim Bagh, Kan Mehterzai and Nasai feeders are connected to the Muslim Bagh grid.

Killa Saifullah does not have access to gas through pipelines, however, Liquefied Petroleum Gas (LPG) is available in cylinders.

1.3.4 Trade and Trade Centres

No large scale trading activity exists in the district, therefore there is no trading centre worth mentioning. Fruit and to a lesser extent vegetables are the only items being exported outside the district.

1.4 HISTORY, ETHNICITY/TRIBES AND CULTURE

1.4.1 History

Killa Saifullah, remains a tribal agency in social and administrative terms. It was part of Zhob upto 1988, therefore all the available historical references are in the context of the Zhob. The traditional importance of Zhob as being the cradle of the Afghan race should be seen as referring to the whole Zhob river valley inclusive of the present day Killa Saifullah. Both Nadir Shah (1736-47 AD) and Ahmed Shah Abdali(1747-73 AD) held suzerainty over parts of Balochistan including the Zhob river valley. The region remained more or less under the control of the Durranis and Barakzais until it was formally ceded to the British under the treaty of Gandmak.

In the middle of the 18th century Ahmed Shah granted a *Sanad* (certificate) to Bekar Nika, fourth in descent from Jogi, the head of the Jogizai family, conferring upon him the title and position of *Badshah* (ruler of Zhob)". This family continued to exercise authority over the Kakars until the arrival of the British.

After the outbreak of the Afghan war in 1878, Zhob became a focus of the British attention when the Kakars of Zhob under the command of various *Sardars* – the most important being Shah Jahan, Shahbaz Khan, Dost Muhammad and Bangul Khan – resisted the British authority and tried to disrupt their lines of communication. In October 1884, an expedition was sent into Zhob area to seek submission of the local tribes. After a number of encounters with the Kakars of Zhob the British occupied the territory and Zhob was declared a Political Agency in 1890. Captain Mac Iver was appointed as the first Political Agent to Zhob. However, tribesmen of Zhob always posed difficulties for the British government. In 1924, the British Political Agent at Zhob was murdered by tribesmen and during World Wars I and II British military posts in the area were under continuous threat of attacks from the tribesmen.

The entire Killa Saifullah district remained part of Zhob district as Upper Zhob sub-division up to 14th December 1988. Badinai, sub-tehsil of Killa Saifullah district, which was previously included in Kakar Khurasan sub-division of Zhob with the name Kashatoo was transferred to Killa Saifullah district.

1.4.2 Ethnicity and Tribes

Most of the population residing in the district is Pushtoon, the majority of which belongs to the Kakar tribe. Kakars living in Killa Saifullah district are divided into two major sub-tribes. Sanzarkhels and Sanatia. The major branches of Sanzarkhel Kakars in the district include Jogizai, Rahatzai, Sargarhi, Mehterzai, Jalalzai, Musazai, Malaizai, Mardanzai, Akhtarzai, Faqirzai and Allozai, While the major branches of Sanatia Kakars include Sultanzai, Mullazai and Bakalzai.

1.4.3 Food

Majority of the people take two meals daily, one in the morning and other at sunset. Only well-to-do families have a third meal (break fast) early in the morning. Meal is made up of wheat, cooked pulses or vegetables, milk and butter milk (*Lassi*). Eating of "*Landi*" is common during the winter.

1.4.4 Dress and Ornaments

The common dress of the people is "*Shalwar* and *Qamiz*" with turbans tied over the head. The women wear a wrapper and a long shirt reaching to the knees. Women of middle and upper classes wear ornaments made of gold.

1.4.5 Dwellings

The majority of the houses in the district are built with mud. In some cases stone-pitched walls and enclosures are used. Thatched roofs made out of dried shrubs and bushes are common. These are plastered with mud and supported beneath by wooden beams honed out of the trunks of Shinay tree. The tribal chiefs however live in fort-like *pacca* houses in the midst of orchard and cultivated lands. Some businessmen based in towns also live in *pacca* house. However RCC constructions is gaining momentum and most government buildings and some privately constructed accommodations are made out of concrete.

1.4.6 Occupations

Agriculture and horticulture-based trading are the major occupations. Flock owning is second in importance.

1.4.7 Culture, Customs and Traditions

The society in Killa Saifullah district is primarily tribal, based upon a system of kinship. The *Nawabs* and *Sardars* were highly powerful and influential at one time. Over the years their influence has substantially decreased. The *Sardar* families, specially the Jogizais, still command a good deal of influence and respect, which derives partly from their relative economic prosperity.

Traditions continue to have a great hold on the populace of Killa Saifullah. Examples which can readily be cited are revenge-killings which transcends generations, the wide-spread practice of carrying arms and the usage and practice of *Vulver* or bride money. However, in keeping with their tradition the people are very hospitable.

Joint and extended families are common in the district. Male siblings reside under the same roof even after their marriage. However, a few nuclear families are found in the towns of Killa Saifullah and Muslim Bagh.

Generally marriages are arranged. Parents are fully authorized to select spouses, both for men and women. *Vulvar* is commonly paid to the brides family. The amount of

Vulvar varies and is decided by the both parties, keeping in view the family background of the bride and her physical attraction. Sometimes marriages are arranged to mediate a feud in which a girl belonging to the aggressor's family is wedded to a victim's family-member.

After the terms of the forth coming union have been decided by both the parties, details including the amount of *Vulvar* and dates of the wedding are finalized, which is followed by *dua-e-khair* (a prayer for auspicious consummation of marriage rites) generally offered by a *Mullah*. *Ukkare* (formal engagement) is performed a few days before the wedding. All expenses for entertainment of the guests at the wedding are afforded by the groom's family. Soon after the marriage, the groom arranges *valima* (marriage feast).

A high degree of social co-operation exists among the people of the district, a phenomena observable throughout Balochistan. This cooperation manifests it self in such activities as the maintenance of karezes, sowing of crops and reaping/harvesting. It can also be witnessed on such occasions as the death of person when the community shares the financial burden of the bereaved family by contributing either in kind or cash.

Muslims constitute the majority of the population in Killa Saifullah district and belong to the Sunni sect of Islam.

Conflict resolution still takes the form of a *jirga* which is generally made up of *Nawabs* or tribal chiefs or through arbitration where both parties to the conflict agree on a common arbitrator. The arbitrator than has separate sittings with both the parties and sometimes after resorting to advice from the elderly and respectable members of the society gives a decision which is binding on both the parties. However, in some cases a party may feel aggrieved and may approach the court of law.

The prevalence of tribal norms ensure that in relative terms the law and order situation although not optimal is fairly normal. However, because the district has a long unmanned border with Afghanistan, there is a large scale proliferation of arms and ammunition which could be partly responsible for such crimes as murder and robbery especially in the far-flung/border areas.

1.5 ADMINISTRATIVE SET UP

1.5.1 District Administration

The district is controlled by the Political Agent who is assisted by the Assistant Political Agent, Tehsildars and Naib Tehsildars. The Political Agent is overall coordinator of various government departments and also collects revenue on behalf of government. From

the administrative point of view the district is divided into the following sub-divisions tehsils and sub-tehsils.

1.5.2 Police Department

Killa Saifullah is divided into two areas as far as law enforcement is concerned. Area "A" is controlled by the Balochistan police headed by a Deputy Superintendent of Police (DSP) while "B" area is controlled by the Balochistan levies force headed by the Political Agent (PA), Killa Saifullah. There are two police stations; at Killa Saifullah and Muslim Bagh. However, the area controlled by the police is only nominal and the major portion of the district is controlled by the levies force.

A contingent of Zhob Militia is also deployed at Muslim Bagh for policing the international border with Afghanistan.

1.5.3 Judicial System

Justice is administered through regular as well as Qazi courts. Regular courts provide justice under the civil and criminal laws of the state. Previously the Political Agent and the Sub-Division Magistrates had judicial powers but now administration and judiciary have been separated. Qazi courts were established under the provisions of the Civil Disputes (Shariat Application) Regulation of 1976 to provide justice to private parties under the provisions of Shariat laws. Appeal against decisions of Qazi courts can be made before a *Majlis-e-Shoora* which comprises two Qazis under the chairmanship of District and Session Judge. Both types of courts work in complete harmony.

The *jirga* system through officially revoked by the Balochistan High Court is still frequently resorted to for the resolution of many long-standing tribal disputes.

1.5.4 Revenue System

Killa Saifullah is a Political Agency, hence, many of the taxes – like motor-vehicle tax, arms license fee, etc. are not levied. However, some local taxes are levied by the local councils.

Collection of revenue is done by the relevant federal, provincial and local government agencies.

The un-employment rate (39.05 percent) as percentage of un-employed labour force(i.e looking for work and laid off) to the total labour force reflects a high degree of un-employment in the district which is much higher for male i.e 39.94 percent compared to female of zero percent. The un-employment rate in the rural areas is significantly higher at 43.66 percent as compared to 8.25 percent in urban areas.

2.5.3 Employed Population by Occupation

Among the employed class in the district the highest percentage 52.71 belongs to Major Occupation Group-6 "skilled agricultural and fishery workers", followed by Group-9 "elementary occupations" and Group-5 "services workers and shop and market sales workers" comprising 27.86 and 6.29 percent respectively. The next higher is Group-2 "professionals" sharing 5.64 percent. The rest 7.50 percent of the employed popualtion are engaged in the remaining occupational groups.

The question was asked from population of 18 years age and above. According to the responses to the question it was found that 42.45 percent of the population aged 18 years and above have obtained National Identity Card. It was 54.81 percent for male and 29.78 percent for female. Table 2.12 gives the necessary detail by sex and area.
